*Inventing the Feeble Mind* James Trent 2016-11-01 Pity, disgust, fear, cure, and prevention--all are words that Americans have used to make sense of what today we call intellectual disability.

*Inventing the Feeble Mind* explores the history of this disability from its several identifications over the past 200 years: idiocy, imbecility, feeble-mindedness, mental defect, mental deficiency, mental retardation, and most recently intellectual disability. Using institutional records, private correspondence, personal memories, and rare photographs, James Trent argues that the economic vulnerability of intellectually disabled people (and often their families), more than the claims made

for their intellectual and social limitations, has shaped meaning, services, and policies in United States history.

Front Pages Nancy Chunn 1997 Front Pages is an illustrated novel of the real world created by the painter Nancy Chunn. Every day of 1996 Chunn claimed as an artistic canvas the front page of the New York Times. Using specialized rubber stamps and bold pastels to enhance, eradicate, and alter images and text, she created a commentary - colorful, intense, smart, compassionate, visually explosive - on the year's events and the power of the press. When these artworks were shown at the Ronald Feldman Gallery in New York, they created a sensation. Chunn's treatment of the events we all lived through - the Presidential campaign, the crash of TWA flight 800, the wars in Chechnya and Rwanda - will strike an immediate chord in readers tuned in to the complex frequencies of a political world awash in images and news. Gary Indiana's interview with the artist provides lively and intimate insights into the artistic process as means of talking back to power and engaging with the world. Front Pages is being published to coincide with an exhibition of these works at The Corcoran Gallery of Art in Washington, DC, January 10-March 2, 1998.

*Congress and the Nation XI* Cq Press 2006-05-04 For over forty years, Congress and the Nation has been the signature resource for perspective and analysis of the U.S. Congress. It is the authoritative reference on Congressional trends, actions, and controversies. The eleventh edition in this acclaimed series chronicles the political events during the first four years of the George W. Bush administration, covering the 107th and 108th Congresses. These four years are marked by some of the most significant, landscape changing events in American politics including the attacks of September 11, 2001 and the ensuing U.S. led invasions of Afghanistan and Iraq. Congress and the Nation XI: 2001-2004 addresses these topics and more, including: Legislative activity in the U.S. Congress Establishment of the Department of Homeland Security The 2002 midterm elections in which the Republican party won majorities in both houses of Congress Each chapter contains summaries of legislative activity, including bills passed, defeated, or postponed. An extensive appendix covers the four-year period. Also available in online edition.

*Handbook of Community Sentiment* Monica K. Miller 2014-11-18 This volume is the most comprehensive reference book on community sentiment available. The classic book about community sentiment is Norm Finkel's "Commonsense Justice: Jurors' Notions of the Law" (1995). A similarly influential book called "Justice, Liability, and Blame" was published at the same time, examining lay sentiment about a variety of criminal issues and suggesting ways in which the substantive criminal law could be reformed in light of such lay responses (Robinson & Darley, 1995). Although these books were influential and important for their time (and since), this Handbook expands significantly on them, both by updating research since that time and broadens the scope of

topic areas to ones that are not limited to trial and criminal justice issues. Each chapter is original/unpublished and focuses on an area related to children/families, many of which are “hot topic” areas in the news and courts today. For instance, the U.S. Supreme Court decided a case in June 2012 about the constitutionality of “life without parole” for juvenile offenders—a topic discussed in the Fass and Miora chapter. Thus, it is of interest to those interested in family law topics as well.

Professor Kathleen Stock surveys the philosophical ideas that led to this point, and closely interrogates each one, from De Beauvoir's statement that, 'One is not born, but rather becomes a woman' (an assertion she contends has been misinterpreted and repurposed), to Judith Butler's claim that language creates biological reality, rather than describing it. She looks at biological sex in a range of important contexts, including women-only spaces and resources,

Material Girls makes a clear, humane and feminist case for our retaining the ability to discuss reality, and concludes with a positive vision for the future, in which trans rights activists and feminists can collaborate to achieve some of their political aims.

**Judging Insanity, Punishing Difference** Chloé Deambrogio 2023-11-14 In *Judging Insanity, Punishing Difference*, Chloé Deambrogio explores how developments in the field of forensic psychiatry shaped American courts' assessments of defendants' mental health and criminal responsibility over the course of the twentieth century. During this period, new psychiatric notions of the mind and its readability, legal doctrines of insanity and diminished culpability, and cultural stereotypes about race and gender shaped the ways in which legal professionals, mental health experts, and lay witnesses approached mental disability evidence, especially in cases carrying the death penalty. Using Texas as a case study, Deambrogio examines how these medical, legal, and cultural trends shaped psycho-legal debates in state criminal courts, while shedding light on the ways in which experts and lay actors' interpretations of "pathological" mental states influenced trial verdicts in capital cases. She shows that despite mounting pressures from advocates of the "rehabilitative penology," Texas courts maintained a punitive approach towards defendants allegedly affected by severe mental disabilities, while allowing for moralized views about personalities, habits, and lifestyle to influence psycho-legal assessments, in potentially prejudicial ways.

**The Boundaries of Desire** Eric Berkowitz 2015-08-01 The act of reproduction, and its variants, never change much, but our ideas about the meaning of sex are in constant flux. Switch a decade, cross a border, or traverse class lines and the harmless pleasures of one group become the gravest crimes in another. Combining meticulous research and lively storytelling, *The Boundaries of Desire* traces the fast-moving bloodsport of sex law over the past century, and challenges our most cherished notions about family, power, gender, and identity. Starting when courts censored birth control information as pornography and let men rape their wives, and continuing through the "sexual revolution" and into the present day (when rape, gay rights, sex trafficking, and sex on the internet saturate the news), Berkowitz shows how the law has remained out of synch with the convulsive changes in sexual morality. By focusing on the stories of real people, Berkowitz adds a compelling human element to what might otherwise be faceless legal battles. The law is made by people, after all, and nothing sparks intolerance - on the left and right -- more than sex. Ultimately, Berkowitz shows the emptiness of sanctimonious condemnation, and argues that sexual questions are too subtle and volatile for simple, catch-all solutions.

*Geospatial Technologies and Homeland Security* Daniel Sui 2008-05-25 Homeland security and context In the Geographical Dimensions of Terrorism (GDOT) (Cutter et al. 2003), the first book after 9/11 to address homeland security and geography, we developed several thematic research agendas and explored intersections between geographic research and the importance of context, both geographical and political, in relationship to the concepts of terrorism and security. It is good to see that a great deal of new thought and research continues to flow from that initial research agenda, as illustrated by many of the papers of this new book, entitled *Geospatial Technologies and Homeland Security: Research Frontiers and Future Challenges*. Context is relevant not only to understanding homeland security issues broadly, but also to the conduct of research on geospatial technologies. It is impossible to understand the implications of a homeland security strategy, let alone hope to make predictions, conduct meaningful modeling and research, or assess the value and dangers of geospatial technologies, without consideration of overarching political, social, economic, and geographic contexts within which these questions are posed.

**Killer Looks** Zara Stone 2021-10-26 Killer Looks is the definitive story about the long-forgotten practice of providing free nose jobs, face-lifts, breast implants, and other physical alterations to prisoners, the idea being that by remodeling the face you remake the man. From the 1920s up to the mid-1990s, half a million prison inmates across America, Canada, and the U.K willingly went under the knife, their tab picked up by the government. In the beginning, this was a haphazard affair -- applied inconsistently and unfairly to inmates, but entering the 1960s, a movement to scientifically quantify the long-term effect of such programs took hold. And, strange as it may sound, the criminologists were right: recidivism rates plummeted. In 1967, a three-year cosmetic surgery program set on Rikers Island saw recidivism rates drop 36% for surgically altered offenders. The program, funded by a \$240,000 grant from the Department of Health, Education, and Welfare, was led by Dr. Michael Lewin, who ran a similar program at Sing-Sing prison in 1953. Killer Looks draws on the intersectionality of socioeconomic success, racial bias, the prison industry complex and the fallacy of attractiveness to get to the heart of how appearance and societal approval creates self-worth, and uncovers deeper truths of beauty bias, inherited racism, effective recidivism programs, and inequality.

*Heretics and Hellraisers* Margaret C. Jones 1993-08-01 The Masses was the most dynamic and influential left-wing magazine of the early twentieth century, a touchstone for understanding radical thought and social movements in the United States during that era. As a magazine that supported feminist issues, it played a crucial role in shaping public discourse about women's concerns. Elsie Clews Parsons, Inez Haynes Gillmore, and Helen Hull contributed as significantly to the magazine as better-known male figures. In this major revisionist work, Margaret C. Jones calls for reexamination of the relevance of Masses feminism to that of the 1990s. She explores women contributors' perspectives on crucial issues: patriarchy, birth control, the labor movement, woman suffrage, pacifism, and ethnicity. The book includes numerous examples of the writings and visual art of Masses women and a series of biographical/bibliographical sketches designed to aid other researchers.

**The Well of Loneliness** Radclyffe Hall 2015-04-23 This early work by Radclyffe Hall was originally published in 1928 and we are now republishing it with a brand new introductory biography. 'The Well of Loneliness' is a novel that follows an upper-class Englishwoman who falls in love with another woman while serving as an ambulance driver in World War I. Marguerite Radclyffe Hall was born on 12th August 1880, in Bournemouth, England. Hall's first novel *The Unlit Lamp* (1924) was a lengthy and grim tale that proved hard to sell. It was only published following the success of the much lighter social comedy *The Forge* (1924), which made the best-seller list of John O'London's Weekly. Hall is a key figure in lesbian literature for her novel *The Well of Loneliness* (1928). This is her only work with overt lesbian themes and tells the story of the life of a masculine lesbian named Stephen Gordon.

In this book, Ramesh Thakur examines the transformation in UN operations, analysing its changing role and structure. He asks why, when and how force may be used and argues that the growing gulf between legality and legitimacy is evidence of an eroded sense of international community. He considers the tension between the US, with its capacity to use force and project power, and the UN, as the centre of the international law enforcement system. He asserts the central importance of the rule of law and of a rules-based order focused on the UN as the foundation of a civilised system of international relations. **Incarceration of Minors** Marty Gitlin 2019-07-30 "Approximately ten thousand children are imprisoned in adult correctional facilities in the United States on any given day. Children as young as thirteen have received life sentences in prisons far from their family and community, vulnerable to abuse and neglect. These are often the same conditions that led them there in the first place. What is the most effective method of dealing with youth offenders? Should they be tried as adults and incarcerated with adult prisoners? Is money better spent on education and rehabilitation? This resource tackles these difficult questions through diverse perspectives written by authorities on the subject"--Back cover.

**History and Presence** Robert A. Orsi 2018-05-11 Honorable Mention, PROSE Award A Choice Outstanding Academic Title of the Year A Junto Favorite Book of the Year Beginning with metaphysical debates in the sixteenth century over the nature of Christ's presence in the host, the distinguished historian and scholar of religion Robert Orsi imagines an alternative to the future of religion that early moderns proclaimed was inevitable. "This book is classic Orsi: careful, layered, humane, and subtle... If reformed theology has led to the gods' ostensible absence in modern religion, History and Presence is a sort of counter-reformation literature that revels in the excesses of divine materiality: the contradictions, the redundancies, the scrambling of borders between the sacred and profane, the dead and the living, the past and the present, the original and the imitator...History and Presence is a thought-provoking, expertly arranged tour of precisely those abundant, excessive phenomena which scholars have historically found so difficult to think." —Sonja

**Governing States and Localities** Kevin B. Smith 2016-11-30 The partisan and ideological polarization associated with federal government plagues states and localities too, bringing with it significant implications for public policy and intergovernmental relations. The trusted and proven *Governing States and Localities* guides students through these issues and continues its focus on the role economic and budget pressures play. With their engaging journalistic writing and crisp storytelling, Kevin B. Smith and Alan Greenblatt employ a comparative approach to explain how and why states and localities are both similar and different in institutional structure, culture, history, economy, geography, and demographics. A great blend of high-quality academic analysis and the latest scholarship, the Sixth Edition is thoroughly updated to account for such major developments as state vs. federal conflicts over immigration reform, gun control, and voter rights; health and education reforms aimed at improving the effectiveness of state and local government service delivery; and the lingering effects of the Great Recession.
