Divine Madness John R. Haule 2010-03 'Divine Madness: Archetypes of Romantic Love' examines the transforming experience of romantic love in literature, myth, religion, and everyday life. A series of psychological meditations on the nature of romantic love and human relationship, Divine Madness takes the perspective that human love is a species of divine love and that our experience of romantic love both conceals and reveals the ultimate Lover and Beloved. John Haule draws on depth psychology, the mystical traditions of the world, and literature from Virgil to Milan Kundera to lead the reader inside the mind and heart of the lover. Each chapter explores a characteristic aspect of relationship, such as seduction and love play, the rapture of union, the agony of separation, madness, woundedness, and transcendence. Focusing on the soulful and spiritual meaning of these experiences, Divine Madness sheds light on our elations, obsessions, and broken hearts, but it also reconnects us with the wisdom of time immemorial. As a practicing Jungian analyst and former professor of religious studies, John Haule masterfully guides his readers through the labyrinth of everyday experience, and the often hidden layers of archetypal realities, sketching a philosophy of romantic love through the stories of the world's literature and mythology.

The Psychology of Love and Hate in Intimate Relationships Katherine Aumer 2016-06-23 Social psychology has made great advancements in understanding how our romantic relationships function and to some extent, dissolve. However, the social and behavioral sciences in much of western scholarship often focus exclusively on the more positive aspects of intimate relationships--and less so on more controversial or unconventional aspects. The goal of this volume is to explore and illuminate some of these underrepresented aspects: aspects such as non-monogamy, female orgasm, sadism, and hate, that often function alongside love in intimate relationships. Ultimately, by looking at intimate relationships in this way, the

volume contributes to and advocates for a more holistic and comprehensive view of intimate relationships. Throughout the volume, contributors from social, clinical, and evolutionary psychology cover love and hate from a variety of (sometimes opposing) perspectives. The first section, covers love and the changing landscape of intimate relationships. Its chapters review the current literature and research of understudied topics like non-monogamy, female orgasm, sexual fantasies, and the viewpoint of love as something other than positive. The second section explores hate and how hate can operate in intimate relationships--for example, the appearance of sadistic behavior and debates the nature of hate as either a motivation or emotion. The volume concludes, by looking at ways in which the appearance of hate in relationships can be dealt with and overcome successfully. Taken together, these two sections reflect the full variety of experiences within intimate relationships. With the aim of exploring how love and hate can-and frequently do-work together, *The Psychology of Love and Hate in Intimate Relationships* is a fascinating psychological exploration of intimate relationships in modern times. It is an invaluable resource to academics and students specializing in psychology, gender, and sociology, including clinicians and therapists, and all those interested in increasing our knowledge of intimate relationships.

The Psychology of Romantic Love Robert A. Johnson 1984

Why Love Hurts Eva Illouz 2013-05-20 Few of us have been spared the agonies of intimate relationships. They come in many shapes: loving a man or a woman who will not commit to us, being heartbroken when we're abandoned by a lover, engaging in Sisyphean internet searches, coming back lonely from bars, parties, or blind dates, feeling bored in a relationship that is so much less than we had envisaged - these are only some of the ways in which the search for love is a difficult and often painful experience. Despite the widespread and almost collective character of these experiences, our culture insists they are the result of faulty or insufficiently mature psyches. For many, the Freudian idea that the family designs the pattern of an individual's erotic career has been the main explanation for why and how we fail to find or sustain love. Psychoanalysis and popular psychology have succeeded spectacularly in convincing us that individuals bear responsibility for the misery of their romantic and erotic lives. The purpose of this book is to change our way of thinking about what is wrong in modern relationships. The problem is not dysfunctional childhoods or insufficiently self-aware psyches, but rather the institutional forces shaping how we love. The argument of this book is that the modern romantic experience is shaped by a fundamental transformation in the ecology and architecture of romantic choice. The samples from which men and women choose a partner, the modes of evaluating prospective partners, the very importance of choice and autonomy and what people imagine to be the spectrum of their choices: all these aspects of choice have transformed the very core of the will, how we want a partner, the sense of worth bestowed by relationships, and the organization of desire. This book does to love what Marx did to commodities: it shows that it is shaped by social relations and institutions and that it circulates in a marketplace of unequal actors.

Love: All That Matters Mark Vernon 2013-01-25 *Love: All That Matters* argues that the modern view on love has been distorted by a fixation on romantic love that has depleted our resources for living through the darker sides of love, whereas in fact there are several ways in which humans give and experience love over the course of their lives and it is best to have access to them all. Vernon draws on science, psychology, philosophy and literature, to examine eight different kinds of love, each associated with a phase of human development. From infant narcissism and the emergence of eros, through puberty and the rush of romantic love, to the end of life and the love of God, this is a beguiling tour of the most mysterious force of all. This accessible and readable book will appeal to both students and general readers, giving a fascinating introduction to the psychology and philosophy of love - and what matters most about it.

Romantic Love Susan S. Hendrick 1992-06-10 Is love a uniquely human endeavor? Is romantic love universally felt ... or is it a cultural phenomenon? Can we control it? Love is of concern to nearly everyone--yet it is rarely understood. Drawing material from history, psychology, sociobiology, sociology, philosophy, family studies, and other disciplines, the authors provide an overview to aid readers in understanding the complexity--and ultimate elusiveness--of romantic love. Chapters in this fascinating volume encompass a wide range of material, covering the history of love; theories and research on love; and an explanation of the meaning of love as we practice it in our everyday lives. *Romantic Love* will benefit students, researchers and professionals by presenting the most recent empirical work on the topic and pointing the way toward more exciting research and applications. "This engagingly written little volume presents a social psychological approach to romantic love, but also brings to bear important facts and concepts from sociobiology, philosophy, history, family studies, and sociology. It is part of a series of short-focused volumes dealing with aspects of close relationships and would make excellent supplementary reading for undergraduate courses in marriage and the family, close relationships, social psychology, or human sexual behavior."--*Journal of Marriage & The Family*.

The difference between low self-esteem and high self-esteem is the difference between passivity and action, between failure and success. Now, one of America's foremost psychologists and a pioneer in self-esteem development offers a step-by-step guide to strengthening your sense of self-worth. Here are simple, straightforward and effective techniques that will dramatically improve the way you think and feel about yourself. You'll learn: How to break free of negative self-concepts and self-defeating behavior. How to dissolve internal barriers to success in work and love. On Romantic Love Berit Brogaard 2015 *Romantic love* presents some of life's most challenging questions. Can we choose who to love? Is romantic love rational? Can we love more than one person at a time? And can we make ourselves fall out of love? In *On Romantic Love*, Berit Brogaard

attempts to get to the bottom of love's many contradictions. This short book, informed by both historical and cutting edge philosophy, psychology, and neuroscience, combines a new theory of romantic love with entertaining anecdotes from real life and accessible explanations of the neuroscience underlying our wildest passions. Against the grain, Brogaard argues that love is an emotion; that it can be, at turns, both rational and irrational; and that it can be manifested in degrees. We can love one person more than another and we can love a person a little or a lot or not at all. And love isn't even always something we consciously feel. However, love -- like other emotions, both conscious and not -- is subject to rational control, and falling in or out of it can be a deliberate choice. This engaging and innovative look at a universal topic, featuring original line drawings by illustrator Gareth Southwell, illuminates the processes behind heartbreak, obsession, jealousy, attachment, and more.

The Psychology of Romantic Love Nathaniel Branden 2008-01-31 What love is, why love is born, why it sometimes grows, and why it sometimes dies. Have you ever wondered how romantic love evolves? What the difference is between mature and immature love? What role sex plays in romantic love, and whether love necessarily implies sexual exclusivity? And, most important, how can we make love last? Originally published in 1980, this updated edition of *The Psychology of Romantic Love* explores the nature of romantic love on many levels--the philosophical, the historical, the sociological, and the physiological. Nathaniel Branden explains why so many people say that romantic love is just not possible in today's world and--drawing on his experience with thousands of couples--finds that such love is still a possibility for anyone who understands its essence and is willing to accept its challenges. Branden sees it as a pathway not only to extraordinary joy but also to profound self-discovery. His vision of love is thoroughly appropriate to our time and grounded in our humanness.

Romantic Love in Cultural Contexts Victor Karandashev 2016-12-24 This volume presents a conceptual, historical, anthropological, and sociological review of how culture affects our experience and expression of romantic love. What is romantic love and how is it different from and similar to other kinds of love? How is romantic love related to sex and marriage in human history and across contemporary cultures? What cultural factors mediate attraction in love? These are some of the questions the volume explores through its interdisciplinary yet focused lens. Much of the current research evidence suggests that love is a universal emotion experienced by a majority of people, in various historical eras, and in all the world's cultures. Yet, love displays in different ways because culture has an impact on people's conceptions of love and the ways they feel, think, and behave in romantic relationships. This volume summarizes classical knowledge on love and culture while at the same time focusing sharply on recent studies and cutting-edge research that has advanced the field. Divided into three parts, the volume begins by defining and analyzing the concept of romantic love and interdisciplinary approach to its study in cultural context. Part II traces the origin and evolution of romantic love both in various places throughout the world and various time periods throughout history. Part III presents the revolutionary expansion of romantic love ideas and practices in the late 20th and early 21st centuries in various parts of the world, focusing particularly on the development of romantic love as a cultural ideal of the modern cultures. Finally, the book concludes by summarizing the major achievements in this field of study and predicts future development. A timely and thoughtful addition to the literature, *Romantic Love in Cultural Contexts* delivers thought-provoking insights to researchers in relationship scholarship, sociology, anthropology, and cultural studies, and all those interested in the universal human concept of love. Overall I find Dr. Victor Karandashev is an excellent and fine scholar who has a firm grasp of both the fundamental principles of cross-cultural research and of anthropology. In our increasingly connected world *Romantic Love in Cultural Contexts* updates and adds to the descriptions and explanations of similarities and differences in romantic love across generations and cultures. Romantic love encompasses the life span, rather than being a phenomenon largely confined to youthful years. The topic of this project concerns the deepest of our sentiments and pervades life from birth to death. This book contributes to better knowledge of this phenomenon across generations. The Myth of Romantic Love and Other Essays Michael Novak 2017-07-28 Written by noted Catholic philosopher Michael Novak, the selections in The Myth of Romantic Love and Other Essays highlight the arc of his intellectual career. Collectively demonstrating the fundamental unity of Novak's work, the sixteen essays in this book span a broad range of political, economic, and social topics. The selections offer clarity of thinking for the sake of concrete ends. For example, The Myth of Romantic Love, the chapter from which the title of this work is drawn, sharply distinguishes the love that popular culture portrays from the true Christian vision of love. And The Family out of Favor argues, if things go well with the family, life is worth living; when the family falters, life falls apart. Thus, true Christian love manifest in marriage and family life is a greater resource for civilized society than any other institution. Although this collection shows that Novak's viewpoints did evolve over time, he remains a thinker that is clearly rooted in the ancient and medieval Catholic tradition. From his discussions of gender relations, to economics, culture, and politics, his perspective honors the primacy of man and his immediate experience, and thereby ultimately glorifies the Creator. Novak's writing will infuriate some readers, and inspire many others—but both comrades-in-arms and intellectual opponents will find the clarity and intensity of his writings undeniable.

Why We Love Helen Fisher 2005-01-02 A groundbreaking exploration of our most complex and mysterious emotion Elation, mood swings, sleeplessness, and obsession—these are the tell-tale signs of someone in the throes of romantic passion. In this revealing new book, renowned anthropologist Helen Fisher explains why this experience—which cuts across time, geography, and gender—is a force as powerful as the need for food or sleep. *Why We Love* begins by presenting the results of a scientific study in which Fisher scanned the brains of people who had just fallen madly in love. She proves, at last, what researchers had only suspected: when you fall in love, primordial areas of the brain "light up" with increased blood flow, creating romantic passion. Fisher uses this new research to show exactly what you experience when you fall in love, why you choose one person rather than another, and how romantic love affects your sex drive and your feelings of attachment to a partner. She argues that all animals

feel romantic attraction, that love at first sight comes out of nature, and that human romance evolved for crucial reasons of survival. Lastly, she offers concrete suggestions on how to control this ancient passion, and she optimistically explores the future of romantic love in our chaotic modern world. Provocative, enlightening, and persuasive, *Why We Love* offers radical new answers to the age-old question of what love is and thus provides invaluable new insights into keeping love alive.
