Sexuality & Ageing - Walter Pierre Bouman 2017-10-02

Across the globe, both in developed and developing countries, the population is rapidly ageing. In the fields of sexual and relationship therapy and sexual health, ageing has not been an issue of priority. Too often, ageing is thought of as a process that relates to problems, deficits, and taboos, and less to pleasure, change, growth and diversity. It is treated as a separate life stage and not a process throughout the lifecycle. Sexuality and sexual health are important parts of the lives of older people, as they have a significant impact on quality of life, psychological well-being and physical health, as well as social and family life. This book brings together contributions from those currently writing on and researching ageing as it relates, in a therapeutic context, to gender identity, to sex and sexuality, and to intimate relationships. This book was originally published as a special issue of Sexual and Relationship Therapy.

Ageing and Male Sexuality - Raul C. Schiavi 1999-06-17

Awareness of the importance of sexuality and its disorders in the aging population is increasing as the proportion of older people increases. Based in part on the author's clinical experience and research at Mount Sinai Medical Center in New York, this book presents an up-to-date overview of the sexuality of aging men in health and illness, within a multidimensional conceptual framework. It takes into account physiological, psychological, interpersonal, and social influences. The book also discusses the impact of medical illness, psychopathology, and drugs, with a review of coping strategies in shaping individual sexual responses to aging and disease. The author incorporates many case studies and vignettes, and devotes a chapter to the sexuality of older gay men. A balanced account of medical and psychosocial evaluation and treatment concludes the book, which will be of broad interest to clinicians and students interested in sexuality and aging.

Sexuality and Aging - Jennifer Hillman 2012-03-27

Despite continuing ageist beliefs that sexuality is a privilege designed only for the young and physically healthy, research continues to indicate that the majority of older adults maintain interest in sexuality and may engage in fulfilling sexual behavior well into their last decade of life. Unfortunately, many professionals remain unaware of general knowledge of elderly sexuality, including the expected and normal physiological changes that can occur within the context of both male and female aging. The presence of chronic illness and other medical problems certainly can influence the expression of an aging adult's sexuality, and emergent research suggests that there are effective ways to cope with menopause, heart disease, arthritis, incontinence, diabetes, sleep disorders, breast cancer, prostate cancer, and erectile dysfunction (ED), among others. Dramatic changes have taken place within the last decade alone in terms of non-surgical treatment for incontinence and ED, with forms of sex therapy, biofeedback, and PDE-5 inhibitors. Regrettably, many aging adults and their care providers remain unaware of their increased risk factors for STDs, including HIV infection via lack of knowledge, changes in the vaginal lining, and typical declines in immune function. Estimates suggest that by the year 2020, more than half of all individuals living with HIV will be over the age of 50. Although some high quality professional books are available for

clinicians, they tend to be disjointed research bibliographies, edited volumes on a narrowly focused aspect of elderly sexuality, or texts that are more than 10 years old. With the extent of new information available regarding sexuality and aging, an up to date, empirically based text is necessary.

Sexuality in the Later Years - Ruth B. Weg 2013-09-24

Sexuality in the Later Years: Roles and Behavior pulls together evidence from the anthropological, psychological, social, and physiological disciplines and represents an effort to present a coherent picture of sexual roles and behavior in the later years. This work does not pretend to answer all questions that could be raised concerning sexuality and aging but attempts rather to concentrate on issues that have been relatively neglected, primarily options, potentials, and possibilities for the individualization and humanization of sex roles and sexual behavior of older persons. The book is organized into five parts. Part I examines concepts of sexuality in the later years, including cultural attitudes and behaviors towards sexuality, psychological and sociological perspectives, and a life-span model of sex-role development. Part II on life-styles deals with the impact of aging on the sexuality of those who are unmarried in later life; the relationship between interpersonal intimacy and adaptation to stress throughout adult life; and the range of sexual orientations in the later years, along with their incidence, their contributions to social adaptation, and the particular constraints surrounding them. Part III discusses issues in research and therapy while Part IV considers views of sexuality and aging in other countries, namely Canada and Sweden. Part V inquires into the problems associated with transitions in the later part of the life cycle of love.

EBOOK: Sexuality, Sexual Health and Ageing - Merryn Gott 2004-12-16

·What factors underpin dominant understandings of later life sexuality? · How do older people experience and prioritise sexuality and sexual health? ·What sexual health issues are relevant to older people and how are these addressed by health care professionals? This is the first book to integrate theoretical insights into sexuality, sexual health and ageing, with research findings from studies conducted with older people and the professionals that work with them. The book is split into three sections. In the first section stereotypes that typify contemporary understandings of sexuality and ageing are explored, particularly the 'myth of asexual old age' and the more recent stereotype of the 'sexy oldie'. Section two identifies what we actually know about ageing and sexuality by reviewing current literature, as well as presenting findings from one of the first qualitative studies to explore sexuality from the perspective of older people themselves. The final section of the book explores what 'sexual health' means within the context of ageing and focuses on issues relevant to health professionals working with older people. *Sexuality, Sexual Health and Ageing* provides key reading for students, researchers, practitioners and policymakers working within gerontology, sociology, psychology, social work, health sciences, nursing and medicine. This book is likely to become essential reading for all academics and professionals working with older people or in the area of sexual health.

Ageing, Gender and Sexuality - Sue Westwood 2016-03-10

Ageing, Gender and Sexuality focuses on the experiences of older lesbian, gay and bisexual (LGB) individuals, in order to analyse how ageing, gender and sexuality intersect to produce particular inequalities relating to resources, recognition and representation in later life. The book adopts a feminist socio-legal perspective to propose that these inequalities are informed by and play out in relation to temporal, spatial and regulatory contexts. Discussing topics such as ageing sexual subjectivities, ageing kinship formations, classed trajectories and anticipated care futures, this book provides a new perspective

on older individuals in same-sex relationships, including those who choose not to label their sexualities. Drawing upon recent empirical data, the book offers new theoretical approaches for understanding the intersectionality of ageing, gender and sexuality, as well as analysing the social policy implications of these findings. With an emphasis on the accounts of individuals who have experienced the dramatically changing socio-legal landscape for LGB people first-hand, this book is essential reading for students, scholars and policymakers working in the areas of: gender and sexuality studies; ageing studies and gerontology; gender, sexuality and law; equality and human rights; sociology; socio-legal studies; and social policy. Ageing, Gender and Sexuality won the Socio-Legal Studies Association (SLSA) Hart Prize for Early Career Academics for 2017.

Addressing the Sexual Rights of Older People - Catherine Barrett 2017-11-02

There is growing evidence that the sexual rights of older people are not being met. One reason, perhaps the main reason, relates to the way that old age is viewed. In many cultures, being old is associated with decline and disease, which positions older people as dependent and powerless. Furthermore, an absence of positive or celebratory discourses around older people's sexuality is particularly striking. The book addresses a gap in research and policy. Using an adaptation of the Declaration of Sexual Rights from the World Association of Sexual Health, it provides readers with an innovative and evidence-based framework for achieving the sexual rights of older people. Drawing on interdisciplinary research, it explores the cultural and social locations of old age and its intersections with sexual orientation, gender identity, and intersex status. Key themes include stigma, silencing, invisibility, prejudice, discrimination, and a lack of information, awareness, and understanding. Addressing the Sexual Rights of Older People: Theory, Policy and Practice is a text for academics, health professionals, social professionals, service providers, and policy-makers. It is a timely and insightful collection which suggests ways to apply the sexual rights framework, raise awareness, and engage communities in constructing strategies for reform.

Sexuality & Long-term Care - Gayle Appel Doll 2012

Sexuality in residents of long-term care facilities is a topic rarely addressed except in cases of inappropriate behavior. After distinguishing between sexuality and intimacy, Doll (Center on Aging, Kansas State U.) examines societal, older adult, and staff attitudes toward sexual expression in seniors; the effects of aging on sexuality; family influences; spaces and policies for balancing public and private spaces; and the needs of lesbian, gay, bisexual, and transgendered residents. The text includes case studies, assessment forms, exercises, discussion questions, and annotated further references.

My Parents Never Had Sex - Doris B. Hammond 1987

Sexuality and Aging - James E. Birren 1975

Ageing and Sexualities - Elizabeth Peel 2017-05-15

This book showcases developments in theory, research and practice regarding sexuality and ageing, considering the differences as well as similarities between and among ageing heterosexual and LGBT older people. Identifying the questions central to future social scientific research on ageing and sexuality, it focuses on the important, emerging dimensions of sexuality and ageing: embodiment, the diversification of the ageing context and the intersections of care and sexuality. With attention to the different forms of sexualities, particularly at their intersection with gender, this volume explores the importance of spatial and relational contexts, whether individual, residential or virtual, with authors offering studies of online dating, sexuality in the context of residential care and the relationship between sexuality, legal frameworks and social policy. Interdisciplinary in scope and offering the latest research from scholars in the UK, Australasia and Africa, Ageing and Sexualities constitutes an integrated approach to the conceptual and practical challenges of understanding the interplay of ageing and sexuality in contemporary society. As such, it will appeal to scholars from a variety of disciplinary backgrounds, including sociology, cultural studies, socio-legal studies, social gerontology, psychology, medicine and health care.

Sexuality and the Elderly - Bonnie L. Walker 1997-05-12

This literature review was undertaken in order to determine what caregivers needed to know about elderly sexuality, to determine the needs of elderly people related to their sexuality, and to determine how caregivers could best assist them in meeting those needs. In selecting materials to be annotated for this book, the first priority was given to empirical studies. Also included were articles by prominent practitioners and researchers interested in elderly sexuality, literature reviews, and books written for the lay population which are often cited in the professional literature. In addition to seeking knowledge about elderly sexuality and understanding attitudes about sexuality, this literature review sought information about measurement issues and measurement instruments frequently used in research within elderly populations. Also of interest were investigations of educational and training programs involving caregivers.

Sex and Diversity in Later Life - Hafford-Letchfield, Trish 2021-05-27

Despite increased awareness of sexual diversity, older people's accounts of sex and intimacy remain marginalised. This edited volume addresses diversity in sexual and intimate experience later in life (50+) and captures international research and analysis relating to intersectional identities. Contributors explore how being older intersects with differences of ethnicity, gender, sexuality and class. Offering a critical focus and original contribution to an emerging, although still relatively neglected field, this collection extends knowledge concerning intimacies, practices and pleasures for those thought to represent normative, non-normative and 'new normative' forms of sexual identification and expression.

In Full Flower - Lois W. Banner 1992

And we see the emergence that followed of the idealized, domesticated, and sentimentalized nuclear family centered around the mother--and the concurrent vilification or mockery of the older unmarried woman, which continues to the present. Banner provides new perspective on such subjects as goddess-young god stories in ancient religions, witchcraft, menopause, changes in male and female dress, the rise of the grandmother as a social type, and affectionate and erotic relationships through history, particularly between older women and younger men. She contemplates the mature women portrayed in high and popular art, from Penelope in the Odyssey and the Wife of Bath in The Canterbury Tales to Norma Desmond in Sunset Boulevard. She writes about attempts over the centuries to mute the voices of older women--and about those who could not be silenced, from Sappho to Elizabeth I, from the women of France's eighteenth-century salons to nineteenth-century reformers and twentieth-century writers.

Sexual Deviance in Health and Aging - Lacey J. Ritter 2020-12-02

Sexual Deviance in Health and Aging: Uncovering Later Life Intimacy explores life course health experiences and unmet care needs of populations perceived as sexually deviant in the United States. These groups include but are not limited to: gay, lesbian, and bisexual people; asexual and demisexual people; trans, nonbinary, and gender nonconforming people; intersex people; nonmonogamous and polyamorous people; kink and fetishism practitioners; sex and adult entertainment workers; individuals labeled as sexual offenders and predators; people living with sexually transmitted infections; people identifying as neuroatypical and/or autistic; and people with chronic conditions and disabilities who lead active sexual lives. Lacey J. Ritter and Alexandra C.H. Nowakowski analyze the social, cultural, and political origins of perceptions of these groups as sexually deviant. In the process, they provide history and context for the health care experiences of people within each of these broad groups. Simultaneously, Sexual Deviance in Health and Aging highlights the complexity and individuality of different people's journeys through sexuality in health and aging.
