Criminalising the Purchase of Sex - Jay Levy 2014-09-15

In an attempt to abolish prostitution, Sweden criminalised the purchase of sex in 1999, while simultaneously decriminalising its sale. In so doing, it set itself apart from other European states, promoting itself as the pioneer of a radical approach to prostitution. What has come to be referred to as 'the Swedish model' has been enormously influential, and has since been adopted and proposed by other countries. This book establishes the outcomes of this law - and the law's justifying narratives - for the dynamics of Swedish sex work, and upon the lives of sex workers. Drawing on recent fieldwork undertaken in Sweden over several years, including qualitative interviewing and participant observation, Jay Levy argues that far from being a law to be emulated, the Swedish model has had many detrimental impacts, and has failed to demonstrably decrease levels of prostitution. *Criminalising the Purchase of Sex: Lessons from Sweden* utilises a wealth of respondent testimony and secondary research to redress the current lack of primary academic research and to contribute to academic discussion on this politically-charged and internationally relevant topic. This original and timely work will be of interest to sex worker rights organisations, policy makers and politicians, as well as researchers, academics and students across a number of related disciplines, including law, sociology, criminology, human geography and gender studies.

Sinners and Citizens - Jens Rydström 2003-11-15

Sinners and Citizens explores how sexual habits changed in Sweden during its development from an agrarian society into a modern welfare state. Jens Rydström examines the history of homosexuality and bestiality in that country to consider why these sexual practices have been so closely linked in virtually all Western societies. He limns sharply the distinctive experience of rural life, showing that to regularly witness farm animals stirred passions and sparked ideas, especially among young farmhands. Based on medical journals, psychiatric reports, and court records from the period, as well as testimonies from men in diaries, letters, and interviews, *Sinners and Citizens* reveals that bestiality was once a dreaded crime in Sweden. But in time, mention of the practice disappeared completely from legal and medical debates. This, Rydström contends, is because models of penetrative sodomy shifted from bestiality to homosexuality as Sweden transformed from a rural society into a more urban one. As the nation's economy and culture became less identified with the countryside, so too did its idea of deviant sexual behavior.

Prostitution Policy in the Nordic Region - May-Len Skilbrei 2016-04-08

There is great interest internationally in the development of prostitution policies in the Nordic countries after Sweden, Norway and Iceland have introduced general bans against buying sex whilst selling sex remains legal. In addition, there is a partial ban against buying sex in Finland. This is a different approach from that of several other European countries, where we have seen a decriminalisation of third-party involvement in prostitution as well as to that of the USA which criminalises both the buying and selling of sexual services. Thus the

Nordic countries are often treated as representatives of a 'Nordic model' of prostitution policies. In this book - the first on the subject - Skilbrei and Holmström argue that these models of policies or policy regimes tend to ignore the trajectories, contexts and consequences of the full range of approaches to prostitution, thus they are too simplistic and static. Prostitution policies in the Nordic countries are multifaceted and dynamic, and cannot be represented as following a straight path and detached from empirical contexts. Their analysis treats Nordic prostitution policies both as a product of history, of current national and Nordic debates, and of international obligations and changes in the international and national prostitution markets. Furthermore they argue that a broad understanding of the relevant context is necessary so as to place Nordic prostitution policies within broader policy concerns related to gender, class, ethnicity, sexuality, social welfare, immigration and organised crime, as well as to neoliberal forms of governance.

Sexual Life in Sweden - Hans Lennart Zetterberg 2002

Now available in English for the first time, *Sexual Life in Sweden* is a classic piece of sex research by one of Sweden's most distinguished social scientists. Sponsored by the Royal Commission on Sex Education more than thirty years ago, it remains the only study of sexual behavior in a randomly selected adult population sample ever funded by a government. Because an astonishing response rate was achieved (91 percent) during the course of Zetterberg's research, the claim that Sweden is one of the few countries where generalizations about national sexual behavior can be made may be stated with confidence. Zetterberg's study matches the gender of interviewers to that of subjects. From a theoretical perspective, Zetterberg analyzes the change in Sweden from a "restrictive" to a "contraceptive" society. The study makes it clear that, with over 1,000 acts of intercourse for every live birth, 90 percent of

sexual activity between consenting adults in modern Sweden does not result simply for procreation. Nevertheless, the research yields a picture of a highly responsible society. Zetterberg explores the emergence of two powerful new norms: "when having sex, you must use contraception," and "when in an existing sexual relationship, you must not start another one." He also examines the issue of abortion as part of a concept of social justice. The author compares the behavior of those who experience an unwanted pregnancy with those who do not, and explains that abortion is seen by Swedes as part of the provision of the welfare and social justice system. Included is an examination of the sexual behavior of young people—the age of their first sexual experience, the circumstances surrounding it, whether positive parental involvement in their children's lives has any influence on their sexual conduct, and sex education programs in the schools. This translation of Zetterberg's study has been prepared by British sociologist Graham Fennell, who also authored a new introduction positioning Zetterberg's work in the history of sex research and comparing its findings with contemporary studies in Scandinavia, Western Europe, and North America. In light of the ongoing controversies about sex education, its conclusions remain relevant to policy discussions today.

Sexual Life in Sweden - Hans L. Zetterberg

A review of sexual behaviour in Sweden. Sponsored by the Royal Commission on Sexual Education, it uses a randomly-selected adult population sample, with a 92 per cent response rate. It explores the evolution of western sexual behaviour in the light of controversies about sexual education.

The War on People who Use Drugs - Jay Levy 2017-07-14

This book explores the outcomes of Sweden's aim to create a 'drug-free society' on the lived realities, health, and welfare of people who use drugs, and on the dynamics of Swedish drug use. Drawing on a wealth of empirical data, including extensive interview testimony and participant observation from years of fieldwork conducted in Sweden, the book debunks the widely-believed myth that Sweden is a progressive, liberal, inclusive state. In contrast to its liberal reputation, Sweden has criminalised the use of drugs and allows for compulsory treatment for those with drug dependencies. The work argues that Swedish law and policy cannot be demonstrated to have decreased drug use as intended, with the law used instead as a means with which to displace people who use drugs from public spaces in Sweden's cities. And where the law has failed in its ambition to decrease drug use, Swedish law and policy have increased and exacerbated the problems, dangers, and harms that can be associated with it. People who use drugs in Sweden experience considerable and endemic difficulties with health, violence, abuse, and

social exclusion, stigma, and discrimination as a result of Sweden's drug laws, policies, and discourses.
