Sense and Scent Ability Renee George An unputdownable, thoroughly enjoyable, cozy mystery by USA Today Bestselling Author Renee George. Featuring an middle-aged heroine, strong friendships, and romance with a younger detective...oh, and a mystery that only this heroine's nose can sniff out. ☐☐☐☐ My name is Nora Black, and I'm fifty-one-years young. At least that's what I tell myself, when I'm not having hot flashes, my knees don't hurt, and I can find my reading glasses. I'm also the proud owner of a salon called Scents & Scentsability in the small resort town of Garden Cove, where I make a cozy living selling handmade bath and beauty products. All in all, my life is pretty good. Except for one little glitch... Since my recent hysterectomy, where I died on the operating table, I've been experiencing what some might call paranormal activity. No, I don't see dead people, but quite suddenly I'm triggered by scents that, in their wake, leave behind these vividly intense memories. Sometimes they're unfocused and hazy, but there's no doubt, they are very, very real. Know what else? They're not my memories. It seems I've lost a uterus and gained a psychic gift. When my best friend's abusive boyfriend ends up dead after a fire, and she becomes the prime suspect, I end up a babysitter to her two teenagers while she's locked up in the clink. Add to that the handsome detective determined to stand in my way, my super sniffer's newly acquired abilities and a rash of memories connected to the real criminal, and I find myself in a race to catch a killer before my best friend is tried for murder. ***** "Sense and Scent Ability by Renee George is a delightfully funny, smart, full of excitement, up-all-night fantastic read! The Scent Trail Celia Lyttelton 2009-02-03 Lyttelton's passion for fragrance inspired her to have a signature perfume created just for her?and then to embark on the ultimate olfactory odyssey. Armed with a list of ingredients, she tracked down each component of her scent, tracing its origins, history, and culture. From the iris fields of Tuscany to the vetivert distilleries of India, from the nutmeg plantations of Sri Lanka to the shores of the Arabian Sea, Celia gives readers a glimpse into the world of scent that few people have ever experienced, providing delicious details on its place in history?for example, how Casanova added small amounts of ambergris to chocolate mousses to aid his amorous adventures, and how Charles Dickens carried a monogrammed pocket nutmeg grater in his waist coat at a time when nutmeg was used to ward off evil and to spice rum.

Scents and Sensibility Catherine Maxwell 2017-10-19 This lively, accessible book is the first to explore Victorian literature through scent and perfume, presenting an extensive range of well-known and unfamiliar texts in intriguing and imaginative new ways that make us re-think literature's relation with the senses. Concentrating on aesthetic and decadent authors, Scents and Sensibility introduces a rich selection of poems, essays, and fiction, exploring these texts with reference to both the little-known cultural history of perfume use and the appreciation of natural fragrance in Victorian Britain. It shows how scent and perfume are used to convey not merely moods and atmospheres but the nuances of the aesthete or decadent's carefully cultivated identity, personality, or sensibility. A key theme is the emergence of the olfactif, the cultivated individual with a refined sense of smell, influentially represented by the poet and critic Algernon Charles Swinburne, who is emulated by a host of canonical and less well-known aesthetic and decadent successors such as Walter Pater, Edmund Gosse, John Addington Symonds, Lafcadio Hearn, Michael Field, Oscar Wilde, Arthur Symons, Mark André Raffalovich, Theodore Wratislaw, and A. Mary F. Robinson. This book explores how scent and perfume pervade the work of these authors in many different ways, signifying such diverse things as style, atmosphere, influence, sexuality, sensibility, spirituality, refinement, individuality, the expression of love and poetic creativity, and the aura of personality, dandyism, modernity, and memory. A coda explores the contrasting twentieth-century responses of Virginia Woolf and Compton Mackenzie to the scent of Victorian literature.

The Psychological Basis of Perfumery J. Stephan Jellinek 2012-12-06 During the many years of its publication and subsequent revisions, Paul Jellinek's book has been the standard work on its subject. This new edition, translated into English for the first time, was conceived in response to the increased interest in recent years in perfumes and the sense of smell. This interest has come not only from within the highly competitive perfumery industry, but also from psychologists and market researchers. The original text has impressively withstood the test of time and the approach of this new book has been to supplement it with chapters that are now of critical importance, but which were only touched upon in the original book. A market researcher looks at why people use perfumes; a psychologist examines the motivation of perfume choice; another psychologist discusses odours and a perfumer looks at the effects of odours on human experience and behaviour. In the final chapter the editor compares the original author's views with those of today's experts and suggests which aspects are still valid and in what areas divergent views now prevail. This book is written principally to provide a scientific basis to the craft of perfumery and to enable formulators and marketers to understand why the smells they create and sell have the effect they do. It allows a systematic approach to the development of these products. Others outside the industry, including psychologists in academia, will find the book an essential reference source.

Smells Robert Muchembled 2020-05-07 Why is our sense of smell so under-appreciated? We tend to think of smell as a vestigial remnant of our pre-human past, doomed to gradual extinction, and we go to great lengths to eliminate smells from our environment, suppressing body odour, bad breath and other smells. Living in a relatively odour-free environment has numbed us to the importance that smells have always had in human history and culture. In this major new book Robert Muchembled restores smell to its rightful place as one of our most important senses and examines the transformation of smells in the West from the Renaissance to the beginning of the 19th century. He shows that in earlier centuries, the air in towns and cities was often saturated with nauseating emissions and dangerous pollution. Having little choice but to see and smell faeces and urine on a daily basis, people showed little revulsion; until the 1620s, literature and poetry delighted in excreta which now disgust us. The smell of excrement and body odours were formative aspects of eroticism and sexuality, for the social elite and the popular classes alike. At the same time, medicine explained outbreaks of plague by Satan's poisonous breath corrupting the air. Amber, musk and civet came to be seen as vital bulwarks against the devil's breath: scents were worn like armour against the plague. The disappearance of the plague after 1720 and the sharp decline in fear of the devil meant there was no longer any point in using perfumes to fight the forces of evil, paving the way for the olfactory revolution of the 18th century when softer, sweeter perfumes, often with floral and fruity scents, came into fashion, reflecting new norms of femininity and a gentler vision of nature. This rich cultural history of an under-appreciated sense will be appeal to a wide readership.

The Smell Culture Reader Jim Drobnick 2006-05 Publisher Description

That Kind of Woman: The Life and Career of Barbara Nichols Richard Koper Barbara Nichols (1928-1976), the "dame with the shapely frame," changed her reddish-brown hair to platinum blonde, drew whistles as a semi-nude post-World War Two pin-up model, and was named Miss Long Island. Broadway beckoned and she drew attention in the *Pal Joey* musical. When Hollywood called, she filled a dubious niche in small, wisecracking roles, wringing both comedy and tragedy from cheesy, dim-witted stereotypical strippers, gold-diggers, barflies, gun molls, and floozies. Barbara scored great reviews in films, such as *Pal Joey* (1957), *Sweet Smell of Success* (1957) and *The Pajama Game* (1957). Her later work on television cemented her archetypal characterizations on *The Bob Cummings Show* (1958-1960), *Love that Jill* (1958), *The Jack Benny Program* (1958-1960), *The Red Skelton Hour* (1958-1960), *The Beverly Hillbillies* (1962), *Adam-12* (1968), *The Twilight Zone* (1959), *The Untouchables* (1959) and *Batman*, among others. Always the life of the party and smiling before the public, her private life spiraled down into a whirlpool of troubled relationships and heartbreaking decline. Forever haunted by her unbreakable image as "that kind of woman," Barbara ultimately fell victim to the perilous price of fame, yet her sunny character and the hilarious anecdotes recalled by co-workers, directors, and relatives live on as a testament to her enduring appeal. The author has drawn from extensive interviews with Tab Hunter, Michael Dante, Marvin Kaplan, Paula Stewart, Barbara Luna, Mamie Van Doren, Shirley Knight, director William Byron Hillman, Barbara's psychic, two of her relatives, fellow high school students, and friends. Filmography. Index. Bibliography. Foreword by her second-cousin, John Carpenter. Illustrated with more than 200 photographs from her personal archives.

Scented Visions Christina Bradstreet 2022-06-29 Smell loomed large in cultural discourse in the late nineteenth century, thanks to the midcentury fear of miasma, the drive for sanitation reform, and the rise in artificial perfumery. Meanwhile, the science of olfaction remained largely mysterious, prompting an impulse to "see smell" and inspiring some artists to picture scent in order to better know and control it. This book recovers the substantive role of the olfactory in Pre-Raphaelite art and Aestheticism. Christina Bradstreet examines the iconography and symbolism of scent in

nineteenth-century art and visual culture. Fragrant imagery in the work of John Everett Millais, Dante Gabriel Rossetti, Simeon Solomon, George Frederic Watts, Edward Burne-Jones, and others set the trend for the preoccupation with scent that informed swaths of British, European, and American art and design. Bradstreet's rich analyses of paintings, perfume posters, and other works of visual culture demonstrate how artworks mirrored the "period nose" and intersected with the most clamorous debates of the day, including evolution, civilization, race, urban morality, mental health, faith, and the "woman question." Beautifully illustrated and grounded in current practices in sensory history, *Scented Visions* presents both fresh readings of major works of art and a deeper understanding of the cultural history of nineteenth-century scent.

Led By The Nose Jenny Joseph 2023-08-03 Jenny Joseph was no ordinary poet - and *Led by the Nose* is no ordinary memoir. Shaped around the smells of the English countryside, it is full of the wilful personality and the sly humour that characterised the purple-clad old woman in her iconic poem 'Warning'. Joseph's eccentricities permeate each chapter as she flows through the gardening year with its chores and blossoms, frequently leading the reader off the garden path to stop, smell the roses, and ignore the world for a while. Full of the sensual awareness of Jenny Joseph's poetry, *Led by the Nose* is a singular memoir: a work of delicious diversion and literary flair, horticultural anxieties and countercultural tendencies, providing a glimpse - or sniff - of the landscape of this treasured poet's life.

Aroma Constance Classen 2002-11-01 Smell is a social phenomenon, given particular meanings and values by different cultures. Odours form the building blocks of cosmologies, class hierarchies, and political odours. They can enforce social structures or transgress them, unite people or divide them, empower or disempower. The authors argue that the sociology of smell is repressed in the modern West, and its social history ignored. This book breaks the "olfactory silence" of modernity. It offers the first comprehensive exploration of the cultural role of odours in Western history - from antiquity to the present. It also covers a wide variety of non-Western societies. Its topics range from the medieval concept of the "odour of sanctity", to the aromatherapies of South America, and from olfactory stereotypes of gender and ethnicity in the modern West to the role of smell in postmodernity. Its subject matter will fascinate anyone who likes to nose around in the inner workings of culture.

The Scent of Desire Rachel Herz 2009-10-13 Shakespeare wrote that a rose by any other name would smell as sweet. But if you cannot smell, does the rose lose its sweetness? The first and definitive book on the psychology of smell, *The Scent of Desire* traces the importance of smell in our lives, from nourishment to procreation to our relationships with the people closest to us and the world at large. Smell was the very first sense to evolve and is located in the same part of the brain that processes emotion, memory, and motivation. To our ancestors, the sense of smell wasn't just important, it was crucial to existence and it remains so today. Our emotional, physical, even sexual lives are profoundly shaped by both our reactions to and interpretations of different smells. Why do some people like a certain smell and others hate it? Is smell personal or cultural? How does smell affect our choices and our daily lives? Rachel Herz explores these questions and examines the role smell plays in our lives, and how this most essential of senses is imperative to our physical and emotional well-being. Herz investigates how our sense of smell functions, examines what purpose it serves, and shows how inextricably it is linked to our survival. She introduces us to people who have lost their ability to smell and shows how their experiences confirm this sense's importance by illuminating the traumatic effect its loss has on the quality of day-to-day living. Herz illustrates how profoundly scent and the sense of smell affect our daily lives with numerous examples and personal accounts based on her years of research. The wonders of our sense of smell are all explored in a compelling and engaging manner, from emotions and memory to aromatherapy and pheromones. For anyone who has ever wondered about human nature or been curious about the secrets of both the body and the mind, *The Scent of Desire* is a fascinating, down-to-earth tour of the psychology and biology of our most neglected sense, the sense of smell.

Letter From An Unknown Woman James Naremore 2021-03-25 James Naremore's study of Max Ophuls' classic 1948 melodrama, Letter from an Unknown Woman, not only pays tribute to Ophuls but also discusses the backgrounds and typical styles of the film's many contributors--among them Viennese author Stephan Zweig, whose 1922 novella was the source of the picture; producer John Houseman, an ally of Ophuls who nevertheless made questionable changes to what Ophuls had shot; screenwriter Howard Koch; music composer Danièle Amfitheatrof; designers Alexander Golitzen and Travis Banton; and leading actors Joan Fontaine and Louis Jourdan, whose performances were central to the film's emotional effect. Naremore also traces the film's reception history, from its middling box office success and mixed early reviews, exploring why it has been a work of exceptional interest to subsequent generations of both aesthetic critics and feminist theorists. Lastly, Naremore provides an in-depth critical appreciation of the film, offering nuanced appreciation of specific details of mise-en-scene, camera movement, design, sound, and performances, integrating this close analyses into an overarching analysis of Letter's "recognition plot;" a trope in which the recognition of a character's identity creates dramatic intensity or crisis. Naremore argues that Letter's use of recognition is one of the most powerful in Hollywood cinema, and contrasts it with what we find in Zweig's novella.

Neurobiology of Sensation and Reward Jay A. Gottfried 2011-03-28 Synthesizing coverage of sensation and reward into a comprehensive systems overview, Neurobiology of Sensation and Reward presents a cutting-edge and multidisciplinary approach to the interplay of sensory and reward processing in the brain. While over the past 70 years these areas have drifted apart, this book makes a case for reuniting sensation and reward by highlighting the important links and interface between the two. Emphasizing the role of reward in reinforcing behaviors, the book begins with an exploration of the history, ecology, and evolution of sensation and reward. Progressing through the five senses, contributors explore how the brain extracts information from sensory cues. The chapter authors examine how different animal species predict rewards, thereby integrating sensation and reward in learning, focusing on effects in anatomy, physiology, and behavior. Drawing on empirical research, contributors build on the themes of the book to present insights into the human sensory rewards of perfume, art, and music, setting the scene for further cross-disciplinary collaborations that bridge the neurobiological interface between sensation and reward.
