Unequal Neighbourhoods, Unequal Schools Julia Nast 2019-08-20 Do schools work differently in deprived and privileged neighbourhoods? As segregation is on the rise in many cities, this book explores how different neighbourhood contexts shape public organisations, by using an innovative approach that combines a Bourdieusian perspective and new institutional theory. Based on interviews and ethnographic data from two primary schools in Berlin, Germany, it shows how local social compositions, symbolic meanings of urban areas, and neighbourhood-based policy interventions structure schools. Educational professionals adapt to these structural differences. The book analyses how teachers' understandings and practices vary by local context - and what that means for the reproduction of urban inequality.

The Social World of Pupil Career Andrew Pollard 1999-06-17 This text is the second part of a seven-year ethnography of individual pupils from the ages of four to eleven in an English primary school. It presents a sociological analysis of children coping with the social worlds of home, playground and classroom over the seven years of a primary school career. The study provides holistic insights into the biographies of four children during their primary school years and the case studies give prominence to the voices and perspectives of parents, children and teachers interacting over time. The reader is invited to engage personally with these accounts and is guided, as the book progresses, to an overall analysis of the significance of social relationships and learning processes on the children's career trajectories.

Identity and Schooling Among the Naxi Haibo Yu 2010 Identity and Schooling among the Naxi examines the identity construction of Naxi students in Lijiang No.1 Senior Secondary School in China, focusing on the changing roles of school, community, and family in the identity construction of the students. Through participant observation, interviews, and student essays, Yu finds that Naxi students of the school retain a strong Naxi identity while also managing to fit into mainstream culture through a process she characterizes as "harmonious creative identity engagement". Three main forces affecting the identity construction of the Naxi students are highlighted: the state and the school, Naxi intellectuals, and socialization in the family and community. As an institution of the state, the school conveys national ideology and instills a sense of ethnic unity and an understanding of the culture of the Chinese nation. However, the school also takes an active role in ethnic identity construction of the Naxi students. At the same time, Naxi intellectuals, through their research publications and responses to state policies, preserve and revitalize Naxi culture. Socialization within the community and family allows the Naxi students to learn about their heritage. These factors result in both an asserted and assigned identity of the Naxi.

The Best of You Joseph Aigbojie Etute 2014-04-14 You were born to be the best of you; otherwise, you wouldnt have been born at all. Your Creator has more important things to do than creating wasted humans that will fail Him in accomplishing the best He had set for them and had prepared for them even before the foundation of the world. To now see that in todays world only less than 10 percent of us actually attain the best of us not only saddens me, but it creates in me a heavy burden and an agonizing pain far beyond the one that any word can describe. I am a work in progress myself. I have messed up so much and failed so many times that I have even stopped counting. This book narrates all the areas of my life where I have failed and what I would have done differently to bring out the best of me. This book gives you all the practical ways of becoming the best of you. It is a ten-volume series designed and written to help you become the best, and nothing but the best.

Music Teachers' Values and Beliefs Rachael Dwyer 2016-06-03 In *Music Teachers' Values and Beliefs*, Dwyer investigates the relationships between teachers, learners and music in music classrooms. Using Bourdieu's concepts of habitus and doxa as an interpretive lens, the book explores the values and beliefs of four music teachers, depicted in richly detailed narratives. The narratives are contextualised through the examination of traditions of music and contemporary approaches. In the past, music education has been shaped by elitist tendencies regarding the types of music worthy of study, the ways in which music should be learnt, and the purpose of such learning. Contemporary approaches to music education have enacted significant change in some regions and systems, while others have been slower to leave behind deeply entrenched values, beliefs and practices. These approaches have been blamed for low rates of participation and engagement in school music education, despite the fact that the majority of young people listen to and enjoy music outside of school. This innovative book provides music education researchers and practitioners with a new understanding of the impact of teachers' personal values, beliefs and experiences of music and music education on classroom practice, and the impact this has on students' experiences of music education.
