**Representations of Health, Illness and Handicap** Ivana Marková 1995 The research described provides evidence that work needs to be carried out at the level of the community in bringing about changes in its representations of illness and handicap, since it would appear that working only through the mass media of communication is insufficient. "Representations of Health, Illness and Handicap" is a unique contribution of Health, Psychology and Social Science to an understanding of links between media images, lay representation of health issues and their implications for behaviour.

**Safer Sex in Personal Relationships** Tara M. Emmers-Sommer 2004-11-16 This book focuses on safer sex discussion and practice in close, personal relationships, emphasizing research on individuals in personal relationship types that are experiencing a rise in HIV infection and AIDS. Moving beyond studies of gay adult males and IV drug-users, this work paints a clear picture of the very real risk that exists for these less-studied, more general populations, so individuals may better personalize the risk and engage in more preventative measures. Authors Tara M. Emmers-Sommer and Mike Allen examine issues surrounding safer sex, utilizing research that focuses on how individuals struggle with personalizing the HIV and AIDS risk and how they cope with safer sex issues. Safer Sex in Personal Relationships takes readers on a journey through a variety of close relationship types. It begins by highlighting awareness to the global enormity of HIV and AIDS and providing a link between the global and personal, and the need to make HIV and AIDS awareness part of everyday talk and personal relationship structure. It then focuses on: \*safer sex in close relationships, both heterosexual and homosexual; \*marital relationships and the importance of safe sex discussion and awareness in marriages; \*HIV and AIDS from a multicultural perspective; \*HIV and AIDS in aged populations; and \*increasing awareness, understanding, and compassion of those living with HIV and AIDS. This book will appeal to scholars and students concerned with HIV and AIDS in personal relationships. It will be an invaluable text for courses on interpersonal communication and relationships; family, marital, human sexuality, sex and

accessible, this book manages to be both theoretically subtle and attuned to the realities of classroom practice.â€” Dr Rachel Thomson, The Open University "[This] book is a great success and provides a wealth of insights into the realities of teaching and being taught about sex and relationships." Michael Reiss, Institute of Education

What are the different values and perspectives on sex and relationship education within a single secondary school? How do young people think sex education should be taught? What are the challenges facing the provision of good sex and relationship education at the classroom level and at the political level? Young people often receive mixed messages about gender and sexual relationships. When providing sex education lessons, schools should take into account different ideas and values, including the general British embarrassment over intimate matters and differing political and personal views about sex education. This book combines young peopleâ€™s views of sex education, schooling and parenthood, with those of teachers, school nurses and head-teachers. It brings together these varied perspectives and considers how they reveal different values, aims and agendas. The authors highlight the potential conflict between approaches to education and health, and reveal the complexity of dealing with sexuality and gender in real-life situations. Focusing on young peopleâ€™s identities in the classroom, contemporary theoretical approaches in the social sciences are employed to explore how gender is enacted and experienced by individuals, and how social pressures and government agendas operate at the level of the individual. This book contains original, first-hand empirical material from a detailed study of all the schools in one English city, and offers a critical analysis of broader political and cultural ideas and values. Get Real About Sex is key reading for students and professionals in education, health and the sociology of gender and sexuality.

*Sex on Your Terms* Elizabeth Powell 1995 To make wise sexual choices and to avoid being a victim or perpetrator, one must have two things: knowledge and the power to act on that knowledge. While some books adequately cover the necessary factual information regarding sexual harassment, rape, and disease and pregnancy prevention, there is a great need for learning the coping skills for dealing with the sexual dilemmas that confront readers today.

**The Psychology of Sexual Health** Dr. David Miller 2008-04-15  
There have been rapid developments in the psychological management of sexually transmitted diseases, particularly HIV and AIDS. However, a significant proportion of those attending genitourinary clinics do not have a disease or infection, but rather are seeking help with sexual health issues relating to behaviour, prior sexual experiences and relationships. Hence as clinics become more and more generalist there is a need to focus on behavioural aspects of disease. This is the first text to draw together the knowledge base and expertise of clinicians and researchers from all disciplines in the psychological management of sexual health. It presents advances in theory and practice in a practical way that will be accessible for all disciplines.

**Toward Equity in Health** Barbara C. Wallace, PhD 2007-11-26 This essential collection presents a state-of-the-art framework for how workers in public health and related disciplines should conceptualize health disparities and how they should be addressed worldwide. The contributors, who are leading public health professionals, educators, and practitioners in complimentary fields advance new evidence-based models designed to mobilize and educate the next generation of research and practice. The resulting chapters articulate new theory, procedures, and policies; the legacy of racism; community-based participatory research; new internet technology; training community workers and educators; closing the education and health gap; and addressing the needs of special populations. *Toward Equity in Health* is an essential book for all who are working toward global health equity-whether in health education, health promotion, disease prevention, public health, the health care delivery system, or patient- and population level health.

**Stress and Anxiety** Petra Buchwald 2009-01-23 The book offers cutting-edge developments in both experimental and theoretical aspects of stress and anxiety introduced by world-wide well-know researchers. It covers four major areas that are health, work place, community, and education. stress and deals with the role of personality, workaholism, and the importance of burnout. The third part of the volume focuses on stress, anxiety, and coping in the community related to terror attacks. Research presented here helps to understand the phenomenon of posttraumatic growth and related paradoxical effects of traumatic events. A comprehensive and instructive conceptual overview of terror, its psychological antecedents and consequences, as well as findings from research that investigated the coping process during a period of political violence is given. The fourth part of the book refers to education and develops understandings of the sources, experiences, and consequences of stress, anxiety, and coping in different groups and school settings. Anxiety, stress, and coping are important to understand if we want to have meaningful descriptions of individuals. All contributions in this book demonstrate the development of research in this field and how important a continuing investigation and refinement in this complex area is. We wish to encourage academic researchers, students, service providers, policy makers, community members, and anyone else involved in treating stress to join with us in understanding individuals in the context of stress, coping, and emotions and how this effects their well-being, functioning and resilience.

*Coping with HIV Infection* Lena Nilsson Schönnesson 1999-08-31  
"I'm like a whirling leaf in the wind," said one of Dr. Lena Nilsson SchOnnesson' s patients, and another "I'm in the claws of HIV." Their voices and those of other HIV-positive patients frame the humanistic and scholarly discussion in this impor tant book. Dr. SchOnnesson, a Fulbright scholar at the HIV Center for Clinical and Behavioral Studies, Columbia University in 1995, has unusually extensive clinical experience in counseling HIV-positive gay men. Her work with 38 such patients treated between 1986 and 1995 is discussed in the pages that follow. Dr. SchOnnesson's longitudinal approach to clinical data is extremely unusual in the psychotherapy literature generally, and in the literature on

counseling HIV positive men in particular. Building upon the experience of such recent scholar clinicians as Klitzman, Isay, Schaffner, and others, Dr. SchOnnesson adds some thing unique by analyzing her ongoing detailed notes of the psychotherapeutic process in a systematic quantitative as well as qualitative manner. The analysis of her data is further informed by her coauthor, Dr. Michael Ross, a therapist and investigator whose contribution to the clinical and research literature on the psychotherapeutic treatment of gay men has already been substantial.

The Challenges of Being a Rural Gay Man Deborah Bray Preston  
2013-01-04 Gay men often face struggles in the conservative world of rural life, due to the pervasive social stigmas associated with homosexuality and the lack of anonymity in a small-town setting. In this book, Preston and D'Augelli present the results of in-depth interviews and surveys with rural gay men, providing unique and hitherto unknown perspectives on their experiences coping with intolerance. With sensitivity and humor, the authors narrate their attempts at accessing this hidden population in bars, campgrounds, social clubs, and political groups. This volume is a must-read for researchers, academics, and graduate and post-graduate students in health care, nursing, health policy, and social and psychological science.

**Youth, AIDS and Sexually Transmitted Diseases** Anne Mitchell  
2020-03-25 What has been the impact of AIDS and sexually transmitted diseases on the lives of young people? *Youth, AIDS and Sexually Transmitted Diseases* provides a comprehensive overview of research and policy in this increasingly important area. The book describes the world-wide incidence and prevalence of sexually transmitted diseases among adolescents and examines how their sexual behaviour has changed as a result of the threat of AIDS. It also looks at young people's knowledge and attitudes about their own sexual health, as well as the usefulness of models in predicting those at risk. The authors also discuss the effectiveness of institutional policies in educating young people and in preventing sexually transmitted diseases. *Youth, AIDS and Sexually Transmitted Diseases* will be of considerable benefit to health care providers, sex educators and all those who work with and study adolescents.

**Spiritual Coping in People with HIV** Sarah M Henry  
2013 Objective: The purpose of the present study was to examine whether spiritual coping (SC) was related to health behaviors, specifically medication adherence, safer sex practices, and substance use as well as depression levels in an HIV+ population

over a two year period. In addition, the present study examined whether spiritual coping predicted changes in medication adherence and depression levels over time. Methods: This longitudinal study assessed 177 HIV+ and diverse men and women in the midrange of illness as indicated by a CD4 number between 150 and 500 and no previous AIDS-defining symptom. Spiritual coping data and safer sex data were assessed from interviews conducted at baseline assessment and at each follow-up assessment every 6 months for a period of 2 years. Linear Regression was used to examine the relationship between Spiritual Coping and baseline medication adherence, safer sex practices, substance use, and baseline depression levels. Hierarchical Linear Modeling was used to examine whether S change over time in medication adherence and depression controlling for age, gender, ethnicity, education, anti-HIV medication and baseline values for each outcome. Results: Spiritual Coping was not significantly related to medication adherence, substance use, safer sexual practices, or depression. Spiritual coping did not significantly predict changes in medication adherence or depression over time. However, subcodes showed that spiritual conflict, spiritual struggle and spiritual guilt were related with less marijuana use, less cocaine use, and to less use of protection in participants reporting sexual activity with more than one partner, respectively. Conclusions: Negative spiritual coping strategies were related to more substance use and risky sexual behaviors in participants reporting sexual activity with more than one partner. No significant relationships were found between spiritual coping and medication adherence or depression. Findings indicate that negative spiritual coping is related to negative health behaviors. These findings suggest that future interventions aimed at reducing negative spiritual coping should be developed as they may help to reduce substance use and risky sexual behaviors in people with HIV.

*More Sex is Safer Sex* Steven E. Landsburg 2008-09-04 With his long-running 'Everyday Economics' column in Slate and his popular book, *The Armchair Economist*, Steven Landsburg has been leading the pack of economists who are transforming their science from a drab meditation on graphs and charts into a fascinating window on human nature. Now he's back and more provocative than ever with surprises on virtually every page. In *More Sex is Safer Sex*, Professor Landsburg offers readers a series of stimulating discussions that all flow from one unsettling fact. Combining the rational decisions of each of us often produces an irrational result for all of us. Avoiding casual sex can actually encourage the spread of diseases. To solve population pressures, we need more people. In his tantalizing, entertaining narrative, Landsburg guides us through these shocking notions by the light of compelling logic and evidence and makes suggestions along the way: Why not charge juries if a convicted felon is exonerated? Why not let firemen keep the property they rescue? As entertaining as it is inflammatory, *More Sex is Safer Sex* will make readers think about their decisions in unforgettable ways -- and spark debate over much that we all take for granted.

**Persuading People To Have Safer Sex** Richard M. Perloff

**Enhancing Sexual Health, Self-Identity and Wellbeing among Men Who Have Sex With Men** Rusi Jaspal 2018-06-21  
By analysing research into links between low psychological wellbeing and sexual risk-taking behaviours that occur in men who have sex with men (MSM), this book demonstrates what impact social and psychological interventions could have on MSM at risk of poor sexual outcomes. At the heart of the book is Identity Process Theory, co-developed by the author, a social psychological theory of identity construction, threat and coping. The book considers the emerging debates in MSM's health, such as the use of Grindr and 'chemsex', and also explores the socio-structural factors, such as homophobia and stigma, that threaten the self-identity of MSM. The book offers principles and techniques from this theory that can be used as an effective intervention and therapeutic model with MSM to build more positive identities and reduce sexual risk-taking.

**Gay Men, Sex and HIV in New Zealand** Heather Worth 2003

The gay community has experienced the greatest impact of AIDS in New Zealand. Through the two decades since the HIV epidemic struck here, gay and bisexual men have had to come to terms with death: either their own or that of their friends and loved ones. They have had to reinvent sexual practice and learn to keep themselves and their partners safe. This book tells the story of that journey. It aims to give the reader an overview of gay men's lives in the era of AIDS, their sexual practices and the strategies they have used in dealing with the epidemic. It uses data, both qualitative and quantitative, gathered by the author and other researchers from a range of projects that investigate the hard facts about gay men's response to the virus as well as their personal stories.

HIV and AIDS have posed new challenges to societies, communities and individuals. In many parts of the world, existing health and social services have been hard pressed to cope with the demands of the epidemic. In hospitals and in the community, new approaches to health education, support and care have been developed. This book examines the extent to which sound foundations for the future have been laid in public, private and voluntary sector action.
