Online Social Networking on Campus - Ana M. Martínez-Alemán 2008-02

In the era of such online spaces as Facebook, Instant Messenger, Live Journal, Blogger, Web Shots, and campus blogs, college students are using these resources and other online sites as a social medium. Inevitably, this medium presents students with ethical decisions about social propriety, self disclosure and acceptable behaviour. Because online social networking sites have proven problematic for college students and for college administrators, this book aims to offer professional guidance to Higher Education administrators and policy makers. Online Social Networking on Campus: Understanding what matters in student culture is a professional guide for Higher Education faculty and Student Affairs administrators, which rigorously examines college

students' use of online social networking sites and how they use these to develop relationships both on and off campus. Most importantly, Online Social Networking on Campus investigates how college students use online sites to explore and makes sense of their identities. Providing information taken from interviews, surveys and focus group data, the book presents an ethnographic view of social networking that will help Student Affairs administrators, Information Technology administrators, and faculty better understand and provide guidance to the "neomillennials" on their campuses.

What Philosophy Can Tell You About Your Lover -

Sharon M. Kaye 2012-05-08

Be warned—in your journey through this volume you will encounter many true stories. Some will make you laugh, others could make you cry, and all are enough to thoroughly embarrass the authors. These stories would never be allowed to see the light of day if they did not open the door to important truths about love.

The authors speak to you, sometimes in their own voices, sometimes through dialogue, and sometimes through fiction. You will recognize yourself in their struggles and triumphs. Can the good life be attained without true love? What is jealousy? Is it possible to be a feminist and a heterosexual

lover at the same time? What is the logic of the lovers' quarrel? Is rough sex immoral? Is pornography a great lover's friend or a foe? What did Plato, Aristotle, Kant, Nietzsche, Russell, Beauvoir, and other great geniuses of Western history have to say about what goes on under the boardwalk? Is there any freedom in love? Is erotic desire a function of body or spirit? What is the best kind of love? Is there such a thing as a soul mate? You will have to face these questions and more when you dare to ask what philosophy can tell you about your lover. Everyone who has experienced it knows that romantic love truly is a "crazy little thing." It keeps us awake at night and makes us do things we would never have dreamed we were capable of. In this volume twenty-five philosophy professors are gathered together to discuss various connections between romantic love and philosophy. They have left their tweed jackets and spectacles behind. some far away city where they are at ease, ready to tell you what they really think. Perhaps you have taken a few philosophy classes, or perhaps you always kind of wanted to. This is your chance to enjoy some deep reflection on one of life's greatest mysteries without any of the scholarly jargon, the academic pretenses, or the impossible exams. This volume will explain the lasting value of their ideas in simple, modern terms without the use of a single footnote.

Teaching and Learning Practices That Promote Sustainable Development and Active Citizenship - Saúde, Sandra 2020-10-30

The profound changes that we are experiencing at the political, environmental, economic, social, and cultural levels of our "postmodern" society pose immense

challenges to education. **Style and Intersubjectivity
in Youth Interaction** - Dwi

Noverini Djenar 2018-02-19

This book examines how style and intersubjective meanings emerge through language use. It is innovative in theoretical scope and empirical focus. It brings together insights from discourse-functional linguistics, stylistics, and conversation analysis to understand how language resources are used to enact stances in intersubjective space. While there are numerous studies devoted to youth language, the focus has been mainly on face-to-face interaction. Other types of youth interaction, particularly in mediated forms, have received little attention. This book draws on data from four different text types - conversation, e-forums, comics, and teen fiction - to highlight the multidirectional nature of style construction. Indonesia provides a rich context for the study of style and intersubjectivity among youth. In constructing style, Indonesian urban youth have

been moving away from conventions which emphasized hierarchy and uniformity toward new ways of connecting in intersubjective space. This book analyzes how these new ways are realized in different text types. This book makes a valuable addition to sociolinguistic literature on youth and language and an essential reading for those interested in Austronesian sociolinguistics.

Online Child Sexual Abuse -

Elena Martellozzo 2013-06-17

Online Child Sexual Abuse: Grooming, Policing and Child Protection in a Multi-Media World addresses the complex, multi-faceted and, at times, counter-intuitive relationships between online grooming behaviours, risk assessment, police practices, and the actual danger of subsequent abuse in the physical world. Online child sexual abuse has become a high profile and important issue in public life. When children are victims, there is clearly intense public and political interest and concern. Sex offenders are society's

most reviled deviants and the object of seemingly undifferentiated public fear and loathing. This may be evidenced in ongoing efforts to advance legislation, develop police tactics and to educate children and their carers to engage with multi-media and the internet safely. Understanding how sex offenders use the internet and how the police and the government are responding to their behaviour is central to the development of preventative measures. Based on extensive ethnographic research conducted with the police and a specialist paedophile unit, here Elena Marellozzo presents an informed analysis of online child sexual abuse: of the patterns and characteristics of online grooming, and of the challenges and techniques that characterize its policing. Connecting theory, research and practice in the field of policing, social policy, victimology and criminology, this book adds significantly to our understanding and knowledge of the problem of

online child sexual abuse, the way in which victims are targeted and how this phenomenon is, and might be, policed.

New Literacies around the Globe - Cathy Burnett

2014-07-11

The increasing popularity of digitally-mediated communication is prompting us to radically rethink literacy and its role in education; at the same time, national policies have promulgated a view of literacy focused on the skills and classroom routines associated with print, bolstered by regimes of accountability and assessments. As a result, teachers are caught between two competing discourses: one upholding a traditional conception of literacy reiterated by politicians and policy-makers, and the other encouraging a more radical take on 21st century literacies driven by leading edge thinkers and researchers. There is a

pressing need for a book which engages researchers in international dialogue around new literacies, their implications for policy and practice, and how they might articulate across national boundaries. Drawing on cutting edge research from the USA, Canada, UK, Australia and South Africa, this book is a pedagogical and policy-driven call for change. It explores studies of literacy practices in varied contexts through a refreshingly dialogic style, interspersed with commentaries which comment on the significance of the work described for education. The book concludes on the 'conversation' developed to identify key recommendations for policy-makers through a Charter for Literacy Education.

Facebook. By including hundreds of examples, readers can see for themselves the differences between postings from a village north of London, and those from a small town in Trinidad. Why do women respond so differently to becoming a mother in England from the way they do in Trinidad? How are values such as carnival and suburbia expressed visually? Based on an examination of over 20,000 images, the authors argue that phenomena such as selfies and memes must be analysed in their local context. The book aims to highlight the importance of visual images today in patrolling and controlling the moral values of populations, and explores the changing role of photography from that of recording and representation, to that of communication, where an image not only documents an experience but also enhances it, making the moment itself more exciting.
