When Technology Fails - Matthew Stein
2008-08-18

There's never been a better time to "be prepared." Matthew Stein's comprehensive primer on sustainable living skills—from food and water to shelter and energy to first-aid and crisis-management skills—prepares you to embark on the path toward sustainability. But unlike any other book, Stein not only shows you how to live "green" in seemingly stable times, but to live in the face of potential disasters, lasting days or years, coming in the form of social upheaval, economic meltdown, or environmental catastrophe. When Technology Fails covers the gamut. You'll learn how to start a fire and keep warm if you've been left temporarily homeless, as well as the basics of installing a renewable energy system for your home or business. You'll learn how to find and sterilize water in the face of utility failure, as well as practical information for dealing with water-quality issues even when the public tap water is still flowing. You'll learn alternative techniques for healing equally suited to an era of profit-driven malpractice as to situations of social calamity. Each chapter (a survey of the risks to the status quo; supplies and preparation for short- and long-term emergencies; emergency measures for survival; water; food; shelter; clothing; first aid, low-tech medicine, and healing; energy, heat, and power; metalworking; utensils and storage; low-tech chemistry; and engineering, machines, and materials) offers the same approach, describing skills for self-reliance in good times and bad. Fully revised and expanded—the first edition was written pre-9/11 and pre-Katrina, when few Americans took the risk of social disruption

seriously—When Technology Fails ends on a positive, proactive note with a new chapter on "Making the Shift to Sustainability," which offers practical suggestions for changing our world on personal, community and global levels.

The Knowledge - Lewis Dartnell 2015-03-05
Maybe it was a viral pandemic, or an asteroid strike, or perhaps nuclear war. Whatever the cause, the world as we know it has ended and you and the other survivors must start again. What key knowledge would you need to start rebuilding civilisation from scratch? Once you've scavenged what you can, how do you begin producing the essentials? How do you grow food, generate power, prepare medicines, or get metal out of rocks? Could you avert another Dark Ages or take shortcuts to accelerate redevelopment? Living in the modern world, we have become disconnected from the basic processes that support our lives, as well as the beautiful fundamentals of science that enable you to relearn things for yourself. The Knowledge is a journey of discovery, a book which explains everything you need to know about everything. This is a quickstart guide for rebooting civilisation which will transform your understanding of the world and help you prepare for when it's no longer here...

The Once and Future Sex: Going Medieval on Women's Roles in Society - Eleanor Janega
2023-01-17

Named a Most Anticipated Book of 2023 by The Millions A vibrant and illuminating exploration of medieval thinking on women's beauty, sexuality, and behavior. What makes for the ideal woman? How should she look, love, and be? In this vibrant, high-spirited history, medievalist Eleanor Janega turns to the Middle Ages, the era that bridged the ancient world and modern society, to unfurl its suppositions about

women and reveal what's shifted over time—and what hasn't. Enshrined medieval thinkers, almost always male, subscribed to a blend of classical Greek and Roman philosophy and Christian theology for their concepts of the sexes. For the height of female attractiveness, they chose the mythical Helen of Troy, whose imagined pear shape, small breasts, and golden hair served as beauty's epitome. Casting Eve's shadow over medieval women, they derided them as oversexed sinners, inherently lustful, insatiable, and weak. And, unless a nun, a woman was to be the embodiment of perfect motherhood. In contrast, drawing on accounts of remarkable and subversive medieval women like Eleanor of Aquitaine and Hildegard of Bingen, along with others hidden in documents and court cases, Janega shows us how real women of the era lived. While often mothers, they were industrious farmers, brewers, textile workers, artists, and artisans and paved the way for new ideas about women's nature, intellect, and ability. In *The Once and Future Sex*, Janega unravels the restricting expectations on medieval women and the ones on women today. She boldly questions why, if our ideas of women have changed drastically over time, we cannot reimagine them now to create a more equitable future.

Henley's Formulas for Home and Workshop

- Gardner Dexter Hiscox 1979

A valuable reference book for the home, factory, office, laboratory and the workshop, containing ten thousand selected household, workshop and scientific formulas, trade secrets, chemical recipes, processes and money saving ideas for both the amateur and professional worker. Enlarged Edition including useful workshop and laboratory methods.

Caveman Chemistry - Kevin M. Dunn 2003

Half a million years ago our ancestors learned to make fire from scratch. They crafted intricate tools from stone and brewed mind-altering elixirs from honey. Their descendants transformed clay into pottery, wool into clothing, and ashes into cleansers. In ceramic crucibles they won metal from rock, the metals lead to colored glazes and glass. Buildings of brick and mortar enshrined books of parchment and paper. Kings and queens demanded ever more colorful clothing and accessories in order to out-class

clod-hoppers and call-girls. Kingdoms rose and fell by the power of saltpeter, sulfur, and charcoal. And the demands of everyday folk for glass and paper and soap stimulated the first round of chemical industrialization. From sulfuric acid to sodium carbonate. From aniline dyes to analgesic drugs. From blasting powder to fertilizers and plastics. In a phrase, From Caveman to Chemist. Your guides on this journey are the four alchemical elements; Fire, Earth, Air and Water. These archetypical characters deliver first-hand accounts of the births of their respective technologies. The spirit of Fire, for example, was born in the first creature to cultivate the flame. This spirit passed from one person to another, from one generation to another, from one millennium to another, arriving at last in the pages of this book. The spirit of Earth taught folks to make tools of stone, the spirit of Air imparted knowledge of units and the spirit of Water began with the invention of spirits. Having traveled the world from age to age, who can say where they will find their next home? Perhaps they will find one in you.

○ [How to Invent Everything](#) - Ryan North
 2018-09-20
 One of BBC Focus magazine's top books of 2018 Get ready to make history better... on the second try. Imagine you are stranded in the past (your time machine has broken) and the only way home is to rebuild civilization yourself. But you need to do it better and faster this time round. In this one amazing book, you will learn How to Invent Everything. Ryan North -- bestselling author, programmer and comic book legend -- provides all the science, engineering, mathematics, art, music, philosophy, facts and figures required for this challenge. Thanks to his detailed blueprint, humanity will mature quickly and efficiently - instead of spending 200,000 years stumbling around in the dark without language, not realising that tying a rock to a string would mean we could navigate the entire world. Or thinking disease was caused by weird smells. Fascinating and hilarious, How To Invent Everything is an epic, deeply researched history of the key technologies that made each stage of human history possible (from writing and farming to buttons and birth control) - and it's as entertaining as a great time-travel novel. So if you've ever secretly wondered if you could do history better yourself, now is your chance to find out how.

[The Chemistry of Money](#) - Brian Rohrig
 2020-10-26

Did you know that some societies once used giant rocks for money? Why do some coins have holes in them? Will plastic soon replace paper currency? The history of money closely parallels the history of chemistry, with advances in material science leading to advances in our physical currency. From the earliest examples of money, through the rise of coins, paper, plastic and beyond, with excursions into corrosion and counterfeiting along the way, this book provides a chemist's eye view into the history of the cash in our pockets. Written in an accessible style

that will appeal to the layperson and scientist alike, *The Chemistry of Money* will be sure to both enlighten and entertain. You will never look at money the same way again!

[The Survival Chemist: Vital Information for Anyone Who Wishes to Survive and Resist Any Threat to Their Freedom](#) - David A. Howard
 2006-11

The survival chemist brings survivalists important information on building and maintaining shelters, leather preservation, the making of explosives such as Dynamite, blasting and percussion powders, gunpowder, nitroglycerin and fuses. Other chapters cover water purification, survival foods, meat preservation, brewing your own beer and liquor, making poison gas, protecting against radiation, the use of drugs, and precious metals testing. 5.5 x 8.5, 59 pages, illus., & softcover.

[The Business of Botanicals](#) - Ann Armbrrecht
 2021-02-25

From tulsi to turmeric, echinacea to elderberry, medicinal herbs are big business—but do they deliver on their healing promise—to those who consume them, those who provide them, and the natural world? “An eye-opener. . . . [Armbrrecht] challenges ideas of what medicine can be, and how business practices can corrupt, and expand, our notions of plant-based healing.”—The Boston Globe "So deeply honest, sincere, heartfelt, questioning, and brilliant. . . . [The Business of Botanicals] is an amazing book, that plunges in, and takes a deepening look at those places where people don't often venture."—Rosemary Gladstar, author of *Rosemary Gladstar's Medicinal Herbs* "For those who loved *Braiding Sweetgrass*, this book is a perfect opportunity to go deeper into understanding the complex and co-evolutionary journey of plants and people." —Angela McElwee, former president and CEO of Gaia Herbs Using herbal medicines to heal the body is an ancient practice, but in the twenty-first century, it is also a worldwide industry. Yet most consumers know very little about where those herbs come from and how they are processed into the many products that fill store shelves. In *The Business of Botanicals*, author

que hay que saber acerca de todo lo que nos rodea. Una guía rápida para reiniciar la civilización que transformará nuestra comprensión del mundo, y nos ayudará cuando este ya no exista. La crítica ha dicho... «Un maravilloso compendio de los conocimientos que hemos olvidado. El libro más inspirador que he leído en mucho tiempo.» Peter Forbes, *Independent* «Un libro extraordinario, una lectura estupenda incluso si la civilización no desaparece. Si lo hace, será la biblia del nuevo mundo, y Dartnell su profeta.» *The Times* «Una fascinante historia de la ciencia y la tecnología.» Steven Poole, *The Guardian*
New Scientist - 2005

Как изобрести все. Создай цивилизацию с нуля - Райан Норт 2019-08-29

Отфильтровать воду? Создать антибиотик?
Собрать радио и паровой двигатель?
Приготовить пиво, да еще и хранить его в холодильнике? Легко, если вы, конечно, не забыли захватить с собой руководство по выживанию «Как изобрести всё на свете». Эта

книга делает вас умнее, сообразительнее и поможет стать самым влиятельным человеком на Земле. Даже если для этого вам не придется возвращаться в прошлое. Книга «Как изобрести всё на свете» – это не только практический гид по выживанию, но и уникальный инструмент для развития творческого мышления. Она помогает читателю научиться видеть возможности там, где другие видят проблемы, и создавать нечто новое и полезное для себя и окружающих. Кроме того, книга может быть использована для самообразования или обучения других людей. Все это делает ее ценным ресурсом для всех, кто стремится к развитию своих технических навыков и умений.

Scientific Soapmaking - Kevin M. Dunn 2010
"Scientific Soapmaking" bridges the gap between the technical and craft literature. It explains the chemistry of fats, oils, and soaps, and teaches sophisticated analytical techniques that can be carried out using equipment and materials familiar to makers of handcrafted soap.
