

The Love Mindset An Unconventional Guide To Healing And Happiness

The Love Mindset - Vironika Tugaleva 2013

"For anyone who's tired of feeling angry, depressed, or hurt, this book is a beacon of hope! The Love Mindset is a guide to healing yourself, no matter how hopeless and complicated things seem to be." –Christina Rasmussen, bestselling author of *Second Firsts*
"As Vironika shared her own story, I saw pieces of myself and pieces of the people I care about. Many times the book brought me to tears and I had to put it down. It was like looking in the mirror and there was a part of me that was used to not looking." –Elephant Journal
"If I had two words to describe The Love Mindset, they would be: fresh and powerful. This is because when I read it, something grabbed hold of me like it was the first time I'd seen a book in 5 years!"

–Reuben Lowe, *Mindful Creation*
"Vironika Tugaleva's *The Love Mindset* is an authentic, brave and beautiful guide to a more loving self and a more loving world. A great gift of words for anyone searching for the sacred place of self-acceptance, self-understanding and self-love."
–Howard Falco, spiritual teacher and author of *I AM: The Power of Discovering Who You Really Are*
"In the midst of turmoil, this book comes as a breath of fresh air." –Readers' Favorite
After a decade-long struggle with mental distress, addiction, eating disorders, and profound self-hatred, Vironika Tugaleva faced a choice: change or die. Reluctantly, she chose to change. Nothing could have prepared her for what came next. Vironika's life as a suffering cynic ended when she found herself having a spiritual awakening. Drawing from first-hand experience, what Vironika says in this important and timely book isn't fanciful fluff or indoctrinating dogma. Her approach to healing, love, and spirituality is unconventional, deep, and refreshingly real. Winner of the Readers' Favorite silver medal for best self-help book of 2013, *The Love Mindset* offers a surprisingly simple look at how we can heal our relationships with ourselves and with

each other. If you feel like you're too broken to fix, hold out your last shred of hope and give Vironika a try. She won't disappoint you. She will teach you about the power of love, the purpose of life, and the potential of people united. She will show you to yourself.

Life's Messy, Live Happy - Cy Wakeman
2022-03-29

A simple shift in thinking can change everything you believe about your own happiness. By the time we become adults, most of us have joined the religion of suffering, which preaches that unless circumstances are controlled, life will be a mess. We compare ourselves to others and speculate about an impossible-to-know future, holding out hope for an improved life through getting ahead, fulfilling passion, or finding true love. But the idea that happiness comes from

putting effort toward altering one's circumstances is harmful and backward. What if we instead learned to understand that circumstances can rarely be controlled, and that life is, and always will be, messy? From that starting point, we could learn to use our minds to create happiness despite life's ever-changing circumstances and events. *Life's Messy, Live Happy* by Cy Wakeman is about dramatically changing the level of happiness you feel in your daily life, by learning to disconnect happiness from external forces, stop worrying about the future, and realize that most of your negative feelings are about things that never even happened. Wakeman is a credible, relatable teacher—a business owner, mother, and community member who has lived her philosophy and achieved profound happiness and success in a crazy, messy life. Filled with concrete daily practices and true stories that are hilarious, painful, and poignant, this book will change everything: your perspective, your focus, and your energy level for everyday life.

Onward - Elena Aguilar 2018-05-08

A practical framework to avoid burnout and keep great teachers teaching *Onward* tackles the problem of educator stress, and provides a practical framework for taking the burnout out of teaching. Stress is part of the job, but when 70 percent of teachers quit within their first five years because the stress is making them physically and mentally ill, things have gone too far. Unsurprisingly, these effects are highest in difficult-to-fill positions such as math, science, and foreign languages, and in urban areas and secondary classrooms—places where we need our teachers to be especially motivated and engaged. This book offers a path to resiliency to help teachers weather the storms and bounce back—and work toward banishing the rain for good. This actionable framework gives you concrete steps toward rediscovering yourself, your energy, and your passion for teaching. You'll learn how a simple shift in mindset can affect your outlook, and how taking care of yourself physically, mentally, and emotionally is one of the most important things you can do. The companion workbook helps you put the framework into action, streamlining your way toward renewal and strength. Cultivate resilience with a four-part framework based on

12 key habits Uncover your true self, understand emotions, and use your energy where it counts Adopt a mindful, story-telling approach to communication and community building Keep learning, playing, and creating to create an environment of collective celebration By cultivating resilience in schools, we help ensure that we are working in, teaching in, and leading organizations where every child thrives, and where the potential of every child is recognized and nurtured. *Onward* provides a step-by-step plan for reigniting that spark.

I Love Jesus, But I Want to Die - Sarah J. Robinson 2021-05-11

A compassionate, shame-free guide for your darkest days “A one-of-a-kind book . . . to read for yourself or give to a struggling friend or loved one without the fear that depression and suicidal thoughts will be minimized, medicalized or over-spiritualized.”—Kay Warren, cofounder of Saddleback Church What happens when loving Jesus doesn't cure you of depression, anxiety, or suicidal thoughts? You might be crushed by shame over your mental illness, only to be told by well-meaning Christians to “choose joy” and “pray more.” So you beg God to take away the pain, but nothing eases the ache inside. As darkness lingers and color drains from your world, you're left wondering if God has abandoned you. You just want a way out. But there's hope. In *I Love Jesus, But I Want to Die*, Sarah J. Robinson offers a healthy, practical, and shame-free guide for Christians struggling with mental illness. With unflinching honesty, Sarah shares her story of battling depression and fighting to stay alive despite toxic theology that made her afraid to seek help outside the church. Pairing her own story with scriptural insights, mental health research, and simple practices, Sarah helps you reconnect with the God who is present in our deepest anguish and discover that you are worth everything it takes to get better. Beautifully written and full of hard-won wisdom, *I Love Jesus, But I Want to Die* offers a path toward a rich, hope-filled life in Christ, even when healing doesn't look like what you expect.

The Love Mindset - Vironika Tugaleva 2013-12 Winner of the Readers' Favorite silver medal for best self-help book of 2013, *The Love Mindset* offers a surprisingly simple look at how we can heal our relationships with ourselves and with

each other.

The Joy of Movement - Kelly McGonigal
2019-12-31

The bestselling author of *The Willpower Instinct* introduces a surprising science-based book that doesn't tell us why we should exercise but instead shows us how to fall in love with movement. Exercise is health-enhancing and life-extending, yet many of us feel it's a chore. But, as Kelly McGonigal reveals, it doesn't have to be. Movement can and should be a source of joy. Through her trademark blend of science and storytelling, McGonigal draws on insights from neuroscience, psychology, anthropology, and evolutionary biology, as well as memoirs, ethnographies, and philosophers. She shows how movement is intertwined with some of the most basic human joys, including self-expression, social connection, and mastery--and why it is a powerful antidote to the modern epidemics of depression, anxiety, and loneliness. McGonigal tells the stories of people who have found fulfillment and belonging through running, walking, dancing, swimming, weightlifting, and more, with examples that span the globe, from Tanzania, where one of the last hunter-gatherer tribes on the planet live, to a dance class at Juilliard for people with Parkinson's disease, to the streets of London, where volunteers combine fitness and community service, to races in the remote wilderness, where athletes push the limits of what a human can endure. Along the way, McGonigal paints a portrait of human nature that highlights our capacity for hope, cooperation, and self-transcendence. The result is a revolutionary narrative that goes beyond familiar arguments in favor of exercise, to illustrate why movement is integral to both our happiness and our humanity. Readers will learn what they can do in their own lives and communities to harness the power of movement to create happiness, meaning, and connection.

The Great Cholesterol Myth - Jonny Bowden
2012-11-01

Heart disease is the #1 killer. However, traditional heart disease protocols--with their emphasis on lowering cholesterol--have it all wrong. Emerging science is showing that cholesterol levels are a poor predictor of heart disease and that standard prescriptions for lowering it, such as ineffective low-fat/high-carb diets and serious, side-effect-causing statin drugs, obscure the real causes of heart disease. Even doctors at leading institutions have been misled for years based on creative reporting of research results from pharmaceutical companies intent on supporting the \$31-billion-a-year cholesterol-lowering drug industry. The Great Cholesterol Myth reveals the real culprits of heart disease, including: - Inflammation - Fibrinogen - Triglycerides - Homocysteine - Belly fat - Triglyceride to HCL ratios - High glycemic levels

Bestselling health authors Jonny Bowden, Ph.D., and Stephen Sinatra, M.D. give readers a 4-part strategy based on the latest studies and clinical findings for effectively preventing, managing, and reversing heart disease, focusing on diet, exercise, supplements, and stress and anger management. Get proven, evidence-based strategies from the experts with The Great Cholesterol Myth. MYTHS VS. FACTS

Myth-High cholesterol is the cause of heart disease. Fact-Cholesterol is only a minor player in the cascade of inflammation which is a cause of heart disease. Myth-High cholesterol is a predictor of heart attack. Fact-There is no correlation between cholesterol and heart attack. Myth-Lowering cholesterol with statin drugs will prolong your life. Fact-There is no data to show that statins have a significant impact on longevity. Myth-Statin drugs are safe. Fact-Statin drugs can be extremely toxic including causing death. Myth-Statin drugs are useful in men, women and the elderly. Fact-Statin drugs do the best job in middle-aged men with coronary disease. Myth-Statin drugs are useful in middle-aged men with coronary artery disease because of its impact on cholesterol. Fact-Statin drugs reduce inflammation and improve blood viscosity (thinning blood). Statins are extremely helpful in

men with low HDL and coronary artery disease.

Myth-Saturated fat is dangerous.

Fact-Saturated fats are not dangerous. The killer fats are the trans fats from partially hydrogenated oils. Myth-The higher the cholesterol, the shorter the lifespan.

Fact-Higher cholesterol protects you from gastrointestinal disease, pulmonary disease and hemorrhagic stroke. Myth-A high carbohydrate diet protects you from heart disease.

Fact-Simple processed carbs and sugars predispose you to heart disease. Myth-Fat is bad for your health. Fact-Monounsaturated and saturated fats protect you from metabolic syndrome. Sugar is the foe in cardiovascular disease. Myth-There is good (HDL) cholesterol and bad (LDL) cholesterol. Fact-This is oversimplistic. You must fractionate LDL and HDL to assess the components. Myth-Cholesterol causes heart disease. Fact-Cholesterol is only a theory in heart disease and only the small component of LP(a) or "bb shot" LDL predisposes one to oxidation and inflammation.

'We're trying to do things differently' - Freya Aquarone 2020-12-07

Students and staff from KCL's Social Sciences BA programme turn the research lens back on their own world and together explore the many challenges of 'trying to do things differently' in Higher Education. In doing so, they grapple with fundamental questions in education such as: how to meaningfully foreground democracy, partnership, and emotional care; the role and limits of free speech; and how to deconstruct enduring inequality and marginalisation. In a period of considerable change and challenge for education, there is surely no better time to be critically analysing the principles guiding our universities through the lens of real-life practice. "In a period when university arrangements are being rethought in the wake of COVID-19 and the resurgence of Black Lives Matter, this compelling text is both timely and forward looking. 'We're trying to do things differently' successfully brings together first year undergraduates and lecturers to research, analyse and document how students and staff co-create meaningful educational experiences. The authors offer a nuanced picture of the centrality of relationships and recognition to the degree course. It shows how the students foreground

love, kindness and social justice, rather than curriculum and outcomes, while being alert to the politics of difference and absence in higher education classrooms. The book draws on well-worn and innovative writing styles to produce analyses and arguments that are eye-opening, persuasive and raise difficult questions for future educational practices. This book is a must for anyone interested in championing excellence and social justice in higher education." Ann Phoenix, Professor of Psychosocial Studies, UCL Institute of Education "This is a book with a difference. It is based on critical scholarship and draws on reflexive analysis but - and this is the important and unique part - it is a book written mainly by university students about how to enact meaningful relationships in the academy. It takes as its substantive focus one new undergraduate programme but the agenda is about change, social justice and the hard work of real inclusion. This book stands as a wake-up call to all of us who care deeply about socially just education and democracy in our institutions of higher education. It is also a wonderful example of how to write something that really matters!" - Meg Maguire, Professor of Sociology of Education, King's College London

She writes about romantic experiences that may shock you but makes no apologies for her unconventional lifestyle. Men and women are often self-care-challenged and Lynda was no the exception. If you are fighting any kind of illness or dis-ease, you are not alone! Lynda has walked her talk, and after an experience in the summer of 2015 relating to Dr. Wayne Dyer, she is now ready to release her story. Lynda knows how it feels to be told you're not healing or your condition is incurable. At no point will she undermine anything your physicians tell you to do. She is not a medical doctor. She will explain the powerful, yet simple concepts, beliefs, balance and faith that she believes led to her healing. Most of all, she will show you how she used these simple principles to design and live, the fully healed life she now enjoys in 2017. You will shake your head in wonder, laugh, and maybe cry too. If you want less pain, worry, and stress about dis-ease and life in general, you will want to read this simple yet powerful story.
