Psychotherapy, the Alchemical Imagination and Metaphors of Substance - Alan Bleakley 2023-07-04

Alchemy is popularly viewed as a secret way of turning worthless base metal into gold, and then a precursor to modern chemistry. This is often taken as a metaphor for psychological development. This book describes an innovative "third way" for both the education and exercise of an alchemical imagination that embraces both material matters and psychological insight: alchemy as lyrical poetics, or the intensive production of embodied metaphor. Alchemy here is viewed as an immanent set of metaphor-driven "best practices" for indwelling complex and contradictory earthly matters in a sensual, artistic and humane manner. Or, again, it describes best psychotherapeutic practice. Alchemy is read not as a medium for "personal growth", but optimal co-existence with the natural world. It is an eco-logical rather than ego-logical project with deep aesthetic concerns (education of the senses in close noticing) and political intentions (a democracy of worldly things). The book echoes post-Freudian developments in psychoanalysis that avoid the mysticism of symbol systems to work rather with everyday signs and linguistic registers such as embodied metaphors, keeping the focus on known and sensed phenomena rather than abstractions.

Jungian Thought in the Modern World - Elphis Christopher 2000

C.G. Jung (1875-1961) was a man of the millennium. His personal history

parallels the history of the last century and is especially relevant to the current movement where themes not only from the last century but also the last millennium are being gathered in anticipation of the new era. Jung's life and work touch on the past century's two major themes: on the one hand, the discovery and mapping of the unconscious, an internal source of creativity and destruction for each individual; and, on the other hand, those outbreaks of dreadful violence and expressions of awesome creativity that can erupt from within the unconscious of humankind as a whole.

Jungian Archetypes in 20th Century Women's Fiction - Lorelei Cederstrom 2002

With this the beginning of the new millennium and in the aftermath of the many hundred-best lists of the outstanding contributions to culture in the past century, Dr. Cederstrom was struck with the difference between such lists as they would have been written at the turn of the century and those written of late. It is evident that best books, like the literary canon itself, has been forced to recognize women's achievements.

The Bonding of Will and Desire - Joanne Stroud 1994

"Over many centuries, philosophers, theologians, and poets have been fascinated by the interplay of will and desire in the human psyche. Does will follow or precede desire? How can we bond them and thus unite body, soul, and spirit in harmonic concord? For fresh insights to these age-old questions, Dr. Joanne Stroud enlists the tools of modern psychology. Her eclectic probe of basic human drives moves from the awesome power of Eros, the great liberator of antiquity, through the impact of the monotheistic faiths on will and desire, and finally to the discordant views of the great philosophers and psychologists of the modern era, among them Nietzsche, Freud, Jung, and the little known but magnetic Frenchman, Gaston Bachelard." "Love and will, human aspirations and desires, are caught - the author concludes - in a whirlwind of change, with impersonal scientific data supplanting the myths, the ancient lore, the stories rich in imagery, that previously contoured human behavior. As a result we live, in W.B. Yeats's famous phrase, in "the age of disordered will."" "In the twentieth century will became recognized only in its more conscious applications, as almost synonymous with ego. With this increasing reverence for the strong ego,

will was elevated (by psychologists, among many others) to new egotistical summits as a potent tool of power. The more subtle aspects of will, such as the way it delineates identity, have been neglected, the author contends, and can only be recaptured by an understanding of how will becomes bonded to desire."--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. The Alchemical Mercurius - Mathew Mather 2014-03-05

The figure of the alchemical Mercurius features ubiquitously and radically in Jung's later works, but despite this, there has been little research concerning Mercurius in Jungian studies to date. In this book, Mathew Mather explores the figure of the alchemical Mercurius and contextualises and clarifies its significance in Jung's life and works. Placing the alchemical Mercurius as a central concern reveals a Jungian interpretation in which the grail legend, alchemy and precessional astrology, as three thematic threads, converge. In such a treatment, Jung's belief in the dawning of a new platonic month emerges as a central consideration and an esoteric perspective on Jung's life and works is brought more fully to light, constructing a life-myth interpretation. The book is comprised of three parts: Aurea Catena: locating the figure of the alchemical Mercurius within the Western esoteric tradition Daimonic Encounter: the relevance of this figure in Jung's personal life Magnum Opus: Jung's portrayal of this figure in key texts such as Synchronicity, Aion, Mysterium Coniunctionis; and Emma Jung and von Franz's The Grail Legend. The Alchemical Mercurius is a unique contribution to analytical psychology, substantially revealing 'esoteric Jung' and providing valuable perspectives on the theme of his myth for our times. The book will appeal to researchers and academics in the field of analytical psychology as well as postgraduate students.

Mothers and Others - Wilma Garcia 1984

This study applies methodologies developed in myth scholarship to the literary works of three American authors, Herman Melville, Mark Twain, and Ernest Hemingway, in order to demonstrate the significance of female characterizations and feminine symbolic patterns in these works. By examining the feminine elements present in the writers' adaptations (usually ironic) of the theme of the heroic quest, the investigation also

hopes to provide an increased awareness of the long traditions, in our literature as in our mythologies, that have shaped our culture's attitudes toward and about the female.
