Women as Revolutionary Agents of Change -
Shere Hite 1993

For 20 years Shere Hite has been conducting ground-breaking research into the personal lives of women and men. From her conclusions she

has formulated philosophical guidelines which have initiated and enlightened debates about sexuality, love, marriage, autonomy, friendships between women, male psychology, the family and our very culture in a time of radical change. P PFrom the first Hite Report which presented a new theory of female sexuality - one defined by women themselves and not imposed by the vagaries of Freud, patriarchy or Masters and Johnson - to her celebrated psychosexual investigations of men and her latest analysis of the emotions surrounding love as women describe them, Shere Hite is consistently challenging. She takes the pulse of individuals,

astonishing amounts of them, and on the basis of wide-ranging research formulates her theories.;This book shows the impact of her work over two decades and, at the same time, takes us to the cutting edge of the current debate on sexual politics in our culture. P

The Shere Hite Reader - Shere Hite 2011-01-04
The Shere Hite Reader presents wide-ranging analysis on the individual and society from a renowned thinker on psychosexual development. The book includes new science in addition to previously published material, reflecting Hite's three decades of work probing the roots of human identity through questionnaires and theory. For the first time Hite formalizes her thinking on male adolescence, that boys feel tortured by the new social role they are forced to

assume at puberty requiring a show of superiority toward females. In new detail Hite advances her understanding that sex is political, linking the expectation on women to achieve orgasm through coitus with broader patterns of oppression. Hite discusses new research on female adolescence, challenging the "virgin" hymen concept, and documenting that sexual awakening often precedes puberty. Hite also argues that pornography misrepresents male sexuality (not to mention female sexuality), depicting it as singular and silly instead of "full of intriguing, nuanced behavior involving the entire body, not just the penis." The authoritative collection of her work, The Shere Hite Reader challenges the reader to a new way of seeing.

men, ages thirteen to ninety-seven, speak out about: What they think of women--as wives, lovers, and friends; why a majority of men like marriage but are not faithful; what they think about love--and why they often distrust it; how they feel about giving women clitoral stimulation; why they often masturbate even with a regular sex life...and more.

The Hite Report on Women Loving Women - Shere Hite 2007

In this latest Hite Report the friendship between women and the societal definitions of such, friendship are examined: what are the limits, does it include sex, its historical context, and other, pressing issues. With high profile stars such as, Madonna and Ellen de Generis very publically, exploring the nature of female friendship and, women everywhere questioning its nature, Dr Hite's, extensively researched findings couldn't be more, timely.

The New Hite Report - Shere Hite 2000

This new report includes previously unpublished

data and personal accounts from women in the UK and Commonwealth. The original "Hite Report on Female Sexuality" was based on samples of women exclusively in the USA. First published in 1976, it explored women's feelings about sex and has had a profound influence on generations of readers. In it, women between the ages of 14 and 78 described their most intimate feelings and answered questions about orgasm, masturbation and their sexual desires. This book brings Shere Hite's thinking to a new generation of women and draws conclusions based on up-to-date and relevant worldwide findings to one of the most probing surveys ever undertaken.

hundred pages. To answer sensitive questions dealing with the most intimate details of women's sexuality, Hite's innovation was simple: she asked women, a lot of them, everything--and published the results. One hundred thousand women, ages fourteen to seventy-eight, were asked what they do and don't like about sex; how orgasm really feels, with and without intercourse; how it feels not to have an orgasm during sex; the importance of clitoral stimulation and masturbation; and to name the greatest pleasures and frustrations of their sexual lives, among many other questions. The Hite Report declares that orgasm is easy and strong for women, given the right stimulation; that most women have orgasm most easily during masturbation or clitoral stimulation by hand; that sex as we define it is a cultural institution, not a biological one; and that attitudes must change to include the stimulation women desire.
