**Global Cinderellas** - Pei-Chia Lan 2006-03-13  
Migrant women are the primary source of paid domestic labor around the world. Since the 1980s, the newly prosperous countries of East Asia have recruited foreign household workers at a rapidly increasing rate. Many come from the Philippines and Indonesia. Pei-Chia Lan interviewed and spent time with dozens of Filipina and Indonesian domestics working in and around Taipei as well as many of their Taiwanese employers. On the basis of the vivid ethnographic detail she collected, Lan provides a nuanced look at how boundaries between worker and employer are maintained and negotiated in private households. She also sheds light on the fate of the workers, “global Cinderellas” who seek an escape from poverty at home only to find themselves treated as disposable labor abroad. Lan demonstrates how economic disparities,

immigration policies, race, ethnicity, and gender intersect in the relationship between the migrant workers and their Taiwanese employers. The employers are eager to flex their recently acquired financial muscle; many are first-generation career women as well as first-generation employers. The domestics are recruited from abroad as contract and “guest” workers; restrictive immigration policies prohibit them from seeking permanent residence or transferring from one employer to another. They care for Taiwanese families’ children, often having left their own behind. Throughout *Global Cinderellas*, Lan pays particular attention to how the women she studied identify themselves in relation to “others”—whether they be of different classes, nationalities, ethnicities, or education levels. In so doing, she offers a framework for thinking about how migrant

A history of the feminist movement that changed how we see women's work forever

*Global Woman* - 2003

In a remarkable pairing, two renowned social critics offer a groundbreaking anthology that examines the unexplored consequences of globalization on the lives of women worldwide. Women are moving around the globe as never before. But for every female executive racking up frequent flier miles, there are multitudes of women whose journeys go unnoticed. Each year, millions leave Mexico, Sri Lanka, the Philippines, and other third world countries to work in the homes, nurseries, and brothels of the first world. This broad-scale transfer of labor associated with women's traditional roles results in an odd displacement. In the new global calculus, the female energy that flows to wealthy countries is subtracted from poor ones, often to the detriment of the families left behind. The migrant nanny--or cleaning woman, nursing care attendant, maid--eases a "care deficit" in rich countries, while her absence creates a "care deficit" back home. Confronting a range of

topics, from the fate of Vietnamese mail-order brides to the importation of Mexican nannies in Los Angeles and the selling of Thai girls to Japanese brothels, "Global woman offers an unprecedented look at a world shaped by mass migration and economic exchange on an ever-increasing scale. In fifteen vivid essays--of which only four have been previously published--by a diverse and distinguished group of writers, collected and introduced by best selling authors Barbara Ehrenreich and Arlie Russell Hochschild, this anthology reveals a new era in which the main resource extracted from the third world is no longer gold or silver, but love. Work and Life in the Global Economy - D.

Howcroft 2009-11-30

This book aims to explore the social and cultural issues within the economic changes that have given rise to service work. Written by specialists in their respective fields, this book draws together authors from interdisciplinary areas that are carrying out significant research into

gender and service work within an international context.

Sex Trafficking - Kathryn Farr 2004-11-05

One million people are trafficked into the sex industry each year. In this timely and provocative study, Kathryn Farr documents the macro and micro impact of trafficking women and children into this industry on a global scale. Farr looks not only at the victims themselves, but also at the sex trade's main players, organized crime structure, economic conditions, and role in which various militaries perpetuate its demand. Sex Trafficking can be incorporated into a variety of courses in sociology, social problems, culture and sexuality, history, and women's studies.

Publisher Description  
[The Second Shift](#) - Arlie Hochschild 2012-01-31  
An updated edition of a standard in its field that remains relevant more than thirty years after its original publication. Over thirty years ago, sociologist and University of California, Berkeley professor Arlie Hochschild set off a tidal wave of conversation and controversy with her bestselling book, *The Second Shift*. Hochschild's examination of life in dual-career households finds that, factoring in paid work, child care, and housework, working mothers put in one month of labor more than their spouses do every year. Updated for a workforce that is now half female, this edition cites a range of updated studies and statistics, with an afterword from Hochschild that addresses how far working mothers have come since the book's first publication, and how much farther we all still must go.

the intricate interplay of gender, race, and class, Sheba George examines an unusual immigration pattern to analyze what happens when women who migrate before men become the breadwinners in the family. Focusing on a group of female nurses who moved from India to the United States before their husbands, she shows that this story of economic mobility and professional achievement conceals underlying conditions of upheaval not only in the families and immigrant community but also in the sending community in India. This richly textured and impeccably researched study deftly illustrates the complex reconfigurations of gender and class relations concealed behind a quintessential American success story. When *Women Come First* explains how men who lost social status in the immigration process attempted to reclaim ground by creating new roles for themselves in their church. Ironically, they were stigmatized by other upper class immigrants as men who needed to "play in the

church" because the "nurses were the bosses" in their homes. At the same time, the nurses were stigmatized as lower class, sexually loose women with too much independence. George's absorbing story of how these women and men negotiate this complicated network provides a groundbreaking perspective on the shifting interactions of two nations and two cultures.

*Maid in the USA* - Mary Romero 2016-05-13

This is a classic work in the fields of Women's Studies and Sociology. On its 10th Anniversary, it is still a vital and moving study of the lives of immigrant domestic workers, and is constantly cited in the research. Romero's new introduction will offer a fresh look at the material, including more recent events, proving that the issues discussed in the book are still very relevant to today's world.

untangles this complex history in a unique comparative regional study from the end of Reconstruction to the eve of World War II. During this era the country experienced enormous social and economic changes with the abolition of slavery, rapid territorial expansion, and massive immigration, and struggled over the meaning of free labor and the essence of citizenship as people who previously had been excluded sought the promise of economic freedom and full political rights. After a lucid overview of the concepts of the free worker and the independent citizen at the national level, Glenn vividly details how race and gender issues framed the struggle over labor and citizenship rights at the local level between blacks and whites in the South, Mexicans and Anglos in the Southwest, and Asians and haoles (the white planter class) in Hawaii. She illuminates the complex interplay of local and national forces in American society and provides a dynamic view of how labor and citizenship were defined,

enforced, and contested in a formative era for white-nonwhite relations in America.

### **Disposable Women and Other Myths of**

**Global Capitalism** - Melissa Wright 2013-01-11  
Everyday, around the world, women who work in the Third World factories of global firms face the idea that they are disposable. Melissa W. Wright explains how this notion proliferates, both within and beyond factory walls, through the telling of a simple story: the myth of the disposable Third World woman. This myth explains how young women workers around the world eventually turn into living forms of waste. Disposable Women and Other Myths of Global Capitalism follows this myth inside the global factories and surrounding cities in northern Mexico and in southern China, illustrating the crucial role the tale plays in maintaining not just the constant flow of global capital, but the present regime of transnational capitalism. The author also investigates how women challenge the story and its meaning for workers in global firms. These

Gender, Migration, and the Work of Care - Sonya Michel 2017-08-21

This book explores how around the world, women's increased presence in the labor force has reorganized the division of labor in households, affecting different regions depending on their cultures, economies, and politics; as well as the nature and size of their welfare states and the gendering of employment opportunities. As one result, the authors find, women are increasingly migrating from the global south to become care workers in the global north. This volume focuses on changing patterns of family and gender relations, migration, and care work in the countries surrounding the Pacific Rim—a global epicenter of transnational care migration. Using a multi-scalar approach that addresses micro, meso, and

macro levels, chapters examine three domains: care provisioning, the supply of and demand for care work, and the shaping and framing of care. The analysis reveals that multiple forms of global inequalities are now playing out in the most intimate of spaces.

**Inside Toyland** - Christine L. Williams 2006-01-09

"I got my first job working in a toy store when I was 41 years old." So begins sociologist Christine Williams's description of her stint as a low-wage worker at two national toy store chains: one upscale shop and one big box outlet. In this provocative, perceptive, and lively book, studded with rich observations from the shop floor, Williams chronicles her experiences as a cashier, salesperson, and stocker and provides broad-ranging, often startling, insights into the social impact of shopping for toys. Taking a new look at what selling and buying for kids are all about, she illuminates the politics of how we shop, exposes the realities of low-wage retail

work, and discovers how class, race, and gender manifest and reproduce themselves in our shopping-mall culture. Despite their differences, Williams finds that both toy stores perpetuate social inequality in a variety of ways. She observes that workers are often assigned to different tasks and functions on the basis of gender and race; that racial dynamics between black staff and white customers can play out in complex and intense ways; that unions can't protect workers from harassment from supervisors or demeaning customers even in the upscale toy store. And she discovers how lessons that adults teach to children about shopping can legitimize economic and social hierarchies. In the end, however, *Inside Toyland* is not an anticonsumer diatribe. Williams discusses specific changes in labor law and in the organization of the retail industry that can better promote social justice.

*Global Woman* - Barbara Ehrenreich 2003

This anthology examines the unexplored

consequences of globalization on the lives of women worldwide. In a world shaped by mass migration and economic exchange on an ever-increasing scale, women are moving around the globe as never before. Every year, millions leave Mexico, Sri Lanka, the Philippines and Eastern Europe to work in the homes, nurseries and brothels of the First World - from Vietnamese mail-order brides to Mexican nannies in LA, from Thai girls in Vietnamese brothels to Czech au pairs in the UK. In the new global calculus, the female energy that flows to wealthy countries to ease a care deficit, is subtracted from poor ones, often to the detriment of the families left behind.
