Jenny and the Jaws of Life - Jincy Willett 2008-05-27

In these wonderfully funny and poignant stories, Willett's eccentric, complex characters think and do the unconventional. Soft, euphonic women gradually grow old; weak, unhappy men confront love and their own mortality; and abominable children desperately try to grow up with grace. With a unique voice and dry humor, Willett gives us a new insight into human existence, showing us those specific moments in relationships when life suddenly becomes visible. Critically acclaimed when it was first published in 1987, *Jenny and the Jaws of Life* is being brought back due to popular demand. It's a timeless collection filled with a certain freshness and wit that ring just as loudly today.

Teacherpreneurs - Barnett Berry 2013-08-12

We need a bold new brand of teacher leadership that will create opportunities for teachers to practice, share, and grow their knowledge and expertise. This book is about "teacherpreneurs"—highly accomplished classroom teachers who blur the lines of distinction between those who teach in schools and those who lead them. These teacherpreneurs embody the concept that teachers can teach as well as lead the transformation of teaching and learning. It's about empowering expert teachers who can buoy the image of teaching and enforce standards among their ranks while all along making sure that their colleagues as well as education policymakers and the public know what works best for students. The book follows a small group of teacherpreneurs in their first

year. We join their journey toward becoming teacher leaders whose work is not defined by administrative fiat, but by their knowledge of students and drive to influence policies that allow them and their colleagues to teach more effectively. The authors trace the teacherpreneurs' steps—and their own—in the effort to determine what it means to define and execute the concept of "teacherpreneurism" in the face of tough demands and resistant organizational structures.

Be the Change - Chandra Clarke 2014-07-20

Can You Save The World? It's so easy to be overwhelmed by everything that is wrong in the world. In 2010, there were 660,000 deaths from malaria. Dire predictions about climate change suggest that sea levels could rise enough to submerge both Los Angeles and London by 2100. Bees are dying, not by the thousands but by the millions. But what can you do? You're just one person, right? The good news is that you *can* do something. It's called citizen science, and it's a way for ordinary people like you and me to do real, honest-to-goodness, help-answer-the-big-questions science. This book introduces you to a world in which it is possible to go on a wildlife survey in a national park, install software on your computer to search for a cure for cancer, have your smartphone log the sound pollution in your city, transcribe ancient Greek scrolls, or sift through the dirt from a site where a mastodon died 11,000 years ago—even if you never finished high school. Part I of *Be the Change: Saving the World with Citizen Science* will show you what citizen science is, how important it is, and why we need more of it. You will also find out how it can personally benefit

you, how you can get involved, and what it might mean to you if you did. Part II provides a large list of projects that you can join right now, concisely explained, and organized by the level of involvement required. Citizen science is fun, it's easy, and you can get started today. Be the Change: Saving the World with Citizen Science will show you how. Show less
