Blackwell Handbook of Social Psychology Abraham Tesser 2008-04-15 This volume on intraindividual processes is one of a set of four handbooks in the social psychology field and covers social cognition, attitudes, and attribution theory. Includes contributions by academics and other experts from around the world to ensure a truly international perspective. Provides a comprehensive overview of classic and current research and likely future trends. Fully referenced chapters and bibliographies allow easy access to further study. Now available in full text online via xreferplus, the award-winning reference library on the web from xrefer. For more information, visit www.xreferplus.com

Love and Electronic Affection Lindsay D. Grace 2020-04-30 Love and Electronic Affection: A Design Primer brings together thought leadership in romance and affection games to explain the past, present, and possible future of affection play in games. The authors apply a combination of game analysis and design experience in affection play for both digital and analog games. The research and recommendations are intersectional in nature, considering how love and affection in games is a product of both player and designer age, race, class, gender, and more. The book combines game studies with game design to offer a foundation for incorporating affection into playable experiences. The text is organized into two sections. The first section covers the patterns and practice of love and affection in games, explaining the patterns and practice. The second section offers case studies from which designers can learn through example. Love and Electronic Affection: A Design Primer is a resource for exploring how digital relationships are offered and how to convey

emotion and depth in a variety of virtual worlds. This book provides:

- A catalog of existing digital and analog games for which love and affection are a primary or secondary focus.
- A catalog of the uses of affection in games, to add depth and investment in both human-computer and player-to-player engagement.
- Perspective on affection game analyses and design, using case studies that consider the relationship of culture and affection as portrayed in games from large scale studios to single author independent games.
- Analysis and design recommendations for incorporating affection in games beyond romance, toward parental love, affection between friends, and other relationships.
- Analysis of the moral and philosophical considerations for historical and planned development of love and affection in human-computer interaction.
- An intersectionality informed set of scholarly perspectives from the Americas, Eurasia, and Oceania.

Editor Bio: Lindsay D. Grace is Knight Chair of Interactive Media and an Associate Professor at the University of Miami School of Communication. He is Vice President for the Higher Education Video Game Alliance and the 2019 recipient of the Games for Change Vanguard award. Lindsay is author of *Doing Things with Games*, *Social Impact through Design* and more than fifty peer-reviewed papers on games and related research. He has given talks at the Game Developers Conference, SXSW, Games for Change Festival, the Online News Association, the Society for News Design, and many other industry events. He was the founding director of the American University Game Lab and Studio and the designer-developer behind several award winning games, including two affection games. He served as Vice President and on the board of directors for the Global Game Jam™ non-profit between 2014 and 2019. From 2009 to 2013 he was the Armstrong Professor at Miami University's School of Art. Lindsay also served on the board for the Digital Games Research Association (DiGRA) between 2013 and 2015.

The Social Construction of Climate Change Mary E. Pettenger 2016-02-24 Individuals, international organizations and states are calling for the world to confront climate change. Efforts such as the Kyoto Protocol have produced intractable disputes and are deemed inadequate. This volume adopts two constructivist perspectives - norm-centred and discourse - to explore the social construction of climate change from a broad, theoretical level to particular cases. The contributors contend that climate change must be understood from the context of social settings, and that we ignore at our peril how power and knowledge structures are generated. They offer a greater understanding of why current efforts to mitigate climate change have failed and provide academics and policy makers with a new understanding of this important topic.

The Dark Side of Close Relationships II William R. Cupach 2010-09-13 Focuses on the paradoxical, dialectical, and mystifying facets of human interaction, not merely to elucidate dysfunctional relationship phenomena, but to help readers explore and understand it in relation to a broader understanding about relationships. This volume is of interest to relationship researchers in social psychology and sociology.

A Generation at Risk Paul R. Amato 2009-07-01 Just what do we know about the current generation of young Americans? So little it seems that we have dubbed them Generation X. Coming of age in the 1980s and '90s, they hail from families in flux, from an intimate landscape changing faster and more profoundly than ever before. This book is the first to give us a clear, close-up picture of these young Americans and to show how they have been affected and formed by the tremendous domestic changes of the last three decades. How have members of this generation fared at school and at work, as they have moved into the world and formed families of their own? Do their struggles or successes reflect the turbulence of their time? These are the questions *A Generation at Risk* answers

in comprehensive detail. Based on a unique fifteen-year study begun in 1980, the book considers parents' socioeconomic resources, their gender roles and relations, and the quality and stability of their marriages. It then examines children's relations with their parents, their intimate and broader social affiliations, and their psychological well-being. The authors provide rare insight into how both familial and historical contexts affect young people as they make the transition to adulthood. Perhaps surprising is the authors' finding that, in this era of shifting gender roles, children who grow up in traditional father-breadwinner, mother-homemaker families and those in more egalitarian, role-sharing families apparently turn out the same. Also striking are the beneficial influence of parental education on children and the troubling long-term impact of marital conflict and divorce--an outcome that prompts the authors to suggest policy measures that encourage marital quality and stability.

Riding With Giants Peter Holmes a Court 2020-01-21 International businessman Peter Holmes à Court left the executive world and found himself living deep in rural France with only his seven-year-old twin girls for company. Peter was struggling as a single father in a foreign country - unsettled by the sudden move away from a traditional job, and completely baffled by the society around him. His only plan: to ride L'Etape du Tour, the challenging amateur leg of the Tour de France. In an effort to find some new friends in the community - and a bike for the race - he discovered the region's small bicycle factory. He was soon spending his days there: photographing his custom bike being built, meeting the locals, and learning about the rich traditions of artisan craftsmanship. Trying to enjoy the simple things and become a better father, Peter slowed down, and started to reflect seriously on history, industry and the structure of our modern economy. He and his daughters finally began to put down roots and understand the beauty and calm of a small-scale existence - and a very different

approach to excellence and the well-lived life. This is one man's compelling, informative and funny story about the wisdom of children, the nature of work today, and the science of bicycles.

Responsible Artificial Intelligence Virginia Dignum 2019-11-04 In this book, the author examines the ethical implications of Artificial Intelligence systems as they integrate and replace traditional social structures in new sociocognitive-technological environments. She discusses issues related to the integrity of researchers, technologists, and manufacturers as they design, construct, use, and manage artificially intelligent systems; formalisms for reasoning about moral decisions as part of the behavior of artificial autonomous systems such as agents and robots; and design methodologies for social agents based on societal, moral, and legal values. Throughout the book the author discusses related work, conscious of both classical, philosophical treatments of ethical issues and the implications in modern, algorithmic systems, and she combines regular references and footnotes with suggestions for further reading. This short overview is suitable for undergraduate students, in both technical and non-technical courses, and for interested and concerned researchers, practitioners, and citizens.

Team Creativity and Innovation Roni Reiter-Palmon 2018 "For the past two decades, creativity and innovation have been viewed by researchers as critical to organizational success and survival. The purpose of this edited book is to provide a state-of-the-art review of the major concepts, current research, and practice issues related to team creativity and innovation"--

field of creativity. To this end, the book contains 22 chapters covering a wide range of issues and topics in the field of creativity, all written by distinguished leaders in the field. The chapters have been written to be accessible to all educated readers with an interest in creative thinking. Although the authors are leading behavioral scientists, people in all disciplines will find the coverage of creativity divided in the arts and sciences to be of interest. The volume is divided into six parts. Part I, the Introduction, sets out the major themes and reviews the history of thinking about creativity. Subsequent parts deal with methods, origins, self and environment, special topics and conclusions.

Applied Factor Analysis in the Natural Sciences Richard A. Reyment 1996-09-28 This graduate-level text aims to introduce students of the natural sciences to the powerful technique of factor analysis and to provide them with the background necessary to be able to undertake analyses on their own. A thoroughly updated and expanded version of the authors' successful textbook on geological factor analysis, this book draws on examples from botany, zoology, ecology, and oceanography, as well as geology. Applied multivariate statistics has grown into a research area of almost unlimited potential in the natural sciences. The methods introduced in this book, such as classical principal components, principal component factor analysis, principal coordinate analysis, and correspondence analysis, can reduce masses of data to manageable and interpretable form. Q-mode and Q-R-mode methods are also presented. Special attention is given to methods of robust estimation and the identification of atypical and influential observations. Throughout the book, the emphasis is on application rather than theory.

The New Science of Intimate Relationships Garth J. O. Fletcher 2008-04-15 Written by one of the world's leading authorities on close relationships, this accessible study is one of the first to look seriously at what science can tell us about love, sex and friendship.

The Psychology of Marriage Frank D. Fincham 1990-06-08 This book describes and evaluates the major contributions social, developmental, and clinical psychologists have made to a scientific understanding of marriage. The book's objective: to foster a deeper appreciation of the knowledge gained from basic and applied psychological research on the marital relationship as well as a better understanding of the issues, assumptions, and controversies that confront researchers and practitioners in the field. Systematically addressing theoretical, methodological, and applied issues in the study of marriage, this ambitious volume shows how this accumulated knowledge informs the practitioner's attempts to cope with practical problems. Among the fundamental issues examined in Part I are * the social psychology of marriage * research methods in the study of marital interdependence * observation of marital interaction * cognition in marriage * gender differences and sex-role identity * the impact of children on marriage * employment and marital functioning * marriage and psychopathology. Focusing on the translation of research into practical interventions, subsequent chapters discuss the prevention and treatment of marital dysfunction, spouse abuse, and sexual dysfunction. Also featured is a review of theoretical orientations in the treatment of marital discord. THE PSYCHOLOGY OF MARRIAGE brings together the work of leading experts in marital research and therapy, each of whom provides a cogent overview of a particular area of clinical research while illuminating the problems frequently encountered in its practical implementation. This authoritative synthesis and update of contemporary psychological research on the marital relationship is a valuable resource for investigators seeking a comprehensive overview of marital research and practitioners wishing to strengthen their skills and learn about the empirical bases for their interventions. The work is suitable for advanced undergraduate or graduate courses on close relationships, marriage, marital therapy, and the family.

Pedagogical Considerations and Opportunities for Teaching and Learning on the Web Thomas, Michael 2013-10-31 "This book concentrates on theory, application, and the development of web-based technologies for teaching and learning and its influence on the education system"--

Atlas of the Human Brainstem George Paxinos 2013-10-22 Work on the human brainstem has been impeded by the unavailability of a comprehensive diagrammatic and photographic atlas. In the authors' preliminary work on the morphology of the human brainstem (The Human Nervous System, 1990), Paxinos et al demonstrated that it is possible to use chemoarchitecture to establish a number of human homologs in structures known to exist in the rat, the most extensively studied species. Now, with the first detailed atlas on the human brainstem in more than forty years, the authors present an accurate, comprehensive, and convenient reference for students, researchers, and pathologists. Key Features * The first detailed atlas on the human brainstem in more than forty years * Delineated as accurately as The Rat Brain in Stereotaxic Coordinates, Second Edition (Paxinos/Watson, 1986), the most cited book in neuroscience * Based on a single brain from a 59-year-old male with no medical history of neurological or psychiatric illness * Represents all areas of the medulla, pons, and midbrain in the plane transverse to the longitudinal axis of the brainstem * Consists of 64 plates and 64 accompanying diagrams with an interplate distance of half a millimeter * The photographs are of Nissl and acetylcholinesterase (AChE) stained sections at alternate levels * Establishes systematically the human homologs to nuclei identified in the brainstem of the rat Reviewed by leading neuroanatomists * An accurate and convenient guide for students, researchers, and pathologists

Cognition in Close Relationships Garth J.O. Fletcher 2013-05-13 The past decade has witnessed an explosion of interest and research on close relationships and social cognition. In both areas, numerous handbooks, textbooks, and journal articles have been published. However, it is the editors' impression that although cognitive theories and concepts have filtered through to research dealing with close relationships, much of this research reflects a relatively untutored understanding of the theoretical and empirical work in social cognition. Conversely, the research literature that provides a more sophisticated perspective on the role of cognition in close relationships typically reveals a relatively limited knowledge of the literature on close relationships. As researchers who have worked in both social cognitive processes and close relationships, Fletcher and Fincham are convinced that each field has much to offer the other. In fact, their book is based on two important postulates: first, that a social cognitive framework offers a valuable resource for developing our understanding of close relationships; and, second, that studying cognition within close relationships has the potential to inform our understanding of basic social cognitive processes.

Identity and Upbringing in South Asian Muslim Families Michela Franceschelli 2017-01-20
What is it like to grow up as a South Asian British Muslim today? What are the experiences of South

Asian Muslim parents bringing up their children in contemporary Britain? Identity and Upbringing in South Asian Muslim Families explores these questions within the context of the series of events which, from 9/11 to the recent upsurge of the Islamic State, have affected the perceptions and the identity of Muslims around the world. Franceschelli reveals the complex range of negotiations behind the coming of age of South Asian Muslim teenagers and reflects on the changes and continuities between their life experiences, priorities and aspirations compared to their parents' generation. Based on primary research with South Asian Muslim young people and parents, this book highlights the importance of Islam to upbringing; the shifting value of South Asian cultural norms in Britain; and the persistent influence of class in shaping inequalities amongst families and on young people's experiences of growing up.

How Brands Become Icons D. B. Holt 2004-09-15 Coca-Cola. Harley-Davidson. Nike. Budweiser. Valued by customers more for what they symbolize than for what they do, products like these are more than brands--they are cultural icons. How do managers create brands that resonate so powerfully with consumers? Based on extensive historical analyses of some of America's most successful iconic brands, including ESPN, Mountain Dew, Volkswagen, Budweiser, and Harley-Davidson, this book presents the first systematic model to explain how brands become icons.

Douglas B. Holt shows how iconic brands create "identity myths" that, through powerful symbolism,

soothe collective anxieties resulting from acute social change. Holt warns that icons can't be built through conventional branding strategies, which focus on benefits, brand personalities, and emotional relationships. Instead, he calls for a deeper cultural perspective on traditional marketing themes like targeting, positioning, brand equity, and brand loyalty--and outlines a distinctive set of "cultural branding" principles that will radically alter how companies approach everything from marketing strategy to market research to hiring and training managers. Until now, Holt shows, even the most successful iconic brands have emerged more by intuition and serendipity than by design. With *How Brands Become Icons*, managers can leverage the principles behind some of the most successful brands of the last half-century to build their own iconic brands. Douglas B. Holt is associate professor of Marketing at Harvard Business School.

Conserving the Oceans Justin Alger 2021 "Conserving the Oceans: The Politics of Large Marine Protected Areas documents the efforts of activists and states to increase the pace and scale of global ocean protections, leading to a new global norm in ocean conservation of large marine protected areas exceeding 200,000 km². Through an analysis of domestic political economies, the book explains how states have protected millions of square kilometers of ocean space while remaining highly responsive to the interests of businesses. It argues that states design environmental policies above all around two key features of a given space: (1) the composition of extractive versus non-extractive industry interests; and (2) the salience of various industry interests, defined as the degree to which businesses would suffer tangible and significant costs in response to new environmental regulations. Through an analysis of large marine protected area advocacy campaigns in Australia, Palau, and the United States, this book demonstrates how the political economy of a given marine space shapes how governments align their environmental and economic goals, sometimes

strengthening conservation but more often than not undermining it. While recognizing important global progress and growing ambition to conserve ocean ecosystems, *Conserving the Oceans* demonstrates that even ambitious large marine protected areas have so far not fundamentally challenged a neoliberal paradigm of environmentalism that has caused considerable ecological harm"--

Individuals in Relationships Steve Duck 1993-06-03 This volume features the latest scholarship on cognitive processes in interpersonal relationships. It explores such questions as: What special knowledge must a person have to participate in a relationship? What particular language structures do people typically use in entering or conducting relationships? Contributors examine the cognitive processes that individuals bring to relationships, ranging from their thought patterns and attributional styles to the ways in which they recall relationship events and use shared knowledge.

Transformational Leadership Bernard M. Bass 2006-08-15 *Transformational Leadership, Second Edition* is intended for both the scholars and serious students of leadership. It is a comprehensive review of theorizing and empirical research that can serve as a reference and starting point for additional research on the theory. It can be used as a supplementary textbook in an intense course on leadership--or as a primary text in a course or seminar focusing on transformational leadership. New in the Second Edition: *New, updated examples of leadership have been included to help illustrate the concepts, as well as show the broad range of transformational leadership in a variety of settings. *New chapters have been added focusing specifically on the measurement of transformational leadership and transformational leadership and effectiveness. *The discussion of both predictors and effects of transformational leadership is greatly expanded. *Much more

emphasis is given to authentic vs. inauthentic transformational leadership. *Suggestions are made for guiding the future of research and applications of transformational leadership. *A greatly expanded reference list is included.

Oceanography and Marine Biology S. J. Hawkins 2019-08-02 Oceanography and Marine Biology: An Annual Review remains one of the most cited sources in marine science and oceanography. The ever increasing interest in work in oceanography and marine biology and its relevance to global environmental issues, especially global climate change and its impacts, creates a demand for authoritative reviews summarizing the results of recent research. This volume covers topics that include resting cysts from coastal marine plankton, facilitation cascades in marine ecosystems, and the way that human activities are rapidly altering the sensory landscape and behaviour of marine animals. For more than 50 years, OMBAR has been an essential reference for research workers and students in all fields of marine science. From Volume 57 a new international Editorial Board ensures global relevance, with editors from the UK, Ireland, Canada, Australia and Singapore. The series volumes find a place in the libraries of not only marine laboratories and institutes, but also universities. Previous volume Impact Factors include: Volume 53, 4.545. Volume 54, 7.000. Volume 55, 5.071. Guidelines for contributors, including information on illustration requirements, can be downloaded on the Downloads/Updates tab on the volume's CRC Press webpage. Chapters 3, 4, 5 and 7 of this book are freely available as a downloadable Open Access PDF under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license. unable to put a dent in out-of-stocks at store level, Why is that? Andre' Martin, Mike Doherty, and Jeff Harrop- all experienced practitioners, consultants, and implementation specialists in the field of time-phased supply chain planning - have been asking themselves the same question and have come to the conclusion that 1) far less forecasting is needed in the retail supply chain and 2) the only forecasting that needs to happen is at the store shelf. Flowcasting the Retail Supply Chain outlines a breakthrough approach for supply chain planning that mimics the natural flow of products from the factory to the consumer. It is the first and only approach that truly puts the consumer front and center when planning the supply chain.

Handbook of Sexuality-Related Measures Robin R. Milhausen 2019-06-25 This classic and invaluable reference handbook, written for sex researchers and their students, has now been completely revised in a new, fourth edition. It remains the only easy and efficient way for researchers to learn about, evaluate, and compare instruments that have previously been used in sex research.

The GEO Handbook on Biodiversity Observation Networks Michele Walters 2016-11-25

Biodiversity observation systems are almost everywhere inadequate to meet local, national and international (treaty) obligations. As a result of alarmingly rapid declines in biodiversity in the modern era, there is a strong, worldwide desire to upgrade our monitoring systems, but little clarity on what is actually needed and how it can be assembled from the elements which are already present. This book intends to provide practical guidance to broadly-defined biodiversity observation networks at all scales, but predominantly the national scale and higher. This is a practical how-to book with substantial policy relevance. It will mostly be used by technical specialists with a responsibility for biodiversity monitoring to establish and refine their systems. It is written at a technical level, but one that is not discipline-bound: it should be intelligible to anyone in the broad field with a tertiary education.

Coral Reef Remote Sensing James A. Goodman 2013-04-18 Remote sensing stands as the defining technology in our ability to monitor coral reefs, as well as their biophysical properties and associated processes, at regional to global scales. With overwhelming evidence that much of Earth's reefs are in decline, our need for large-scale, repeatable assessments of reefs has never been so great. Fortunately, the last two decades have seen a rapid expansion in the ability for remote sensing to map and monitor the coral reef ecosystem, its overlying water column, and surrounding environment. Remote sensing is now a fundamental tool for the mapping, monitoring and management of coral reef ecosystems. Remote sensing offers repeatable, quantitative assessments

of habitat and environmental characteristics over spatially extensive areas. As the multi-disciplinary field of coral reef remote sensing continues to mature, results demonstrate that the techniques and capabilities continue to improve. New developments allow reef assessments and mapping to be performed with higher accuracy, across greater spatial areas, and with greater temporal frequency. The increased level of information that remote sensing now makes available also allows more complex scientific questions to be addressed. As defined for this book, remote sensing includes the vast array of geospatial data collected from land, water, ship, airborne and satellite platforms. The book is organized by technology, including: visible and infrared sensing using photographic, multispectral and hyperspectral instruments; active sensing using light detection and ranging (LiDAR); acoustic sensing using ship, autonomous underwater vehicle (AUV) and in-water platforms; and thermal and radar instruments. **Emphasis and Audience** This book serves multiple roles. It offers an overview of the current state-of-the-art technologies for reef mapping, provides detailed technical information for coral reef remote sensing specialists, imparts insight on the scientific questions that can be tackled using this technology, and also includes a foundation for those new to reef remote sensing. The individual sections of the book include introductory overviews of four main types of remotely sensed data used to study coral reefs, followed by specific examples demonstrating practical applications of the different technologies being discussed. Guidelines for selecting the most appropriate sensor for particular applications are provided, including an overview of how to utilize remote sensing data as an effective tool in science and management. The text is richly illustrated with examples of each sensing technology applied to a range of scientific, monitoring and management questions in reefs around the world. As such, the book is broadly accessible to a general audience, as well as students, managers, remote sensing specialists and anyone else

working with coral reef ecosystems.

Empathic Accuracy William John Ickes 1997-01-01 Empathic inference, or "everyday-mind reading", is a form of complex psychological inference in which observation, memory, knowledge, and reasoning are combined to yield insights into the subjective experience of others. This comprehensive volume addresses the question of how accurate our "readings" of thoughts and feelings of others actually are, introducing two innovative methods for objectivity measuring this key dimension of social intelligence. Presenting cutting-edge research in this emerging area, the volume offers essential insights into how and why people sometimes succeed, and sometimes fail, in their attempts to understand each other. Leading experts cover such topics as the evolutionary and social-developmental origins of empathic accuracy; physiological aspects of empathic accuracy; gender and other individual difference variables; empathic accuracy and processes of mental control; the dynamic role of empathic accuracy in personal and psychotherapeutic relationships; and the relation of empathic accuracy to applied domains in psychology. This book will be of interest to students, researchers, and professionals in a range of disciplines, including personality and social psychology, clinical and counseling psychology, communication, developmental psychology, and marriage and family studies.

Handbook of Personal Relationships Steve Duck 1997 As the field of social relationships has grown enormously, this edition has been revised to include a new section on family relationships, focusing on the central truth that the dynamics of personal relationships are a key basis of social life.

Qualitative Research for the Information Professional G. E. Gorman 2005 This established text is the only introduction to qualitative research methodologies in the field of library and information management. Its extensive coverage encompasses all aspects of qualitative research work from conception to completion, and all types of study in a variety of settings from multi-site projects to data organization. The book features many case studies and examples, and offers a comprehensive manual of practice designed for LIS professionals. This new edition has been thoroughly revised and includes three new chapters. It has been updated to take account of the substantial growth in the amount and quality of web-based information relevant to qualitative research methods and practice, and the many developments in software applications and resources. The authors have identified a clear need for a new chapter on the evaluation of existing research, as a gateway into new research for information professionals. The final chapter, 'Human Resources In Knowledge Management', takes the form of a model case study, and is an 'ideal' qualitative investigation in an information setting. It exemplifies many of the approaches to qualitative research discussed in earlier chapters. Readership: Directed primarily at the beginner researcher, this book also offers a practical refresher in this important area for the more experienced researcher. It is a useful tool for all practitioners and researchers in information organizations, whether libraries, archives, knowledge management centres, record management centres, or any other type of information service provider.
