'Maté's book will make you examine your behaviour in a

new light' Guardian 'bold, wise and deeply moral. [Maté] is a healer to be cherished' Naomi Klein, author of No Logo and The Shock Doctrine Children take their lead from their friends: being 'cool' matters more than anything else. Shaping values, identity and codes of behaviour, peer groups are often far more influential than parents. But this situation is far from natural, and it can be dangerous - it undermines family cohesion, interferes with healthy development, and fosters a hostile and sexualized youth culture. Children end up becoming conformist, anxious and alienated. In Hold on to Your Kids, acclaimed physician

Maté joins forces with Gordon Neufeld, a psychologist with a reputation for penetrating to the heart of complex parenting. Together they pinpoint the causes of this breakdown and offer practical advice on how to 'reattach' to sons and daughters, establish the hierarchy at home, make children feel safe and understood, and earn back your children's loyalty and love. This updated edition also addresses the unprecedented parenting challenges posed by the rise of digital devices and social media. By helping to reawaken our instincts, Maté and Neufeld empower parents to be what nature intended: a true source of contact, security and warmth for their children. *Sexuality Today* - Gary F. *Parenting Matters* - National Academies of Sciences, Engineering, and Medicine 2016-12-21

Decades of research have demonstrated that the parent-child dyad and the environment of the family"which includes all primary caregivers"are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's

brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased

access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

*Regretting Motherhood* - Orna

Donath 2017-07-11

Women who opt not to be mothers are frequently warned that they will regret their decision later in life, yet we rarely talk about the possibility that the opposite might also be

true—that women who have Guide To Sex

children might regret it.

Drawing on years of research interviewing women from a variety of socioeconomic, educational, and professional backgrounds, sociologist Orna Donath treats regret as a feminist issue: as regret marks the road not taken, we need to consider whether alternative paths for women currently are blocked off. She asks that we pay attention to what is forbidden by rules governing motherhood, time, and emotion, including the cultural assumption that motherhood is a “natural” role for women—for the sake of all women, not just those who regret becoming mothers. If we are disturbed by the idea that a woman might regret becoming a mother, Donath says, our response should not be to silence and shame these women; rather, we need to ask honest and difficult questions about how society pushes women into motherhood and why those who reconsider it are still seen as a danger to the status quo. Groundbreaking, thoughtful,

and provocative, this is an especially needed book in our current political climate, as women's reproductive rights
