Man-Made Women - Kathleen Richardson 2023-01-01

This book presents a unique, feminist approach to 'sex' dolls and 'sex' robots, taking a critical look at the academic and business narratives that serve to rationalise them. As new forms of pornography (porn robots), this edited volume provides an urgent women's centred critique. The emergence of 'sex' robots is situated within the wider context of the attack on women's rights and the relentless rise of techno-pornography. As an outgrowth of the industries of prostitution, pornography and child sex abuse, these objects offer new ways to dehumanise women and girls. While support for 'sex' robots is positioned as progressive and emancipatory, the contributors in this volume argue they reduce women to consumable parts. They explore how law, the arts, ethics, economy, politics and culture are interconnected with harmful technological developments.

A Psalm for the Wild-Built - Becky Chambers 2021-07-13

Winner of the Hugo Award! In A Psalm for the Wild-Built, bestselling Becky Chambers's delightful new Monk and Robot series, gives us hope for the future. It's been centuries since the robots of Panga gained self-awareness and laid down their tools; centuries since they wandered, en masse, into the wilderness, never to be seen again; centuries since they faded into myth and urban legend. One day, the life of a tea monk is upended by the arrival of a robot, there to honor the old promise of checking in. The robot cannot go back until the question of "what do people need?" is answered. But the answer to that question depends on who you ask, and how. They're going to need to ask it a lot. Becky Chambers's new series asks: in a world where people have what they want, does having more matter? At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Robot Sex - John Danaher 2017-10-13

Perspectives from philosophy, psychology religious studies, economics, and law on the possible future of robot-human sexual relationships. Sexbots are coming. Given the pace of technological advances, it is inevitable that realistic robots specifically designed for people's sexual gratification will be developed in the not-too-distant future. Despite popular culture's fascination with the topic, and the emergence of the much-publicized Campaign Against Sex Robots, there has been little academic research on the social, philosophical, moral, and legal implications of robot sex. This book fills the gap, offering perspectives from philosophy, psychology, religious studies, economics, and law on the possible future of robot-human sexual relationships. Contributors discuss what a sex robot is, if they exist, why we should take the issue seriously, and what it means to "have sex" with a robot. They make the case for developing sex robots, arguing for their beneficial nature, and the case against it, on religious and moral grounds; they consider the subject from the robot's perspective, addressing such issues as consent and agency; and they ask whether it is possible for a human to form a mutually satisfying, loving relationship with a robot. Finally, they speculate about the future of human-robot sexual interaction, considering the social acceptability of sex robots and the possible effect on society. Contributors Marina Adshade, Thomas Arnold, Julie Carpenter, John Danaher, Brian Earp, Lily Eva Frank, Joshua Goldstein, Michael Hauskeller, Noreen Herzfeld, Neil McArthur, Mark Migotti, Sven Nyholm, Ezio di Nucci, Steve Petersen, Anders Sandberg, Matthias Scheutz, Litska Strikwerda, Nicole Wyatt

Ile kosztuje żona? Mroczne sekrety rynku małżeńskiego - Violetta Rymaszewicz 2022-08-03

Ile kosztuje żona? Zamówiona z katalogu lub przez Internet już od 5000 dolarów Wylicytowana na aukcji dziewic – powyżej 1 miliona euro Kupiona na targu w Bułgarii – od 350 dolarów Wykonana z silikonu lub

seksrobot – od 4000 funtów Ile kosztuje żona? to opowieść o losach kobiet i mężczyzn, którzy szukają miłości i spełnienia w małżeństwie, i o tym, co stanie się ze światem, jeśli zabraknie kobiet gotowych na zamążpójście. Reportaże wędrują po całym świecie – od Stanów Zjednoczonych, przez Chiny, Indie, Tadżykistan, aż po Afrykę Subsaharyjską – i opowiadają historie o poszukiwaniu miłości, kulturowej przemocy wobec kobiet i niedoskonałościach instytucji małżeństwa w gwałtownie zmieniającym się świecie. Okazuje się jednak, że problem złego traktowania kobiet dotyczy również nas, Europejczyków, choć wciąż wydaje się nam, że to realia krajów po drugiej stronie globu. Violetta Rymaszewicz udowadnia, że systemowa przemoc wobec kobiet nie jest historyjką zza mórza i oceanów. Stanowi część naszej

rzeczywistości, w której polski europoseł w wywiadzie z przekonaniem głosi: „Kobiety są mniej, inteligentne, słabsze i mniejsze, więc zarabiają mniej”, a znany pięściarz w programie rozrywkowym sugeruje, że „rozpuszczone kobiety trzeba łać”. Jak wygląda status żon w różnych kulturach? Dlaczego przemoc domowa wciąż jest tematem tabu? Jak traktowana jest wdowa po śmierci swojego męża? Dlaczego incele nienawidzą kobiet? Czy świat jest sobie w stanie poradzić bez żon? ----- „O przemocy wobec kobiet w Polsce pisze się z trudem. Z pozoru najprościej byłoby sięgnąć po dane statystyczne i rzucić je na papier, niech naprowadzą na pierwsze wnioski. A kiedy szok nieco minie, napisać o kulturowych źródłach i wpływach obowiązującego niegdyś prawa. Kłopot w tym, że polskie dane statystyczne o przemocy w rodzinie są politycznie i kulturowo wrażliwe. Polityka tematu przemocy w rodzinie nie lubi, a tradycyjne podejście nie dość, że ofiar nie rozumie, to jeszcze obarcza je winą i dobija komentarzami w stylu «pewnie go sprowokowała». Nie wszystkie przestępstwa przemocy w rodzinie są zgłaszane i trafiają do policyjnych statystyk, bo jak tu donosić na męża?” Violetta Rymaszewicz od zawsze chciała pisać, ale powstrzymywał ją nieuleczalny perfekcjonizm i widzenie świata w ostrych, nie zawsze jasnych barwach. Publikowała teksty w „Newsweek Polska”, „Gazecie Wyborczej” i na blogu w na:temat. Studiowała na Uniwersytecie im. Adama Mickiewicza w Poznaniu i University of Cambridge. Jest członkinią Brytyjskiego Towarzystwa Psychologicznego i stamtąd czerpie akceptację dla różnych punktów widzenia, kultur i światopoglądów. Pracuje jako trener biznesu, pomaga kobietom planować kariery i ścieżki edukacyjne oraz wychodzić z kryzysów w karierze.

The Philosophy of Online Manipulation - Fleur Jongepier 2022-06-19
Are we being manipulated online? If so, is being manipulated by online technologies and algorithmic systems notably different from human forms of manipulation? And what is under threat exactly when people are manipulated online? This volume provides philosophical and conceptual depth to debates in digital ethics about online manipulation. The contributions explore the ramifications of our increasingly consequential interactions with online technologies such as online recommender systems, social media, user friendly design, microtargeting, default settings, gamification, and real time profiling. The authors in this volume address four broad and interconnected themes: What is the conceptual nature of online manipulation? And how, methodologically, should the concept be defined? Does online manipulation threaten autonomy, freedom, and meaning in life and if so, how? What are the epistemic, affective, and political harms and risks associated with online manipulation? What are legal and regulatory perspectives on online manipulation? This volume brings these various considerations together to offer philosophically robust answers to critical questions concerning our online interactions with one another and with autonomous systems. The Philosophy of Online Manipulation will be of interest to researchers and advanced students working in moral philosophy, digital ethics, philosophy of technology, and the ethics of manipulation.

Turned On - Kate Devlin 2020-10-20

An exploration of sexuality, technology, and humanity through the promises of artificial intelligence. The idea of the seductive sex robot is the stuff of myth, legend and science fiction. But beyond the fantasies there are real and fundamental questions about our relationship with technology as it moves into the realm of robotics. Artificial intelligence raises very real concerns. Sexual activity is central to our very existence; it shapes how we think, how we act and how we live. With advances in technology come machines that may one day think independently. What will happen to us when we form close relationships with these intelligent systems? Chapter by chapter, this book builds on the science and the philosophy surrounding our most intimate relationship with technology. The scene is set with the history of the artificial sexual companion, then goes on to explore the "modern" robot and the twentieth century sci-fi

that promised us our own robot slaves. An explanation of artificial intelligence and the urge to create sentient machines delves into our own psychology: how does desire affect our own behavior, and can we become attached to an inanimate object? Can robots make society a better place? And what can go wrong? Sex robots are here, and here to stay--and more are coming. This book explores how the emerging and future development of sexual companion robots might affect us, and our society. It explores the social changes arising from emerging technologies, and our relationships with the machines that may someday care for us and about us.

Love and Sex with Robots - Adrian David Cheok 2018-03-03

This book constitutes the refereed proceedings of the Third International Conference on Love and Sex with Robots, LSR 2017, held in December 2017, in London, UK. The 12 revised papers presented together with 2 keynotes were carefully reviewed and selected from a total of 83 submissions. One of the biggest challenges of the Love and Sex with Robots conference is to engage a wider scientific community in the discussions of the multifaceted topic, which has only recently established itself as an academic research topic within, but not limited to, the disciplines of artificial intelligence, human-computer interaction, robotics, biomedical science and robot ethics etc.

Religion and Technology into the Future - Sam Gill 2018-09-15

This book examines the broad significance of the current trends in technology (AI/robots) against the long history of the human imagination of making sentient beings. It seeks to enrich our understanding of the present as it is trending into the future against the richly relevant and surprisingly long past.

Sex Robots & Vegan Meat - Jenny Kleeman 2020-07-09

'Like Louis Theroux channelling Margaret Atwood' - New Statesman 'A tour of the lurid fringes of the tech world' - The Times 'A moreish page-turner of a book' - Herald Imagine if it was possible to have the perfect sexual relationship without compromise, eat meat without killing animals, have babies without the need to bear them, and choose the time of our painless death. Life would be better, right? All over the globe, people are trying to make this a reality. They want to use technology to solve the thorniest problems of humanity. But what if these 'problems' are the very things that make us human? Join Jenny Kleeman on an entertaining, thought-provoking adventure to a place where sex robots and vegan meat are no longer science fiction - right here, right now.

Watching YouTube - Michael Strangelove 2010-04-30

An anonymous musician plays Pachelbel's Canon on the electric guitar in a clip that has been viewed over sixty million times. The Dramatic Gopher is viewed over sixteen million times, as is a severely inebriated David Hasselhoff attempting to eat a hamburger. Over 800 variations, parodies, and parodies-of-parodies are uploaded of Beyonce Knowles' Single Ladies dance. Tay Zonday sings Chocolate Rain in a video viewed almost forty million times and scores himself a record deal. Obama Girl enters the political arena with contributions such as I Got a Crush on Obama and gets coverage in mainstream news networks. In Watching YouTube, Michael Strangelove provides a broad overview of the world of amateur online videos and the people who make them. Dr. Strangelove, the Governor General Literary Award-nominated author that Wired Magazine called a 'guru of Internet advertising,' describes how online digital video is both similar to and different from traditional home-movie-making and argues that we are moving into a post-television era characterized by mass participation. Strangelove draws from television, film, cultural, and media studies to help define an entirely new field of research. Online practices of representation, confessional video diaries, gendered uses of amateur video, and debates over elections, religion, and armed conflicts make up the bulk of this groundbreaking study, which is supplemented by an online blog at strangelove.com/blog. An innovative and timely study, Watching YouTube raises questions about the future of cultural memory, identity, politics, warfare, and family life when everyday representational practices are altered by four billion cameras in the hands of ordinary people.

Burn-in - P. W. Singer 2020

"An FBI agent teams up with the first police robot to hunt a shadowy terrorist in this gripping technothriller-and fact-based tour of tomorrow-from the authors of Ghost Fleet"--

The Smart Wife - Yolande Strengers 2021-08-31

The life and times of the Smart Wife--feminized digital assistants who are friendly and sometimes flirty, occasionally glitchy but perpetually available. Meet the Smart Wife--at your service, an eclectic collection of feminized AI, robotic, and smart devices. This digital assistant is friendly and sometimes flirty, docile and efficient, occasionally glitchy but

perpetually available. She might go by Siri, or Alexa, or inhabit Google Home. She can keep us company, order groceries, vacuum the floor, turn out the lights. A Japanese digital voice assistant--a virtual anime hologram named Hikari Azuma--sends her "master" helpful messages during the day; an American sexbot named Roxxy takes on other kinds of household chores. In *The Smart Wife*, Yolande Strengers and Jenny Kennedy examine the emergence of digital devices that carry out "wifework"--domestic responsibilities that have traditionally fallen to (human) wives. They show that the principal prototype for these virtual helpers--designed in male-dominated industries--is the 1950s housewife: white, middle class, heteronormative, and nurturing, with a spick-and-span home. It's time, they say, to give the Smart Wife a reboot. What's wrong with preferring domestic assistants with feminine personalities? We like our assistants to conform to gender stereotypes--so what? For one thing, Strengers and Kennedy remind us, the design of gendered devices re-inscribes those outdated and unfounded stereotypes. Advanced technology is taking us backwards on gender equity. Strengers and Kennedy offer a Smart Wife "manifesta," proposing a rebooted Smart Wife that would promote a revaluing of femininity in society in all her glorious diversity.

Robot Ethics 2.0 - Patrick Lin 2017

The robot population is rising on Earth and other planets. (Mars is inhabited entirely by robots.) As robots slip into more domains of human life--from the operating room to the bedroom--they take on our morally important tasks and decisions, as well as create new risks from psychological to physical. This makes it all the more urgent to study their ethical, legal, and policy impacts. To help the robotics industry and broader society, we need to not only press ahead on a wide range of issues, but also identify new ones emerging as quickly as the field is evolving. For instance, where military robots had received much attention in the past (and are still controversial today), this volume looks toward autonomous cars here as an important case study that cuts across diverse issues, from liability to psychology to trust and more. And because robotics feeds into and is fed by AI, the Internet of Things, and other cognate fields, robot ethics must also reach into those domains, too. Expanding these discussions also means listening to new voices; robot ethics is no longer the concern of a handful of scholars. Experts from different academic disciplines and geographical areas are now playing vital roles in shaping ethical, legal, and policy discussions worldwide. So, for a more complete study, the editors of this volume look beyond the usual suspects for the latest thinking. Many of the views as represented in this cutting-edge volume are provocative--but also what we need to push forward in unfamiliar territory.

AI Love You - Yuefang Zhou 2019-07-17

Using an interdisciplinary approach, this book explores the emerging topics and rapid technological developments of robotics and artificial intelligence through the lens of the evolving role of sex robots, and how they should best be designed to serve human needs. An international panel of authors provides the most up-to-date, evidence-based empirical research on the potential sexual applications of artificial intelligence. Early chapters discuss the objections to sexual activity with robots while also providing a counterargument to each objection. Subsequent chapters present the implications of robot sex as well as the security and data privacy issues associated with sexual interactions with artificial

intelligence. The book concludes with a chapter highlighting the importance of a scientific, multidisciplinary approach to the study of human - robot sexuality. Topics featured in this book include: The Sexual Interaction Illusion Model. The personal companion system, Harmony, designed by RealbotixTM. An exposition of the challenges of personal data control and protection when dealing with artificial intelligence. The current and future technological possibilities of projecting three-dimensional holograms. Expert discussion notes from an international workshop on the topic. *AI Love You* will be of interest to academic researchers in psychology, robotics, ethics, medical science, sociology, gender studies as well as clinicians, policy makers, and the business sector.

Solve For Happy - Mo Gawdat 2017-03-23

'He explains how even in the face of the unthinkable, happiness is still possible' - Stylist Solve for Happy is the equation for happiness. A startlingly original book about creating and maintaining happiness, written by a top Google executive with an engineer's training and fondness for thoroughly analyzing a problem. Mo Gawdat, a remarkable thinker whose gifts had landed him top positions in half a dozen companies and who - in his spare time - had created significant wealth, realized that he was desperately unhappy. A lifelong learner, he attacked the problem as an engineer would, examining all the provable facts and scrupulously following logic. When he was finished, he had discovered the equation for enduring happiness. Ten years later, that research saved him from despair when his college-aged son, Ali - also intellectually gifted - died during routine surgery. In dealing with the loss, Mo found his mission: he would pull off the type of 'moonshot' that he and his Google [X] colleagues were always aiming for: he would help ten million people become happier by pouring his happiness principles into a book and spreading its message around the world. One of Solve for Happy's key premises is that happiness is a default state. If we shape expectations to acknowledge the full range of possible events, unhappiness is on its way to being defeated. To steer clear of unhappiness traps, we must dispel the six illusions that cloud our thinking (e.g., the illusion of time, of control, and of fear); overcome the brain's seven deadly defects (e.g., the tendency to exaggerate, label, and filter), and embrace five ultimate truths (e.g., change is real, now is real, unconditional love is real). By means of several highly original thought experiments, Mo helps readers find enduring contentment by questioning some of the most fundamental aspects of their existence.

Why We Love - Anna Machin 2022-01-06

In this entertaining and accessible exploration of love, Oxford anthropologist Dr Anna Machin dives into the science behind the myriad types of love that exist in the world, including romantic love, parental love, friendships, love for pets, football teams, religious love and even love for our smartphones. Through original research brought to life by interviews and case studies, and encompassing such fascinating areas as polyamorous relationships, parasocial (love for a celebrity) and sacred loves, this book argues that it is time to stop putting romantic love on a pedestal. By exploring the science that illuminates the benefits of all our different close relationships, Dr Anna Machin encourages us to reconsider the importance of love in our own lives, to interrogate our own experiences, and to reconnect with the heart of what it really means to be human.
