A Song for Another Day - Maria Imbalzano 2020-10-21

Gigi Jenson, an up-and-coming Broadway star, finds herself in Willow Springs, Vermont, for the summer as director of their first annual community revue. This sleepy town is worlds away from her vibrant and beloved New York City, but the experience she'll gain will be invaluable to her career. Jason Simmons has lived in Willow Springs his entire life. Working several jobs while writing music, he yearns for a contract to record his songs. The one chance he had to make it in Nashville he blew due to stage fright. When Jason volunteers to help Gigi with the revue, sparks ignite but their dreams are taking them in different directions. Could their love for each other guide them to the same path?

Afrocentricity in AfroFuturism - Aaron X. Smith 2023-10-30

Contributions by Taharka Adé, Molefi Kete Asante, Alonge O. Clarkson, John P. Craig, Ifetayo M. Flannery, Kofi Kubatanna, Lehasa Moloi, M. Ndiika Mutere, and Aaron X. Smith In the twenty-first century, AfroFuturism—a historical and philosophical concept of the future imagined through a Black cultural lens—has been interpreted through a myriad of writers, artists, scientists, and other visionary creatives. In *Afrocentricity in AfroFuturism: Toward Afrocentric Futurism*, editor Aaron X. Smith curates a collection of interdisciplinary essays that critiques existing scholarship on Black futurity. In contrast to much previous work, these essays ground their explorations in African agency, centering the African within historical and cultural reality. Situating Afrocentricity as the field's foundational root and springboard for an expansive future, contributors detail potential new modes of existence and expression for African people throughout the diaspora. Divided into two parts—Representations and Transformations—this book examines the tensions created by historical and cultural dislocation of African peoples and consciousness. Contributors cover varied topics such as the intersections of culture and design; techno culture; neuroscience; and the multiplicity of African cultural influences in aesthetics, oratory, visual art, hip hop, and more. Essays range from theoretical analyses to close readings of history and popular culture, from the Haitian Revolution to Sun Ra, Janelle Monáe's *Dirty Computer*, and Black Panther. *Afrocentricity in AfroFuturism* offers an expansive vision of AfroFuturism and its ranging significance to contemporary culture and discourse.

Love Addict - Ethlie Ann Vare 2011-09

Neuroscience now shows us--in living color, thanks to PET scans and fMRI technology--that falling in love affects our brains precisely the same way as snorting cocaine. Award-winning author and screenwriter Ethlie Ann Vare already knew that; she's been addicted to both. She survived to tell the tale . . . with humor, honesty, and hope. Just because something is addictive doesn't mean that you will get addicted to it. But . . . if your stomach ties up in knots while you count the seconds waiting for a phone call from that special someone . . . if you hear a loud buzzing in your ears when you see a certain person's car (or one just like it) . . . if your eyes burn when you hear a random love song or see a couple holding hands . . . if you suffer the twin agonies of craving for and withdrawing from a series of unrequited crushes or toxic relationships . . . if you always feel like you're clutching at someone's ankle and dragged across the floor as they try to leave the room . . . welcome to the club. With a light touch and a sharp wit, Ethlie has enlisted some famous love junkies--including

supermodel Amber Smith, movie star William McNamara, and comedienne Margaret Cho--and the top therapists and researchers in the field to help lead you from the dark of despair into the dawn of recovery.

Chance, Calculation and Life - Thierry Gaudin 2021-05-25

Chance, Calculation and Life brings together 16 original papers from the colloquium of the same name, organized by the International Cultural Center of Cerisy in 2019. From mathematics to the humanities and biology, there are many concepts and questions related to chance. What are the different types of chance? Does chance correspond to a lack of knowledge about the causes of events, or is there a truly intrinsic and irreducible chance? Does chance preside over our decisions? Does it govern evolution? Is it at the origin of life? What part do chance and necessity play in biology? This book answers these fundamental questions by bringing together the clear and richly documented contributions of mathematicians, physicists, biologists and philosophers who make this book an incomparable tool for work and reflection.

Nothing But Noise - 2022-01-24

Nothing but Noise: Timbre and Musical Meaning at the Edge explores how timbre shapes musical affect and meaning. Integrating perspectives from musicology with the cognitive sciences, author Zachary Wallmark advances a novel model of timbre interpretation that takes into account the bodily, sensorimotor dynamics of sound production and perception. The contribution of timbre to musical experience is clearest in drastic situations where meaning is itself contested; that is, in polarizing contexts of reception where evaluation of musical timbre by some listeners collides headlong against a competing claim--that it is just noise. Taking this ubiquitous moment as a starting point, the book explores affect, reception, and timbre semantics through diverse cultural-historical case studies that frustrate the acoustic and perceptual boundary between musical sound and noise. Nothing but Noise includes chapters on the racial and gender politics in the reception of free jazz saxophone screaming in the late 1960s; an analysis of contested timbral ideals in the performance practices of the Japanese shakuhachi flute; and an historical examination of the overlooked role of brutal timbres in the moral panic over heavy metal in the eighties and nineties. The book closes with a discussion of the slippery social fault lines separating perceptions of musical sound from noise and the ethical stakes of encountering another's aural face.

JUNIOR - Jason Allday 2014-07-21

Society played a part in the death of my baby brother. The demand for perfection and what was deemed acceptable by our everyday standards

helped mold a fragile frame in a young man's mind. The security and resolution I needed was never to be found within the realms of the everyday working world. I learned to reconcile with what you may unfairly call the "ills of society". I found not only resolve, but also harmony within the world, a world that all members of our populace are exposed to in their lives and is part of a culture, even if you chose to ignore it, is one we all live in. I'm not only lucky enough, but also privileged to have been welcomed and accepted in this world, and here their stories will show that this syndicate are of the same making of us all. For me and my brothers none of our heroes wore capes.
