**The Structures of the Film Experience by Jean-Pierre Meunier** Julian Hanich 2019 For the first time this volume makes Jean-Pierre Meunier's insightful thoughts on the film experience available for an English-speaking readership. Introduced and commented by specialists in film studies and philosophy, Meunier's intricate phenomenological descriptions of the spectator's engagement with fiction films, documentaries and home movies can reach the wide audience they have deserved ever since their publication in French in 1969.

*Bulletin of the Atomic Scientists* 1973-10 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the Bulletin's iconic "Doomsday Clock" stimulates solutions for a safer world.

**Bono on Bono: Conversations with Michka Assayas** Michka Assayas 2011-12-22 Bono is one of the most influential musicians at work today. Over the past twenty-five years his band, U2, have sold a staggering 130 million albums and collected 14 Grammys. Their success has made Bono one of the most recognisable faces in the world. Here, in a series of conversations with his friend, the music journalist, Michka Assayas, Bono reflects on his transformation from extrovert singer of a small, Irish, post-punk band into an international rock star. Along the way he speaks candidly about his childhood, about his mother's death, about his Christian faith and about his difficult relationship with his father, who died recently. Bono also speaks passionately about how he has used his fame as a platform to campaign fervently on a range of global issues, and why these issues - which include the IRA ceasefire, Third World debt and, most recently, the growing AIDS crisis in Africa - are so important to each of us. Intimate, humorous, and fiercely opinionated, BONO ON BONO is Bono's story in his own words. It will fascinate and challenge fans of U2 and general readers alike.

**A Million Junes** Emily Henry 2017-05-16 "A beautiful, lyrical, and achingly brilliant story about love, grief, and family. Henry's writing will leave you breathless." —BuzzFeed Romeo and Juliet meets One Hundred Years of Solitude in Emily Henry's brilliant follow-up to *The Love That Split the World*, about the daughter and son of two long-feuding families who fall in love while trying to uncover the truth about the strange magic and harrowing curse that has plagued their bloodlines for generations. In their hometown of Five Fingers, Michigan, the O'Donnells and the Angerts have mythic legacies. But for all the tall tales they weave, both founding families are tight-lipped about what caused the century-old rift between them, except to say it began with a cherry tree. Eighteen-year-old Jack "June" O'Donnell doesn't need a better reason than that. She's an O'Donnell to her core, just like her late father was, and O'Donnells stay away from Angerts. Period. But when Saul Angert, the son of June's father's mortal enemy, returns to town after three mysterious years away, June can't seem to avoid him. Soon the unthinkable happens: She finds she doesn't exactly hate the gruff, sarcastic boy she was born to loathe. Saul's arrival sparks a chain reaction, and as the magic, ghosts, and coywolves of Five Fingers conspire to reveal the truth about the dark moment that started the feud, June must question everything she knows about her family and the father she adored. And she must decide whether it's finally time for her—and all of the O'Donnells before her—to let go.

Liquid Life Rachel Armstrong 2019 If we lived in a liquid world, the concept of a "machine" would make no sense. Liquid life is metaphor and apparatus that discusses the consequences of thinking, working, and living through liquids. It is an irreducible, paradoxical, parallel, planetary-scale material condition, unevenly distributed spatially, but temporally continuous. It is what remains when logical explanations can no longer account for the experiences that we recognize as part of "being alive." *Liquid Life* references a third-millennial understanding of matter that seeks to restore the agency of the liquid soul for an ecological era, which has been banished by reductionist, "brute" materialist discourses and mechanical models of life.

Offering an alternative worldview of the living realm through a "new materialist" and "liquid" study of matter, Armstrong conjures forth examples of creatures that do not obey mechanistic concepts like predictability, efficiency, and rationality. With the advent of molecular science, an increasingly persuasive ontology of liquid technologies can be identified. Through the lens of lifelike dynamic droplets, the agency for these systems exists at the interfaces between different fields of matter/energy that respond to highly local effects, with no need for a central organizing system. Liquid Life seeks an alternative partnership between humanity and the natural world. It provokes a re-invention of the languages of the living realm to open up alternative spaces for exploration, including contributor Rolf Hughes' "angelology" of language, which explores the transformative invocations of prose poetry, and Simone Ferracina's graphical notations that help shape our concepts of metabolism, upcycling, and designing with fluids. A conceptual and practical toolset for thinking and designing, liquid life reunites us with the irreducible "soul substance" of living things, which will neither be simply "solved," nor go away.

**Kids Online** Livingstone, Sonia 2009-09-30 As the internet and new online technologies are becoming embedded in everyday life, there are increasing questions about their social implications and consequences. This text addresses these risks in relation to children.

**Eden's Bridge** David B. Doty 2012-01-01 Eden's Bridge: The Marketplace in Creation and Mission explores a biblically based theology of the marketplace implicit in the creation narrative of Genesis 1-2. The thesis validates the calling and ministry of all marketplace Christians. David Doty invites readers to rethink and redirect the purposes of vocation, trade, and profit toward the purposes of God's Kingdom, as they were revealed in the beginning and are to be restored in Christ's reign. This book is eye-opening and inviting as it explores how God is moving to reclaim the marketplace for His Kingdom, and His redeeming purposes for the world of commerce. The marketplace holds untold potential if business is conducted according to God's plan: poverty can be eradicated, abundant living can be shared among all people, and shalom can prevail. Eden's Bridge offers hope for recovering from the recent collapse of the global economic system by envisioning a new view of how wealth is made and how the marketplace is yet to serve God's purposes in His mission to the world.

**Turn-taking in human communicative interaction** Judith Holler 2016-05-09 The core use of language is in face-to-face conversation. This is characterized by rapid turn-taking. This turn-taking poses a number central puzzles for the psychology of language. Consider, for example, that in large corpora the gap between turns is on the order of 100 to 300 ms, but the latencies involved in language production require minimally between 600 ms (for a single word) or 1500 ms (for as simple sentence). This implies that participants in conversation are predicting the ends of the incoming turn and preparing in advance. But how is this done? What aspects of this prediction are done when? What happens when the prediction is wrong? What stops participants coming in too early? If the system is running on prediction, why is there consistently a mode of 100 to 300 ms in response time? The timing puzzle raises further puzzles: it seems that comprehension must run parallel with the preparation for production, but it has been presumed that there are strict cognitive limitations on more than one central process running at a time. How is this bottleneck overcome? Far from being 'easy' as some psychologists have suggested, conversation may be one of the most demanding cognitive tasks in our everyday lives. Further questions naturally arise: how do children learn to master this demanding task, and what is the developmental trajectory in this domain? Research shows that aspects of turn-taking, such as its timing, are remarkably stable across languages and cultures, but the word order of languages varies enormously. How then does prediction of the incoming turn work when the verb (often the informational nugget in a clause) is at the end? Conversely, how can production work fast enough in languages that have the verb at the beginning, thereby requiring early planning of the whole clause? What happens when one changes modality, as in sign languages - with the loss of channel constraints is turn-taking much freer? And what about face-to-face communication amongst hearing individuals - do gestures, gaze, and other body behaviors facilitate turn-taking? One can also ask

the phylogenetic question: how did such a system evolve? There seem to be parallels (analogies) in duetting bird species, and in a variety of monkey species, but there is little evidence of anything like this among the great apes. All this constitutes a neglected set of problems at the heart of the psychology of language and of the language sciences. This Research Topic contributes to advancing our understanding of these problems by summarizing recent work from psycholinguists, developmental psychologists, students of dialog and conversation analysis, linguists, phoneticians, and comparative ethologists.

*Hendrik Petrus Berlage* Hendrik Petrus Berlage 1996-01-01 Hendrik Petrus Berlage, the Dutch architect and architectural philosopher, created a series of buildings and a body of writings from 1886 to 1909 that were among the first efforts to probe the problems and possibilities of modernism. Although his Amsterdam Stock Exchange, with its rational mastery of materials and space, has long been celebrated for its seminal influence on the architecture of the 20th century, Berlage's writings are highlighted here. Bringing together Berlage's most important texts, among them "Thoughts on Style in Architecture", "Architecture's Place in Modern Aesthetics", and "Art and Society", this volume presents a chapter in the history of European modernism. In his introduction, Iain Boyd Whyte demonstrates that the substantial contribution of Berlage's designs to modern architecture cannot be fully appreciated without an understanding of the aesthetic principles first laid out in his writings.

**The Hunt for Planet X** Govert Schilling 2010-01-24 Ever since the serendipitous discovery of planet Uranus in 1781, astronomers have been hunting for new worlds in the outer regions of our solar system. This exciting and ongoing quest culminated recently in the discovery of hundreds of ice dwarfs in the Kuiper belt, robbed Pluto from its 'planet' status, and led to a better understanding of the origin of the solar system. This timely book reads like a scientific 'who done it', going from the heights of discovery to the depths of disappointment in the hunt for 'Planet X'. Based on many personal interviews with astronomers, the well-known science writer Govert Schilling introduces the heroes in the race to be the first in finding another world, bigger than Pluto.

**Greening the Academy** Samuel Fassbinder 2012-12-30 This is the academic Age of the Neoliberal Arts. Campuses—as places characterized by democratic debate and controversy, wide ranges of opinion typical of vibrant public spheres, and service to the larger society—are everywhere being creatively destroyed in order to accord with market and military models befitting the academic-industrial complex. While it has become increasingly clear that facilitating the sustainability movement is the great 21st century educational challenge at hand, this book asserts that it is both a dangerous and criminal development today that sustainability in higher education has come to be defined by the complex-friendly “green campus” initiatives of science, technology, engineering and management programs. By contrast, *Greening the Academy: Ecopedagogy Through the Liberal Arts* takes the standpoints of those working for environmental and ecological justice in order to critique the unsustainable disciplinary limitations within the humanities and social sciences, as well as provide tactical reconstructive openings toward an empowered liberal arts for sustainability. *Greening the Academy* thus hopes to speak back with a collective demand that sustainability education be defined as a critical and moral vocation comprised of the diverse types of humanistic study that will benefit the well-being of our emerging planetary community and its numerous common locales.

**Accelerando** Charles Stross 2010-11-04 His most ambitious novel to date, *ACCELERANDO* is a multi-generational saga following a brilliant clan of 21st-century posthumans. The year is some time between 2010 and 2015. The recession has ended, but populations are ageing and the rate of tech change is accelerating dizzyingly. Manfred makes his living from spreading ideas around, putting people in touch with one another and leaving a spray of technologies in his wake. He lives at the cutting edge of intelligence amplification technology, but even Manfred can take on too much. And when his pet robot cat picks up some interesting information from the SETI data, his world - and the world of his descendants - is turned on its head.

**Rewire Your Brain** John B. Arden 2010-03-22 How to rewire your brain to improve virtually every aspect of your life-based on the latest research in neuroscience and psychology on neuroplasticity and evidence-based practices Not long ago, it was thought that the brain you were born with was the brain you would die with, and that the brain cells you had at birth were the most you would ever possess. Your brain was thought to be “hardwired” to function in predetermined ways. It turns out that's not true. Your brain is not hardwired, it's "softwired" by experience. This book shows you how you can rewire parts of the brain to feel more positive about your life, remain calm during stressful times, and improve your social relationships. Written by a leader in the field of Brain-Based Therapy, it teaches you how to activate the parts of your brain that have been underactivated and calm down those areas that have been hyperactivated so that you feel positive about your life and remain calm during stressful times. You will also learn to improve your memory, boost your mood, have better relationships, and get a good night sleep. Reveals how cutting-edge developments in neuroscience, and evidence-based practices can be used to improve your everyday life Other titles by Dr. Arden include: Brain-Based Therapy-Adult, Brain-Based Therapy-Child, Improving Your Memory For Dummies and Heal Your Anxiety Workbook Dr. Arden is a leader in integrating the new developments in neuroscience with psychotherapy and Director of Training in Mental Health for Kaiser Permanente for the Northern California Region Explaining exciting new developments in neuroscience and their applications to daily living, Rewire Your Brain will guide you through the process of changing your brain so you can change your life and be free of self-imposed limitations.

Improbable Planet Hugh Ross 2016-09-06 The Latest Scientific Discoveries Point to an Intentional Creator Most of us remember the basics from science classes about how Earth came to be the only known planet that sustains complex life. But what most people don't know is that the more thoroughly researchers investigate the history of our planet, the more astonishing the story of our existence becomes. The number and complexity of the astronomical, geological, chemical, and biological features recognized as essential to human existence have expanded explosively within the past decade. An understanding of what is required to make possible a large human population and advanced civilizations has raised profound questions about life, our purpose, and our destiny. Are we really just the result of innumerable coincidences? Or is there a more reasonable explanation? This fascinating book helps nonscientists understand the countless miracles that undergird the exquisitely fine-tuned planet we call home--as if Someone had us in mind all along.

**Fully Automated Luxury Communism** Aaron Bastani 2020-06-16 A different kind of politics for a new kind of society--beyond work, scarcity and capitalism In the twenty-first century, new technologies should liberate us from work. Automation, rather than undermining an economy built on full employment, is instead the path to a world of liberty, luxury and happiness—for everyone. Technological advance will reduce the value of commodities—food, healthcare and housing—towards zero. Improvements in renewable energies will make fossil fuels a thing of the past. Asteroids will be mined for essential minerals. Genetic editing and synthetic biology will prolong life, virtually eliminate disease and provide meat without animals. New horizons beckon. In Fully Automated Luxury Communism, Aaron Bastani conjures a vision of extraordinary hope, showing how we move to energy abundance, feed a world of 9 billion, overcome work, transcend the limits of biology, and establish meaningful freedom for everyone. Rather than a final destination, such a society merely heralds the real beginning of history.

*Dominion* Tom Holland 2019-09-05 'If great books encourage you to look at the world in an entirely new way, then Dominion is a very great book indeed . . . Written with terrific learning, enthusiasm and good humour, Holland's book is not just supremely provocative, but often very funny' Sunday Times History Book of the Year Christianity is the most enduring and influential legacy of the ancient world, and its emergence the single most transformative development in Western history. Even the increasing number in the West today who have abandoned the faith of their forebears, and dismiss all religion as pointless superstition, remain recognisably its heirs. Seen close-up, the division between a sceptic and a believer may seem

unbridgeable. Widen the focus, though, and Christianity's enduring impact upon the West can be seen in the emergence of much that has traditionally been cast as its nemesis: in science, in secularism, and yes, even in atheism. That is why *Dominion* will place the story of how we came to be what we are, and how we think the way that we do, in the broadest historical context. Ranging in time from the Persian invasion of Greece in 480 BC to the on-going migration crisis in Europe today, and from Nebuchadnezzar to the Beatles, it will explore just what it was that made Christianity so revolutionary and disruptive; how completely it came to saturate the mind-set of Latin Christendom; and why, in a West that has become increasingly doubtful of religion's claims, so many of its instincts remain irredeemably Christian. The aim is twofold: to make the reader appreciate just how novel and uncanny were Christian teachings when they first appeared in the world; and to make ourselves, and all that we take for granted, appear similarly strange in consequence. We stand at the end-point of an extraordinary transformation in the understanding of what it is to be human: one that can only be fully appreciated by tracing the arc of its parabola over millennia.

*Assessing Competence in Professional Performance across Disciplines and Professions* Paul F. Wimmers 2016-04-19 This book examines the challenges of cross-professional comparisons and proposes new forms of performance assessment to be used in professions education. It addresses how complex issues are learned and assessed across and within different disciplines and professions in order to move the process of "performance assessment for learning" to the next level. In order to be better equipped to cope with increasing complexity, change and diversity in professional education and performance assessment, administrators and educators will engage in crucial systems thinking. The main question discussed by the book is how the required competence in the performance of students can be assessed during their professional education at both undergraduate and graduate levels. To answer this question, the book identifies unresolved issues and clarifies conceptual elements for performance assessment. It reviews the development of constructs that cross disciplines and professions such as critical thinking, clinical reasoning, and problem solving. It discusses what it means to instruct and assess students within their own domain of study and across various roles in multiple contexts, but also what it means to instruct and assess students across domains of study in order to judge integration and transfer of learning outcomes. Finally, the book examines what it takes for administrators and educators to develop competence in assessment, such as reliably judging student work in relation to criteria from multiple sources. "... the co-editors of this volume, Marcia Mentkowski and Paul F. Wimmers, are associated with two institutions whose characters are so intimately associated with the insight that assessment must be integrated with curriculum and instructional program if it is to become a powerful influence on the educational process ..." Lee Shulman, Stanford University

**The Rights of Woman** Olympe de Gouges 1989

*Mr. Cannyharme: A Novel of Lovecraftian Terror* Michael Shea 2021-08-20 Early in his career, Michael Shea wrote the Lovecraftian novel *The Color out of Time* (1984). He subsequently wrote some of the most scintillating and gripping tales of the Cthulhu Mythos in contemporary weird fiction, including "Fat Face" and "Copping Squid." These tales mingled Lovecraftian themes with the gritty realism of urban horror, and they often featured drug addicts, prostitutes, and others whom conventional society treats with scorn and marginalization. Shea wrote the novel *Mr. Cannyharme* in the late 1970s, and it constitutes a remarkable adaptation of Lovecraft's early story "The Hound" (1922), about the depredations of an ancient Dutch vampire. In Shea's novel, Mr. Cannyharme stalks the seedy Mission District of San Francisco in the aftermath of the hippie movement of the 1960s. Holed up in a rundown hotel, the seemingly harmless Cannyharme-aged, feeble, bent almost double with a crippling disease-is the focus of the supernatural terror in the novel. Jack Hale, who manages the hotel, is one of the few who sense the danger to society and the world that Cannyharme represents. With a motley band of young whores and drug dealers, he takes on the challenge to counteract the horrors that Mr. Cannyharme seeks to release upon an unsuspecting world. *Mr. Cannyharme*, written in a vibrant prose that brings to life the multitude of characters that populate the

book, is a triumph of Lovecraftian terror, but also speaks of the way in which those who are regarded as the refuse of society can assert their dignity and self-worth in a grim environment. In this sense, it proves to be a novel affirming the triumph of the human spirit over the horrors facing it.

**For We Are Many** Dennis E. Taylor 2017-03-18 Bobiverse fans: a signed limited edition of all three books in a boxed set, signed by the author, is now available on Amazon. Look for The Bobiverse [Signed Limited Edition] on Amazon Bob Johansson didn't believe in an afterlife, so waking up after being killed in a car accident was a shock. To add to the surprise, he is now a sentient computer and the controlling intelligence for a Von Neumann probe. Bob and his copies have been spreading out from Earth for 40 years now, looking for habitable planets. But that's the only part of the plan that's still in one piece. A system-wide war has killed off 99.9% of the human race; nuclear winter is slowly making the Earth uninhabitable; a radical group wants to finish the job on the remnants of humanity; the Brazilian space probes are still out there, still trying to blow up the competition; And the Bobs have discovered a spacefaring species that sees all other life as food. Bob left Earth anticipating a life of exploration and blissful solitude. Instead he's become a sky god to a primitive native species, the only hope for getting humanity to a new home, and possibly the only thing that can prevent every living thing in the local sphere from ending up as dinner.

*Mesopotamia* Britannica Educational Publishing 2010-04-01 Celebrated for numerous developments in the areas of law, writing, religion, and mathematics, Mesopotamia has been immortalized as the cradle of civilization. Its fabled cities, including Babylon and Nineveh, spawned new cultures, traditions, and innovations in art and architecture, some of which can still be seen in present-day Iraq, Iran, Syria, and Turkey. Readers will be captivated by this ancient culture's rich history and breadth of accomplishment, as they marvel at images of the magnificent temples and artifacts left behind.

**Death Watch** Jack Cavanaugh 2010-05-04 YOU HAVE BEEN SELECTED FOR DEATH STOP PRECISELY FORTY-EIGHT HOURS FROM THE TIME OF THIS TRANSMISSION YOU WILL DIE STOP THIS IS AN OFFICIAL DEATH WATCH NOTICE STOP Rookie news reporter Sydney St. James found the first Death Watch notice in a vehicle at the scene of a fatal accident. That was just hours ago. Now other notices are turning up worldwide—and Sydney finds herself paired with renowned international newscaster Hunz Vonner in a desperate attempt to unmask the terrorists. The wording of the notices is always the same—as are the results. There is no pattern to the victims' deaths. Every attempt to save the recipients fails. Government agencies and news organizations are stumped. Then it gets personal. People close to Sydney begin receiving Death Watch notices. The clock is ticking . . . and suddenly, Sydney finds herself in possession of an astonishing secret. It could break the power of Death Watch, save the lives of those she loves . . . and ruin her forever.

**We Are Legion (We Are Bob)** Dennis E. Taylor 2017-04-14 Bobiverse fans: a signed limited edition of all three books in a boxed set, signed by the author, is now available on Amazon. Look for The Bobiverse [Signed Limited Edition] on Amazon Bob Johansson has just sold his software company and is looking forward to a life of leisure. There are places to go, books to read, and movies to watch. So it's a little unfair when he gets himself killed crossing the street. Bob wakes up a century later to find that corpsicles have been declared to be without rights, and he is now the property of the state. He has been uploaded into computer hardware and is slated to be the controlling AI in an interstellar probe looking for habitable planets. The stakes are high: no less than the first claim to entire worlds. If he declines the honor, he'll be switched off, and they'll try again with someone else. If he accepts, he becomes a prime target. There are at least three other countries trying to get their own probes launched first, and they play dirty. The safest place for Bob is in space, heading away from Earth at top speed. Or so he thinks. Because the universe is full of nasties, and trespassers make

them mad - very mad.

**Idea Man** Paul Allen 2012 What's it like to start a revolution? How do you build the biggest tech company in the world? And why do you walk away from it all? Paul Allen co-founded Microsoft. Together he and Bill Gates turned an idea writing software into a company and then an entire industry. This is the story of how it came about: two young mavericks who turned technology on its head; the bitter battles as each tried to stamp his vision on the future; and, the ruthless brilliance and fierce commitment. And finally, Allen's extraordinary step in walking away from it all to discover what it is you do after you've already changed the world.

**Bios** Robert Charles Wilson 2012-08-06 It is the 22nd century. Interstellar travel is possible, but colossally expensive, so humankind's efforts are focused on the only nearby Earth-like world. Isis is rich with plant and animal life, but every molecule of it is spectacularly toxic to humans. The whole planet is a permanent Hot Zone. Zoe Fisher was born to explore Isis. Literally. She has been cloned and genetically engineered to face its terrors. But there are secrets implanted within her that not even she suspects - and the planet itself contains revelations that will change our understanding of life in the universe.

**Beyond Earth** Charles Wohlforth 2017-10-17 We are at the cusp of a golden age in space science, as increasingly more entrepreneurs—Elon Musk, Richard Branson, Jeff Bezos—are seduced by the commercial potential of human access to space. But Beyond Earth does not offer another wide-eyed technology fantasy: instead, it is grounded not only in the human capacity for invention and the appeal of adventure, but also in the bureaucratic, political, and scientific realities that present obstacles to space travel—realities that have hampered NASA's efforts ever since the Challenger disaster. In Beyond Earth, the authors offer groundbreaking research and argue persuasively that not Mars, but Titan—a moon of Saturn with a nitrogen atmosphere, a weather cycle, and an inexhaustible supply of cheap energy—offers the most realistic, and thrilling, prospect of life without support from Earth.

**Understanding Gender Dysphoria** Mark A. Yarhouse 2015-05-22 Foreword Reviews' INDIEFAB Honorable Mention Few topics are more contested today than gender identity. In the fog of the culture war, complex issues like gender dysphoria are reduced to slogans and sound bites. And while the war rages over language, institutions and political allegiances, transgender individuals are the ones who end up being the casualties. Mark Yarhouse, an expert in sexual identity and therapy, challenges the church to rise above the political hostilities and listen to people's stories. In Understanding Gender Dysphoria, Yarhouse offers a Christian perspective on transgender issues that eschews simplistic answers and appreciates the psychological and theological complexity. The result is a book that engages the latest research while remaining pastorally sensitive to the experiences of each person. In the midst of a tense political climate, Yarhouse calls Christians to come alongside those on the margins and stand with them as they resolve their questions and concerns about gender identity. Understanding Gender Dysphoria is the book we need to navigate these stormy cultural waters. Christian Association for Psychological Studies (CAPS) Books explore how Christianity relates to mental health and behavioral sciences including psychology, counseling, social work, and marriage and family therapy in order to equip Christian clinicians to support the well-being of their clients.

**This is How Your Marriage Ends** Matthew Fray 2022-03-31 'The man who coaches husbands on how to avoid divorce' The New York Times 'One

husband's confession you might be tempted to hand to your other half next time he does something infuriating' Daily Mail 'Could genuinely help save a few rocky marriages' Literary Review One night during his divorce, after one too many vodkas and a phone-in-therapist's advice to 'journal his feelings,' Matthew Fray started a blog. As he tried to piece together how his ex-wife went from adoring to angry he realised that even though he was a decent guy, he was kind of a bad husband. From the raw, uncomfortable and darkly humorous stories he shared about the lessons he's learned from his failed marriage comes this strangely hopeful guide to saving relationships. This is How Your Marriage Ends offers immediately actionable advice to help readers identify toxic behaviour patterns in their own lives, and break them out of the cycles of dysfunction that ruin relationships. This is a must-read for people in any stage of a relationship, whether it's near the beginning or nearing the end. Good people can be bad partners - here's how to ensure that isn't you.

**Transgender Medicine** Leonid Poretsky 2019-02-22 Although transgender persons have been present in various societies throughout human history, it is only during the last several years that they have become widely acknowledged in our society and their right to quality medical care has been established. In the United States, endocrinologists have been providing hormonal therapy for transgender individuals for decades; however, until recently, there has been only limited literature on this subject, and non-endocrine aspects of medical care for transgender individual have not been well addressed in the endocrine literature. The goal of this volume is not only to address the latest in hormonal therapy for transgender individuals (including pediatric and geriatric age groups), but also to familiarize the reader with other aspects of transgender care, including primary and surgical care, fertility preservation, and the management of HIV infection. In addition to medical issues, psychological, social, ethical and legal issues pertinent to transgender individuals add to the complexities of successful treatment of these patients. A final chapter includes extensive additional resources for both transgender patients and providers. Thus, an endocrinologist providing care to a transgender person will be able to use this single resource to address most of the patient's needs. While Transgender Medicine is intended primarily for endocrinologists, this book will be also useful to primary care physicians, surgeons providing gender-confirming procedures, mental health professionals participating in the care of transgender persons, and medical residents and students.

Progress and Poverty Henry George 1923 First published in 1879, "Progress and Poverty" is the ground-breaking treatise on the relationship between industrialization and poverty by Henry George, the American social theorist and economist. A huge commercial success when it was published and one of the best-selling books in America in the late 19th century, George's work had a profound influence on economists, politicians, and social reformers all over the world. In "Progress and Poverty", George attempted to understand why the technical and economic progress of the Industrial Age was so often accompanied by increases in poverty and human suffering. These "boom and bust" cycles in the economy had devastating impacts on countless numbers of people and George sought to find better solutions to these pressing problems. The solution that he proposed was radical at the time: a tax on land so that the value of private property could protect the most vulnerable from the fluctuations in the larger economy. Many of his ideas were instrumental to a new progressive social movement and have been adopted by several countries in the century since his work was first published

Outland Dennis E. Taylor 2019-07 When the Yellowstone supervolcano erupts, it's up to six college students and their experimental physics project to prevent the end of civilization. When an experiment to study quantum uncertainty goes spectacularly wrong, physics student Bill Rustad and his friends find that they have accidentally created an inter-dimensional portal. They connect to Outland-an alternate Earth with identical geology, but where humans never evolved. The group races to establish control of the portal before the government, the military, or evildoers can take it away. Then everything changes when the Yellowstone supervolcano erupts in an explosion large enough to destroy civilization and kill half the planet.

The team has just hours to get as many people as possible across to Outland before a lethal cloud of ash overwhelms them. Nothing has prepared the refugees for what they find—a world of few resources and unprecedented dangers. Somehow, they must learn to survive, because Outland may be not just a safe haven—it could be their new home. This 2019 edition has been substantially revised by the author.

*Social Isolation and Loneliness in Older Adults* National Academies of Sciences, Engineering, and Medicine 2020-06-14 Social isolation and loneliness are serious yet underappreciated public health risks that affect a significant portion of the older adult population. Approximately one-quarter of community-dwelling Americans aged 65 and older are considered to be socially isolated, and a significant proportion of adults in the United States report feeling lonely. People who are 50 years of age or older are more likely to experience many of the risk factors that can cause or exacerbate social isolation or loneliness, such as living alone, the loss of family or friends, chronic illness, and sensory impairments. Over a life course, social isolation and loneliness may be episodic or chronic, depending upon an individual's circumstances and perceptions. A substantial body of evidence demonstrates that social isolation presents a major risk for premature mortality, comparable to other risk factors such as high blood pressure, smoking, or obesity. As older adults are particularly high-volume and high-frequency users of the health care system, there is an opportunity for health care professionals to identify, prevent, and mitigate the adverse health impacts of social isolation and loneliness in older adults. *Social Isolation and Loneliness in Older Adults* summarizes the evidence base and explores how social isolation and loneliness affect health and quality of life in adults aged 50 and older, particularly among low income, underserved, and vulnerable populations. This report makes recommendations specifically for clinical settings of health care to identify those who suffer the resultant negative health impacts of social isolation and loneliness and target interventions to improve their social conditions. *Social Isolation and Loneliness in Older Adults* considers clinical tools and methodologies, better education and training for the health care workforce, and dissemination and implementation that will be important for translating research into practice, especially as the evidence base for effective interventions continues to flourish.

**Together Apart** Jolanda Jetten 2020-07-13 Written by leading social psychologists with expertise in leadership, health and emergency behaviour – who have also played an important role in advising governments on COVID-19 – this book provides a broad but integrated analysis of the psychology of COVID-19. It explores the response to COVID-19 through the lens of social identity theory, drawing from insights provided by four decades of research. Starting from the premise that an effective response to the pandemic depends upon people coming together and supporting each other as members of a common community, the book helps us to understand emerging processes related to social (dis)connectedness, collective behaviour and the societal effects of COVID-19. In this it shows how psychological theory can help us better understand, and respond to, the events shaping the world in 2020. Considering key topics such as: Leadership, Communication, Risk perception, Social isolation, Mental health, Inequality, Misinformation, Prejudice and racism, Behaviour change, Social Disorder. This book offers the foundation on which future analysis, intervention and policy can be built. We are proud to support the research into Covid-19 and are delighted to offer the finalised eBook for free. All Royalties from this book will be donated to charity.

**ESO's Early History** Adriaan Blaauw 1991

**Then Came the Fire** Stephen J. Lofgren 2011-09 Full color illustrations throughout. Two days after the September 11, 2001 attack, the U.S. Army Center of Military History began an extensive project to document the historic event through oral history interviews. Published on the incident's tenth anniversary, *Then Came the Fire* is an anthology of excerpts from those interviews. This collection highlights the personal accounts of participants who witnessed some aspect of the events in the Pentagon that day: the survivors, some of whom were injured; policemen; firefighters; medical personnel; observers; others involved in the rescue and recovery efforts; and building occupants.

**The Way Back: A Spiritual Novel about Relationships** Leen Kuiper 2015-03-10 A spiritual novel about relationships from the perspective of self-realization. Chris meets a girl that puts him on the trail of an enlightenment master. He goes to his Ashram, a place of religious retreat for Hindus where he was inspired to make a radical self-realization. He was then sent back home which his ex-girlfriend was against. He then suddenly realized that he can give a deeper understanding to their relationship. This story clearly refers about a source of happiness that we find in ourselves which is also accessible once we dare to surrender to what is here and now. Leen Kuiper has been dealing with Eastern philosophy and meditation. He has already written several books about self-realizations. One of which is the "See and Directly Observe During Satsang" which was written in 2002. It is an autobiographical account of his encounters with Hans Laurentius. In 2003, he also wrote the book "Reality or Illusion," a compilation of essays interspersed with short poems. "Love and Wind" in 2004, which is a collection of conversations about Satsang. And last but not the least, his first novel, "The Way Back," which describes about how we learn to deal with our relationships in a spiritual way.

He Held Radical Light Christian Wiman 2018-09-11 A moving meditation on memory, oblivion, and eternity by one of our most celebrated poets What is it we want when we can't stop wanting? And how do we make that hunger productive and vital rather than corrosive and destructive? These are the questions that animate Christian Wiman as he explores the relationships between art and faith, death and fame, heaven and oblivion. Above all, He Held Radical Light is a love letter to poetry, filled with moving, surprising, and sometimes funny encounters with the poets Wiman has known. Seamus Heaney opens a suddenly intimate conversation about faith; Mary Oliver puts half of a dead pigeon in her pocket; A. R. Ammons stands up in front of an audience and refuses to read. He Held Radical Light is as urgent and intense as it is lively and entertaining—a sharp sequel to Wiman's earlier memoir, My Bright Abyss.
