What's Love Got to Do With It - Dr. John Chirban

2012-06-04

Having trouble talking to your kids about sex? Their friends at school don't... Unfortunately, for many parents, the most important conversations are the hardest. Ninety-three percent of adults are dissatisfied with the sex education they received as children, which is precisely why they are so bad at teaching their kids—they have no frame of reference.

Renowned Harvard Medical

School psychologist and frequent Dr. Phil guest John Chirban helps parents talk to their kids . . . about sex. Kids are going to learn about sex, and it is up to parents to decide if their kids are going to learn from them or from MTV. How parents address sex—their openness, the context, and their attitudes—will impact how their children view their own sexuality and self worth. Dr. Chirban helps parents know when, how, and how much. He uses humor, compassion, and real-life examples to prepare parents for a healthy and ongoing conversation that will equip their kids to own their own sexuality and an understanding of the larger issues of relationships, love, commitment, and intimacy. In addition, parents understand how helping their children understand these veiled yet critical keys of a fulfilling life deepens their own connection with their children.

Love Life for Parents - David Arp 1997-12-23

You're exhausted. It's the end

Too

of the day and you're at your wits' end. Your toddler wants just one more glass of water, your eight-year-old employs his favorite bedtime-delaying tactic, and the baby screams every time she's put down.

Sex? You've got to be kidding. Who has the time and energy?

Married Love - Marie

Carmichael Stopes 2015-01-30

Example in this ebook In this little book Dr. Marie Stopes deals with subjects which are generally regarded as too sacred for an entirely frank treatment. Some earnest and delicate minds may feel apprehensive that such frankness in details is "dangerous," because the effect on prurient minds might be to give them food for their morbid fancies. It is just such a fear which has been largely responsible for the silence and mystery which have for so long been wrapped round the sacred rites of mating. The question now is, Has this reticence been carried too far? Has it been carried so far that it now tends to defeat its purpose of safeguarding public

morals? There are many who unhesitatingly answer such questions in the affirmative. Their intimate knowledge of human lives compels them to recognise that at least as much harm is done by silence as by speaking out. Everything depends on how the matter is presented. Those who are shocked at the publication of such a book as this on the ground that it gives material for impure minds to sport with, need only reflect that such material is already amply provided in certain comic papers, in hosts of inferior novels, too often on the stage and film, and presented thus in coarse and demoralising guise. It can do nothing but good to such minds to meet the facts they are already so familiar with in a totally new light. On the other hand, there are all the earnest and noble young minds who seek to know what responsibilities they are taking on themselves when they marry, and how they may best meet these responsibilities. How few of them have more than the vaguest ideas on the

Love Life For Parents How To Have Kids And A Sex Life Too

subject! How few of them know how or where to obtain the help they desire! They recoil from the coarse and impure sources of information which are so accessible, and they hesitate to approach those they have learned to regard as virtuous and modest, realising that from such they will receive so little actual information, and that so veiled as to be almost useless. Dr. Stopes has attempted to meet the need of such seekers, and her book will certainly be warmly welcomed by them. It is calculated to prevent many of those mistakes which wreck the happiness of countless lovers as soon as they are actually married. If it did no more than this it would be valuable indeed! But there is an even more important aspect to be considered—the effect on the child. In all civilised lands there is a growing sense of responsibility towards the young. The problems of their physical and mental nurture attract more and more attention day by day. Eugenists, educationists, physicians, politicians,

philanthropists, and even ordinary parents discuss and ponder, ponder and discuss, matters both great and small which have a bearing on the development of the child. By common consent the first seven years of life are regarded as the most critical. It is during these years that the foundations of the personality-to-be are laid—"well and truly" or otherwise. It is during these years that the deepest and most ineradicable impressions are made in the plastic constitution of the child, arresting or developing this or the other instinctive trend and fixing it, often for life. And it is during these years above all that the parents play the most important role in the inner history of the child's life, not so much by anything they directly teach through verbal exhortations, warnings, or commands, as by those subtler influences which are conveyed in gesture, tone, and facial expression. The younger the child, the more is it influenced through these more primitive modes of expression, and quite

as much when they are not directed towards itself but are employed by the parents in their intimate relations with one another in the presence of their apparently unobserving child—the infant in its cot, the toddling baby by the hearth, the little child to all appearance absorbed in its picture book or toy. No Time For Sex - David Arp
2010-06-15

Finally! Help for energy-zapped, sleep-challenged, and sex-deprived couples longing to put the interest back in intimacy, readiness back in romance, and sizzle back in marital sex. Today most married couples live in a perpetual frenzy of crisscrossing schedules, meals on the run, continual drop-offs and pick-ups, feedings, meetings, and events. Something has to give, and often it is sex. But according to marriage experts David and

^{Too} Claudia Arp, it does not have to be this way. Using an easy, fun, but realistic and biblically based approach, the Arps share five secrets to help time-deprived lovers recapture a five-star love life, including tips for boosting energy and finding time away from the kids. Intimate, frank, and down-to-earth practical, this book is a must for today's harried marrieds.

children how to make sexuality a safe, healthy, and sacred part of their lives. How parents address sex—their openness, the context, and their attitudes—will impact how their children view their own sexuality and self-worth. Dr. Chirban helps parents know when, how, and how much, and stresses the vital importance of their role in sex education. He uses humor, compassion, and real-life examples to prepare parents for healthy and ongoing conversations that equips their kids to own their own sexuality and provide an understanding of the larger issues of relationships, love, commitment, and intimacy. In addition, parents discover how helping their children grasp these veiled yet critical keys to a fulfilling life deepens their own connection with their children. With specific helps for children from birth through young adult, Dr. Chirban provides context for what needs to be communicated at each stage of their development as well as tips for the inevitable surprise

questions. In addition, he tackles complicated issues such as pornography, relationships and the Internet, sexting, and homosexuality. Most important is the emphasis on strong family values and spirituality as it relates to sexuality.

Previously released in 2007 as *What's Love Got to Do With It?*, this revised book adds new insights from today's culture that make it even more relevant to parents and families.

I didn't share it because I wanted to make money. I didn't share it to be a celebrity. I shared it because I love you all and want you to have access to 100 percent of you.
