German Pop Music - Uwe Schütte 2017-01-11
The development of German pop music represents a fascinating cultural mirror to the history of post-war Germany, reflecting sociological changes and political developments. While film studies is an already established discipline, German pop music is currently emerging as a new and exciting field of academic study. This pioneering companion is the first volume to provide a comprehensive overview of the subject, charting the development of German pop music from the post-war period 'Schlager' to the present 'Diskursrock'. Written by acknowledged experts from Germany, the UK and the US, the various chapters provide overviews of pertinent genres as well as focusing on major bands such as CAN, Kraftwerk or Rammstein. While these acts have shaped the international profile of German pop

music, the volume also undertakes in-depth examinations of the specific German contributions to genres such as punk, industrial, rap and techno. The survey is concluded by an interview with the leading German pop theorist Diedrich Diederichsen. The volume constitutes an indispensable companion for any student, teacher and scholar in the area of German studies interested in contemporary popular culture.

Counterculture, while commonly used to describe youth-oriented movements during the 1960s, refers to any attempt to challenge or change conventional values and practices or the dominant lifestyles of the day. This fascinating three-volume set explores these movements in America from colonial times to the present in colorful detail. "American Countercultures" is the first reference work to examine the impact of countercultural movements on American social history. It highlights the writings, recordings, and visual works produced by these movements to educate, inspire, and incite action in all eras of the nation's history. A-Z entries provide a wealth of information on personalities, places,

events, concepts, beliefs, groups, and practices. The set includes numerous illustrations, a topic finder, primary source documents, a bibliography and a filmography, and an index. [Gravity's Rainbow](#) - Thomas Pynchon 2012-06-13 Winner of the 1974 National Book Award "A screaming comes across the sky. . ." A few months after the Germans' secret V-2 rocket bombs begin falling on London, British Intelligence discovers that a map of the city pinpointing the sexual conquests of one Lieutenant Tyrone Slothrop, U.S. Army, corresponds identically to a map showing the V-2 impact sites. The implications of this discovery will launch Slothrop on an amazing journey across war-torn Europe, fleeing an international cabal of military-industrial superpowers, in search of the mysterious Rocket 00000, through a wildly comic extravaganza that has been hailed in *The New Republic* as "the most profound and accomplished American novel since the end of World War II."

Learning to Perform - Carol Simpson Stern
2010-06-30

In *Learning to Perform*. Carol Simpson Stern and Bruce Henderson introduce the art and craft of performing literary texts, including poetry, prose fiction, and drama, as well as personal narratives and ethnographic materials. They present a performance methodology that offers instruction in close reading and analysis, the development and refinement of performance skills, and the ability to think critically about and discuss a performance. As students become reacquainted with the world of the imagination and its possibilities, the insights they gain in the classroom can become the basis for achievement not only on the stage or in front of the camera but in many facets of public life. By addressing an expanded sense of text that includes cultural as well as literary artifacts, Stern and Henderson bridge the gap between oral interpretation and the more inclusive field of performance studies. A substantial appendix

provides a dozen texts for performance in the classroom, including works by Jane Hamilton, Willa Cather, Henry James, E.M. Forster, Henrik Ibsen, Jane Austen, and Michael S. Bowman.

Dark Aeon - Joe Allen 2023-08-29

Humanity Is Consumed by Relentless

Transformation Like a thief in the night, artificial intelligence has inserted itself into our lives. It makes important decisions for us every day.

Often, we barely notice. As Joe Allen writes in this groundbreaking book, "Transhumanism is the great merger of humankind with the Machine. At this stage in history, it consists of billions using smartphones. Going forward, we'll be hardwiring our brains to artificial intelligence systems." The world-famous robot, Sophia, symbolizes a rising techno-religion. She takes her name from the goddess—or Aeon—whose fall from grace is described in the Gnostic Gospels.

With an academic background in both science and theology, Allen confronts the paradox of what he calls "good people constructing a digital

abomination." Dark Aeon is nothing less than a cri de coeur for humanity itself. He takes us on a roller coaster ride through history and the emergence of Scientism, and from government-mandated mRNA vaccines to the weird visions of cyborg billionaires like Elon Musk. From Silicon Valley to China, these globalists' visions of humanity's future, exposed and described in Dark Aeon, are dire and terrifying. But Joe Allen argues that humanity's salvation is within our grasp. Only if we refuse to avert our eyes from the impending twilight before us.

Just Following Orders - Rick A Hyatt

Sex Museums - Jennifer Tyburczy 2016-01-11
Museums have lengthy history, going back to the Renaissance Cabinets of Curiosity, and they are

indices of changing fashions of perception insofar as the categories museum curators use to classify objects change over time. The major focus of Tyburczy's study is sexuality on display, which sets up, in turn, her investigation of the effects of museum display on the history of sexuality. Historical context for the museum is one of her themes (and how categories of normacy and perversity change over time), with another themes being the work of sex museums in redefining what sex means in the modern public sphere; she also folds in consideration of the pleasures and dangers of exhibiting marginalized sexual subjects (women, nonwhite races, LGBT individuals, and the like); last, she explores the paradox of asserting (as she does) that all museums are sex museums bodies move around and toward objects on display, they reshape the typical dances of museum-goers along with their preconscious motivations in visiting a museum. She proposes that explicit display or restagings of sexual artifacts provides

new ways for approaching and understanding issues of desire, sexual identity, and sexual practices as they intersect with the history of the modern museum and with sexual history during the past two centuries. Her fieldwork sites are: the Leather Archives & Museum in Chicago, the Museum of Sex in New York, the World Erotic Art Museum in Miami Beach, and El Museo del Sexo in Mexico City. Such institutions allow Tyburczy to show how alternative sexuality (inclusive of kink, fetish, and sadomasochistic cultures) and slavery dangerously crisscross on the surface of objects. There are plenty of cases here, in short, to keep the casual reader titillated and the erudite reader surprised."

Rammstein on Fire - John T. Littlejohn
2013-10-14

This volume contains 13 original essays exploring Rammstein's stage performance and

recorded works from multiple academic perspectives. Topics range from Rammstein's connection with 19th century German literature and their East German heritage to cannibalism and the supernatural. The panoramic view of approaches to Rammstein's music and performance goes beneath the surface and provides fan and scholar alike with a deeper appreciation for the band.

The Transnationalism of American Culture -
Rocío G. Davis 2013

This book studies the transnational nature of American cultural productions, examining how they serve as ways of perceiving American culture. Visiting literature, film, and music, it considers how manifestations of American culture have traveled and what has happened to the texts in the process, including how they have been commodified.
