The Bugatti Queen - Miranda Seymour 2015-04-09

Born in 1900 to a soon-to-be-widowed postmaster's wife in a small French village, H el ene Delangle's background offered no suggestion of the extraordinary life she was to lead. The first step was to leave the country behind and head to the city -- in this case, a Paris in the grip of an intoxicating 1920s blend of creativity and debauchery. She became a dancer, and then a stripper. But the demi-monde of gauze veils and admirers was not enough. A visit to the Actors' Championships, a uniquely French meeting of the theatrical world with the race-track, opened her eyes to the glamorous combination of machines and speed. Quickly establishing herself as a racer of uncommon talent and audacity, the beautiful woman now known as Hell e Nice -- Hellish Nice to her British fans -- then caught the attention of none other than Ettore Bugatti, founder of the marque with which her name will always be associated. And yet, despite the fame and the fortune she amassed in an unprecedented career, she died penniless and alone, an old woman in a crumbling Nice flat surrounded only by memories. THE BUGATTI QUEEN is the story of a great pioneer of motor racing who happened to be a woman. Re-creating her rollercoaster career with great verve and panache, Miranda Seymour brilliantly shows us a life now forgotten -- and makes it unforgettable.

A Society of Young Women - Amelie Le Renard 2014-06-25

The cities of Saudi Arabia are among the most gender segregated in the world. In recent years the Saudi government has felt increasing international pressure to offer greater roles for women in society. Implicit in these calls for reform, however, is an assumption that the only "real" society is male society. Little consideration has been given to the rapidly evolving activities within women's spaces. This book joins young urban women in their daily lives—in the workplace, on the female university campus, at the mall—to show how these women are transforming Saudi cities from within and creating their own urban, professional, consumerist lifestyles. As young Saudi women are emerging as an increasingly visible social group, they are shaping new social norms. Their shared urban spaces offer women the opportunity to shed certain constraints and imagine themselves in new roles. But to feel included in this peer group, women must adhere to new constraints: to be sophisticated, fashionable, feminine, and modern. The position of "other" women—poor, rural, or non-Saudi women—is increasingly marginalized. While young urban women may embody the image of a "reformed" Saudi nation, the reform project ultimately remains incomplete, drawing new hierarchies and lines of exclusion among women.

"Bring Me Men..." Brought Women - Kathleen Utley Kornahrens 2023-05-01

On June 28, 1976, into the all-male bastion of the United States Air Force Academy 157 women stepped, challenging the slogan over the entrance ramp that read "Bring Me Men." These women inspired an upheaval of change in this tradition-bound military school. Their journey was one of survival in a male-dominated environment, where they struggled to find balance on a seesaw of ingrained gender discrimination and undesired special privileges. This book tells the story of the first female cadets in

the United States Air Force Academy, and their fight to make a permanent place for themselves there. Chapters explore their struggle to be accepted, the difficulties of the training environment, the camaraderie and conflict with men and the hardships and joys of those who marched in the ranks of that first co-ed class.

The New Feminine Brain - Mona Lisa Schulz 2013-07-16

Ever wonder why most women can handle the kids and careers and the renovation but men can concentrate on either the newspaper or a game on TV? This is because female brains have more interconnections that allow them to multi-task and split their attention. The New Feminine Brain is the first book by a medical doctor, who is also a psychiatrist and a brain expert, to show how modern life challenges are physically rewiring the brain and to address the particular challenges that women face as a result. The female brain today is not your grandmother's brain - it has even more connections and skills, but with that can come more physical problems, including an increase in attention and memory deficits and chronic mood and health conditions. The New Feminine Brain combines the insights of Dr Schulz's research and stories of clinical experience as a neuropsychiatrist treating people with tough brain disorders with unique self-help and expert health advice. Readers will discover and cultivate their special genius and intuitive style with provocative self-tests, so they can hear and heal their depression, anxiety, attention, memory, and other brain problems. 'Rewiring' exercises, herbs and nutritional supplements will improve their physical, psychological and emotional health.

Capturing Contemporary Japan - Satsuki Kawano 2014-08-31

What are people's life experiences in present-day Japan? This timely volume addresses fundamental questions vital to understanding Japan in the first decade of the twenty-first century. Its chapters collectively reveal a questioning of middle-class ideals once considered the essence

of Japaneseness. In the postwar model household a man was expected to obtain a job at a major firm that offered life-long employment; his counterpart, the "professional" housewife, managed the domestic sphere and the children, who were educated in a system that provided a path to mainstream success. In the past twenty years, however, Japanese society has seen a sharp increase in precarious forms of employment, higher divorce rates, and a widening gap between haves and have-nots. Contributors draw on rich, nuanced fieldwork data collected during the 2000s to examine work, schooling, family and marital relations, child rearing, entertainment, lifestyle choices, community support, consumption and waste, material culture, well-being, aging, death and memorial rites, and sexuality. The voices in these pages vary widely: They include schoolchildren, teenagers, career women, unmarried women, young mothers, people with disabilities, small business owners, organic farmers, retirees, and the elderly.

Driving Women - Deborah Clarke 2007-04-15

Over the years, cars have helped to define the experiences and self-perceptions of women in complex and sometimes unexpected ways. When women take the wheel, family structure and public space are reconfigured and re-gendered, creating a context for a literary tradition in which the car has served as a substitute for, an escape from, and an extension of the home, as well as a surrogate mother, a financial safeguard, and a means of self-expression. *Driving Women* examines the intersection of American fiction—primarily but not exclusively by women—and automobile culture. Deborah Clarke argues that issues critical to twentieth-century American society—technology, mobility, domesticity, and agency—are repeatedly articulated through women's relationships with cars. Women writers took surprisingly intense interest in car culture and its import for modern life, as the car, replete with material and symbolic meaning, recast literal and literary female power in the automotive age. Clarke draws on a wide range of literary works, both canonical and popular, to document women's fascination with cars from many perspectives: historical, psychological, economic, ethnic. Authors discussed include Wharton, Stein, Faulkner, O'Connor, Morrison, Erdrich, Mason, Kingsolver, Lopez, Kadohata, Smiley, Senna, Viramontes, Allison, and Silko. By investigating how cars can function as female space, reflect female identity, and reshape female agency, this engaging study opens up new angles from which to approach fiction by and about women and traces new directions in the intersection of literature, technology, and gender.

The Pursuit of Attention - Charles Derber 2000-06-15

"Enough about me," goes the old saying, "what about you? What do you think about me?" Hence the pursuit of attention is alive and well. Even the Oxford English Dictionary reveals a modern coinage to reflect the

chase in our technological age: "ego-surfing"--searching the Internet for occurrences of your own name. What is the cause of this obsessive need for others' recognition? This useful and popular volume, now in a second edition that features major new introductory and concluding essays, entertainingly ponders this question. Derber argues that there is a general lack of social support in today's America, one which causes people to vie hungrily for attention, and he shows how individuals will often employ numerous techniques to turn the course of a conversation towards themselves. Illustrating this "conversational narcissism" with sample dialogues that will seem disturbingly familiar to all readers, this book analyzes the pursuit of attention in conversation--as well as in politics and celebrity culture--and demonstrates the ultimate importance of gender, class, and racial differences in competing for attention. Derber shows how changes in the economy and culture--such as the advent of the Internet--have intensified the rampant individualism and egotism of today. And finally, in a new afterword, he focuses on solutions: how to restructure the economy and culture to humanize ourselves and increase the capacity for community, empathy, and attention-giving.
