Life's a Beach Robert Klanten 2021-06-15 There's no two ways about it: life is better by the beach. The salty air, the sound of the waves and, above all, the relaxed way of life. Projects and firms featured include Greenwich House, Allan Greenberg; Longbranch, Jim Olson; Astley Castle, Witherford Watson Mann; Hunsett Mill, Acme; Cotswolds House, Richard Found; plus more than a dozen others. These projects address such timely factors as sustainability, multiculturalism, preservation, and style, and demonstrate the unique beauty and elegance that comes from the interweaving of modernity and history.

The World of Thennla Jonathan Drake 2016-10-13 Thennla is a fantasy setting for the Mythras game system. Encircled by the Outer Ocean, watched by the God of the Sun and the Goddess of the Moon, Thennla's continents reveal themselves. The jungles of Jandekot; the vast deserts of Rasputana; and there, in the east, the Moon Goddess Jekkara anchored over it, is Taygus, land of plains and hills, the great inland sea and teeming civilisations. Here empires are born: Korantia, fading now, but defiant, its city-states each a goddess incarnate; the Jekkarenes, oldest of all civilisations, and blessed by the Moon Goddess; and now the Taskan Empire, overturning centuries of tradition with new ideas, ruled by a god-emperor and his avatar, the Iron Simulacrum. And watching closely is Assabia, a land of cruel rites and cunning sorcerers. The World of Thennla sourcebook is available as a paperback (or as a free PDF) resource for Mythras - a campaign world that is open for exploration and adventure. It includes an overview of the world, centering on Taygus, and describes the magic of the place, and how to create Thennlan characters. More information is given in the supplements Shores of Korantia and The Taskan Empire, but this is an ideal introduction for Games Masters and players who want a magic-rich world of high adventure, with the flavours of classical Greece, Rome, Persia and Byzantium. The Thennla sourcebook will get you started and wanting to learning more. It will inspire you to create your own adventures and develop the cultures outline in its pages.If you already have Shores of Korantia or The Taskan Empire, this booklet is not essential, although it may prove a useful gazeteer for players.

Planetary Hinterlands Pamila Gupta 2023-12-11 This open access book considers the concept of the hinterland as a crucial tool for understanding the global and planetary present as a time defined by the lasting legacies of colonialism, increasing labor precarity under late capitalist regimes, and looming climate disasters. Traditionally seen to serve a (colonial) port or market town, the hinterland here becomes a lens to attend to the times and spaces shaped and experienced across the received categories of the urban, rural, wilderness or nature. In straddling these categories, the concept of the hinterland foregrounds the human and more-than-human lively processes and forms of care that go on even in sites defined by capitalist extraction and political abandonment. Bringing together scholars from the humanities and social sciences, the book rethinks hinterland materialities, affectivities, and ecologies across places and cultural imaginations, Global North and South, urban and rural, and land and water.

2G: Fala Atelier (Porto) Pedro Bandeira 2019 Fala is a young architecture practice founded in 2013 in Porto, and led by Filipe Magalhães, Ana Luisa Soares and Ahmed Belkhodja. Hedonistic yet restrained, the studio takes lightness and joy very seriously. Their projects can be characterized by a strong tendency towards autonomy, or better: towards an emerging independence of architectural language. Many of the refurbishment projects in Porto were initiated by private investors, trying to make a fortune by real estate speculation. After the economic crisis of 2008 the downtowns of Porto and Lisbon were confronted with a rampant boom in tourism. Speculation was propelled by special governmental measures such as the relief of a far-reaching protection against dismissal or the easy availability of golden visas. This may be the reason why some of Fala's projects come across like topical declinations of the same program: separation of auxiliary functions from the main space, zoning of the plan, opening and staging of the view onto a small courtyard.

Shedworking Alex Johnson 2010-05-25 Featuring shedworkers and shedbuilders from around the world who are leading the alternative workplace revolution, Shedworking looks at why having a shed office is a greener way of working, improves the work-life balance, and accelerates one's productivity. Inspired by the author's Shedworking website, which has been internationally acclaimed for the groundbreaking scale of its architectural coverage, the book features many previously unpublished images of garden offices and shed-like atmospheres: offices on roofs, sheds inside "traditional" offices, and even sheds on wheels, as well as cutting-edge Le Corbusier-designed models for the back garden, all-glass shed offices, and buildings "built" using living trees. Along the way it offers a whistle-stop tour of famous sheds from Pliny the Younger's summerhouse and the retreats of 19th-century composers Edvard Grieg and Gustav Mahler to award-winning 21st-century fantasy writer Neil Gaiman's gazebo. In short, Shedworking offers a manifesto for those wanting to change their working lives for the better and go to work in the garden.

Wealth And Poverty Of Nations David S. Landes 2015-04-20 The history of nations is a history of haves and have-nots, and as we approach the millennium, the gap between rich and poor countries is widening. In this engrossing and important new work, eminent historian David Landes explores the complex, fascinating and often startling causes of the wealth and poverty of nations. The answers are found not only in the large forces at work in economies: geography, religion, the broad swings of politics, but also in the small surprising details. In Europe, the invention of spectacles doubled the working life of skilled craftsmen, and played a prominent role in the creation of articulated machines, and in China, the failure to adopt the clock fundamentally hindered economic development. The relief of poverty is vital to the survival of us all. As David Landes brilliantly shows, the key to future success lies in understanding the lessons the past has to teach us - lessons uniquely imparted in this groundbreaking and vital book which exemplifies narrative history at its best.
