*His Wife Leaves Him* Stephen Dixon 2013-09-07 This prose fiction novel, written by literary prizewinner Stephen Dixon, replicates the consciousness of a jilted man. Stephen Dixon, one of America's great literary treasures, has completed his first novel in five years — His Wife Leaves Him, a long, intimate exploration of the interior life of a husband who has lost his wife. His Wife Leaves Him is as achingly simple as its title: A man, Martin, thinks about the loss of his wife, Gwen. In Dixon's hands, however, this straightforward premise becomes a work of such complexity that it no longer appears to be words on pages so much as life itself. Dixon, like all great writers, captures consciousness. Stories matter here, and the writer understands how people tell them and why they go on retelling them, for stories, finally, may be all that Martin has of Gwen. Reminders of their shared past, some painful, some hilarious, others blissful and sensual, appear and reappear in the present. Stories made from memories merge with dreams of an impossible future they'll never get to share. Memories and details grow fuzzy, get corrected, and then wriggle away, out of reach again. Martin holds all these stories dear. They leaven grief so that he may again experience some joy. Story by story then, he accounts for himself, good and bad, moments of grace, occasions for disappointment, promises and arguments. From these things are their lives made. In His Wife Leaves Him, Stephen Dixon has achieved nothing short of the resurrection of a life through words. When asked to describe his latest work, the author said that "it's about a bunch of nouns: love, guilt, sickness, death, remorse, loss, family, matrimony, sex, children, parenting, aging, mistakes, incidents, minutiae, birth, music, writing, jobs, affairs, memory, remembering, reminiscences, forgetting, repression, dreams, reverie, nightmares, meeting, dating, conceiving, imagining, delaying, loving." His Wife Leaves Him is Dixon's most important and ambitious novel, his tenderest and funniest writing to date, and the stylistic and thematic summation of his writing life.

*Lunar Meteoroid Impacts and How to Observe Them* Brian Cudnik 2010-03-10 The genesis of modern searches for observable meteoritic phenomena on the Moon is the paper by Lincoln La Paz in Popular Astronomy magazine in 1938. In it he argued that the absence of observed fashes of meteoritic impacts on the Moon might be interpreted to mean that these bodies are destroyed as luminous meteors in an extremely rarefied lunar atmosphere. The paper suggested the possibility of systematic searches for such possible lunar meteors. With these concepts in mind, I was surprised to note a transient moving bright speck on the Moon on July 10, 1941. It appeared to behave very much as a lunar meteor would - except that the poorly estimated duration would lead to a strongly hyperbolic heliocentric velocity. Thus, the idea of systematic searches for both possible lunar meteors and meteoritic impact fashes was born. It was appreciated that much time might need to be expended to achieve any positive results. Systematic searches were carried out by others and myself chiefly in the years 1945-1965 and became a regular program at the newly founded Association of Lunar and Planetary Observers, or ALPO.
