

Sex Health Screening

Sexually Transmitted Infections - National Academies of Sciences, Engineering, and Medicine
2021-12-24

One in five people in the United States had a sexually transmitted infection (STI) on any given day in 2018, totaling nearly 68 million estimated infections. STIs are often asymptomatic (especially in women) and are therefore often undiagnosed and unreported. Untreated STIs can have severe health consequences, including chronic pelvic pain, infertility, miscarriage or newborn death, and increased risk of HIV infection, genital and oral cancers, neurological and rheumatological effects. In light of this, the Centers for Disease Control and Prevention, through the National Association of County and City Health Officials,

commissioned the National Academies of Sciences, Engineering, and Medicine to convene a committee to examine the prevention and control of sexually transmitted infections in the United States and provide recommendations for action. In 1997, the Institute of Medicine released a report, *The Hidden Epidemic: Confronting Sexually Transmitted Diseases*. Although significant scientific advances have been made since that time, many of the problems and barriers described in that report persist today; STIs remain an underfunded and comparatively neglected field of public health practice and research. The committee reviewed the current state of STIs in the United States, and the resulting report, *Sexually Transmitted Infections: Advancing a Sexual Health*

Paradigm, provides advice on future public health programs, policy, and research.

The Sexual Health of Men -

Laura Serrant-Green

2018-04-19

This challenging critique explores the current constraints and opportunities for addressing and promoting the sexual health of men. It redresses the balance between society's traditional views and expectations of men's sexual health, compared to the sexual health of women. The wide-ranging approach critically considers all aspects of sexual health, including historic developments, social considerations, personal issues and political climates.

Authoritative and evidence-based, "The Sexual Health of Men" brings together experts from the fields of sexual health research, education and practice. It is highly recommended for health and social care professionals, including nurses, doctors, social workers, health advisers and sexual health service providers. Health researchers,

and policy makers and shapers will find the research of great interest, as will all those concerned about the sexual health and well-being in men.

Canadian Guidelines on Sexually Transmitted Infections - 2019

Improving Sexual Health Advice - Gill Wakley 2003

This practical guide for busy health and social care professionals outlines essential tasks and services for organisations and individual staff, in relation to the implementation plan of the NHS Sexual Health Strategy. It covers the necessary training needs of staff, offering tips and advice that can be integrated into the NHS work setting, providing clear guidance on what practitioners, practices and primary care organisations need to do to implement the strategy. This book will be invaluable for all those who have to give informed advice on sexual health in determining their training and learning needs and for delivering high quality sexual health services

within their working environment.

The Psychology of Sexual Health - Dr. David Miller
2008-04-15

There have been rapid developments in the psychological management of sexually transmitted diseases, particularly HIV and AIDS. However, a significant proportion of those attending genitourinary clinics do not have a disease or infection, but rather are seeking help with sexual health issues relating to behaviour, prior sexual experiences and relationships. Hence as clinics become more and more generalist there is a need to focus on behavioural aspects of disease. This is the first text to draw together the knowledge base and expertise of clinicians and researchers from all disciplines in the psychological management of sexual health. It presents advances in theory and practice in a practical way that will be accessible for all disciplines.

Key Topics in Sexual Health
- Stephen Baguley 2005-11-12

This impeccably researched text provides the reader with a comprehensive overview of sexual health, exploring a range of topics such as: sexually transmitted infections contraception urological conditions genital dermatoses sexual dysfunction novel therapeutic options. With a clear, symptom-based format, this is an ideal quick reference guide for the consulting room and the ward.

Disease Control Priorities, Third Edition (Volume 6) -

King K. Holmes 2017-11-06
Infectious diseases are the leading cause of death globally, particularly among children and young adults. The spread of new pathogens and the threat of antimicrobial resistance pose particular challenges in combating these diseases. Major Infectious Diseases identifies feasible, cost-effective packages of interventions and strategies across delivery platforms to prevent and treat HIV/AIDS, other sexually transmitted infections, tuberculosis, malaria, adult febrile illness,

Downloaded from
legacy.opendemocracy.net
on 2019-01-22 by guest

viral hepatitis, and neglected tropical diseases. The volume emphasizes the need to effectively address emerging antimicrobial resistance, strengthen health systems, and increase access to care. The attainable goals are to reduce incidence, develop innovative approaches, and optimize existing tools in resource-constrained settings.

Sexual Health - Meredith Temple-Smith 2014-12-01

Sexual health is now seen as multi-dimensional, a product of complex interplay between biological, psychological, and socio-cultural factors. This book brings together 34 expert Australian practitioners and researchers to provide a comprehensive, authoritative, up-to-date, and stimulating perspective on sexual health. In numerous and significant ways the book differs from its predecessor-volume, published in 2005. Chapters are now grouped in to five parts: § Sexual health in Australia; § Foundations for sexual health; § Sexual health in clinical practice; § Sexual health in

specific populations; and § Prevention and promotion. All original chapters have been thoroughly reviewed and updated. Six new chapters are included, on: § Sexual health in society; § Contraception, and options for unintended pregnancy; § The legal environment of sexual healthcare practice; § Lesbian, gay, bisexual, and transgender people; § Health promotion; and § Prevention strategies. Chapters on sexual health in adolescence and in older adults have been expanded. A section on refugees is now included (with sections on homeless youth, sex workers, and prisoners) in a chapter on the sexual health of 'other vulnerable populations'. This book is one-third longer than its predecessor-volume. For tertiary-level students of nursing, medicine, public health, health promotion, and sexology, this new book will continue to be an ideal textbook. For healthcare practitioners working in reproductive health, sexual health, maternal and child

Downloaded from
legacy.opendemocracy.net
on 2019-01-22 by guest

health, and many other specialist fields, it will be an invaluable first reference.

Sexual Health Matters in Primary Care - Gill Wakley
2001-11-29

Book looks at best practice in the clinical management of sexual health and at ways to improve practice systems and procedures.

Government Response to the Health Select Committee's Third Report of Session 2004-2005 on New Developments in Sexual Health and HIV/AIDS Policy

- Great Britain: Department of Health 2005-07-20

Response to HCP 252-I, session 2004-05 (ISBN 0215023013).

Dated July 2005

Sexual Health Medicine - Darren Russell 2011

Authoritative coverage is offered of the biological, clinical, laboratory, psychosocial, and public-health aspects of sexual health medicine. A feature of the book is its holistic approach, with the client seen as a whole person, rather than simply the owner of a set of

malfunctioning genitalia.

Let's Talk about Sex - Dr Hannah Carton 2020-08-31

'Let's Talk About Sex' is a much-needed resource for providing information to groups and individuals with intellectual disabilities in order that they are aware of the risks and intricacies of sexual health, sexual relationships and all that goes with this. This need may arise during adolescence, following a period away from the community (e.g. hospitalisation, incarceration) or later in life. The manual provides a sexual health education programme that can be used with adolescents and adults with intellectual disabilities. Its detailed guidance and resources can be used to run a group programme delivered as individual stand-alone sessions, in a pick and mix style, or as a 16-week programme, according to the needs of those attending. It can also be used as a basis for working with individuals on sexual health matters. The programme covers topics including physiology, puberty,

*Downloaded from
legacy.opendemocracy.net
on 2019-01-22 by guest*

personal hygiene, health screening, sexual orientation and gender identity, dignity and respect, sexual education, consent, relationships, and exploitation, delivered in a non-judgemental, informative, supportive approach. Each session incorporates different methods of learning, including facilitator-led discussion, active participation and visual aids to enhance learning and can be adapted to meet the learning needs of participants. Online, printable resources are included to reinforce learning. Guidance is provided to facilitators on supporting individuals during and after sessions.

Sexual and Reproductive Health at a Glance - Catriona Melville 2015-09-28

Sexual and Reproductive Health at a Glance provides a highly-illustrated, visual introduction to all aspects of sexual and reproductive health, from basic clinical examination skills to the management of acute Sexually Transmitted Infections (STIs) and unplanned pregnancy.

Covering topics which are often difficult to access as an undergraduate or junior doctor, Sexual and Reproductive Health at a Glance focuses on the fundamental principles in delivering effective contraception and sexual health care. It features high-yield information on the essential clinical topics covered in the Community Sexual and Reproductive Health (CSRH) curriculum. Presented in the familiar, easy-to-use, at a Glance format, Sexual and Reproductive Health at a Glance:

- Provides a quick revision of basic anatomy, physiology and clinical skills
- Offers balanced coverage of both male and female GU pathology, STIs and contraception
- Includes material on practical gynaecological procedures performed in the out-patient setting
- Presents a holistic approach to issues dealt with in this specialty
- Takes a global perspective by addressing SRH issues in different cultures and resource-limited settings

*Downloaded from
legacy.opendemocracy.net
on 2019-01-22 by guest*

Includes a companion website at www.ataglanceseries.com/sexualhealth featuring a selection of case scenarios and interactive flashcards for self-test. This brand new title will provide an invaluable resource for medical and healthcare students, junior doctors, SRH trainees and busy clinicians working in other specialties.

Guidelines for the management of symptomatic sexually transmitted infections - World Health Organization
2021-07-15

The WHO global health sector strategy on sexually transmitted infections, 2016–2021, endorsed by the World Health Assembly in 2016, aims to eliminate STIs as a public health threat by 2030. In 2019, WHO published estimates of new cases of chlamydia, gonorrhoea, syphilis and trichomoniasis. Recent changes in the epidemiology of STIs and progress in prevention, diagnosis and treatment of STIs and HIV have

necessitated changes in approaches to STI prevention and management. To address these STIs, the most widely used approach in clinical settings is the syndromic management of STIs. In most resource-limited settings, the syndromic management flow charts are still the standard of care where laboratory diagnosis is not available or is hard to access. The objectives of these guidelines are to provide updated, evidence-informed clinical and practical recommendations on the case management of people with symptoms of STIs; and to support countries in updating their national guidelines for the case management of people with symptoms of STIs. These guidelines include the management of symptomatic infections related to urethral discharge syndrome, including persistent urethral discharge syndrome; vaginal discharge syndrome, including persistent vaginal discharge; anorectal infection; genital ulcer disease syndrome; and lower abdominal pain syndrome.

Downloaded from

on 2019-01-22 by guest

These guidelines are intended for programme managers for STI prevention and control at the national level and the health-care providers at the frontline - primary, secondary and tertiary health care.

Syphilis Screening for Low-Risk Clients Visiting a Sexual Health Clinic - 2015

Their answers did not necessarily specify any low risk groups but directed us to consider the local context (disease prevalence and risk groups), that individuals attending STI clinics are often "higher" risk than the general population, and given the resurgence of syphilis in parts of Canada, the chance of potentially missing cases in persons in whom a specific "risk" factor is not identified. [...] Cautionary comments related to decreasing syphilis screening in lower risk populations included the potential to miss outbreaks in lower-risk populations, clients who do not disclose all of their risk factors to practitioners, and the role of sexual health clinic expertise in surveillance

of a virulent infection. [...] The Canadian STI Guidelines identifies the potential situations for considering a syphilis diagnosis assessment such as: • individuals with signs and symptoms compatible with syphilis • individuals at high risk of syphilis At the local level, the need for and the frequency of syphilis screening depends on the local epidemiology (including incidence, prevalence, test positivity etc) of specific sub [...] Subsequent to that, screening would be dependent on risk factors We have gone back and forth over (multiple partners - and the years in terms of the definition of most of our clients do fit in Have not "multiple partners". [...] Risk factors (2014): • Unprotected oral sex: 74% (highest percentage of the four STIs) • Unprotected vaginal sex: 45% (third highest percentage of the four STIs) • Unprotected anal sex: 45% (second highest percentage of the four STIs) • Met contact through the internet: 26% (highest percentage of the four

STIs) • Anonymous sex partner: 48% (highest percentage of the four STIs) • MSM: 48% (highest.

Handbook of Contraception and Sexual Health - Suzanne Everett 2020-07-15

Offering a comprehensive guide to contraception and sexual health, the new edition of this practical handbook has been fully updated with the latest clinical guidance, research and methods, including new technologies. Giving clear and detailed information about all contraceptive methods, including how to use them, contra-indications, interactions and common patient anxieties, this guide takes an integrated approach to sexual health. It includes updated chapters on the consultation, person-centred care, anatomy and physiology, and sexually transmitted infections. The new edition adds content on pharmacology for independent prescribers, pornography, trafficking, female genital mutilation (FGM) and other issues related to safeguarding,

LGBT sexuality, and new technologies such as apps, online screening kits and SH24. With plenty of self-assessment exercises, question and answers, and case scenarios, the Handbook of Contraception and Sexual Health is an essential read for all nurses, midwives and allied health professionals working in community health and primary care settings.

The Hidden Epidemic - Institute of Medicine 1997-04-28

The United States has the dubious distinction of leading the industrialized world in overall rates of sexually transmitted diseases (STDs), with 12 million new cases annually. About 3 million teenagers contract an STD each year, and many will have long-term health problems as a result. Women and adolescents are particularly vulnerable to these diseases and their health consequences. In addition, STDs increase the risk of HIV transmission. The Hidden Epidemic examines the scope of sexually transmitted

Downloaded from
legacy.opendemocracy.net
on 2019-01-22 by guest

infections in the United States and provides a critical assessment of the nation's response to this public health crisis. The book identifies the components of an effective national STD prevention and control strategy and provides direction for an appropriate response to the epidemic. Recommendations for improving public awareness and education, reaching women and adolescents, integrating public health programs, training health care professionals, modifying messages from the mass media, and supporting future research are included. The book documents the epidemiological dimensions and the economic and social costs of STDs, describing them as "a secret epidemic" with tremendous consequences. The committee frankly discusses the confusing and often hypocritical nature of how Americans deal with issues regarding sexuality—the conflicting messages conveyed in the mass media, the reluctance to promote condom

use, the controversy over sex education for teenagers, and the issue of personal blame. The Hidden Epidemic identifies key elements of effective, culturally appropriate programs to promote healthy behavior by adolescents and adults. It examines the problem of fragmentation in STD services and provides examples of communities that have formed partnerships between stakeholders to develop integrated approaches. The committee's recommendations provide a practical foundation on which to build an integrated national program to help young people and adults develop habits of healthy sexuality. The Hidden Epidemic was written for both health care professionals and people without a medical background and will be indispensable to anyone concerned about preventing and controlling STDs.

Sexually Transmitted Diseases - Lisa Marr

2007-09-04

Every year, millions of people are exposed to a sexually

*Downloaded from
legacy.opendemocracy.net
on 2019-01-22 by guest*

transmitted disease. And many people who are sexually active often worry about being infected. In her comprehensive guide to STDs, Dr. Lisa Marr tells readers everything they need to know about avoiding, preventing, and treating these diseases. Complete and up-to-date, this book describes safer sex practices, testing protocols, and symptoms, and details commonly known treatments as well as significant recent medical advances—including new testing for the herpes virus, the vaccine against the human papilloma virus (HPV), and new discoveries about the effectiveness of spermicides and condoms. For each disease, Dr. Marr offers the latest Sexually Transmitted Disease Treatment Guidelines from the Centers for Disease Control and Prevention. Fortright, compassionate, and practical, this guide is a trusted source of advice for anyone who is sexually active. *STI Testing in HIV Positive MSM Patients: A Missed Opportunity?* - Charlotte Cain 2017

Approximately 1 in 20 men that have sex with men (MSM) are infected with HIV. The risk of acquiring a sexually transmitted infection (STI) is higher in this population compared to heterosexuals. Therefore, it is important for HIV positive MSMs to have regular sexual health screening to reduce the risk of transmission of STIu2019s and HIV. Consequently, the British HIV Association recommends that HIV positive MSMs should have annual STI screening. Furthermore, those that are classified as high-risk should be tested every 3 months. This audit retrospectively gathered case notes of HIV positive MSMs that have been seen in the last 12 months, October 2015 to November 2016. The following criteria were assessed; annual or 3 monthly screening of STIu2019s; hepatitis B and C immunity status, patient age, evidence of high-risk behaviours and year of HIV diagnosis. The criteria for high-risk behavior included; multiple partners (>2 in the last 12 months) and drug use.

Downloaded from
legacy.opendemocracy.net
on 2019-01-22 by guest

The data will be used to assess what proportion of patients are screened in line with national guidelines and to identify ways the practice can increase the uptake of screening. The results show that 84% of cases were not screened annually for hepatitis C, 40% of patients were not receiving the

minimum screening for STIu2019s. However, 78% of patients were vaccinated against hepatitis B. In conclusion, this audit shows there is a failure to meet the minimum level of screening for this high-risk group. We aim to improve this via a new pro-forma and education.
