C. G. Jung and the Dead - Stephani L. Stephens 2019-07-05

C. G. Jung and the Dead: Visions, Active Imagination and the Unconscious Terrain offers an in-depth look at Jung's encounters with the dead, moving beyond a symbolic understanding to consider these figures a literal presence in the psyche. Stephani L. Stephens explores Jung's personal experiences, demonstrating his skill at visioning in all its forms as well as detailing the nature of the dead. This unique study is the first to follow the narrative thread of the dead from Memories, Dreams, Reflections into *The Red Book*, assessing Jung's thoughts on their presence, his obligations to them, and their role in his psychological model. It offers the opportunity to examine this previously neglected theme unfolding during Jung's period of intense confrontation with the unconscious, and to understand active imagination as Jung's principle method of managing that unconscious content. As well as detailed analysis of Jung's own work, the book includes a timeline of key events and case material. *C. G. Jung and the Dead* will offer academics and students of Jungian and post-Jungian studies, the history of psychology, Western esoteric history and gnostic and visionary traditions a new perspective on Jung's work. It will also be of great interest to Jungian analysts and psychotherapists, analytical psychologists and practitioners of other psychological disciplines interested in Jungian ideas.

Sleep Paralysis - Shelley R. Adler 2011

Sleep Paralysis explores a distinctive form of nocturnal fright: the "night-mare," or incubus. In its original meaning a night-mare was the nocturnal visit of an evil being that threatened to press the life out of its victim. Today, it is known as sleep paralysis—a state of consciousness between sleep and wakefulness, when you are unable to move or speak and may experience vivid and often frightening hallucinations. Culture, history, and biology intersect to produce this terrifying sleep phenomenon. Although a relatively common experience across cultures, it is rarely recognized or understood in the contemporary United States. Shelley R. Adler's fifteen years of field and archival research focus on the ways in which night-mare attacks have been experienced and interpreted throughout history and across cultures and how, in a unique example of the effect of nocebo (placebo's evil twin), the combination of meaning and biology may result in sudden nocturnal death.

Into the Heart's Land - Henry Barnes 2005-08

Henry Barnes, the author of *A Life for the Spirit*, brings us a comprehensive view of the roots and development of anthroposophy throughout North America. From its seminal beginnings with a few hearty souls in New York City, it moved across the prairies to the west coast and beyond, to Canada, Mexico, and Hawaii, and took root in the hearts and minds of the "new world." Here is the story of those adventurous spirits who took responsibility for bringing the work of Rudolf Steiner to North America in the form of study groups, agricultural initiatives, Waldorf and special education, the arts, and so much more.

New Essential Steiner - Steiner, Rudolf 2009-10

The New Essential Steiner is an illuminating, completely new introduction to the philosophy and essential writings of Rudolf Steiner, introduced and edited by Robert McDermott, who also edited the now-classic *Essential Steiner*. This new volume offers selections from a wide variety of Steiner's published works, presenting a broad, accessible

overview of Anthroposophy. In his introduction, McDermott recounts Steiner's life and work, from his childhood and education to his work as a natural scientist, philosopher, scholar, educator, artist, interpreter of culture, and seer. He places Steiner in relation to major traditions of thought and explores the genesis and development of Anthroposophy. Although Rudolf Steiner is considered by many to be the greatest spiritual seer and philosophical thinker of the twentieth century and is credited with major cultural contributions such as the worldwide Waldorf school movement and the ever-growing biodynamic agricultural movement, he nevertheless remains relatively unknown to both academics and the public. The purpose of this volume is to redress that situation by introducing Steiner's work to a broader audience and making his name more universally recognized. *The New Essential Steiner* includes selections from Steiner's writings, which are grouped into chapters that demonstrate the breadth of his thinking and spiritual accomplishments.

Steiner and Kindred Spirits - Robert McDermott 2015-08-01

Rudolf Steiner (1861–1925), the Austrian founder of Anthroposophy, is frequently viewed by those familiar with his teaching as unique and separate from other spiritual teachers of our modern era. While, Steiner is thought by anthroposophists to be a scientist and a philosopher, as well as an interpreter of events depicted in Christian scriptures, he is nevertheless generally ignored by scientists and philosophers, as well as by both liberal and fundamentalist scriptural scholars and theologians. In this book, Robert McDermott—the editor of *American Philosophy* and *Rudolf Steiner*, which investigates Steiner's philosophy in the context of American philosophers—places Steiner and his work in the context of a variety of spiritual teachers and teachings, both Western and Eastern. In doing so, the reader is guided to new perspectives that show the similarities and contrasts between Steiner's Spiritual Science and a number of Christian, Hindu, Buddhist, and secular spiritual worldviews. The kindred spirits in this book include His Holiness the Dalai Lama, C. G. Jung, Teilhard de Chardin, Martin Buber, Sri Aurobindo, Rabindranath Tagore, Gandhians, feminists, ecologists, and more. Steiner went as far up the spiritual ladder as any modern individual but, unlike some enthusiasts for Steiner, McDermott is also impressed by other religious thinkers and spiritual practitioners who have been helpful to those of us in need of encouragement and guidance and whose vistas and insights may not have been researched or explained by Steiner. For those with unbiased, open minds, this book presents a fresh look at Rudolf Steiner, a modern spiritual initiate, and his contributions to the world, along with a generous and appreciative view of his kindred spirits of our time.

What is Anthroposophy? - Rudolf Steiner 2002

3 selected lectures by Rudolf Steiner This is one of those books that can change your life. Radical, thought-provoking, and indeed mind-boggling, it leads to a completely new way of looking at what it means to be human—a spiritual being in a universe that itself is not just physical, but psychic and spiritual as well. These three previously untranslated lectures are a masterly introduction to what Rudolf Steiner means by "Anthroposophy." They explain why Steiner describes this path—which means literally "the wisdom of the human being"—as one that "unites what is spiritual in the human being with what is spiritual in the universe." Steiner begins by describing what happens when we die. He shows the relationship between our physical life on Earth and the etheric, astral, and spiritual life of the cosmos. He also explains how physical lives are completely interwoven with cosmic existence, and how the "miss-ing links" in evolution are spiritual in nature. Steiner then demonstrates what he calls the "dilettantism" and "soullessness" of mainstream psychology. He points out that, since the second half of the nineteenth century, the idea of the soul has been lost and that, consequently, understanding of our inner lives is without a sure foundation. A very different view emerges, however, from a truly spiritual perspective. In the third lecture, Steiner takes as his guide our three states of being—waking, dreaming, and sleeping. He describes in detail what happens in these three states and how each is bound up with our lives as physical, psychic, and spiritual beings. With the profound insights in this book, the world becomes a much larger, richer, and more

exciting place to live.

Staying Connected - Rudolf Steiner 1999-11-01

Rudolf Steiner's extraordinary ability to perceive the inner nature and development of children provided insights at many levels and areas of the creative learning process. He spoke of this ability as a precondition for all forms of healthy childhood education--including special education--and suggested that teachers should develop such a capacity within themselves. This process involves the recreation of the child within oneself, based on what we are able to observe in the child's physical appearance, temperament, ways of moving, and environment. In *The Therapeutic Eye*, Dr. Peter Selg discusses Steiner's views on childhood development, how teachers can look at children, and ways that these approaches can be used to develop lessons and classroom activities to deal with behavioral extremes and learning challenges. *The Therapeutic Eye* is a valuable resource for teachers and parents. *The Therapeutic Eye* is a translation from German of *Der therapeutische Blick: Rudolf Steiner sieht Kinder*.

Staying Connected - Rudolf Steiner 1999

The idea of maintaining, continuing, and enhancing our relationships with those who have died was a fundamental part of Rudolf Steiner's work. This volume collects a rich harvest of Steiner's thoughts on this subject gathered over many years. Steiner speaks from his own experiences, providing some of the meditation practices and verses that worked for him. We learn of the value of reading to the dead; of using verbs (rather than nouns) when talking with them; of the importance of the sacred moments while falling asleep and awaking for asking questions and receiving answers; of the way our memories of the dead are like art to them; and of key moods we must develop -- community with the world, gratitude, confidence in the current of life.

Continuing Bonds - Dennis Klass 2014-05-12

First published in 1996. This new book gives voice to an emerging consensus among bereavement scholars that our understanding of the grief process needs to be expanded. The dominant 20th century model holds that the function of grief and mourning is to cut bonds with the deceased, thereby freeing the survivor to reinvest in new relationships in the present. Pathological grief has been defined in terms of holding on to the deceased. Close examination reveals that this model is based more on the cultural values of modernity than on any substantial data of what people actually do. Presenting data from several populations, 22 authors - among the most respected in their fields - demonstrate that the health resolution of grief enables one to maintain a continuing bond with the deceased. Despite cultural disapproval and lack of validation by professionals, survivors find places for the dead in their on-going lives and even in their communities. Such bonds are not denial: the deceased can provide resources for enriched functioning in the present. Chapters examine widows and widowers, bereaved children, parents and siblings, and a population previously excluded from bereavement research: adoptees and their birth parents. Bereavement in Japanese culture is also discussed, as are meanings and implications of this new model of grief. Opening new areas of research and scholarly dialogue, this work provides the basis for significant developments in clinical practice in the field.

Knowledge of Spirit Worlds and Life After Death - Dr Bob Woodward 2020-09-24

'Everyone with a curiosity for spiritual knowledge should read this excellent book.' - Peter John, psychic artist Based on direct communications with his eight spirit guides, Dr Bob Woodward confirms that we have all lived in spirit worlds before our birth - and that we will enter these same realms again after our material deaths. In a very real sense, these higher spirit worlds are actually our true home, he says, rather than our present physical existence, which is only a temporary abode. In consultation with his spirit guides - including a Tibetan Lama, a Jewish Rabbi, a Native American and his personal guardian angel - Bob Woodward gives a detailed survey of our lives in spirit worlds before birth and after death, our relationships there with friends, family and even pets, and our connections with both good and evil spiritual beings. He also gives a commentary on a range of subjects such as reincarnation and climate change. In a final extensive and moving interview, Woodward finds and speaks with the soul of his deceased father, who offers enlightening glimpses of life after death. Whilst the author's knowledge is grounded in decades of study of the work of Rudolf Steiner - with which he compares the results of his own extrasensory perceptions - *Knowledge of Spirit Worlds* is not intended as a dry philosophical study. Rather, it has a warm, experiential quality - based as it is on personal interaction with spirit entities - and emphasizes the love

that connects all worlds and beings together.

At Home in the Universe - Rudolf Steiner 2000

5 lectures at The Hague, November 13-18, 1923 (CW 231) What is our relationship to the planets we see in the night sky? Does the cosmos have any affect on our individual lives? Modern science tells us that we are an insignificant accident in a vast, indifferent universe. Rudolf Steiner maintains that we are intimately enmeshed with the whole cosmos, right down to the very structure of our physical bodies. In these talks, Steiner explores our relationship as individuals to the spiritual cosmos--where we will all become cosmonauts one day. The key to being at home in the universe is to comprehend the significance of our individual, physical lives on Earth and what happens when we leave our physical bodies behind. Steiner describes his view of our journey after death and our subsequent return to Earth and a new life. He describes the "planetary" spheres through which we pass and how they affect our future life. He shows us how our character and actions on Earth affects us after we die, and how those experiences in turn shape our next physical life. This is not just more information to add to our already overloaded store of abstract concepts; Steiner gives imaginative exercises that help us explore our suprasensory, spiritual nature. We can begin right now to act more consciously by recognizing the concrete nature of morality and the real consequences of our present lives. The introduction and comprehensive afterword by Paul Margulies explain and contextualize Steiner's text, revealing a message that is more vital and relevant than ever in our frenzied, materialistic times. This book can help us experience more meaning in life and become more at home as spiritual citizens of the universe. Encountering Rudolf Steiner - Christopher Bamford 2022-04-12

"The deep aim, or intention, of an introduction (understood esoterically) is a 'living understanding,' or, as the poet William Blake put it, the ability 'to catch the bird in flight and fly with it.' If successful, this makes it possible for any reader to hear or translate, into his or her own understanding, what Rudolf Steiner is offering, within and beyond his words, in these texts of *The Collected Works*." --Christopher Bamford Rudolf Steiner's writings and lectures comprise a collection of more than 350 volumes, which can overwhelm anyone hoping to gain an understanding of the vast range of their content. Beginning in the 1990s, as editor in chief of Anthroposophic Press (SteinerBooks), Christopher Bamford wrote introductions to more than fifty books in the English translations, each one offering readers significant context and keys to open up many areas of Steiner's works. This volume presents fifteen of those introductions to some of Steiner's most essential books and lectures on anthroposophic practices, Western esoteric streams, religious renewal, and inner development, as well as practical applications of anthroposophic principles for a threefold society and contributions to modern holistic medicine. Taken together, these introductions provide one of the best possible means of encountering Rudolf Steiner by revealing the background, significance, and relevance of his philosophy and insights for humanity today and in the future. This book is for anyone seeking a way into Steiner's worldview, as well as for those who are already familiar with the work of Rudolf Steiner and wish to delve more deeply into the many aspects of the anthroposophic path of knowledge.

The Reappearance of Christ in the Etheric - Rudolf Steiner 2003

The first chapter of the Acts of the Apostles describes Christ's Ascension: "And a cloud received him out of their sight." As the disciples looked up, two angels appeared and told them, "This same Jesus, taken up from you into heaven, shall come again in the same way as you have seen him go." In 1910, Rudolf Steiner began a series of lectures announcing the advent of Christ's appearance in the sphere of the earth's etheric or life body. At first, he said, only a few will be aware of it, but in time more and more people--regardless of religious affiliation--will be strengthened, comforted and infused by the Christ's living presence. Such "Damascus experiences," bespeaking a new natural clairvoyance, Steiner argues, will become increasingly common. "The Christ will become a living comforter," he writes. "However strange it may seem, it is nevertheless true that often when people, even in considerable numbers, are sitting together not knowing what to do and waiting, they will see the etheric Christ. He will be there, will confer with them, and will cast his word in

such gatherings. We are now approaching these times..." This collection contains Steiner's lectures on this theme, as well as on important related questions, such as spiritual science and etheric vision, the etheric vision of the future, "the etherization of the blood," the Sermon on the Mount and the land of Shambhala, the mysteries of comets and the Moon, Buddhism and Pauline Christianity, spirit beings and the ground of the world, and the three realms between death and rebirth. The Reappearance of Christ in the Etheric collects much of Rudolf Steiner's most important discussions of esoteric Christianity, especially as it relates to the central place of the Christ being in world and human evolution.

Why on Earth? - Signe Ecklund Schaefer 2013-12-01

Life today poses many questions, both in our personal lives and in our participation in nature and the broader culture. We often focus on the outer needs for social, political, technological, or environmental change. However, can we really meet the challenges around us without also attending to our inner life and to our own evolving biography as it reflects and informs the outer world? This book starts from the premise that each of our lives expresses uniqueness of spiritual intention within the unfolding of universal rhythms and possibilities. Can we wake up to the developmental opportunities offered to us through different life phases? Are we able to step out of the narrowness of the dualistic nature-nurture argument and experience that we are both more than our genetic composition and more than a product of the social and educational influences that have shaped us? Can we come to appreciate the learning that our "I" has received through heredity, ethnicity, schooling, and gender without losing a sense of our true individuality? Waking up to our unique self as it grows through interaction with the world and other human beings helps us recognize the significance we all play in one another's biographies and in the unfolding of our larger human story. *Why on Earth?* invites us to explore our own meaning-filled life journey, to bring conscious attention to how we go our path, so that we may more freely perceive our possibilities and our responsibilities along the way of our personal and shared becoming.

Cosmic and Human Metamorphosis - Rudolf Steiner 2012-03-15

"As microcosms we are actually part of, and subject to, the same laws that cosmic beings are, just as the breath we draw is subject to our own human nature.... If our hearts are sensitive to the secrets of cosmic existence and not merely blocks of wood, the words we have been placed into the universe will no longer be an abstract statement. We will be fully alive to this fact. Knowledge and a feeling will spring up within us, the fruits of which will be born in our will impulses, and our whole being will live in unison with the great life, divine cosmic existence." --Rudolf Steiner In this important series of lectures, Rudolf Steiner lays out for Society members right and wrong ways of establishing connections with those who have died. Rather than following the materialistic desire to draw those who have died back into the physical realm, Steiner presents a means toward true spiritual union through strengthening one's forces of consciousness. He also showed how help is provided from the sphere of Christ's activity as a balance for our time. Steiner stated: "One who

sees into the deeper meaning intended by our spiritual science recognizes in it not merely theoretical knowledge about all sorts of human problems, the members of the human being, reincarnation and karma, but one looks in it for an entirely different language, a way to express oneself in regard to spiritual matters. The fact that we learn through spiritual science to speak inwardly in our thoughts with the spiritual world is far more important than acquiring theoretical ideas. The Christ is with us even until the end of the world. It is his language that we must learn." This book is a translation (translator unknown) of 7 lectures from *Bausteine zu einer Erkenntnis des Mysteriums von Golgatha. Kosmische und menschliche Metamorphose* ("Building Blocks for an Understanding of the Mystery of Golgotha: Cosmic and Human Metamorphoses") 17 lectures (GA 175).

Learning to Dance in the Rain - Lori & Brian McDermott 2011-08-12

When a tragic car accident took the life of our twenty-one year old daughter, Maia, we began a journey that has been paradoxically the most heart-wrenching and spiritually uplifting period of our lives. *Learning to Dance in the Rain* chronicles the first year of this journey. Through pain and despair to renewed energy and spiritual discovery, we write about the many ways in which we are finding strength and inspiration to carry on. With help from family and friends, a variety of religious/spiritual traditions, encounters with the natural world, and, most profoundly, continued connection with our beloved daughter, we are learning that death is as much a beginning as it is an end and that pain can be a catalyst for personal & spiritual growth. It is our greatest hope that sharing our story in this way will help others find strength to face the storms that come their way and live their lives with greater meaning, purpose, and wonder. www.learningtodanceintherain.net

A Drop of Light - Liz Attwell 2020-04-14

A-ha! Working through a topic or question, a shaft of sudden inspiration hits. The cloud of fragmented ideas and thoughts clear as a whole picture begins to form coherently in your mind. What you have now worked out - in an unexpected, exciting eureka moment - will stay with you forever. All teachers seek this experience for their students. Liz Attwell explores theories of education to argue that traditional teaching, 'filling buckets', must be replaced by dynamic, progressive teaching that promotes active learning - not just 'lighting a fire', but knowing how to lay the sticks and finding the matches too. This progressive approach seeks to create a basis for inner awakening and original insight, in order for students ultimately to come to their own a-ha moments. In *A Drop of Light*, Liz Attwell presents her original research into the phenomenon of a-ha moments, offering a theoretical background as well as practical advice to give teachers the tools, lesson plans, anecdotes and inspiration to bring living thinking to their own classrooms. Goethe's approach and Rudolf Steiner's pedagogical ideas make an important contribution, but Attwell advises that teachers following Steiner's philosophy should enter into dialogue with educators from other backgrounds. Working together, enlightened teachers around the world can help schools and colleges to become true learning communities.
