

Same Sex Debating The Ethics Science And Culture Of Homosexuality

[The Way Forward?](#) - Timothy Bradshaw 2003
The homosexuality issue is the most pressing dilemma currently facing the churches. Recent controversial church appointments in Britain and America have sparked intense argument and there has been virtually no sign of real dialogue or developing debate. This important and timely book sets out the full range of Christian responses to this critical issue, and offers mature and informed contributions from key figures on all sides of the debate. A vital resource for theological reflection and continuing discussion, this second edition of *The Way Forward?* will be crucial reading for all who

are concerned for the issues at stake and for the future and integrity of the churches today.

'Same Sex' presents a comprehensive anthology on homosexuality, exploring historical conceptions of homosexuality, homosexual identity, and a variety of public policy issues.

Don't Ask, Don't Tell - John D. Laing 2013-09-16

The repeal of the government's policy on homosexual military service, known as Don't Ask, Don't Tell (DADT), has caused much concern among Christian military service members, especially chaplains, and has led to much debate about the morality of

homosexuality, the ideal of free speech, and the role of clergy in public service. Can it be scientifically demonstrated that homosexuality is normal? What has homosexual political activity shown to be their agenda, if any? What does the Bible say about homosexuality? How can chaplains who disagree with the homosexual lifestyle respond to the repeal in a way that retains their prophetic voice, but protects them from prosecution? How can chaplains minister to homosexual service members and their families in a post-DADT military? These are just some of the questions addressed in this important work by a group of scholars and chaplains, many of whom serve or have served in the academy, the military, and the church.

Same Sex - John Corvino 1999

The Course of Gay and Lesbian Lives - Bertram

J. Cohler 2000-08

The authors argue that there is little support for assuming that homosexuality has a biological basis. Recognizing the many pathways that lead to same-gender sexual orientation, the authors conclude that the cause is much less important than understanding the meaning of being homosexual.

Judicial Review in an Age of Moral

Pluralism - Ronald C. Den Otter 2009-08-31

This book considers how judicial review can be improved to strike the appropriate balance between legislative and judicial power.

We the People: The Fourteenth Amendment and the Supreme Court - Michael J. Perry

2001-11-08

Several of the most divisive moral conflicts that have beset Americans in the period since World War II have been transmuted into constitutional conflicts and resolved as such. In his new book, eminent legal scholar Michael Perry evaluates the grave charge that the modern Supreme

Court has engineered a "judicial usurpation of politics." In particular, Perry inquires which of several major Fourteenth Amendment conflicts--over race segregation, race-based affirmative action, sex-based discrimination, homosexuality, abortion, and physician-assisted suicide--have been resolved as they should have been. He lays the necessary groundwork for his inquiry by addressing questions of both constitutional theory and constitutional history. A clear-eyed examination of some of the perennial controversies in American life, *We the People* is a major contribution to modern constitutional studies.

Queer Philosophy - 2012-01-01

The book is a collection of the presentations of the Society for Lesbian and Gay Philosophy from 1998 to 2008. The essays are organized historically, starting in 1998. Their topics cover virtually every philosophical field, and such that each is connected to gay and lesbian studies. Topics include how we are to understand sexual

orientation, whether same-sex leads to polygamy, teaching gay studies to undergraduates, promiscuity and virtue, the “war on terror” and gay oppression, the rationality of coming out, the ethics of outing, connections between being gay and being happy, and last, but not least, dignity and being gay.

The Kuyper Center Review, Volume 2 - John Bowlin 2011

"Includes papers presented at conferences sponsored by the Abraham Kuyper Center for Public Theology at Princeton Theological Seminary over the last two years"--Introduction. *Same Sex, Different Politics* - Gary Mucciaroni 2009-05-15

Why is it so much harder for American same-sex couples to get married than it is for them to adopt children? And why does our military prevent gays from serving openly even though jurisdictions nationwide continue to render such discrimination illegal? Illuminating the

conditions that engender these contradictory policies, *Same Sex, Different Politics* explains why gay rights advocates have achieved dramatically different levels of success from one policy area to another. The first book to compare results across a wide range of gay rights struggles, this volume explores debates over laws governing military service, homosexual conduct, adoption, marriage and partner recognition, hate crimes, and civil rights. It reveals that in each area, the gay rights movement’s achievements depend both on Americans’ perceptions of its demands and on the political venue in which the conflict plays out. Adoption policy, for example, generally takes shape in a decentralized system of courts that enables couples to target sympathetic judges, while fights for gay marriage generally culminate in legislation or ballot referenda against which it is easier to mount opposition. Brilliantly synthesizing all the factors that contribute to each kind of outcome, *Same Sex,*

Different Politics establishes a new framework for understanding the trajectory of a movement. *Remapping the Humanities* - Mary Garrett 2008 An innovative collection demonstrating the rich potential for interdisciplinary learning found within the network of university-based humanities centers.

The Gendered Society - Michael S. Kimmel 2000 They say that we come from different planets (men from Mars, women from Venus), that we have different brain chemistries and hormones, and that we listen, speak, and even define our morals differently. How is it then that men and women live together, take the same classes in school, eat the same food, read the same books, and receive grades according to the same criteria? In *The Gendered Society*, Michael S. Kimmel examines our basic beliefs about gender, arguing that men and women are more alike than we have ever imagined. Kimmel begins his discussion by observing that all cultures share the notion that men and women are different,

and that the logical extension of this assumption is that gender differences cause the obvious inequalities between the sexes. In fact, he asserts that the reverse is true--gender inequality causes the differences between men and women. Gender is not simply a quality inherent in each individual--it is deeply embedded in society's fundamental institutions: the family, school, and the workplace. The issues surrounding gender are complex, and in order to clarify them, the author has included a review of the existing literature in related disciplines such as biology, anthropology, psychology and sociology. Finally, with an eye towards the future, Kimmel offers readers a glimpse at gender relations in the next millennium. Well-written, well-reasoned and authoritative, *The Gendered Society* provides a thorough overview of the current thinking about gender while persuasively arguing that it is time to reevaluate what we thought we knew about men and women.

Debating Same-Sex Marriage - John Corvino
2012-06-01

Polls and election results show Americans sharply divided on same-sex marriage, and the controversy is unlikely to subside anytime soon. Debating Same-Sex Marriage provides an indispensable roadmap to the ongoing debate. Taking a "point/counterpoint" approach, John Corvino (a philosopher and prominent gay advocate) and Maggie Gallagher (a nationally syndicated columnist and co-founder of the National Organization for Marriage) explore fundamental questions: What is marriage for? Is sexual difference essential to it? Why does the government sanction it? What are the implications of same-sex marriage for children's welfare, for religious freedom, and for our understanding of marriage itself? While the authors disagree on many points, they share the following conviction: Because marriage is a vital public institution, this issue deserves a

comprehensive, rigorous, thoughtful debate.

Equality for Same-Sex Couples - Yuval Merin
2010-02-15

During the past three decades, nations all over the world have been debating whether to allow same-sex couples to marry, or at least grant these couples various rights associated with marriage. In Equality for Same-Sex Couples, Yuval Merin presents the first comparative study of the legal regulation of same-sex partnerships worldwide, as well as a unique survey of the status of same-sex couples in Europe. Merin begins by providing a historical overview of the transformation of marriage from antiquity to the present. He then identifies and critically compares four principal models for the legal regulation and recognition of same-sex partnerships: civil marriage, registered partnership, domestic partnership, and cohabitation. Merin concludes that all of the models except civil marriage discriminate against gays and lesbians just as the "separate

but equal" doctrine discriminated against African Americans; thus, so-called alternatives to marriage, even if they provide the same rights and benefits as marriage, are inherently unequal and therefore unconstitutional.

Worlds in Collision - Laurie Guy 2002

A ground-breaking study of gay history in New Zealand, this book explores the period of intense lobbying and opposition leading up to the passing of the Homosexual Law Reform Bill in 1986, which decriminalised sexual acts between males. Based on 22 interviews with important participants in the debates as well as extensive archival research, this is a major contribution

not only to the international literature on the history of homosexuality but also to the understanding of New Zealand society in the later 20th century.

Feminism, Law, Inclusion - Gayle Michelle MacDonald 2005

The contributions to this collection are written by legal advocates, community activists and legal scholars. The ten essays examine theories of intersectionality to demonstrate how race, class, sexual orientation, gender and identity have been integrated into legal scholarship and activism in an attempt to shape legal policy and practice.
