**Treating the Tough Adolescent** - Scott P. Sells 2004-07-26

This book illuminates the causes of severe adolescent behavioral problems and presents a research-based fifteen-step model for helping families bring about real, lasting change. Incorporating structural and strategic principles, the author's cohesive approach focuses on setting clear rules and consequences; changing the mood and direction of confrontations; neutralizing such problem behaviors as disrespect, truancy, running away, violence, and threats of suicide; and restoring positive, nurturing relationships among family members. Special treatment issues covered include working with single-parent families, outside systems (peers, school, probation officers), divorce and stepfamily problems, and substance misuse. Clearly written, practical, and accessible, the book uses actual case examples to demonstrate each step of the approach.

No Two Alike: Human Nature and Human

Individuality - Judith Rich Harris 2010-02-15

A groundbreaking theory of personality. The author of the controversial book *The Nurture Assumption* tackles the biggest mystery in all of psychology: What makes people differ so much in personality and behavior? It can't just be "nature and nurture," because even identical twins who grow up together—same genes, same parents—have different personalities. And if psychologists can't explain why identical twins are different, they also can't explain why each of us differs from everyone else. Why no two people are alike. Harris turns out to be well

suited for the role of detective—it isn't easy to pull the wool over her eyes. She rounds up the usual suspects and shows why none of the currently popular explanations for human differences—birth order effects, for example, or interactions between genes and environment—can be the perpetrator she is looking for. None of these theories can solve the mystery of human individuality. The search for clues carries Harris into some fascinating byways of science. The evidence she examines ranges from classic experiments in social psychology to cutting-edge research in neuroscience. She looks at studies of twins, research on autistic children, observations of chimpanzees, birds, and even ants. Her solution is a startlingly original one: the first completely new theory of personality since Freud's. Based on a principle of evolutionary psychology—the idea that the human mind is a toolbox of special-purpose devices—Harris's theory explains how attributes we all have in common can make us different. This is the story of a scientific quest, but it is also the personal story of a courageous and innovative woman who refused to be satisfied with "what everyone knows is true."

Raising a teen is tough—especially when your teen has trouble regulating their emotions and lashes out. This groundbreaking book will give you the tools you need to stop unwittingly reinforcing your teen's bad behavior, reduce conflicts, and get your teen on track with the things that really matter. If you have a teen who experiences extreme emotions, either as a result of a mental health diagnosis such as borderline personality disorder (BPD), or simply because you have a highly emotional teen, you probably need help right now. This highly practical resource integrates the powerful dynamics of family into residential treatment and outdoors-based therapy for young people. Recognizing both the family as the systemic base for promoting change in adolescents and the therapeutic potential of the residential/wilderness setting, experts show how aligning the two can enhance the healing value of the program while promoting higher standards for care. Chapters describe innovative, science-based interventions and techniques for treating common behavioral and emotional problems along a continuum of family involvement and separation, to address issues affecting the family as well as the identified

patient. With its accessible ideas and compelling case studies, the book ably demonstrates the critical role of family in adolescent patients' successful transition to post-treatment life.

Among the topics covered:

- A parallel process: home therapy while the adolescent or young adult is in residential care.
- Intentional separation of families: increasing differentiation through wilderness therapy.
- Emerging family therapy models utilized in residential settings.
- Engaging families in Outdoor Behavioral Healthcare.

*Helping Your Troubled Teen* - Cynthia S Kaplan 2007-07-01

The first "adolescent primer" on the market. Destructive trends among today's youth are growing, making life very different from when their parents were growing up. The primary four self-destructive behaviors in adolescence today are excessive alcohol and substance abuse, promiscuity, self mutilation (ie: cutting and burning), and eating disorders. These will be covered in detail, along with other issues like Internet addiction and suicide. These problems are not only detrimental to teens' mental and physical health, but the legal consequences for injurious behavior have also changed.

Identification and prevention are the most important aspects in stopping teenage self-destructive behavior. This book offers a comprehensive look at teens self destructive behavior and gives parents solutions for dealing with it. *Helping Your Troubled Teen* instructs parents on how to identify an at-risk adolescent and discuss warning signs of injurious behavior,

before the problem(s) become severe enough that a child is in crisis and/or legal actions are taken against them. Personal anecdotes and testimonials from both parents and their teenagers who have been confronted with and have engaged in self-destructive behavior are also included. McLean Hospital is the largest psychiatric teaching facility of Harvard Medical School. Founded in 1811 as the original psychiatric department of the MGH, it moved to Belmont in 1895. The Child and Adolescent Program at McLean Hospital is one of the foremost clinical programs for helping young people and their families cope with psychiatric illness and the challenges it often brings. There are extensive ties with community services, and each therapeutic program of children and adolescents in inpatient, residential and outpatient services is tailored to the specific needs of the child and family.

Hold on to Your Kids - Gabor Maté 2019-01-03

'Maté's book will make you examine your behaviour in a new light' Guardian 'bold, wise and deeply moral. [Maté] is a healer to be cherished' Naomi Klein, author of *No Logo* and *The Shock Doctrine* Children take their lead from their friends: being 'cool' matters more than anything else. Shaping values, identity and codes of behaviour, peer groups are often far more influential than parents. But this situation is far from natural, and it can be dangerous - it undermines family cohesion, interferes with healthy development, and fosters a hostile and

sexualized youth culture. Children end up becoming conformist, anxious and alienated. In *Hold on to Your Kids*, acclaimed physician and bestselling author Gabor Maté joins forces with Gordon Neufeld, a psychologist with a reputation for penetrating to the heart of complex parenting. Together they pinpoint the causes of this breakdown and offer practical advice on how to 'reattach' to sons and daughters, establish the hierarchy at home, make children feel safe and understood, and earn back your children's loyalty and love. This updated edition also addresses the unprecedented parenting challenges posed by the rise of digital devices and social media. By helping to reawaken our instincts, Maté and Neufeld empower parents to be what nature intended: a true source of contact, security and warmth for their children.
