Splitting - Amanda Ellison 2022-01-11

A leading neurologist lifts the lid on head pain--a fascinating, accessible guide to headaches, with some practical advice along the way. Packed with practical advice and information from a neurologist--from what causes migraines to how sinus pain happens to whether we should just reach for the painkillers and ignore the root causes-- this is *Why We Sleep* for the head. There is nothing novel about headache. Since time immemorial, humans have suffered in its grip. Medieval Persia was a hotbed of intense debate over how to avoid and subsequently cure headache, and castor oil seemed to be prevalent as a remedy. Thankfully we have moved on. Darwin became a recluse because of his headaches, but on the bright side, this gave him more time to stay at home and think about the origin of the species. I doubt any modern human sees their headache as being a blessing, but it is trying to tell you something. How do we find out what that is? What is the point of pain?

Sex Sounds - Danielle Shlomit Sofer 2022-07-05

An investigation of sexual themes in electronic music since the 1950s, with detailed case studies of "electrosexual music" by a wide range of creators. In *Sex Sounds*, Danielle Shlomit Sofer investigates the repeated focus on sexual themes in electronic music since the 1950s. Debunking electronic music's origin myth—that it emerged in France and Germany, invented by Pierre Schaeffer and Karlheinz Stockhausen, respectively—Sofer defines electronic music more inclusively to mean any music with an electronic component, drawing connections between academic institutions, radio studios, experimental music practice, hip-hop production, and histories of independent and commercial popular music. Through a broad array of detailed case studies—examining music that ranges from Schaeffer's *musique concrète* to a video workshop by Annie Sprinkle—Sofer offers a groundbreaking look at the social and cultural impact sex has had on audible creative practices. Sofer argues that "electrosexual music" has two central characteristics: the feminized voice and the "climax mechanism." Sofer traces the historical fascination with electrified sex sounds, showing that works representing women's presumed sexual experience operate according to masculinist heterosexual tropes, and presenting examples that typify the electroacoustic sexual canon. Noting electronic music history's exclusion of works created by women, people of color, women of color, and, in particular Black artists, Sofer then analyzes musical examples that depart from and disrupt the electroacoustic norms, showing how even those that resist the norms sometimes reinforce them. These

examples are drawn from categories of music that developed in parallel with conventional electroacoustic music, separated—segregated—from it. Sofer demonstrates that electrosexual music is far more representative than the typically presented electroacoustic canon.
