The Carbon Almanac - The Carbon Almanac Network
2022-08-11

When it comes to the climate, we don't need more marketing or anxiety. We need established facts and a plan for collective action. The climate is the fundamental issue of our time, yet it seems we can barely agree on what is really going on, let alone what needs to be done. We urgently need facts, not opinions. Insights, not statistics. The Carbon Almanac is a once-in-a-lifetime collaboration between hundreds of writers, researchers, thinkers, and leaders that focuses on what

we know, what has come before, and what might happen next. With thousands of data points, articles and charts explaining carbon's impact on everything in our society, from our the economy to extreme weather events, it is the definitive source for facts and the basis for a global movement to fight climate change. This book isn't what the oil companies, marketers, activists, or politicians want you to believe. This is what's really happening, right now. Our planet is in trouble, and no one concerned group, corporation, country, or hemisphere can address this on its own. We are in this together. And it's not too late for concerted, collective action for change.

Reordering Nature - Celia Deane-Drummond 2003-02-01

In this book experts in the environment, theology and science argue that the challenge posed to society by biotechnology lies not only in terms of risk/benefit analysis of individual genetic technologies and interventions, but also has implications for the way we think about human identity and our relationship to the natural world. Such a profound--they would suggest religious--challenge requires a response that is genuinely interdisciplinary in nature, a conversation that draws as much on expertise in theology and philosophy as on the natural sciences and risk assessment techniques. They argue that an adequate response must also be sociologically informed in at least two ways. First it must draw on contemporary sociological insights about contemporary cultural change, the complex role of expert knowledge in modern complex society and the specific social dynamics of contemporary technological risks. Secondly, it must endeavour to pay

sensitive attention to the voice of the lay public in the current controversy over the new genetics. This book attempts to realise such an aim, as a contribution not just to academic scholarship, but also to the public debate about biotechnology and its regulation. Thus the collection includes contributions from scholars in a range of intellectual domains (indeed, many of the chapters themselves draw on more than one discipline in new and challenging ways). The book invites the reader to enter into this conversation in a creative way and come to appreciate more fully the many-sided nature of the debate.

Yellow Woman and a Beauty of the Spirit - Leslie Marmon Silko 2013-04-30

Bold and impassioned, sharp and defiant, Leslie Marmon Silko's essays evoke the spirit and voice of Native Americans. Whether she is exploring the vital importance literature and language play in Native American heritage, illuminating the inseparability of the land and the Native American people, enlivening the ways and wisdom of the old-time people, or exploding in outrage over the government's long-standing, racist treatment of Native Americans, Silko does

so with eloquence and power, born from her profound devotion to all that is Native American. *Yellow Woman and a Beauty of the Spirit* is written with the fire of necessity. Silko's call to be heard is unmistakable; there are stories to remember, injustices to redress, ways of life to preserve. It is a work of major importance, filled with indispensable truths--a work by an author with an original voice and a unique access to both worlds.

Barack Obama's America - John White 2009-09-08

"White's Barack Obama's America eloquently captures both the important nuances of the current political scene and its long-term consequences." --- Richard Wirthlin, former pollster for Ronald Reagan
"This delightfully written and accessible book is the best available account of the changes in culture, society, and politics that have given us Barack Obama's America." --- Stan Greenberg, pollster for Bill Clinton and Chairman and CEO of Greenberg Quinlan Rosner Research "From one of the nation's foremost experts on how values shape our politics, a clear and compelling account of the dramatic shifts in social attitudes that are transforming American political culture. White's masterful blend of narrative and data illuminates the arc of electoral history from Reagan to Obama, making a powerful case for why we are entering a new progressive political era." - --Matthew R. Kerbel, Professor

of Political Science, Villanova University, and author of Netroots "John Kenneth White is bold. He asks the big questions . . . Who are we? What do we claim to believe? How do we actually live? What are our politics? John Kenneth White writes compellingly about religion and the role it played in making Barack Obama president. White's keen insight into America's many faiths clarifies why Barack Obama succeeded against all odds. It is a fascinating description of religion and politics in twenty-first-century America---a must-read." --- Kathleen Kennedy Townsend, former Lieutenant Governor of Maryland and author of *Failing America's Faithful* "In Barack Obama's America, John Kenneth White has written the political equivalent of Baedeker or Michelin, the definitive guide to and through the new, uncharted political landscape of our world. White captures and explains what America means---and what it means to be an American---in the twenty-first century." ---Mark Shields,

nationally syndicated columnist and political commentator for PBS NewsHour "John White has always caught important trends in American politics that others missed. With his shrewd analysis of why Barack Obama won, he's done it again." ---E. J. Dionne, Jr., Senior Fellow, Brookings Institution, and University Professor in the Foundations of Democracy and Culture at Georgetown University The election of Barack Obama to the presidency marks a conclusive end to the Reagan era, writes John Kenneth White in *Barack Obama's America*. Reagan symbolized a 1950s and 1960s America, largely white and suburban, with married couples and kids at home, who attended church more often than not. Obama's election marks a new era, the author writes. Whites will be a minority by 2042. Marriage is at an all-time low. Cohabitation has increased from a half-million couples in 1960 to more than 5 million in 2000 to even more this year. Gay marriages and civil unions are redefining

what it means to be a family. And organized religions are suffering, even as Americans continue to think of themselves as a religious people. Obama's inauguration was a defining moment in the political destiny of this country, based largely on demographic shifts, as described in Barack Obama's America. John Kenneth White is Professor of Politics at the
