Stand for Life - John Ensor 2022-05-03

Of the 1.2 million abortions performed annually in the U.S., more than 500,000 are performed on college-aged women. They make up 44% of all abortions in the country. So it is not surprising that there is a large, thriving network of pro-life groups on college campuses. These groups serve to advocate for pro-life and educate other young people about the physical, emotional, psychological and spiritual effects that abortion has on women. While there are online guides and booklets on the topic, there are currently very few if any books that are specifically geared for use by young advocates for this cause. Now there is Stand for Life, a manual that addresses tough questions in a format that is concise and straightforward. Topics include: Defending your pro-life views in five minutes or less Understanding the sanctity of human life Simplifying the abortion debate Developing a Christian response to abortion Debate: keeping cool under fire Q&As about such thorny issues as unsafe abortions, abortion when mothers lives are at risk, my body, my choice, and more

In Search of Common Ground on Abortion - Robin West 2016-05-23

This book brings together academics, legal practitioners and activists with a wide range of pro-choice, pro-life and other views to explore the possibilities for cultural, philosophical, moral and political common ground on the subjects of abortion and reproductive justice more generally. It aims to rethink polarized positions on sexuality, morality, religion and law, in relation to abortion, as a way of laying the groundwork for productive and collaborative dialogue. Edited by a leading figure on gender issues and emerging voices in the quest for reproductive justice - a broad concept that encompasses the interests of men, women and children alike - the contributions both search for 'common ground' between opposing positions in our struggles around abortion, and seek to bring balance to these contentious debates. The book will be valuable to anyone interested in law and society, gender and religious studies and philosophy and theory of law.

Victims and Victors - David C. Reardon 2000-01-01

Abortion, Motherhood, and Mental Health - Ellie Lee

Whatever reproductive choices women make--whether they opt to end a pregnancy through abortion or continue to term and give birth--they are considered to be at risk of suffering serious mental health problems. According to opponents of abortion in the United States, potential injury to women is a major reason why people should consider abortion a problem. On the other hand, becoming a mother can also be considered a big risk. This fine, well-balanced book is about how people represent the results of reproductive choices. It examines how and why pregnancy and its various outcomes have come to be discussed this way. The author's interest in the medicalization of reproduction--its representation as a mental health problem--first arose in relation to abortion. There is a very clear contrast between the construction of women who have abortions, implied by moralized argument against abortion, and the construction that results when the case against abortion focuses on its effects on women's mental health. Lee argues that claims that connect abortion with mental illness have been limited in their influence, but this is not to suggest that they have not become a focus for discussion and have had no impact. The limits to such claims about abortion do not, by any means, suggest limits to the process of the medicalization of pregnancy more broadly, that is, a process of demedicalization. The final theme of Ellie Lee's book is the selective medicalization of reproduction. Centering on the claim that abortion can create a post abortion syndrome, the author examines the "medicalization" of the abortion problem on both sides of the Atlantic. Lee points to contrasts in legal and medical dimensions of the abortion issue that make for some important differences, but argues that in both the United States and Great Britain, the post-abortion-syndrome claim constitutes an example of the limits to medicalization

and the return to the theme of motherhood as a psychological ordeal. Lee makes the case for looking to the social dimensions of mental health problems to account for and understand debates about what makes women ill. Ellie Lee is research fellow in the Department of Sociology and Social Policy, University of Southampton, Highfield, United Kingdom.

Book of Edward Christian Mythology (Volume IV: Appendixes-Reference) - Edward G. Palmer 2005-06

Today, Christianity is steeped in mythology and Christians are unwittingly headed towards Hell instead of Heaven. They are far away from God and HIS Word. How would you answer these three questions: 1) Do you pray to Jesus? 2) Do you worship Jesus? 3) Do you give all the glory to Jesus? If you've answered yes to even one, you do not know God, HIS only human begotten Son or HIS Word. Many Christians have been programmed with mythology as explained in 2 Timothy and 2 Thessalonians. However, Jesus taught: 1) Pray to God the Father [Matthew 6:6]. 2) Worship only God the Father [Matthew 4:10]. 3) That he comes in his Father's glory [Mark 8:38]. Inside Volume IV (Appendixes-Reference), you'll learn a real salvation prayer and baptism doctrine that makes scriptural sense. You can study a doctrinal statement that will guarantee eternal life if followed. You'll also find thirty (30) alternative cancer cures along with reference material that will enhance your Bible studies. Volume IV of a four volume set that deals with Faith, Prophecy and Christology. Over 1367 Scriptures are cited and there are 238 illustrations/tables/lists in the entire four volume set. A full Index is contained in this volume for all four volumes.

Making Abortion Rare - David C Reardon 2020-07-29

Is it possible for abortion to become rare even though it remains legal under Roe v Wade? Dr. Reardon answers "yes" and lays out an innovative three-pronged strategy for dramatically curtailing abortion rates. Making Abortion Rare reveals a compassionate and comprehensive program of pastoral, political, and educational reform. This carefully considered approach will reduce antagonism, will create a healing environment for those who have been emotionally wounded by abortion, and will draw Americans together through their common concern for women. Pro-life and pro-choice leaders have called this new approach "inspired." Pro-abortion radicals have scorned it as "devious." But all three camps agree that Making Abortion Rare is redefining the abortion debate-forever. This book builds on the previous works of Dr. Reardon, which demonstrate that abortion is hurting more women than it helps. It poses inherent threats to the physical, psychological, social, familial, and spiritual health of women. With a clear, logical, and humane voice, Dr. Reardon provides readers with a practical strategy for preventing over 80% of all abortions . . . those that are fundamentally unwanted (coerced) or unsafe. About the Author David C. Reardon, Ph.D., is a biomedical ethicist, researcher, and director of the Elliot Institute for Social Sciences Research. He has been involved in post-abortion research and education since 1983 and is considered a leading expert on post-abortion issues. Dr. Reardon is the author of numerous of peer reviewed medical studies about abortion's risks. His related books include: Aborted Women, Silent No More; The Jericho Plan: Breaking Down the Walls Which Prevent Post-Abortion Healing; Victims and Victors: Speaking Out About Their Pregnancies, Abortions, and Children Resulting From Sexual Assault; and (with Dr. Theresa Burke) Forbidden Grief: The Unspoken Pain of Abortion.
