Handbook of Social Psychology John DeLamater 2013-08-13 This handbook provides a broad overview of the field of social psychology and up-to-date coverage of current social psychological topics. It reflects the recent and substantial development of the field, both with regard to theory and empirical research. It starts out by covering major theoretical perspectives, including the interactionist, identity, social exchange, social structure and the person perspectives. Next, it discusses development and socialization in childhood, adolescence and adulthood. In addition to updated discussions of topics that were included in the first edition, the part examining personal processes includes entirely new topics, such as social psychology and the body and individual agency and social motivation. Interpersonal processes are discussed from a contemporary perspective with a focus on stress and health. The final section examines the person in sociocultural context and includes another topic new to the second edition, the social psychology of race and gender and intersectionality.

Adolescent Romantic Relationships as Precursors of Healthy Adult Marriages Benjamin R. Karney 2007 Policymakers are interested in promoting healthy marriages in adulthood by providing services to strengthen the adolescent precursors of healthy marriage, especially within low-income populations. But if programs and curricula targeting adolescent romantic relationships are to be effective, they must be grounded in an accurate understanding of how adolescent relationships function and the role that they play in the development of healthy adult marriages. This report evaluates the current landscape of theory, research, and interventions addressing the role of adolescent romantic relationships in the development of healthy adult marriages. Drawing on a thorough review of the existing theoretical and empirical literature in this area, as well as interviews with practitioners directly involved with developing or administering relationship education to adolescents, the authors bring together relevant research and theory from a wide range of disciplines that have examined these issues, and suggest future directions for research and intervention. In particular, they note that although research describing romantic relationships in low-income populations is sparse, there are already-existing nationally representative data sets that include data from substantial numbers of well-sampled low-income adolescents. Analyses of these data would have relatively low cost and a potentially high yield for informing policies that target low-income youth.
