The South East from 1000 AD C. B. Phillips 2014-07-22 A volume dealing with the regional and local history of South East England, this covers the landscape and society of the modern counties of Surrey, Kent, East and West Sussex and Greater London, south of the Thames from late Anglo-Saxon times to the present. The authors have tried to show the diversity that can be found within the region as well as common characteristics which illustrate the local peculiarities of the area. The works in the series offer a synthesis of both historical and archaeological work in local areas. Each region is covered in two linked but independent volumes, the first covering the period up to AD 1000 and necessarily relying on archaeological data, and the second bringing the story up to modern times. It aims to portray life as it was experienced by the majority of people of South Britain or England as it was to become. The authors look at the major historical events which have an impact on the region - wars, plagues, technological changes and socio-cultural trends amongst them - but they also stress the underlying continuity of rural and urban life.

anyone climbed them all? Where is there for hill walkers to go in the south of England? What is a hill anyway? The answers to these and other questions will be found in *The Relative Hills of Britain*. This book dispenses with the common assumption that a hill must be at least 2000ft high to be worth climbing. Instead it concentrates on listing all the hills that are relatively high compared to the surrounding land, rather than compared to sea level. This approach leads to some interesting results: for example, the highest points in the Cotswolds and Chilterns, Campsies and Quantocks are all included, as well as the main summits on numerous Scottish islands, whereas well-known mountain summits such as Cairn Gorm, Bowfell and Carnedd Dafydd do not qualify. As well as being an invaluable reference work for all walkers, this book contains a fascinating collection of not too serious facts and figures about the Marilyns, as these relative hills have been called. The book is illustrated by a set of photographs and a large number of very clear maps, which make it easy to locate all the hills in each region.

An Elected Second Chamber Great Britain. Ministry of Justice 2008-07-14 This white paper sets out the Government's proposals for a reformed second chamber. It stems from the constructive discussions in a Cross-Party Group on House of Lords Reform, which followed the March 2007 Parliamentary votes on the proposals contained in the February 2007 white paper ("The House of Lords: reform", Cm. 7027, ISBN 9780101702720). The Group reached consensus on a number of key

issues, and this paper states where agreement was not reached. The white paper sets the context for decisions on House of Lords reforms and goes on to consider issues around, and options for, electoral systems. The effect of different electoral systems is examined against two scenarios: that the House is either 100 per cent or 80 per cent elected. The paper then looks at the powers of the second chamber. It suggests possible arrangements for any appointed elements, but there are no concrete proposals yet. Finally the white paper addresses other issues around the operation of a reformed second chamber and explores transitional arrangements.
