Reassembling the Republic of Letters in the Digital Age - Howard Hotson 2019

Between 1500 and 1800, the rapid evolution of postal communication allowed ordinary men and women to scatter letters across Europe like never before. This exchange helped knit together what contemporaries called the 'respublica litteraria', a knowledge-based civil society, crucial to that era's intellectual breakthroughs, formative of many modern values and institutions, and a potential cornerstone of a transnational level of European identity. Ironically, the exchange of letters which created this community also dispersed the documentation required to study it, posing enormous difficulties for historians of the subject

ever since. To reassemble that scattered material and chart the history of that imagined community, we need a revolution in digital communications. Between 2014 and 2018, an EU networking grant assembled an interdisciplinary community of over 200 experts from 33 different countries and many different fields for four years of structured discussion. The aim was to envisage transnational digital infrastructure for facilitating the radically multilateral collaboration needed to reassemble this scattered documentation and to support a new generation of scholarly work and public dissemination. The framework emerging from those discussions - potentially applicable also to other forms of intellectual, cultural and

economic exchange in other periods and regions - is documented in this book.

Out of Control - Kevin Kelly 1995

A synthesis of research and theory, this work chronicles the dawn of a new era in which the adaptability and autonomy of living organisms becomes the model for human made systems and machines. The author combines ideas from the Chaos Theory, cybernetics, current thinking on evolution and research into computerized artificial life with his own experience of on-line culture to show that industrial culture is now obsolete. This book presents the prospects of imminent revolution as Kelly identifies new frontiers of thinking about biological systems that will change the way the natural world is perceived.

This classic volume presents the core vocabulary of everyday life in Morocco--from the kitchen to the mosque, from the hardware store to the natural world of plants and animals. It contains myriad examples of usage, including formulaic phrases and idiomatic expressions.

Understandable throughout the nation, it is based primarily on the standard dialect of Moroccans from the cities of Fez, Rabat, and Casablanca. All Arabic citations are in an English transcription, making it invaluable to English-speaking non-Arabists, travelers, and tourists--as well as being an important resource tool for students and scholars in the Arabic language-learning field.

Crop Breeding - Delphine Fleury 2016-09-24

The recent advent of molecular technologies has changed the way plant breeders identify and select their germplasm as genetic variation can now be assessed at the DNA level. *Crop Breeding: Methods and Protocols* presents detailed guidelines and tutorials that suit different needs and capacity from small laboratories analyzing molecular markers on a one-by-one basis to the increasingly popular high-throughput protocols for high capacity laboratories. Topics covered include breeding strategy for the selection of an ideal variety or genetic ideotype, protocols for breeders using molecular markers in selection programs and for laboratories providing molecular services to breeding programs, statistical programs and software to aid implementation of molecular data into breeding programs and methodologies that facilitate the generation of genetic diversity and its characterization. Written in the

successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible protocols and notes on troubleshooting and avoiding known pitfalls. Authoritative and easily accessible, Crop Breeding: Methods and Protocols will help in expanding the use of molecular technologies for the creation of tomorrow's crop varieties.

Tango Lessons - Marilyn G. Miller 2014-01-13
From its earliest manifestations on the street corners of nineteenth-century Buenos Aires to its ascendancy as a global cultural form, tango has continually exceeded the confines of the dance floor or the music hall. In *Tango Lessons*, scholars from Latin America and the United States explore tango's enduring vitality. The interdisciplinary group of contributors—including specialists in dance, music, anthropology, linguistics, literature, film, and fine art—take up a broad range of topics.

Among these are the productive tensions between tradition and experimentation in tango nuevo, representations of tango in film and contemporary art, and the role of tango in the imagination of Jorge Luis Borges. Taken together, the essays show that tango provides a kaleidoscopic perspective on Argentina's social, cultural, and intellectual history from the late nineteenth to the early twenty-first centuries. The Gospel of Dynamite - J. Frank Norris
2016-02-23

By John R. Rice I cannot introduce Dr. J. Frank Norris, but I gladly say a word about his sermons, "Their line is gone out through all the earth, and their words to the end of the world." A mighty preacher of a mighty gospel, bold defender of the faith, campaigner for righteousness, seeker for sinners and my

beloved friend and brother that he is, I am delighted that you can have his message in print. Here is great preaching! Whether it is Dr. Norris at his greatest, I cannot say, when I remember his sermons on "The Prodigal Son," on "Going to the Well," or "And When the Morning Was Come," or those on the eighth of Romans, or "Elijah at Mt. Carmel," or the Twenty-third Psalm. Those who have read his seven hundred printed sermons or heard him in his own pulpit and in great revivals this almost a quarter of a century can best say. But here is great preaching, preaching to the heart as well as the head. Though my mind marveled at the riches from which Dr. Norris drew when I heard these sermons and then read them, and then again, my poor hungry heart was fed.

The Adventure of the Blanched Soldier - Arthur Conan Doyle 2020-09-28

James Dodd comes to Sherlock Holmes about the whereabouts of his friend Godfrey Emsworth. The two men fought in the Second Boer War

together, where Ensworth was wounded. Dodd has not heard from his friend since then and believes something is very wrong. He has contacted Emsworth's father, Colonel Ensworth, but the later tells him his son has gone off at sea. Not satisfied by this response Dodd went off to visit the colonel and his wife, who he found to be less than welcoming. Questioning the butler only made Dodd even less at ease and he hopes that Holmes will be able to track Emsworth down. "The Adventure of the Blanched Soldier" (1926) is part of "The Case-Book of Sherlock Holmes". Sir Arthur Conan Doyle (1859-1930) was born in Scotland and studied medicine at the University of Edinburgh. After his studies, he worked as a ship's surgeon on various boats. During the Second Boer War, he was an army doctor in South Africa. When he came back to the United Kingdom, he opened his own practice and started writing crime books. He is best known for his thrilling stories about the adventures of Sherlock Holmes. He published

Other than the Sherlock Holmes series, Doyle wrote around thirty more books, in genres such as science-fiction, fantasy, historical novels, but also poetry, plays, and non-fiction.

Harsh Environment and Plant Resilience -

Azamal Husen 2021-04-02

In the recent past, threats from climate change and unforeseeable environmental extremes to plant growth and productivity have consistently increased. The climate change-driven effects, especially from unpredictable environmental fluctuations, can result in an increased prevalence of abiotic and biotic stresses in

plants. These stresses have slowed down the global yields of crop plants. On the other hand, food security for the rapidly growing human population in a sustainable ecosystem is a major concern of the present-day world. Thus, understanding the core developmental, physiological and molecular aspects that regulate plant growth and productivity in a challenging environment is a pivotal issue to be tackled by the scientific community dealing with sustainable agricultural and horticultural practices. Plants are influenced by the adverse environmental conditions at various levels, their different and diverse responses play a significant role in determining their growth, production and the overall geographical distribution. The chapters in this book focus on the biological mechanisms and fundamental principles that determine how different plant species grow, perform and interact with a challenging environment. This book covers a broad range of topics in plant science, including gene function,

molecules, physiology, cell biology and plant ecology, to understand the functioning of plants under harsh environmental conditions. The book elucidates the physiological and molecular mechanisms in different plant species, ecophysiological interactions of plants, interplay between plant roots, arbuscular mycorrhizal fungi and plant growth-promoting rhizobacteria, biosensors for monitoring stress, production of secondary metabolites, stress alleviation processes, and more.

Comparative Semitic Linguistics - Patrick R. Bennett 1998-01-01

As the title indicates, this unique resource is a manual on comparative linguistics, with the examples taken exclusively from Semitic languages. It is an innovative volume that recalls the earlier tradition of textbooks of comparative philology, which, however, exclusively treated

Indo-European languages. It is suited for students with at least a year of a Semitic language. By far the largest component of the book are the nine wordlists that provide the data to be manipulated by the student. Says reviewer Peter Daniels, the wordlists "constitute a unique resource for all of comparative linguistics--a considerable quantity of uniform data from a host of related languages. They would be useful for any class in comparative linguistics, not just for those interested specifically in Semitic." Scattered throughout the text are 25 exercises based on the wordlists that provide a good introduction to the methods of comparativists. Also included are paradigms of the phonological systems of ten Semitic languages as well as Coptic and a form of Berber. A bibliography that guides the student into further reading in Semitic linguistics completes the volume.
