Gender and Social Psychology - Vivien Burr 2002-09-11

Explaining theory and research in an accessible but thorough manner, Gender and Social Psychology critically evaluates the contribution that psychology has made to the study of gender, examining key issues such as family roles and parenting, inequalities in education, jobs and pay, and the effects of media representation of the sexes.

Handbook of the Psychology of Women and Gender - Rhoda K. Unger 2004-04-21

A lively, thought-provoking exploration of the latest theory and practice in the psychology of women and gender Edited by Rhoda Unger, a pioneer in feminist psychology, this handbook provides an extraordinarily balanced, in-depth treatment of major contemporary theories, trends, and advances in the field of women and gender. Bringing together contributions from leading U.S. and international scholars, it presents integrated coverage of a variety of approaches—ranging from traditional experiments to postmodern analyses. Conceptual models discussed include those that look within the individual, between individuals and groups, and beyond the person-to the social-structural frameworks in which people are embedded as well as biological and evolutionary perspectives. Multicultural and cross-cultural issues are emphasized throughout, including key variables such as sexual orientation, race/ethnicity, and social class. Researchers and clinicians alike will appreciate the thorough review of the latest thinking about gender and its impact on physical and mental health—which includes the emerging trends in feminist therapy and sociocultural issues important in the treatment of women of color. In addressing developmental issues, the book offers thought-provoking discussions of new research into possible biological influences on gender-specific behaviors; the role of early conditioning by parents, school, and the media; the role of mother and mothering; gender in old age; and more. Power and gender, as well as the latest research findings on American men's ambivalence toward women, sexual harassment, and violence against women, are among the timely topics explored in viewing gender as a systemic phenomenon. Handbook of the Psychology of Women and Gender is must reading for mental health researchers and practitioners, as well as scholars in a variety of disciplines who want to stay current with the latest psychological/psychosocial thinking on women and gender.

Coping with Threatened Identities - Glynis M. Breakwell 2015-06-19

People cope with threats to their identities in many different ways. Until the original publication of this title in 1986, there had been no theoretical framework within which to analyse their strategies for doing this, or to examine the nature and impact of the threatening experiences themselves. In this elegant and original book, Glynis Breakwell proposes an integrative model which explores the structure of identity and the principles directing its development. Focusing on examples of threat such as unemployment, sexually atypical employment and ethnic marginality, Breakwell examines the relation of the individual to social change. Through her sensitive use of case studies, she enables the victims of threat to speak for themselves about their experiences and feelings. Their reactions illustrate her proposed framework of three levels of coping strategies – intra-psychic, interpersonal and intergroup – and her assessment of the factors which limit the success of such strategies. The case studies also point to new evidence on the effects of unemployment and the impact of youth training schemes at the time. This title would have been essential reading for a range of undergraduate courses in social and abnormal psychology and individual differences, as well as for postgraduate training in clinical and medical psychology at the time. Social workers, counsellors and all those concerned with the care of the sufferers of threatened identities will still find it both informative and influential.

Under Attack, Fighting Back - Mimi Abramovitz 2000-03

Social Theory of Modern Societies - David Held 1989-12-07

This book offers a comprehensive appraisal of the work of Anthony Giddens, who is known worldwide as one of the leading figures in social theory and the social sciences. During the last decade Giddens has published a series of substantial volumes which have defined a distinctive and original theoretical approach. The twin focal points of his approach are the 'theory of structuration' and the analysis of 'modernity'. Giddens's writings on these and related themes are widely recognized as among the most important contributions to theoretical debate in the

social sciences. *Social Theory of Modern Societies* is the first volume to provide a systematic and critical assessment of Giddens's contributions. The volume includes eleven critical essays - all of which were specially commissioned for this volume - by authors who are well known in their own fields: Zygmunt Bauman, Richard J. Bernstein, Derek Gregory, Nicky Gregson, David Held, Bob Jessop, Linda Murgatroyd, Peter Saunders, Martin Shaw, John B. Thompson and Erik Olin Wright. In a long concluding chapter, Anthony Giddens responds to the criticisms raised by these and other authors, clarifying and elaborating his current views. The result is a unique and engaging book which gives both a critical evaluation of Giddens's work and a guide to some of the theoretical issues which are at the forefront of the social sciences today. It will be of interest to students and academics in sociology, politics and geography, and to students in the social sciences and humanities generally.

Gender, Class and Education (Routledge Revivals) - Stephen Walker 2013-11-05

First published in 1983, *Gender, Class and Education* is a collection of papers that formed presentations at the Westhill Sociology of Education Conference in January 1982, and is the fifth such collection to emerge from the annual conference. The conference theme, 'Race, Class and Gender', was not only chosen because of its topicality, but also to provide a framework for debate between educational researchers and teachers. The papers focus on the reproduction of gender relations through education and provide important insights into how this process works, how it is resisted in schools and colleges, and the possibilities for radical intervention. This volume includes three teaching bibliographies on gender and education which were not presented at the conference, but were compiled specially for the book.

Within School Walls - AnnMarie Wolpe 2012-05-16

Drawing from her in-depth ethnographic study of a London comprehensive school the author shows how gender formation for both girls and boys is mediated by disciplinary control, sexuality and the curriculum. Her findings for girls and boys - with their important emphases - are revealed. So are the responses and perspectives of the teachers. Prior to publication of this volume much feminist writing depicted the subordination of girls as a function of patriarchal control, both in terms of the teaching the girls receive and the behaviour of the boys around them. The author's narrative implicitly and explicitly challenges some of these views.

Passport to Heaven (RLE Women and Religion) - Kathleen S. Lowney 2014-10-03

This book focuses on the gender roles within the Unification Church, and on particularly the gender roles as expressed through the vows of marriage. It examines the more widely shared patriarchal assumptions about women in a circumscribed socio-religious environment, with the Church's gender role system being investigated largely on the level of its theological explanations for gender roles. The Church's ethos, its lived reality, is also examined, and for this many interviews have been conducted with the 'blessed', the married couples. First published in 1992.

Representing Women? - Mercedes Mateo Diaz 2005

This work discusses questions on political participation, representation and legitimacy in the European Union national parliaments. Three major empirical questions structure the book: What affects women's presence in parliaments?, Does the number of women in parliament have an effect? And are women in parliament representing women? Empirical evidences show that institutional reforms need a 'minimal environment' in terms of socio-economic development so as to prove effective. As opposed to the critical mass theory, claiming that a few representatives cannot have an impact on the political outcomes, here the empirical evidences suggest that smaller groups can also influence the different components of the legislative process. The last part turns to the fundamental question of whether a parliament that is descriptively representative, i.e. in which the parliamentarians share certain characteristics with the voters, also is a substantively descriptive parliament, i.e. in which the parliamentarians mirror the voters' opinions.
