**How to Overcome Premature Ejaculation** Helen Singer Kaplan 2013-06-17 How to Overcome Premature Ejaculation discusses male sexual response and the cause of its disorders, and provides advice on leading a more normal sex life. Based on the same therapeutic methods that have proven clinically effective for 90% of men suffering from premature ejaculation (PE), this straightforward volume describes a rapid, practical self-help program that can be used by single men or couples in the privacy of their home. Dr Kaplan first explains the nature of PE and its causes and then describes her effective treatment techniques. She also discusses the errors and resistances that can arise and provides suggestions on how to overcome them.

**Reclaiming Desire** Andrew Goldstein, M.D. 2009-06-09 A holistic approach to the problem of low libido in women explains how a variety of physical, emotional, spiritual, and intellectual factors, as well as such events as pregnancy, marriage, childbirth, menopause, and divorce, can affect a woman's sex drive and offers a variety of medical and psychological treatment options to help women reinvigorate their intimate relationships. 35,000 first printing.

The Cultural Construction of Sexuality Patricia Caplan 1987 Illustrates the argument that sexuality is not a 'thing in itself' but a concept that can only be understood with reference to economic, political and social factors.

**Women's Conflicts About Eating and Sexuality** Ellen Cole 2014-06-03 Women's Conflicts About Eating and Sexuality explores the strong relationships food and sex have represented to women over the years. No other book has spelled out so clearly

the parallels between sex and eating nor integrated the relationship of these to women's basic need to be loved. Today's dilemma for women--be fat or go hungry--and the endless variations and unsatisfying solutions to this problem have contributed to the incidence of anorexia, bulimia, and obesity. The pursuit of slimness, the obsession with having the perfect body, excessive aerobicizing, and diet books ad nauseam are all part of this phenomenon. Authors in *Women's Conflicts About Eating and Sexuality* skillfully discuss the parallel between women's obsession with sex and romance in the fifties and their obsession with food today. An important book for all women, it sheds light on the complex issues facing women and devotes special attention to the career woman and the additional pressures to be slim and stay slim. The woman who reads this potentially life-changing book can examine, question, and change her behavior, using the specific step-by-step program aid included in the book. This book is for every woman who has ever worried about being too fat or too sexual. *Women's Conflicts About Eating and Sexuality* will appeal to women of all ages--young women and their mothers will be fascinated by the parallels between sexual obsessions of thirty years ago and the eating obsessions of today. This healing book will particularly attract single career women for whom sex and relationships are fraught with complications. Counselors and therapists will find this book an excellent resource in their work with helping women. It is also a good auxiliary text for courses in Women's Studies focusing on psychology and history of women and the sociology of women and eating disorders.

**Ace** Angela Chen 2020-09-15 An engaging exploration of what it means to be asexual in a world that's obsessed with sexual attraction, and what the ace perspective can teach all of us about desire and identity. What exactly is sexual attraction and what is it like to go through life not experiencing it? What does asexuality reveal about gender roles, about romance and consent, and the

pressures of society? This accessible examination of asexuality shows that the issues that aces face—confusion around sexual activity, the intersection of sexuality and identity, navigating different needs in relationships—are the same conflicts that nearly all of us will experience. Through a blend of reporting, cultural criticism, and memoir, Ace addresses the misconceptions around the “A” of LGBTQIA and invites everyone to rethink pleasure and intimacy. Journalist Angela Chen creates her path to understanding her own asexuality with the perspectives of a diverse group of asexual people. Vulnerable and honest, these stories include a woman who had blood tests done because she was convinced that “not wanting sex” was a sign of serious illness, and a man who grew up in a religious household and did everything “right,” only to realize after marriage that his experience of sexuality had never been the same as that of others. Disabled aces, aces of color, gender-nonconforming aces, and aces who both do and don’t want romantic relationships all share their experiences navigating a society in which a lack of sexual attraction is considered abnormal. Chen’s careful cultural analysis explores how societal norms limit understanding of sex and relationships and celebrates the breadth of sexuality and queerness.

God-given Foods Eating Plan: for Lifelong Health, Optimization of Hormones, Improved Athletic Performance Gary F. Zeolla

2007-03-01 This book studies different food groups, with a chapter devoted to each major classification of foods. First the Biblical evidence is considered, then modern-day scientific research. Foods are classified as God-given foods and non-God-given foods. A healthy eating plan is composed of a variety of God-given foods and avoids non-God-given foods. Unlike other books on this subject, this book does not promote a vegetarian diet since God gave us meat for food, and meat-eating is assumed throughout Scripture, with no negative connotations. Moreover, meat, poultry, and fish can and should be included in a healthy

eating plan. The proposed eating plan is also designed to optimize hormones, such as testosterone, growth hormone, and insulin. This can produce dramatic differences in a person's health and well-being and can lead to a gain in muscle mass and a loss of body fat. It can also lead to improved athletic performance. This book also looks at other aspects of athletic nutrition.

Sexual Nature/Sexual Culture Paul R. Abramson 1995-07 In this multidisciplinary study of human sexuality, an international team of scholars looks at the influences of nature and nurture, biology and culture, and sex and gender in the sexual experiences of humans and other primates. Using as its center the idea that sexual pleasure is the primary motivational force behind human sexuality and that reproduction is simply a byproduct of the pleurability of sex, this book examines sexuality at the individual, societal, and cultural levels. Beginning with a look at the evolution of sexuality in humans and other primates, the essays in the first section examine the sexual ingenuity of primates, the dominant theories of sexual behavior, the differences in male and female sexual interest and behavior, and the role of physical attractiveness in mate selection. The focus then shifts to biological approaches to sexuality, especially the genetic and hormonal origins of sexual orientation, gender, and pleasure. The essays go on to look at the role of pleasure in different cultures. Included are essays on love among the tribespeople of the Brazilian rain forest and the regulation of adolescent sexuality in India. Finally, several contributors look at the methodological issues in the study of human sexuality, paying particular attention to the problems with research that relies on people's memories of their sexual experiences. The contributors are Angela Pattatucci, Dean Hamer, David Greenberg, Frans de Waal, Mary McDonald Pavelka, Kim Wallen, Donald Symons, Heino Meyer-Bahlburg, Jean D. Wilson, Donald Tuzin, Lawrence Cohen, Thomas Gregor, Lenore Manderson, Robert C. Bailey, Alice Schlegel, Edward H. Kaplan, Richard Berk, Paul R.

Abramson, Paul Okami, and Stephen D. Pinkerton. Spanning the chasm of the nature versus nurture debate, *Sexual Nature/Sexual Culture* is a look at human sexuality as a complex interaction of genetic potentials and cultural influences. This book will be of interest to a wide range of readers—from scholars and students in psychology, anthropology, sociology, and history to clinicians, researchers, and others seeking to understand the many dimensions of sexuality. "If we ever expect to solve the sexually based problems that modern societies face, we must encourage investigations of human sexual behavior. Moreover, those investigations should employ a broad range of disciplines—looking at sex from all angles, which is precisely what *Sexual Nature, Sexual Culture* does."—Mike May, American Scientist "...This timely and relevant book reminds us that we cannot rely on simple solutions to complex problems. It represents a transdisciplinary approach integrating knowledge from diverse fields and provides the reader with a challenging and rewarding experience. Especially for those who are involved in teaching human sexuality to medical students and other health care professionals, this book is highly recommended."—Gerald Wiviorrtt, M.D., *Journal of Nervous and Mental Disease* "In short, this volume contains much to stimulate, inform, and amuse, in varying proportions. What more can one ask?"—Pierre L. van den Berghe, *Journal of the History of Sexuality* "...the book succeeds in bring together some of the sharpest thinkers in the field of human sexuality, and goes a long way toward clarifying the diverse perspectives that currently exist."—David M. Buss and Todd K. Shackelford, *Quarterly Review of Biology*

**At the Edge of the Abyss** David Koker 2012-03-29 Finalist for 2012 National Jewish Book Award in the Holocaust category During his time in the Vught concentration camp, the 21-year-old David recorded on an almost daily basis his observations, thoughts, and feelings. He mercilessly probed the abyss that opened around him and, at times, within himself. David's diary

**Learning to Change Lives** A. Ka Tat Tsang 2013-03-13 The Strategies and Skills Learning and Development (SSLD) system is an action-oriented model for enabling clients in social work, health, mental health, and human services settings to address their needs and life goals. In *Learning to Change Lives*, author A. Ka Tat Tsang introduces SSLD's powerful framework and practice, which has been developed based on three decades of experience in psychotherapy, counselling, education, training, consultation, and community service. *Learning to Change Lives* provides detailed, step-by-step guidelines for SSLD intervention - starting with engagement with the client, assessment, translating problems into intervention plans, systematic learning and development of appropriate strategies and skills. Key practice procedures are described clearly and illustrated by case examples, specific instructions, and sample worksheets. Aimed at clinical practitioners, mental health professionals, social workers, and other human service professionals, this book can be used as a manual by practitioners and as a textbook for courses and training programs.

*Consumption and the World of Goods* John Brewer 2013-06-17 The study of past society in terms of what it consumes rather than what it produces is - relatively speaking - a new development. The focus on consumption changes the whole emphasis and structure of historical enquiry. While human beings usually work within a single trade or industry as producers, as, say, farmers or industrial workers, as consumers they are active in many different markets or networks. And while history written from a production viewpoint has, by chance or design, largely been centred on the work of men, consumption history helps to restore

women o the mainstream. The history of consumption demands a wide range of skills. It calls upon the methods and techniques of many other disciplines, including archaeology, sociology, social and economic history, anthropology and art criticism. But it is not simply a melting-pot of techniques and skills, brought to bear on a past epoch. Its objectives amount to a new description of a past culture in its totality, as perceived through its patterns of consumption in goods and services. Consumption and the World of Goods is the first of three volumes to examine history from this perspective, and is a unique collaboration between twenty-six leading subject specialists from Europe and North America. The outcome is a new interpretation of the seventeenth and eighteenth centuries, one that shapes a new historical landscape based on the consumption of goods and services.

**Super Woman Rx** Tasneem Bhatia 2017-09-12 Find your Power Type to discover your personalized plan for weight loss, energy, and lasting health. No more one-size-fits-all diets! Modern womanhood often means juggling multiple roles—businesswoman, mother, spouse, homemaker, and more—all while being expected to look perfectly composed. In other words, it means being superhuman. The truth is, it can seem impossible to maintain physical health while navigating our busy lives. We're overwhelmed and exhausted, which can often translate into unhealthy eating habits, lack of exercise, and no time for self-care. But diet and fitness plans are usually one-size-fits-all, and those universal programs just don't work for every body and every personality. Integrative health and wellness expert Tasneem Bhatia, MD, known to her patients as Dr. Taz, has a plan that is anything but cookie-cutter. Her mission is to help women achieve optimum health, and now she can help you with her personalized plans in Super Woman Rx. In Super Woman Rx, Dr. Taz sets out to treat "super woman syndrome" by offering five prescriptive plans based on a woman's unique blueprint, or Power Type, whether you're a Boss Lady, a Savvy Chick, an Earth

**Sex, Sexuality, Law, and (In)justice** Henry F. Fradella 2016-02-26 Sex, Sexuality, Law, and (In)Justice covers a wide range of legal issues associated with sexuality, gender, reproduction, and identity. These are critical and sensitive issues.

that law enforcement and other criminal justice professionals need to understand. The book synthesizes the literature across a wide breadth of perspectives, exposing students to law, psychology, criminal justice, sociology, philosophy, history, and, where relevant, biology, to critically examine the social control of sex, gender, and sexuality across history. Specific federal and state case law and statutes are integrated throughout the book, but the text moves beyond the intersection between law and sexuality to focus just as much on social science as it does on law. This book will be useful in teaching courses in a range of disciplines—especially criminology and criminal justice, history, political science, sociology, women and gender studies, and law.

*Penile Disorders* Hartmut Porst 2012-12-06 This book contains a compilation of papers based on presentations made at the International Symposium on Penile Disorders held in Hamburg, Germany, 26-27 January 1996, under the Chairmanship of Hartmut Porst. This was a unique conference in that it comprehensively addressed various disorders that affect the organ situated at the "center of the male", the penis. As an important beginning, the sociocultural aspects of the erect phallus were presented by G. Wagner from Copenhagen. The anatomy of the penis and the physiological conditions of erection were then discussed by K. -P. J Unemann from Mannheim, Germany. Previous conferences on the penis had concentrated only on specific areas of disease such as impotence. However, it became readily apparent that at this conference something new for almost every aspect of disease would be discussed, including congenital disorders such as hypospadias and epispadias, sexually transmitted and noninfectious dermatological diseases, and congenital and acquired penile curvatures and penile fractures. An excellent presentation of managing penile cancer by stage related therapeutic decision was presented by S. C. Müller from Bonn, Germany. There is no better person to present a discussion of Peyronie' s disease in 1996 from a historical and management

**Soft Shepherd or Almighty Pastor?** Annemie Dillen 2014-10-24

In *Soft Shepherd or Almighty Pastor?* contributors seek to go beyond the taboo on "power" within pastoral contexts. They not only discuss fundamental theological and philosophical questions about power but also develop ways to prevent power abuse in pastoral context. Power is considered as omnipresent and is analyzed in its positive and negative aspects. Not only the classical associations of "power over" or "domination" are discussed in relation to ecclesial and pastoral situations, but also forms of power linked to "service" and "care." A sacrificial spirituality might also be dangerous. *Soft Shepherd or Almighty Pastor?* gathers ten contributions, all of which reflect on the complexity of power issues, also in relation to sexual abuse. The authors argue that dealing adequately with power requires renewed forms of theological thinking, especially about ministry.

*Psychiatry as Medicine* A. Fried 2012-12-06  
**PREFACE** This volume is a sequel to yet independent of our *Paranoia: A Study in Diagnosis*, Reidel, Dordrecht and Boston, 1976. Whereas our first book centered on diagnosis, this centers on treatment. In our first volume, all discussions of nosology (theory of illness) and of treatment was ancillary to our discussion of diagnosis; similarly all discussion of this volume dealing with nosology - there is very little on diagnosis here - is ancillary to our discussion of psychotherapy. It is still our profoundest conviction that to speak of treatment without diagnosis is meaningless, if not irresponsible, since otherwise one does not know what one is talking about. Hence, our present study, though it centers on theories of treatment, links psychotherapy with psychopathology. It is the rationale of psychotherapy which is of importance, and the rationale dwells in this link. We wish our present study to be

self-contained and understood by readers who are not familiar with our first book - or with any specific literature. Our discussion of medicine in general, meaning the rationale of therapy in general, helps the uninitiated reader, as well as the initiated, we hope: it certainly has helped us. We did not see how else can we study a branch of medicine; we felt the need for some idea of how medicine is supposed to work.

**Summary of Man's Search for Meaning** Alexander Cooper 2021-10-16 Man's Search for Meaning - A Comprehensive Summary Man's Search for Meaning is not an account of facts and events, but a story of personal experience of life in a concentration camp. There are countless stories about the horrors of camp life, but this book is about the how everyday life in a concentration camp affected the mind of the average prisoner. It therefore isn't a book about the heroes or martyrs of the camp, nor is it about the Capos—prisoners who acted on behalf of their captors and often against other prisoners. Capos often fared better in camp than they had in their previous lives and many treated the other prisoners more brutally than some of the SS men. The day-to-day life of a prisoner was a violent struggle for survival physically, emotionally, and morally. For example, when transport units arrived in camp, everyone understood they would take the sick and feeble prisoners away to be executed or worked to death. Prisoners did everything in their power to ensure that they were not on the list, even though they knew that avoiding the list meant a different prisoner had to take their place. The authorities were unconcerned about which men actually went to die because the prisoners were all the same to

“compassionate, authoritative, and wise” (Mark Hyman, MD, New York Times bestselling author of The Pegan Diet) 30-day program that “will shift the way you think about your body and your health” (Gabrielle Bernstein, #1 New York Times bestselling author and international speaker) based on a paradigm-shifting idea: You have to change your body to change your mind and mood. Prescription for Happiness offers a 30-day program for reaching a new level of energy, clarity, and calm. Too often, conventional medicine treats the mind as separate from the body. However, science shows that physical issues, such as chronic illness and weight fluctuation, are oftentimes intricately entwined with mental health conditions like depression, anxiety, fatigue, and more. This must-read book explores the new science of optimizing the body in ways that will help anyone attain a new baseline for energy, calm, and optimism. Dr. Berzin draws on

This builds on her work at her nationally renowned holistic health service Parsley Health, where Dr. Berzin and her team of over 100 highly trained medical providers focus on treating the whole patient, yielding extraordinary results for those dealing with gastrointestinal, hormone-related, autoimmune, and mental health conditions. Leveraging Parsley's unique patient data and successful proprietary protocols, Perscription for Happiness is the ultimate gateway to creating your new baseline for peak physical and mental health.

*The Politics of Uncertainty* Peter Marris 2003-09-02 In *The Politics of Uncertainty* Peter Marris examines one of the most crucial and least studied aspects of social relationships: how we manage uncertainty, from the child's struggle for secure attachment to the competitive strategies of multinational corporations. Using a powerful synthesis of social and psychological theory, he shows how strategies of competition interact with the individual's sense of personal agency to place the heaviest burden of uncertainty on those with the fewest social and economic resources. He argues that these strategies maximize uncertainty for everyone by undermining the reciprocity essential to successful economic and social relationships. At a time when global economic reorganisation is undermining security of employment, *The Politics of Uncertainty* makes a convincing case for strategies of co-operation at both personal and political levels to ensure our economic and social survival in the twenty-first century.

*Communities in Action* National Academies of Sciences, Engineering, and Medicine 2017-04-27 In the United States, some populations suffer from far greater disparities in health than others. Those disparities are caused not only by fundamental differences in health status across segments of the population,

Downloaded from  
[legacy.opendemocracy.net](http://legacy.opendemocracy.net)  
on 2023-08-08 by guest

but also because of inequities in factors that impact health status, so-called determinants of health. Only part of an individual's health status depends on his or her behavior and choice; community-wide problems like poverty, unemployment, poor education, inadequate housing, poor public transportation, interpersonal violence, and decaying neighborhoods also contribute to health inequities, as well as the historic and ongoing interplay of structures, policies, and norms that shape lives. When these factors are not optimal in a community, it does not mean they are intractable: such inequities can be mitigated by social policies that can shape health in powerful ways. Communities in Action: Pathways to Health Equity seeks to delineate the causes of and the solutions to health inequities in the United States. This report focuses on what communities can do to promote health equity, what actions are needed by the many and varied stakeholders that are part of communities or support them, as well as the root causes and structural barriers that need to be overcome.

*Psychology and the Soul* Otto Rank 1998 In his last years, Otto Rank turned his lifetime of thought and learning toward two of the most difficult topics in human history: religion and the soul. The result was this now-classic work, available in this new, very accessible English translation. Unlike many other intellectuals of the twentieth century, Rank maintains a place for the soul rather than dismissing it as a fantasy. The soul and the beliefs about it, he argues, set forth the foundation for psychology, with its complex analyses of consciousness, self-consciousness, and personality. Rank's commentary is not limited to beliefs about individual souls but includes ideas about group souls, sometimes

encompassing nations or generations. Rank suggests that it is in expression of group beliefs that the idea of the soul attains its greatest power.

**Sita's Daughters** Leigh Minturn 1993 *Sita's Daughters* vividly recounts the dramatic changes in role and status experienced by Rajput caste women in the Indian village Khalapur between 1955 and 1975. In the 20 years between her now-classic original field study and her follow-up with the same families, Leigh Minturn witnessed a significant decline in the women's observance of a complex system of customs collectively called purdah, which includes the wearing of veils, silence in the presence of senior men and women, the adoption of subservient postures when speaking to men, and the separation of husbands and wives. Her interviews with mothers- and daughters-in-law reveal how changes in purdah customs and religious traditions have allowed them increased access to education and health facilities, control of finances, and autonomy inside and mobility outside of their husbands' households. This work is unprecedented in its depth, scope, and exposition of the intimate details of the lives of Indian women. Minturn's return to her original subjects allowed her to observe firsthand the changes that had transpired during the interim, resulting in the only Indian village field study to span two generations. Having won the trust and confidence of her subjects, the author poignantly conveys their individuality, along with their stories of heroism, loyalty, infidelity, rape, incest, theft, and even murder. With even-handedness and detailed scholarship, Minturn makes use of methods such as systematic sampling and structured interviewing that are effective in capturing the richness of Indian village life, though they are uncommon in anthropological studies. The wide range of issues addressed here will be of interest to students and researchers in women's studies, South Asian studies, anthropology, and cross-cultural psychology, as well as to interested laypersons.

Samantha van Schalkwyk 2018-10-06 This book explores the textures of women's narratives of patriarchal oppression of female sexuality. Postcolonial feminist scholars in Africa highlight the importance of moving beyond Westernised lenses of 'African' women's powerlessness, towards a focus on women's culturally-specific sexual agency. However, few studies explore women's psychological experiences of sexual oppression/agency in real depth. *Narrative Landscapes of Female Sexuality in Africa* traces the narratives of heterosexual migrant women from Zimbabwe, Kenya and Congo. The book offers insight into women's experiences 'back home,' travelling through border posts in Africa, and life in current post-apartheid South Africa. Through a unique collectively-based methodology and a feminist poststructuralist lens, the author examines narrative strategies used by the women to manage and psychologically resist harmful discourses surrounding female sexuality and women's bodies. The book offers rich exploration of the intersections of gender and sexuality, class, race and citizenship situating the narratives within the wider context of poverty and migration in sub-Saharan Africa. These vectors of oppression are illuminated throughout the text via integrated threads of the researcher's positionality in relation to the women narrators.
