

Relationship Between Education And Philosophy

Philosophy in Educational Research - David Bridges 2016-12-01

This book provides critical and reflective discussions of a wide range of issues arising in education at the interface between philosophy, research, policy and practice. It addresses epistemological questions about the intellectual resources that underpin educational research, explores the relationship between philosophy and educational research, and examines debates about truth and truthfulness in educational research. Furthermore, it looks at issues to do with the relationship between research, practice and policy, and discusses questions about ethics

and educational research. Finally, the book delves into the deeply contested area of research quality assessment. The book is based on extensive engagement in empirically based educational research projects and in the institutional and professional management of research, as well as in philosophical work. It clarifies what is at stake in international debates around educational research and teases out the nature of the arguments, and, where argument permits, the conclusions to which these point. The book discusses these familiar themes using less predictable sources and points of reference, such as: codes of social obligation in

contemporary Egypt and New Zealand; the 'Soviet', and the inspiration of the nineteenth-century philosopher, Abai in contemporary Kazakhstan; seventeenth-century France, Pascal, and the disputes between Jesuits and Jansenites; eighteenth-century Italy, Giambattista Vico, and la scienza nuova; 'educational magic' in traditional Ethiopia; and ends at a banquet with Socrates and dinner with wine and a conversation-loving Montaigne.

Ideas of Education - Christopher Brooke

2013-07-18

There has always been a strong relationship between education and philosophy - especially political philosophy. Renewed concern about the importance and efficacy of political education has revived key questions about the connections between the power to govern, and the power to educate. Although these themes are not always prominent in commentaries, political writings have often been very deeply concerned with both educational theory and practice. This

invaluable book will introduce the reader to key concepts and disputes surrounding educational themes in the history of political thought. The book draws together a fascinating range of educational pioneers and thinkers from the canon of philosophers and philosophical schools, from Plato and Aristotle, down to Edward Carpenter and John Dewey, with attention along the way paid to both individual authors like Thomas Hobbes and Mary Wollstonecraft, as well as to intellectual movements, such as the Scottish Enlightenment and the Utopian Socialists. Each thinker or group is positioned in their historical context, and each chapter addresses the structure of the theory and argument, considering both contemporaneous and current controversies. A number of themes run throughout the volume: an analysis of pedagogy, socialisation, schooling and university education, with particular relation to public and private life, and personal and political power references to the historical and intellectual

context an overview of the current reception, understanding and interpretation of the thinker in question the educational legacy of the theories or theorists. This book will be of interest to students, researchers and scholars of education, as well as students and teachers of political theory, the history of political thought, and social and political philosophy.

The Relationship Between an Administrator's Educational Philosophy and His Management Style - Philip Anthony Barone 1976

Dance, Education and Philosophy - Graham McFee 1999

This text is concerned with the philosophical relationship between dance pedagogy and the core values of dance. It comprises sections on dance understanding and appreciation; the nature of dance; and the place of philosophy in dance studies.

Childhood, Education and Philosophy - Walter Kohan 2014-10-24

This book explores the idea of a childlike education and offers critical tools to question traditional forms of education, and alternative ways to understand and practice the relationship between education and childhood. Engaging with the work of Michel Foucault, Jacques Rancière, Giorgio Agamben and Simón Rodríguez, it contributes to the development of a philosophical framework for the pedagogical idea at the core of the book, that of a childlike education. Divided into two parts, the book introduces innovative ideas through philosophical argument and discussion, challenging existing understandings of what it means to teach or to form a child, and putting into question the idea of education as a process of formation. The first part of the book consists of a dialogue with a number of interlocutors in order to develop an original conception of education. The second part presents the idea of a childlike education, beginning with a discussion of the relationships between

legacy.opendemocracy.net on
2019-02-27 by guest

childhood and philosophy, and followed by a critique of the place of philosophical experience in a childhood of education. Instead of asking how philosophy might educate childhood, this book raises the question of how childhood might educate philosophy. It will be of key value to researchers, educators and postgraduate students in the fields of education and the human sciences.

Education and the Individual - Brenda Almond 2021-06-23

First published in 1981, *Education and the Individual* presents a reasoned case for maintaining the maximum freedom of choice in education in those areas where the interests of the individual and the state conflict. The book argues that ultimately the freedom to opt out of the education system altogether must be protected, as well as the freedom to choose a religious education in a secular state, or a secular education in a religious state, and freedom from political indoctrination. It analyses

what is required of education in a liberal society, and explores its implications for the wider international context of human rights. It also promotes the basic rights of freedom of choice in education and, wherever conflict is inevitable, it argues for the issue to be settled in favour of the individual, rather than the state. *Education and the Individual* will appeal to those with an interest in the history of education, the philosophy of education, and the relationship between education and politics.

The Purposes of Education - John Hattie 2020-05-01

What are the purposes of education and what is the relationship between educational research and policy? Using the twin lenses of Visible Learning and educational philosophy, these are among the many fascinating topics discussed in extended conversations between John Hattie and Steen Nepper Larsen. This wide-ranging and informative book offers fundamental propositions about the nature of education. It

*Downloaded from
legacy.opendemocracy.net on

maps out in fascinating detail a coming together of Hattie's empirical data and world-famous Visible Learning paradigm with the rich heritage of educational philosophy. Additionally, it explores the inevitable questions of the purpose of education and the development of students in a learning society. Part clash of cultures, part meeting of minds, always fascinating and illuminating, this intriguing book will inspire teachers, students, and parents at all levels of the educational system - from kindergarten through school to university. Conversations include: What are the purposes of education? Does educational data speak for itself? What is the role of the teacher? Is learning a visible phenomenon? Is it important to teach and learn specific subjects? What is the role of neuroscience research? What is the relationship between educational research and educational politics? What is the role of the state in education?

Philosophy and the Study of Education - Tom

Feldges 2019-03-26

Combining contributions from international academics and practitioners, this new text develops students' ability to philosophise as well as learn about philosophy and education. It considers issues concerned with the interface between education and wider society but goes beyond this to explore education and philosophy at a micro level: the teacher-learner relationship. It challenges and empowers students to use philosophy as a tool within education, as a set of theories to understand education and as a potential means to develop solutions to problems as they occur within practice. Assuming no pre-existing philosophical background, *Philosophy and the Study of Education* explores complex topics including: encouraging young people to criticise and challenge all authority; the limits of a religious-based education; the desire for 'alternative facts' or 'truths'; the second-class status of vocational pursuits; the inherent struggle in the

teacher-student relationship; the relationship between emotion, morality and autonomy in teaching. Including discussion questions and further recommended reading, this thought-providing book will support and inspire all those on Education Studies, Childhood Studies and Youth Studies courses in developing a critical perspective and understanding the true value of philosophy within education.

Transitioning Students into Higher

Education - Angela Jones 2019-12-05

Transitioning Students in Higher Education focuses on the relationship between philosophy, pedagogy and practice when designing programs, units or courses for transitioning students to new educational spaces in the university environment. The term 'transition' is used to describe the academic as well as social movement and acculturation of students into new higher educational spaces. This book offers both theoretical perspectives and real-world practical examples that reveal the successes and

challenges of implementing philosophically driven pedagogies with diverse transitioning cohorts. Drawing on examples from Australia, New Zealand, US and Canada, it writes through the relationship between philosophy, pedagogy and how it can effectively shape the practice of transition and develop the flourishing student. This book is split into three main sub-themes: Flourishing in Transition, Engaging Diverse Cohorts and Challenges for Educators, and sits at the intersections between philosophy and pedagogy in the practice of effectively engaging and transitioning different enabling groups. This book will be of great interest to postgraduate students, researchers and educators working in the areas of enabling or bridging education, higher/tertiary education, distance learning, and indigenous as well as culturally diverse cohorts. *Philosophy for Children in Transition* - Nancy Vansieleghem 2011-11-28
Philosophy for Children in Transition presents a diverse collection of perspectives on the

worldwide educational movement of philosophy for children. Educators and philosophers establish the relationship between philosophy and the child, and clarify the significance of that relationship for teaching and learning today. The papers present a diverse range of perspectives, problems and tentative prospects concerning the theory and practice of Philosophy for Children today. The collection familiarises an actual educational practice that is steadily gaining importance in the field of academic philosophy. Opens up discussion on the notion of the relationship between philosophy and the child.

The Relationship Between Democracy and Education - Ayşe Ottekin Demirbolat 2012-06-08

This e-book presents an analysis on the correlative relations and interactions between democracy and education at macro and micro levels. This analysis demonstrates that democracy and educational institutes are influenced by the natural, demographic, institutional and cultural dimensions of their

society and that the relation between them should be dealt with under the authentic conditions of the society and with an integral perspective. This e-book provides a sound base for discussions on democracy at all levels. Thus it contributes to functional discussions about the philosophy behind education and democracy, by helping education institutions, teachers, administrators and all responsible citizens to consider their own roles within a comprehensible and simple frame in society through the process of democratization.

Philosophy, Methodology and Educational Research - David Bridges 2007-10-22

This book evaluates the increasingly wide variety of intellectual resources for research methods and methodologies and investigates what constitutes good educational research. Written by a distinguished international group of philosophers of education. Questions what sorts of research can usefully inform policy and practice, and what inferences can be drawn from

different kinds of research Demonstrates the critical engagement of philosophers of education with the wider educational research community and illustrates the benefits that can accrue from such engagement

Art's Teachings, Teaching's Art - Tyson Lewis
2015-08-28

This volume examines the interface between the teachings of art and the art of teaching, and asserts the centrality of aesthetics for rethinking education. Many of the essays in this collection claim a direct connection between critical thinking, democratic dissensus, and anti-racist pedagogy with aesthetic experiences. They argue that aesthetics should be reconceptualized less as mere art appreciation or the cultivation of aesthetic judgment of taste, and more with the affective disruptions, phenomenological experiences, and the democratic politics of learning, thinking, and teaching. The first set of essays in the volume examines the unique pedagogies of the various arts including

literature, poetry, film, and music. The second set addresses questions concerning the art of pedagogy and the relationship between aesthetic experience and teaching and learning.

Demonstrating the flexibility and diversity of aesthetic expressions and experiences in education, the book deals with issues such as the connections between racism and affect, curatorship and teaching, aesthetic experience and the common, and studying and poetics. The book explores these topics through a variety of theoretical and philosophical lenses including contemporary post-structuralism, psychoanalysis, phenomenology, critical theory, and pragmatism.

International Handbook of Philosophy of Education - Paul Smeyers 2018-06-09

This handbook presents a comprehensive introduction to the core areas of philosophy of education combined with an up-to-date selection of the central themes. It includes 95 newly commissioned articles that focus on and advance

Downloaded from

key arguments; each essay incorporates essential background material serving to clarify the history and logic of the relevant topic, examining the status quo of the discipline with respect to the topic, and discussing the possible futures of the field. The book provides a state-of-the-art overview of philosophy of education, covering a range of topics: Voices from the present and the past deals with 36 major figures that philosophers of education rely on; Schools of thought addresses 14 stances including Eastern, Indigenous, and African philosophies of education as well as religiously inspired philosophies of education such as Jewish and Islamic; Revisiting enduring educational debates scrutinizes 25 issues heavily debated in the past and the present, for example care and justice, democracy, and the curriculum; New areas and developments addresses 17 emerging issues that have garnered considerable attention like neuroscience, videogames, and radicalization. The collection is relevant for lecturers teaching

undergraduate and graduate courses in philosophy of education as well as for colleagues in teacher training. Moreover, it helps junior researchers in philosophy of education to situate the problems they are addressing within the wider field of philosophy of education and offers a valuable update for experienced scholars dealing with issues in the sub-discipline. Combined with different conceptions of the purpose of philosophy, it discusses various aspects, using diverse perspectives to do so. Contributing Editors: Section 1: Voices from the Present and the Past: Nuraan Davids Section 2: Schools of Thought: Christiane Thompson and Joris Vlieghe Section 3: Revisiting Enduring Debates: Ann Chinnery, Naomi Hodgson, and Viktor Johansson Section 4: New Areas and Developments: Kai Horsthemke, Dirk Willem Postma, and Claudia Ruitenberg

Philosophy of Education - Chandra Soti Shivendra 2006

It Has Been Rightly Said That Only A True

Philosopher May Give A Practical Shape To Education. Philosophy And Education Go Hand In Hand. Education Depends On Philosophy For Its Guidance While Philosophy Depends On Education For Its Own Formulation. Teaching Methods Are Very Much Concerned With The Philosophy Of Education The Teacher Holds. The Philosophical Systems Of Education Govern The Teacher S Attitude To The Method Of Teaching. With A View To Comprehend The Close Relationship Of Philosophy And Education And Their Great Significance In The Modern Times, The Present Book Philosophy Of Education Has Been Written. The Book Aims At Presenting The Western Isms Of Philosophy As Well As Indian Philosophy Of Education Beginning From The Vedas To The Contemporary Philosophies. It Elucidates The Philosophical Issues And Attempts To Draw The Philosophical Implications Of Every Isms . Invaluable Viewpoints On Education Of Eminent Educators Like Rousseau, Russell, Swami Dayanand, Annie

Besant, M.K. Gandhi, Rabindranath Tagore And Many Others, And The Influence Of Their Philosophies Have Been Studied In Depth. It Acquaints The Readers With The Varied Aims And Ideals Of Education, Methods And Principles Of Teaching, Role And Influence Of Teachers As Propounded By The Great Philosophers. Written In A Simple Language And Lucid Style, The Book Is Expected To Serve As An Ideal Textbook On The Subject. It Will Prove Indispensable For The Students And Teachers Of Education. Question Bank At The End Of The Book Is An Added Advantage Provided To The Students Which Would Prove Helpful In Preparation For Examination. Even The General Readers Will Find This Book Worth-Reading.

Philosophy East / West - Oren Ergas
2015-11-17

Philosophy East/West showcases new scholarship in the philosophy of education and contemplative studies, paying particular attention to the intersection of mindfulness,

evidence-based science, and wisdom traditions. Moves beyond simplistic explanations of “Eastern” and “Western” to explore the complexity and diversity of various wisdom traditions Investigates the effect of mindfulness-based curricular interventions on current educational theory and practice Uses insights from important Western philosophers—including Heidegger, Levinas, and Foucault—to situate contemplative practice within contemporary educational theory Emphasizes the importance of transcultural and intercultural approaches in the philosophy of education

The Dilemma of Western Philosophy - Michael A. Peters 2017-07-28

This edited collection takes a multifaceted approach to the various limitations and achievements of Western philosophy. Considered on its own, Western philosophy is a highly contentious name. The contributors question its validity as a label and take to task its grand appearance within education. However, part of

the problem with Western philosophy is that it has less conventional as well as dominant manifestations. The writers consider both forms of Western philosophy, devoting significant thought and time to it in its own right, but always referring it to the more specific issue of education. This book adds to a growing corpus that sketches the relationship between education and philosophy, showing that they are deeply intertwined, and it is indeed philosophy (and especially its Western variation) that supports Western education and allows it to flourish in the first instance. It is fitting, then, that at various points this book depicts education as a hegemonic vehicle of a deeper phenomenon - that of dominant Western philosophy. This book was originally published as a special issue of *Educational Philosophy and Theory*.

Good Relationships in Schools - Monika Platz 2021-09-11

The relationship between teacher and student is

Downloaded from
legacy.opendemocracy.net on
2019-02-27 by guest

an important element of school education and as such irreplaceable: If we want schools to be good places for those who teach and learn there, we must make sure that the educational relationships between teachers and students are good, too. In research about school education, surprisingly little attention is paid to the normative dimension of the relationship between teacher and student. This lacuna points to a desideratum in the philosophy of education: More should be said about the normative structure of the teacher-student relationship, its role in teaching and learning, and its final value for teacher and student. Answering these fundamental philosophical questions is the core of this book. It offers a normatively rich concept of a good teacher-student relationship that is based on the analysis of two major relationship goods: trust and care. Moreover, the book explains the instrumental value of a good educational relationship for the student's achievement of epistemic aims of school

education as well as the final value of such a relationship for teacher and student.

Problems in Philosophy of Education - James Scott Johnston 2020-09-17

Problems in Philosophy of Education canvasses several of the leading issues in philosophy of education. These include the disconnect between the disciplines of philosophy and philosophy of education, the strained relationship between educational practice and philosophy of education, the role of educational research in philosophy of education, and the lack of an independent scholarship for philosophy of education. James Scott Johnson argues for a philosophy of education separate and distinct from both the disciplines of philosophy and education and claims that philosophy of education should raise and address its own questions and concerns. Supporting this is a model of how philosophy of education should originate basic questions, together with a set of philosophic presuppositions regarding the
