who are searching for answers  
on the internet/digital media.

**Bombay Cinema** - Monika Mehta 2012-08-24

India produces an impressive number of films each year in a variety of languages. Here, Monika Mehta breaks new ground by analyzing Hindi films and exploring the censorship of gender and heterosexuality in Bombay cinema. She studies how film censorship on various levels makes the female body and female sexuality pivotal in constructing national identity, not just through the films themselves but also through the heated debates that occur in newspapers and other periodicals. The standard claim is that the state dictates censorship and various prohibitions, but Mehta explores how relationships among the state, the film industry, and the public illuminate censorship's role in identity formation, while also examining how desire, profits, and corruption are generated through the act of censoring. Committed to extending a feminist critique of mass culture in the global south,

Mehta situates the story of censorship in a broad social context and traces the intriguing ways in which the heated debates on sexuality in Bombay cinema actually produce the very forms of sexuality they claim to regulate. She imagines afresh the theoretical field of censorship by combining textual analysis, archival research, and qualitative fieldwork. Her analysis reveals how central concepts of film studies, such as stardom, spectacle, genre, and sound, are employed and (re)configured within the ambit of state censorship, thereby expanding the scope of their application and impact.

As society becomes smarter, it is critical to replace the traditional technologies with modern ICT architectures. This has led to new computing facilities being developed to derive intelligent decisions in the big data environment. The book covers a variety of topics, including information management, mobile computing and applications, emerging IoT applications, distributed communication networks, cloud computing, and healthcare big data. It also discusses security and privacy issues, network intrusion detection, cryptography, 5G/6G networks, social network analysis, artificial intelligence, human-machine interaction,

**Language, Identity and Contemporary Society** -

Rajesh Kumar 2018-11-30

This book explores the instrumentality of language in constructing identity in contemporary society. The processes of globalization, hyper-mobility, rapid urbanization, and the increasing desire of local populations to be linked to the global community have created a pressing need to reconfigure

identity in this new world order. Following the digital revolution, both traditional and new media are dissolving linguistic boundaries. The centrality of language in organizing communities and groups cannot be overstated: our social order is developed alongside our linguistic allegiance, shared narratives, collective memories, and common social history. Keeping in mind the fluidity of identity, the book brings together fourteen chapters providing cultural and social perspectives. The ideas reflected here draw on a range of disciplines, such as psychology, sociology, anthropology, cultural studies, the politics of language, and linguistic identity.
