Sustainable Summer Fodder - Imran ul Haq 2023-11-01

Increasing human population pressure, especially in developing countries, indicates a massive increase in the consumption of livestock products. Fodder crops are the primary and cheapest source of feed for livestock, but feed shortages or poor-quality fodder are particular constraints to the world's livestock sector. These shortages affect milk production, adult and calf health, calving rates, and livestock numbers. Summer crops including cereal, legume, grass, and tree fodder, provide an economical source of nutrients suitable for animal health as well as improve their breeding efficiency. **Sustainable Summer Fodder: Production, Challenges, and Prospects** presents the unique opportunities and difficulties of supportable cultivation and growth of summer fodder crops and the various methods for enabling crop preservation. It details conventional modern approaches to sustainable production and advanced molecular approaches to develop high-yielding fodder crops. **FEATURES** * Contains information on cultivation, growth, productivity, and protection from pests and diseases of various summer fodder crops * Presents approaches to sustainable production, summarizes fodder preservation methods; and details molecular approaches to develop high-yielding fodder crops * Provides insights into agronomic aspects of cereal, legume, grass, and tree species cultivated as summer fodder worldwide * Discusses the trends in insect pests and diseases, their field identification, and various control methods This book is an essential resource for agronomists, horticulturalists, livestock farmers and practitioners, and students working in the field.

Biopesticides in Sustainable Agriculture Progress and Potential - O. Koul 2014-01-01

This book emphasizes the role of various biopesticides in the protection of various crops like rice, maize, pulses, oilseeds, cotton, sugarcane, vegetables, fruits, tobacco, spice crops, tuber crops, coconut, tea, forest plantations and stored products. The present book is an attempt to evaluate the scope of biopesticides in sustainable agriculture of various crops in order to contemplate the progress and constraints and suggest a future roadmap for potential use of biopesticides.

Cheese Sex Death - Erika Kubick 2021-10-26

From lauded cheesemonger and creator of the popular blog Cheese Sex Death, a bible for everything you need to know about cheese For many people, the world of artisan cheese is an intriguing but intimidating place. There are so many strange smells, unusual textures, exotic names, and rules for serving. Where should a neophyte begin? From evangelist cheesemonger Erika Kubick, this comprehensive book guides readers to become confident connoisseurs and worshippers of Cheesus. A preacher of the curd word, Kubick provides the Ten Commandments of Cheese, which breaks down this complex world into simplified bites. A welcoming sanctuary devoted to making cheese a daily part of life and gatherings, this book explores the many different styles of cheese by type, profiling commonly found and affordable wedges as well as the more rare and refined of rinds. Kubick offers divine recipes that cover everything from everyday crowd pleasers (think mac and cheese and baked brie) to festive feasts fit for holidays and gatherings. This cheese devotee outlines the perfect cheese plate formula and offers inventive yet easy-to-execute beverage pairings, including wine, beer, spirits, and non-alcoholic drinks. These heavenly spreads and recipes wring maximum indulgence out of minimal effort and expense. Filled with seductive photography and audacious prose, Cheese Sex Death is a delightfully approachable guide to artisan cheese that will make just about anyone worship at the altar of Cheesus.

Sustainable Development of the Indian Arid Zone - Rajendra Pal Singh 1994

Compilation of papers on various facets of arid zone related topic.

Sustainable Human Development in the Twenty-First Century - Volume II - Ismail Sirageldin 2008-12-31

Sustainable Human Development in the Twenty-First Century is a component of Encyclopedia of Human Resources Policy, Development and Management in the global Encyclopedia of Life Support Systems (EOLSS), which is an integrated compendium of twenty Encyclopedias. The volume of Human Development examines the state and nature of human development and identifies factors that determine its promotion for the twenty-first century. A general goal, since the ultimate goal for human development is to enhance the quality of human life. However, the concept "quality of human life" is not well defined. It is determined by a set of interrelated factors that cut across many disciplines with varied perspectives and paradigms. These include the prevailing culture, health status, economic performance, technological development, political and social conditions, the building of human capacity and capabilities, and institutional

development on the local and global levels. For example, in an environment characterized by a better quality of human life, it is expected that people will be able to lead long and productive lives. They are also expected to enjoy good health, have access to knowledge and educational opportunities, and be treated by all with respect, in a socially equitable and dignified manner. In the sphere of political economy, they are expected to have the opportunity to participate in governance decisions that affect their lives and the community in which they live; and to have the potential to earn sufficient income to supply themselves with adequate nutrition, shelter, and other material and aesthetic needs. Furthermore, people are expected to maintain a sustainable environment and equitable social contracts across space and generations, especially in the context of the evolving global governance. The volume of "Sustainable Human Development in the Twenty-First Century" is divided into five topics which are then expanded into multiple subtopics, each as a chapter presented in two volumes. The first is "Major issues in Human Development" and provides an overview of the Topic with emphasis on the sociological foundation of human development. The second Topic, "Diversity and Historical Processes" reviews the historical and technological processes which have led to the present state of human diversity and differentiation. The third Topic, "Causes of Global Change" focuses on whether it is possible in the present global environment to enlarge people's capabilities so that economic progress may be translated into a multidimensional human happiness. The fourth Topic, "Consequences of Global Change" examines global change not in the narrow sense of short-term economic change, but rather as historical waves of long-term development. The fifth Topic on Planning Strategies reviews current practice and projects challenges in the next century. These two volumes are aimed at the following five major target audiences: University and College Students, Educators, Professional Practitioners, Research Personnel and Policy Analysts, Managers, and Decision Makers and NGOs.

Integrated Weed Management for Reduced Weed Infestations in Sustainable Cropping Systems - Rodrigo Werle 2023-10-30

Weeds pose a major challenge to the sustainability of agricultural production systems, causing significant crop yield, economic and environmental losses. Chemical weed control tactics play a major role in modern weed management, maintaining the productivity of diverse cropping systems, reducing yield losses and facilitating conservation agriculture. However, the over-reliance on chemical weed control has led to shifts in weed communities in agroecosystems which are now becoming dominated by high competitors and herbicide resistance. Thus, weed scientists and practitioners are urged to develop and incorporate innovative and feasible integrated weed management (IWM) systems that can reduce weed infestations and environmental impacts.

Indian Science Abstracts - 2009-05

Water, the Environment, and the Sustainable Development Goals - Mohammad Hadi Dehghani 2023-11-24

Water, the Environment and the Sustainable Development Goals details the availability of water resources on Earth in the context of sustainable resource management, how these water resources are utilized and the latest sustainable techniques in water resource management. Along with the latest techniques, each chapter discusses future challenges and opportunities in sustainability and provides detailed case studies. Sections cover water quality, water pollution, water borne diseases, water purification, transboundary waters, water and energy, water and the green economy, water cooperation, water scarcity, and the relationship between water environments and sustainable development goals. Comprehensively covers water resources on Earth and their relation to the UN Sustainable Development Goals Covers a wide range of promising approaches for water resource management Provides case studies to further elucidate the progress made towards the SDGs and the latest developments in sustainable techniques

Barefoot - Andrew Pacholyk 2022-06-21

Ready to feel the beating heart of existence? Kick-off your shoes and discover the ultimate way to navigate uncharted waters. Andrew Pacholyk was a gawky kid with big ideas. Awkward and out-of-place as a teen, he relished the moment he discovered dancing and the ecstasy of the rhythm of his body. But it wasn't until he caught his first wave on the wide-open ocean that this nature-lover truly began to comprehend the vast balance on tap in the cosmos. Barefoot ~ A Surfer's View of the Universe is the unvarnished true tale of a spirited man's life with sand between his toes and senses on high alert. With stunning lessons of solace and

eye-opening insights, the lifelong surfer, professional dancer, and acupuncturist's journey through the blue serve as an everyday account of the power of paying attention. And with talented storytelling and vivid prose, diving deep into this memoir-like search for meaning will leave you feeling refreshed, blissfully connected, and transformed. In *Barefoot ~ A Surfer's View of the Universe*, you'll appreciate: - The practice of accepting who you are and embracing what you find - How daily discipline and awareness build courage and confidence - Tips for helping your fellow humans in this grand struggle called life - Techniques to cope through connecting with the body and soul - The magic and genius of nature, and much, much more! *Barefoot ~ A Surfer's View of the Universe* is a doorway to resetting the self. If you like powerful observational wisdom, thought-provoking revelations, and the gift of learning from each moment, then you'll love Andrew Pacholyk's breathtaking story of his pilgrimage through time.

[Nanotechnology for Sustainable Agriculture](#) - Vishnu D. Rajput 2023-09-08

This new volume explores the important and cutting-edge roles that nanotechnology can play in facilitating sustainable agriculture. It provides recent updates on nanobiotechnology in soil science, plant breeding, food science, agricultural tool design and utilization, as well as the impacts of such approaches on properties of soils and plants. The book looks at the use of nanotechnology for crop production and protection, in the creation and application of pesticides, to enhance soil fertility and soil health, as a mitigating factor of plant abiotic stress, and more. The volume explores emerging nanotechnological tools and techniques for crop improvement that include space-inspired speed breeding for crop improvement, nanoparticles as sensing materials, plant nanobionics, nanopore DNA sequencing, and more.

Good beekeeping practices for sustainable apiculture - Food and Agriculture Organization of the United Nations 2021-09-21

Bees provide a critical link in the maintenance of ecosystems, pollination. They play a major role in maintaining biodiversity, ensuring the survival of many plants, enhancing forest regeneration, providing sustainability and adaptation to climate change and improving the quality and quantity of agricultural production systems. In fact, close to 75 percent of the world's crops that produce fruits and seeds for human consumption depend, at least in part, on pollinators for sustained production, yield and quality. Beekeeping, also called apiculture, refers to all activities concerned with the practical management of social bee species. These guidelines aim to provide useful information and suggestions for a sustainable management of bees around the world, which can then be applied to project development and implementation.

[The Critical Surf Studies Reader](#) - Dexter Zavalza Hough-Snee 2017-08-17

The evolution of surfing—from the first forms of wave-riding in Oceania, Africa, and the Americas to the inauguration of surfing as a competitive sport at the 2020 Tokyo Olympics—traverses the age of empire, the rise of globalization, and the onset of the digital age, taking on new meanings at each juncture. As corporations have sought to promote surfing as a lifestyle and leisure enterprise, the sport has also narrated its own epic myths that place North America at the center of surf culture and relegate Hawai'i and other indigenous surfing cultures to the margins. The *Critical Surf Studies Reader* brings together eighteen interdisciplinary essays that explore surfing's history and development as a practice embedded in complex and sometimes oppositional social, political, economic, and cultural relations. Refocusing the history and culture of surfing, this volume pays particular attention to reclaiming the roles that women, indigenous peoples, and people of color have played in surfing. Contributors. Douglas Booth, Peter Brosius, Robin Canniford, Krista Comer, Kevin Dawson, Clifton Evers, Chris Gibson, Dina Gilio-Whitaker, Dexter Zavalza Hough-Snee, Scott Laderman, Kristin Lawler, lisahunter, Colleen McGloin, Patrick Moser, Tara Ruttenberg, Cori Schumacher, Alexander Sotelo Eastman, Glen Thompson, Isaiah Helekunihi Walker, Andrew Warren, Belinda Wheaton

Emphasis is place on the knowledge of the disease, its investigation and its treatment. Invaluable for the training dermatologists and physicians completing their specialist training.

[Sustainable Surfing](#) - Gregory Borne 2017-03-16

Whilst being an ambiguous and contested concept, sustainability has become one of the twenty-first century's most pervasive ideas, as humanity's increasing impact on the environment, as well as increasing social and economic inequalities, have local and global consequences. Surfing is a globally recognised cultural phenomenon whose unique connection with nature and rapid expansion into a multibillion pound industry offers exciting synergies for exploring various dimensions of sustainability. This book is the first to bring together the world's foremost experts on the themes of sustainability and surfing. Drawing upon cutting edge theory and research, this book offers multidisciplinary perspectives and methodological approaches on the social, environmental and economic components of sustainable surfing. Contributions provide unique discussions that bridge the gap between theory and practice, exploring topics such as sustainable surf tourism, surf-econometrics, surf activism, surfing governance, the surfing industry, and technological advancements. Each chapter produces in-depth insights to provide foundational insights of the relationship between sustainability and surfing. This book will appeal to multiple audiences in different disciplines and sectors. Practitioners will benefit from the insights presented in this volume, while both undergraduate and postgraduate students will find this volume an invaluable companion, including those working in geography, environmental studies, sport sciences, and leisure and tourism studies.

[Dismantling the Patriarchy, Bit by Bit](#) - Judith K. Brodsky 2022-10-20

In *Dismantling the Patriarchy, Bit by Bit*, Judith K. Brodsky makes a ground-breaking intellectual leap by connecting feminist art theory with the rise of digital art. Technology has commonly been considered the domain of white men but-unrecognized until this book-female artists, including women artists of color, have been innovators in the digital art arena as early as the late 1960s when computers first became available outside of government and university laboratories. Brodsky, an important figure in the feminist art world, looks at various forms of visual art that are quickly becoming the dominant art of the 21st century, examining the work of artists in such media as video (from pioneers Joan Jonas and Adrian Piper to Hannah Black today), websites and social networking (from Vera Frenkel to Ann Hirsch), virtual and augmented reality art (Jenny Holzer to Hyphen-Lab), and art using artificial intelligence. She also documents the work of female-identifying, queer, transgender, and Black and brown artists including Legacy Russell and Micha Cárdenas, who are not only innovators in digital art but also transforming technology itself under the impact of feminist theory. In this radical study, Brodsky argues that their work frees technology from its patriarchal context, illustrating the crucial need to transform all areas of our culture in order to achieve the goals of #MeToo, Black Lives Matter (BLM), and Black and Minority Ethnic (BAME) representation, to empower female-identifying and Black and brown people, and to document their contributions to human history.

Transforming Coastal Zone for Sustainable Food and Income Security - T.D. Lama 2022-08-09

Coastal areas are commonly defined as the interface or transition areas between land and sea, including large inland lakes. Overall, about 50–70 % of the global population live within 100 km of the coastline covering only about 4 % of earth's land, thereby drawing heavily on coastal and marine habitats for food, building sites, transportation, recreational areas, and waste disposal. The people of these zones depend mainly on low productive agriculture due to several constraints such as prolonged water logging and drainage congestion in predominantly low-lying areas with heavy soils during the wet season, preponderance of saline and acid sulphate soils, scarcity of good quality irrigation water, particularly in the dry season, seawater intrusion into adjoining lands, and water pollution due to eutrophication, and others affecting the aquatic habitats, etc. Carbon sequestration in coastal areas, such as, marshes, lagoons, etc. has significant influence on soil quality, and the carbon pool in soils as well as their impacts on the environment. Over and above these, the coastal areas are prone to disasters due to climate change leading to colossal loss of lives and properties in many areas. Forestry and mangrove dynamics, in particular, because of their continuing diminishing nature, are also subjects of interest affecting the ecology of coastal zones requiring appropriate attention. The international symposium held in this context on 'Transforming Coastal Zones for Sustainable Food and Income Security' in virtual mode in March, 2021 offered scope to present and discuss various thematic areas by eminent scientists from all over the world. The proceedings of selected papers presented reflect cross-sectoral views of the areas highlighting, wherever necessary, a fusion of technologies, with the ultimate target to suggest livelihood security and sustainable development

for the sensitive coastal zones. The book intends to share the knowledge with researchers, academicians, and various other stakeholders to address the complex problems of coastal regions, production constraints, social, economic, technical and environmental issues to draw out strategies for resilient agricultural technologies and improving livelihood security in coastal agro-ecosystems.

Sustainable Pest Management in Date Palm: Current Status and Emerging Challenges - Waqas Wakil 2015-12-21

Date palm, *Phoenix dactylifera* L. (Arecales: Arecaceae), is an important palm species cultivated in the arid regions of the world since pre-historic times and traditionally associated with the life and culture of the people in the Middle-East and North Africa which are the pre-dominant date palm growing regions worldwide. The Food and Agriculture Organization of the UN estimates that there are over 100 million date palms with an annual production of over 7.5 million tonnes. A recent report on the arthropod fauna of date palm, enlists 112 species of insects and mites associated with date palm worldwide including 22 species attacking stored dates. Enhanced monoculture of date palm in several date palm growing countries coupled with climate change, unrestrained use of chemical insecticides and extensive international trade is likely to impact the pest complex and the related natural enemies in the date agro-ecosystems. In view of the importance of date palm as an emerging crop of the future and the need to develop and deploy ecologically sound and socially acceptable IPM techniques, this book aims to comprehensively address issues related to the biology and sustainable management of major insect and mite pests of date palm by assessing the current IPM strategies available, besides addressing emerging challenges and future research priorities. The issues pertaining to the role of semiochemicals in date palm IPM involving new strategies revolving around “attract and kill” and “push-pull” technologies, phytoplasmas and their insect vectors with implications for date palm, innovative methods for managing storage pests of dates and knowledge gaps in devising sustainable strategies for the management of red palm weevil, *Rhynchophorus ferrugineus* (Olivier) are also addressed

Self-care Down There - Taq Kaur Bhandal 2020

Get the lowdown on how to take care of your nether regions with this fun and frank guide focused on helping you maintain your private parts. Covering everything from everyday cleanliness to internal and external safe health advice as well as tips regarding the groom-or-not-to-groom debate and sex-friendly good habits to practice, *Self-Care Down There* will help you keep your private parts in tip-top shape while expressing the true you! Founder and CEO of IM With Periods and menstrual cycle charting coach Taqdir Kaur Bhandal has dedicated her career to offering wellness advice to women. Whether it's period charts or sustainable period products, *Self-Care Down There* is an essential and practical guide to feminine care and the wellbeing of all genders.

New Horizons in Insect Science: Towards Sustainable Pest Management - Akshay Kumar Chakravarthy 2015-04-28

Insect science is fast changing as insects are evolving to a plethora of newer chemical molecules, climate change, management tactics and transformation of the landscapes. Through the International Conference, the editors have attempted to gather together newer aspects of Insect Sciences like Insect Taxonomy, DNA Barcoding, Physiology, Toxicology, Vectors and their Management, Molecular Biology, RNA interference in Pest Management, Semiochemicals and Pest Management using Host Plant Resistance and Biological Control appropriated especially for the developing world. Both basic and applied aspects of insect science have been included to stimulate comprehensive studies on insect science. The book not only deals with insect science but also environmental and ecological aspects in the hope that the book will be of immense use to students, researchers, extension workers, planners, administrators, farmers and other end users. The Chapters on diversified aspects of Insect Science are contributed by leading scientists for the coming 21st century in which entomology is witnessing a dramatic advancement in management of pests through in-depth investigations. The dimensions of Insect Science covered in the book are pest management approaches that can be adopted worldwide with ascent on sustainability.
