The Man with Candy - Jack

Olsen 2008-06-30

The mass murder of almost thirty young boys in Houston may well have been the most heinous crime of the century. How could such a series of murders go undetected for almost three years before being exposed? The Man with the Candy is a brilliant investigative journalist's story of the crime and the answer to that question. The night David Hilligiest didn't come home was both like and unlike other nights when other Houston boys disappeared between the years 1971 and 1973. At three in the morning the police were called, but they just said that boys were running away from the best of homes nowadays and that they'd list David as a runaway. No, there would be no official search for the youngster. Aghast, the Hilligiests, in the months that followed, hired their own detective, put up posters, even sought the aid of clairvoyants. But David never did come

home again because, along with at least twenty-six other Houston boys, he had been murdered and buried by the homosexual owner of a candy factory, the mass murderer of the century, Dean Corll, according to his two teenage confessed accomplices, Elmer Wayne Henley, Jr., and David Brooks. Many of the young boys had not even been reported as missing, and the fact that they were dead would probably never have come to light had not one of the murderers confessed. For in Houston, where in a typical year the total number of murders is twice that of London despite the fact that London is six times as large and far more densely populated, missing persons and violence are likely to be considered commonplace. In the months before the trial of Henley and Brooks, Jack Olsen interviewed and probed for answers about the criminals, the victims and the city itself, which remained for the most part silent, angry and defensive. The result is a

classic of true crime reportage.

**Protecting Society from Sexually Dangerous**

**Offenders** - John Q. La Fond  
2003-01

In Protecting Society From Sexually Dangerous Offenders, legal and mental health experts explore the ramifications of the controversial sexual predator commitment laws, registration and community notification laws, and chemical castration laws that have come into existence in the past dozen years. The increasing number of sex crimes, especially those committed by released sex offenders against young victims, has struck a public nerve. Understandably, citizens are angry, vengeful, and fearful, and they demand both retribution and harsh measures

to prevent these kinds of crimes from recurring. These intense public demands for retaliation and protection have shaped recent law and public policy, resulting in involuntary commitment programs, notification laws, and chemical castration laws for sex offenders in many states. These new legal strategies raise serious constitutional questions regarding the rights of those who have served their punishment. Perhaps more important is the question of whether these programs are actually effective in preventing sexual recidivism. In this volume, contributing authors discuss the issues surrounding these new legal strategies and the alternatives to such programs. They examine the wisdom and constitutionality of post-incarceration commitment and the difficulty of determining who is most likely to offend again. Contributors propose alternatives to involuntary commitment, including community containment and programs for treating sexually abused

children so as to reduce the chances of them growing up to continue the cycle of sexual abuse. They also propose ways in which these new legal approaches can be applied to increase their therapeutic potential. Psychologists and other mental health experts working with sexually dangerous offenders as well as lawyers, policy makers, and students in these fields will find this to be an indispensable sourcebook on this topic.

Human Rights Translated - Castan Centre for Human Rights Law 2008

"The purpose of this publication is to contribute to [the] process of clarification by explaining universally recognised human rights in a way that makes sense to business. The publication also aims to illustrate, through the use of case studies and actions, how human rights are relevant in a corporate context and how human rights issues can be managed."--Introduction, p. vii.

The Lynching of Cleo Wright - Dominic J. CapeciJr.

2014-10-17

On January 20, 1942, black oil mill worker Cleo Wright assaulted a white woman in her home and nearly killed the first police officer who tried to arrest him. An angry mob then hauled Wright out of jail and dragged him through the streets of Sikeston, Missouri, before burning him alive.

Wright's death was, unfortunately, not unique in American history, but what his death meant in the larger context of life in the United States in the twentieth-century is an important and compelling story. After the lynching, the U.S. Justice Department was forced to become involved in

civil rights concerns for the first time, provoking a national reaction to violence on the home front at a time when the country was battling for democracy in Europe. Dominic Capeci unravels the tragic story of Wright's life on several stages, showing how these acts of violence were indicative not only of racial tension but the clash of the traditional and the modern brought about by the war. Capeci draws from a wide range of archival sources and personal interviews with the participants and spectators to draw vivid portraits of Wright, his victims, law-enforcement officials, and members of the lynch mob. He places Wright in the larger context of southern racial violence and shows the significance of his death in local, state, and national history during the most important crisis of the twentieth-century.
