The Family in Clinical Psychiatry - Sidney Bloch 1994

The Family in Clinical Psychiatry breaks new ground by considering the role of family factors in psychiatric illness. This is not another book on family therapy but a comprehensive biopsychosocial account of how family issues are relevant to the assessment and management of every psychiatric illness. This book serves as a scholarly and authoritative guide for the clinician facilitating an integrated approach to psychiatric illness. This is the first book to acknowledge the importance of the family in clinical psychiatry and will be the standard reference for all psychiatrists and other allied health professionals and trainees.

[Eating Disorders and Marital Relationships](#) - Jan Norre 2006-04-19

Anorexia and bulimia are on the increase in the Western world and the disease is now recognised to no longer be only a problem for teenage girls, but older women as well. Most older women either do now or did previously live with a partner and much attention has been paid to these relationships in devising therapeutic regimes. Eating Disorders and Marital Relationships takes a critical look at the evidence behind the assumption of psychiatric illness in the patients and their partners and comes up with some surprising results. Van den Broucke, Vandereycken and Norre carefully describe both the theoretical and practical implications of their work, making this book important reading for both practitioner and researcher.

In verband met dit laatste (onderwijs) vooral aandacht voor de mate waaring het onderwijssysteem de bestaande sekse-ongelijkheid in stand houdt.

[Systems Consultation](#) - Lyman C. Wynne 1986-06-19

Systems Consultation challenges two basic assumptions of family therapy: first, that what family therapists should be doing is curing pathology; second, that family interactions can be understood by focusing on families to the exclusion of larger systems. In asking whether

therapy is the best and only model for what family therapists do, this book registers a definitive no. In its place it offers a systems consultation role that more accurately captures the range of activities therapists can and currently do engage in.

The Future of Marriage - Jessie Bernard 1982-01-01

Dr. Bernard examines recent research findings on the present nature of the marriage commitment and predicts a less restrictive role for women in future marriages.

Lectures on the Psychology of Women - Joan C. Chrisler 2012-12-21

Designed as a supplement in courses on the psychology of women, the psychology of gender, and gender-role development, this collection of short, accessible lectures, written by experienced and committed teachers, spotlights topics that often receive less in-depth coverage in core textbooks. While topically arranged to align with standard texts, each favorite lecture stands alone: essentially instructors can assign the readings to meet their own course needs. Among the student-friendly features are the informal writing styles, with each author speaking directly to the reader; questions and ideas that encourage critical thinking; and biographical statements and photographs that introduce each contributor. The authors represent a variety of personal backgrounds and experiences, but they believe in the importance of gender equality. To that point, the book addresses common feminist themes, including the social construction of gender, power, the value of diversity, inclusive language, the global status of women, and the value

of social activism.
