The Best of Bill - A A Grapevine, Incorporated 1955

A handsome collection of five of AA cofounder Bill W.'s most powerful Grapevine essays sharing his thoughts on faith, fear, honesty, humility and love.

Sleep and Aging - Mark P. Mattson 2005-06-20

Sleep and Aging provides a unique and timely collection of review articles that cover the gamut of basic and clinical aspects of sleep and the abnormalities in sleep associated with aging and neurological disorders that occur during aging. From the evolutionary basis of sleep and its normal functions in processes such as learning and memory, to considerations of the roles of sleep abnormalities in neurological disorders such as depression, Alzheimer's and Parkinson's diseases, the chapters are written by experts in the field. Several chapters focus on signalling pathways involved in sleep regulation and abnormalities in sleep, including those activated by serotonin and BDNF. Basic and clinical research on insomnia, sleep apnea and other disorders of sleep, are covered thus providing students and scientists at all levels with a valuable source of information to advance their understanding of this important topic in aging, biology and medicine. The circuits in the brain involved in sleep regulation, their neurochemistry, how they are altered in disorders of sleep and current clinical treatments of various sleep disorders are reviewed. The important role of sleep disturbances in neurodegenerative disorders is described and research in this particular area is leading to a better understanding of the relationships between synaptic plasticity, neuronal degeneration and the clinical manifestations of disorders such as Alzheimer's disease, Parkinson's disease and depression. This book is a must for scientists, as well as non-scientists, who are interested in the neurobiology of aging, sleep and neurodegenerative disorders.

Occupational Safety & Health Program - 1982

Cognition and Survey Research - Monroe G. Sirken 1999-04-21

Survey methods research—an interdisciplinary approach. Introducing the theory and tools of cognitive aspects of survey methodology (CASM)—a movement that has greatly contributed to the evolving field of survey methods research—this collection of monographs explores advances in the use of cognitive psychology and other sciences to improve the quality of data collected in surveys. In 22 articles commissioned specifically for this volume, leading survey researchers, social scientists, and statisticians from around the globe evaluate the advantages of interdisciplinary survey techniques, focusing on the many contributions of the CASM movement and drawing on such disciplines as statistics, cognitive psychology, sociology, behavioral sciences, anthropology, linguistics, and computer sciences. The authors explain basic concepts and methodologies and demonstrate the application of cognitive theory to all phases of survey research, including data processing, analysis, presentation, and administration. They provide a critical review of the history and findings of CASM-oriented research and describe useful cognitive models used in survey testing and design. Also, the authors discuss the expanding role of computer technologies and statistical advances in the interdisciplinary aspects of survey methods and draw a roadmap for interdisciplinary survey research into the twenty-first century. Clearly written and supplemented with extensive references and more than 80 figures and charts, *Cognition and Survey Research* is an indispensable guide for statisticians and professionals who would like to be at the cutting edge of interdisciplinary survey methods research involving the social, cognitive, computer, or statistical sciences.

Dermatological Signs of Internal Disease - Jeffrey P. Callen 1995

A unique investigation of clinical manifestations of systemic disease in the skin, relationship of signs to systemic disease, evaluation, and therapy. Also includes discussions of etiology and pathogenesis. The 2nd Edition features chapters on sexually transmitted diseases, skin diseases in transplant patients, life-threatening dermatoses, and systemic treatment of skin disease. A slide set is available to accompany the

text.

Astrological Timing of Critical Illness - Noel Tyl 1998

Master astrologer Noel Tyl shows that by using transits and other timing techniques, a skilled astrologer can achieve amazing accuracy in predicting a client's predisposition to a host of critical illnesses, including breast and prostate cancer, heart disease, high blood pressure, diabetes, and more. You, too, can learn how to use Tyl's techniques through his more than 70 case studies presented here.

Bathing Without a Battle - Ann Louise Barrick PhD 2008-03-10

2008 AJN Book of the Year Winner! Like its popular predecessor, the new edition of *Bathing Without a Battle* presents an individualized, problem-solving approach to bathing and personal care of individuals with dementia. On the basis of extensive original research and clinical experience, the editors have developed strategies and techniques that work in both institution and home settings. Their approach is also appropriate for caregiving activities other than bathing, such as morning and evening care, and for frail elders not suffering from dementia. For this second edition, the authors have included historical material on bathing and substantially updated the section on special concerns, including: Pain Skin care Determining the appropriate level of assistance Transfers The environment An enhanced final section addresses ways to support caregivers by increasing their understanding of the care recipient's needs and their knowledge of interventions to improve care and comfort. It also emphasizes self-care and system-level changes to promote person-directed care. Several chapters include specific insights and wisdom from direct caregivers.

Divorce Talk - Catherine Kohler Riessman 1990

Taking a new look at divorce in America, Catherine Riessman shows how divorce is socially shared, and how it takes crucially different forms for women and men. Drawing on interviews with adults who are divorcing, she treats their accounts as texts to be interpreted, as templates for understanding contemporary beliefs about personal relationships. Riessman looks at the ideology of the companionate marriage: husband and wife should be each other's closest companion, and in marriage one should achieve emotional intimacy and sexual fulfillment. These beliefs imply a level of equality that rarely exists. In reality, most wives are subordinate to their husbands, most husbands want neither "deep talk" nor small talk that women want, and many husbands resent their wife's ties to kin and friends. To explain divorce, women and men construct gendered visions of what marriage should provide, and at the same time they mourn gender divisions and blame their divorces on them. Riessman examines the stories people tell about their marriages--the protagonists, inciting conditions, and culminating events--and how these narrative structures provide ways to persuade both teller and listener that divorce was justified. Although divorce is invariably stressful, many people believe that men suffer less than women. This is an artifact of what Riessman calls the "feminization of psychological distress"--traditional ways of measuring distress reflect women's idioms, not men's. Departing from a literature that casts divorce in only negative terms, she finds paradoxically that women sense rewards, even as they report hardship. There is a shakeup in gender roles, and women more than men feel they gain a fuller idea of who they are. The author allows us to enter the points of view of her subjects, while her analytic approach makes links between the self and society.

Polls and Surveys - Norman M. Bradburn 1988-08-15

Explains how polls are conducted, describes the causes of polling errors, and discusses how polls are used and interpreted.

Social Information Processing and Survey Methodology - Hans-J. Hippler 2012-12-06

Survey researchers have long been aware that the way in which questions are asked determines the obtained responses. However, the exact processes that mediate response effects remained elusive. In the present volume, cognitive psychologists and survey methodologists explore the cognitive processes that

underlie respondents' answers to survey questions. The contributors provide an introduction to information processing theories for survey researchers, review current knowledge of response effects in the light of recent theorizing in cognitive psychology, and report a number of experimental studies on question context and question wording. In combination, the chapters provide a theoretical framework for the analysis of response effects in surveys and raise a number of applied and theoretical issues that have so far not been addressed in cognitive psychology.

General Alexander Lebed - Aleksandr Lebed 1997-09-01

Forty-five year old Alexander Lebed is a charismatic figure whose dry wit and brusque no-nonsense style sets him apart from most of the familiar faces of Moscow's political elite. In this brawling autobiography, General Alexander Lebed tells his dramatic life story, demonstrating the strengths that make him a likely candidate for a future Russian leadership role. photos.

In Search of Coronary-prone Behavior - Aron Wolfe Siegman 2013-05-13

In Search of Coronary-Prone Behavior: Beyond Type A provides a methodology of enormous potential for examining the relationship between behavioral variables and basic pathophysiological mechanisms. They discuss the history of Type-A behavior pattern (TABP) as it relates to coronary heart disease (CHD).

Students and researchers with an interest in the correlation between personality and coronary behavior, as well as behavioral medicine, social and health psychology, and the neurosciences.

Learning from Video Games (and Everything Else) - Douglas A. Gentile 2021-12-23

Video games can have many effects on players, some of which could be intentional effects (e.g., games designed to train health compliance behaviors), and most of which are unintentional (e.g., violent games, stereotypes, gaming disorder). Some of these areas of research have been seen as controversial, but many of the controversies can be at least partially resolved by considering the learning mechanisms underlying the effects. We describe the General Learning Model in greater detail than has been provided elsewhere, including short-term and long-term mechanisms, processes of learning and forgetting, and moderators of learning. Video games use many of the best practices to train for both mastery and for transfer of learning. The implications for re-interpreting the literature on violent video games and gaming disorder, as well as for applied social psychology broadly defined, are discussed.

Close Relationships - Clyde Hendrick 2001-11-20

'The authors ...extend the reach of their comprehensive reviews into theoretically driven and innovating explorations. The scope of coverage across and within chapters is striking. The developmentalist, the methodologist, the feminist, the contextualist, and the cross-culturalist alike will find satisfaction in reading the chapters' - Catherine A Surra, University of Texas, Austin The science of close relationships is relatively new and complex. This volume has 26 chapters organized into four thematic areas: relationship methods, forms, processes, and threats, as well as a foreword and an epilogue.

The Futurist Cookbook - Filippo Tommaso Marinetti 2014-05-01

Both madcap cookbook and manifesto on Futurism, Marinetti's exuberant and entertaining book has been described as one of 'the best artistic jokes of the century' No other cultural force except the early twentieth-century avant-garde movement Futurism has produced a provocative work about art disguised as an easy-to-read cookbook. Part manifesto, part artistic joke, Fillippo Marinetti's The Futurist Cookbook is a collection of recipes, experiments, declamations and allegorical tales. Here are recipes for ice cream on the moon; candied atmospheric electricities; nocturnal love feasts; sculpted meats. Marinetti also sets out his argument for abolishing pasta as ill-suited to modernity, and advocates a style of cuisine that will increase creativity. Although at times betraying its author's nationalistic sympathies, The Futurist Cookbook is funny, provocative, whimsical, disdainful of sluggish traditions and delighted by the velocity and promise of modernity. Filippo Tommaso Marinetti was born in 1876 to Italian parents and grew up in Alexandria, Egypt, where he was nearly expelled from his Jesuit school for championing scandalous literature. He then studied in Paris and obtained a law degree in Italy before turning to literature. In 1909 he wrote the infamous Futurist Manifesto, which championed violence, speed and war, and proclaimed the unity of art and life. Marinetti's life was fraught with controversy: he fought a duel with a hostile critic, was subject to an obscenity trial, and was a staunch supporter of Italian Fascism. Alongside his literary activities, he was a war correspondent during the Italo-Turkish War and served on the Eastern Front in World War II, despite

being in his sixties. He died in 1944. 'A paeon to sensual freedom, optimism and childlike, amoral innocence ... it has only once been answered, by Aldous Huxley's Brave New World' Lesley Chamberlain

Computational Interaction - Antti Oulasvirta 2018

This book presents computational interaction as an approach to explaining and enhancing the interaction between humans and information technology. Computational interaction applies abstraction, automation, and analysis to inform our understanding of the structure of interaction and also to inform the design of the software that drives new and exciting human-computer interfaces. The methods of computational interaction allow, for example, designers to identify user interfaces that are optimal against some objective criteria. They also allow software engineers to build interactive systems that adapt their behaviour to better suit individual capacities and preferences.00This book introduces computational interaction design to the reader by exploring a wide range of computational interaction techniques, strategies and methods. It explains how techniques such as optimisation, economic modelling, machine learning, control theory, formal methods, cognitive models and statistical language processing can be used to model interaction and design more expressive, efficient and versatile interaction.

Male Violence - John Archer 2022-11-30

First published in 1994, Male Violence examines male violence as the major source of human suffering from a wide range of perspectives. This book contains accessible contributions from a wide range of psychologists who have studied the many faces of male violence: in childhood and adulthood; on the street and in the home; towards men, women and children; and in its sexual and non-sexual forms. These varied topics, together with an emphasis on naturalistic rather than laboratory-based investigations, distinguish these researchers from those aiming to make generalizations about human aggression without considering the issues of sex and gender. In doing so, Male Violence raises fundamental questions about values which are accepted and unchallenged by the majority of people living in the modern world. This book will be of interest to students of psychology, sociology, and gender studies.

Wolff's Headache and Other Head Pain - Stephen D. Silberstein 2008

The 8th edition of Wolff's Headache and Other Head Pain remains the definitive reference text in the field. Our knowledge and understanding of headache and its management have changed significantly in the twenty-first century. A new international headache classification has been adopted; headache pathophysiology and genetics have advanced; and epidemiologic studies have burgeoned. We have greater insights into the diagnosis and treatment of the secondary headaches. New treatments are available for primary headache disorders, including migraine, cluster, and chronic daily headache, and our understanding and knowledge are increasing by means of ongoing trials. The 8th edition encompasses all of this new material, with all chapters updated and many new authors added.

A Handbook of Statistical Analyses using R - Torsten Hothorn 2014-05-30

Like the best-selling first two editions, A Handbook of Statistical Analyses using R, Third Edition provides an up-to-date guide to data analysis using the R system for statistical computing. The book explains how to conduct a range of statistical analyses, from simple inference to recursive partitioning to cluster analysis. New to the Third Edition

Game Sense - Richard Lawrence Light 2012

Game Sense is an exciting and innovative approach to coaching and physical education that places the game at the heart of the session. It encourages the player to develop skills in a realistic context, to become more tactically aware, to make better decisions and to have more fun. Game Sense is a comprehensive, research-informed introduction to the Game Sense approach that defines and explores key concepts and essential pedagogical theory, and that offers an extensive series of practical examples and plans for using Game Sense in real teaching and coaching situations. The first section of the book helps the reader to understand how learning occurs and how this informs player-centred pedagogy. It also explains the relationship between Game Sense and other approaches to Teaching Games for Understanding. The second section of the book demonstrates how the theory can be applied in practice, providing a detailed, step-by-step guide to using Game Sense in eleven sports, including soccer, basketball, field hockey and softball. No other book explores the Game Sense approach in such depth, or combines theory and innovative practical techniques. Game Sense is invaluable reading for all students of physical education or sports coaching, any

in-service physical education teacher or any sports coach working with children or young people.
