A Field Guide to Earthlings - Ian Ford 2010

Autistic people often live in a state of anxiety and confusion about the social world, running into misunderstandings and other barriers. This book unlocks the inner workings of neurotypical behavior, which can be mysterious to autistics. Proceeding from root concepts of language and culture through 62 behavior patterns used by neurotypical people, the book reveals how they structure a mental map of the world in symbolic webs of beliefs, how those symbols are used to filter perception, how they build and display their identity, how they compete for power, and how they socialize and develop relationships--

Interdependent Minds - Sandra L. Murray 2011-08-03

Why do some marriages grow stronger in the face of conflict or stress while others dissolve? In this book, two pioneering researchers present a groundbreaking theory of how mutually responsive behaviors emerge—or fail to emerge—in relationships. Illustrating their findings through the vivid stories of four diverse couples, the authors explore how conscious considerations interact with unconscious impulses to foster trust and commitment. Compelling topics include why marriages have such different personalities and what makes partners truly compatible. Also discussed are implications of the model for helping couples sustain satisfying relationships and improve troubled ones.

The Unwritten Rule - Elizabeth Scott 2010-04-03

Sarah and Brianna have always been friends, and it's always gone like this: guys talk to Sarah in order to get closer to Brianna. So even though Sarah met Ryan first, she's not surprised that he ends up with Brianna (even though Sarah has a massive crush on him). The three of them hang out, and Sarah and Ryan's friendship grows until one night an innocent exchange between them leads to a moment that makes Sarah realize that Ryan might be interested in her after all. But if there's one unwritten rule, it's this: you don't mess around with a friend's boyfriend. So Sarah tries to resist temptation. But with the three of them thrown together more and more, tension builds between Sarah and Ryan, and when they find themselves alone together at one point, they realize they just can't fight how they feel anymore....

Written for those with little or no prior experience on the dating scene, the book discusses how to know if you are ready for a relationship, what qualities to look for in a potential girlfriend, and if dating goes well how to make a relationship work.

[Autistics' Guide to Dating](#) - Jody John Ramey 2008-02-15

For people on the autism spectrum dating is so often an elusive art form, requiring the very skills--in communication, and in social perception--that don't come naturally to them. This book presents strategies for overcoming social skills deficits and sensory issues, to make for relationship success. Emilia Murry Ramey and Jody John Ramey, both on the spectrum, reflect on their dating experiences and provide recommendations for relationships in both the short- and long-term. Their advice includes how to choose venues for meeting people that are free from discomfiting features; coping with typical experiences in the light of sensory issues such as close proximity with a partner, eye-contact, and physical intimacy; and moving on to extended, committed relationships, co-habiting and continuing to date after marriage. Thorough, accessible, and very encouraging, this book is a must-read for Autistic people, those who love them, and those who are in love with them.

Unwritten Rules of Social Relationships - Temple Grandin 2017-04

Born with autism, both Temple Grandin and Sean Barron now live famously successful social lives. However, their paths were quite different. Temple's logical mind controlled her social behavior. She interacted with many adults and other children, experiencing varied social situations. Logic informed her decision to obey social rules and avoid unpleasant consequences. Sean's emotions controlled his social behavior. Baffled by social rules, isolated and friendless, he made up his own and applied them to others. When they inevitably broke his rules, he felt worthless and unloved. Both Temple and Sean ultimately came to terms with the social world and found their places in it. Whether you are a person with autism, a caregiver in the autism community, or just someone interested in an outsider view of society, their powerful stories will enthrall and enlighten you. The first edition of *Unwritten Rules of Social Engagement* was the Silver Award Winner of the Book of the Year Awards and the original edition sold more than 40,000 copies in hard cover!

Ranking - Pter rdi 2019-10

Human beings are competitive. We want to know who is the strongest, who is the richest, and who is the cleverest of all. Some situations, like ranking people based on height, can be ranked in objective ways. However, many "Top Ten" lists are based on subjective categorization and give only the illusion of objectivity. In fact, we don't always want to be seen objectively since we don't mind having a better image or rank than deserved. Ranking: The Unwritten Rules of the Social Game We All Play applies scientific theories to everyday experience by raising and answering questions like: Are college ranking lists objective? How do we rank and rate countries based on their fragility, level of corruption, or even happiness? How do we find the most relevant web pages? How are employees ranked? This book is for people who have a neighbor with a fancier car; employees, who are being ranked by their supervisors;

managers, who are involved in ranking but may have qualms about the process; businesspeople interested in creating better visibility for their companies; scientists, writers, artists, and other competitors who would like to see themselves at the top of a success list; or college students who are just preparing to enter a new phase of social competition. Readers will engage in an intellectual adventure to better understand the difficulties of navigating between objectivity and subjectivity and to better identify and modify their place in real and virtual communities by combining human and computational intelligence.
