Homecoming - John Bradshaw 2013-04-24

Are you outwardly successful but inwardly do you feel like a big kid? Do you aspire to be a loving parent but all too often "lose it" in hurtful ways? Do you crave intimacy but sometimes wonder if it's worth the struggle? Or are you plagued by constant vague feelings of anxiety or depression? If any of this sounds familiar, you may be experiencing the hidden but damaging effects of a painful childhood—carrying within you a "wounded inner child" that is crying out for attention and healing. In this powerful book, John Bradshaw shows how we can learn to nurture that inner child, in essence offering ourselves the good parenting we needed and longed for. Through a step-by-step process of exploring the unfinished business of each developmental stage, we can break away from destructive family rules and roles and free ourselves to live responsibly in the present. Then, says Bradshaw, the healed inner child becomes a source of vitality, enabling us to find new joy and energy in living. Homecoming includes a wealth of unique case histories and interactive techniques, including questionnaires, letter-writing to the inner child, guided meditations, and affirmations. Pioneering when introduced, these classic therapies are now being validated by new discoveries in attachment research and neuroscience. No one has ever brought them to a popular audience more effectively and inspiringly than John

Bradshaw.

Switch On - Nick Seneca Jankel 2014-09-18

Reconnect your heart. Rewire your brain. Remix your world. When we choose to "Switch On" to life, we have the choice to turn every single problem that we face into an opportunity to become better versions of ourselves and to find true, lasting fulfilment and freedom. Everything that happens to us in life can "make" us feel resentful of what life has "done" to us. Our creative potential can be sucked from us, and we can start to live within our comfort zone and get trapped in patterns from our past that are no longer of use. Molehills become mountains. Stress levels rise. Our health drops. We stop growing. And nothing hurts more than when we stop growing! The other option is that we can purposefully use every experience, no matter how dark, to help us grow, love and create more. Nelson Mandela said that his 27 years in prison didn't break him because it empowered him to lead South Africa to transition. He chose to "Switch On" to life, and such people can inspire us to do the same, whatever situations we face today. The more "Switched On" we become, digging deeper inside to find new ways to connect, create and contribute, the more light-hearted, relaxed, excited, joyful, generous and fulfilled we become, and the more we can thrive in life.

Creative Responses to Child Sexual Abuse -

Sue Richardson 2003-01-15

Despite heightened media attention and the increase in professional knowledge about child abuse, many children are still being failed by the system. Using attachment theory as a foundation, this book addresses in depth the acute practice dilemmas concerning children who, despite the climate of increased awareness, multi-disciplinary cooperation and legislative and procedural change, cannot easily be protected. The contributors give guidelines for working with the children, in particular those who, unable to disclose their experience themselves, are the most difficult to support. Illustrated throughout with case material and informed by the experiences of survivors themselves, the book presents a framework for well managed and resourced, flexible and integrated intervention with children, their families, and the community that will enable professionals and families to work together to break the 'cycle of abuse'.

Recovery therapist Cathryn Taylor offers a step-by-step guide to re-parenting the children within and healing their shame, anger, and feelings of abandonment. Using written and verbal exercises, guided imagery, journaling, drawing, mirror work, and rituals, you can change your experience of the past. For each of the seven stages of childhood, you will follow six steps: • Identify your pain. • Research its childhood roots. • Re-experience the pain. • Separate from it. • Grieve the losses of each stage. • Ritually release the pain and reclaim the joy of each inner child. In the end, you will reap the rewards of the wisdom of your true self. "This easy-to-follow six-step formula helps you contact true spirituality through ritual and imagery, while healing your inner children. The book is brilliant, and serves as a bridge between the psychological and the spiritual."--Laurel King, Author of Women of Power and coauthor of Living in the Light "Cathryn Taylor takes the next step: for her, the inner child is a palpable and real force in life. Methodically she applies a healing formula for each stage of growth and development, offering each of us valuable help in completing the child's unfinished business."--Jeremiah Abrams, Editor of Reclaiming the Inner Child

Communicating with Children and Adolescents - Anne Bannister 2002-04-15

At a time when expectations and assumptions about the delivery of services to children and adolescents are being reconfigured - for example, around the rights of children and adolescents as young citizens - adults are seeking to ensure that they deliver services in creative and empowering ways, ensuring that the opinions of young people are actively solicited and encouraged. Action methods - communication methods using the body as well as speech - provide non-threatening ways of communicating which can be understood by children of all ages and from many cultures. This book places action methods in a theoretical, technical and political framework and documents examples of good practice. Discussion of the application of action methods

to work with young people focuses on differing issues and populations, for example children and adolescents who face life-threatening illnesses, or those involved in peer counselling in schools. Contributions from several different countries emphasise the wide potential of action methods for use with young people. This book provides a comprehensive and wide-ranging resource for those interested in exploring and understanding why action methods are particularly useful when working with young people.

Breaking the Cycle of Silence - Daniel Pearse
2020-10-13

The latest statistics tell us that one out of three girls and one out of six boys will be sexually abused before the age of eighteen, destroying their lives in ways we can't even imagine. We also know that 90 percent of the time, victims know their abuser. Daniel Pearse is living proof of both these statistics. He and his brother were sent to live with a pedophile after their mother died. For nine years, Daniel suffered sexual, physical, emotional, mental, and verbal abuse at the hands of his tormentor. Like many abused children, Daniel then suffered in silence for decades as an adult. Now, he's committed to stopping the cycle of abuse that causes so much pain. *Breaking the Cycle of Silence* proposes age-appropriate sexual abuse training and education in schools. It teaches children what is appropriate, shows adults the signs of abuse to look for, and offers sources of support for victims. With such training and education, we can identify and stop abusers, preventing them from claiming victim after victim for years.
