Norman Haire and the Study of Sex - Diana Wyndham 2012

A star debater at school, Norman Haire had always wanted to be an actor. Forced to study medicine, he followed his other passion: saving the world from sexual misery. When he arrived in London in 1919 he was a poor Jewish outsider from Australia. By 1930 he had a flourishing gynaecology practice in Harley Street, a chauffeur-driven Rolls Royce and a country house. His parties were attended by the medical, intellectual and cultural elite. As a prominent sexologist and a campaigner for birth control, Haire took a leading role in the world's first international conference on birth control in 1922 and organised, with Dora Russell, the World League for Sexual Reform's highly successful 1929 Congress in London. He lectured in America, Germany, France and Spain, and wrote and edited many accessible books on sex education. In 1940 Haire returned to Australia where he attracted a loyal following, but was also hounded by the security service. The ABC Board was censured in parliament for choosing him as the key speaker in a population debate, and his weekly advice column in the magazine *Woman* was strongly opposed by the Catholic Church. Peter Coleman called Haire 'one of Australia's most famous freethinkers and sex reformers'. This biography pays a tribute to this tenacious, humane, witty, innovative and brave man's contribution to birth control, sexology and human rights history.

The Long Sexual Revolution - Hera Cook 2004-02-05

In this book Hera Cook traces the path of sexuality in England, and shows how its route was determined by the gradual exertion of control over fertility. Most sexual activity had

major economic and social costs, the most fundamental of which was the physical cost of children upon women's bodies. Around 1800 birth rates reached historical heights. Using a combination of demographic and qualitative sources, Dr Cook examines the connection between the struggle to lower fertility and the increasing repression of sexuality throughout the nineteenth century. Contraception became a viable option in the early twentieth century. The book charts the resulting slow relaxation of attitudes to sexuality and the remaking of heterosexual physical behaviour, culminating in the sexual revolution of the 1960s.

Sex and the Marriage Covenant - John F. Kippley 2005

The thesis of this book is that God intends that sexual intercourse should be at least implicitly a renewal of the marriage covenant. From this it follows that the marriage covenant provides the criterion to evaluate the morality of every sexual act. Thus the title, *Sex and the Marriage*

Covenant, is an appropriate description of the book's contents. Marriage comes into being by a couple unreservedly entering God's covenant of marriage; contraceptive intercourse contradicts the very essence of the marriage covenant. From these considerations, Kippley developed the covenant theology of sexuality described in this book.

Fixing Men - Matthew C. Gutmann 2007-11-06

Women and Health - Elizabeth Fee 2019-05-23

In the face of the long domination of medical care by men, *Women and Health* explores from a variety of perspectives the twin issues of women in health care, and the health care of women. Specific sections address the women's health movement, birth control and childbirth, women in the health labor force, and the influence of women's employment on their health. Already acclaimed by scholars and health policy-makers alike, *Women and Health* is sure to become a standard sourcebook on an important and neglected subject.

When Sex Changed - Layne Parish Craig
2013-11-01

In *When Sex Changed*, Layne Parish Craig analyzes the ways literary texts responded to the political, economic, sexual, and social values put forward by the birth control movements of the 1910s to the 1930s in the United States and Great Britain. Discussion of contraception and related topics (including feminism, religion, and eugenics) changed the way that writers depicted women, marriage, and family life. Tracing this shift, Craig compares disparate responses to the birth control controversy, from early skepticism by mainstream feminists, reflected in Charlotte Perkins Gilman's *Herland*, to concern about the movement's race and class implications suggested in Nella Larsen's *Quicksand*, to enthusiastic speculation about contraception's political implications, as in Virginia Woolf's *Three Guineas*. While these texts emphasized birth control's potential to transform marriage and family life and emancipate women from the "slavery" of constant childbearing, birth control advocates also used less-than-liberatory language that excluded the poor, the mentally ill, non-whites, and others. Ultimately, Craig argues, the debates that began in these early political and literary texts—texts that document both the birth control movement's idealism and its exclusionary rhetoric—helped shape the complex legacy of family planning and women's rights with which the United States and the United Kingdom still struggle.
