*Problems of Human Adjustment* Lynde C. Steckle 2007-03 PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is depend- ent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream- fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, - such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we dont deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...

*Home Will Never Be the Same Again* Carol R. Hughes 2020-06-22 Adult children are often overlooked and forgotten when their parents divorce later in life, but in these pages they will find comfort and understanding for the many feelings, frustrations, and challenges they face. For more than two decades, a silent revolution has been occurring and creating a seismic shift in the American family and families in other countries. It has been unfolding without much comment, and its effects are being felt across three to four generations: more couples are divorcing later in life. Called the "gray divorce revolution," the cultural phenomenon describes couples who divorce after the age of 50. Overlooked in the issues that affect couples divorcing later in life are the adult children of divorcing parents. Their voices open this book, and they are the voices of men and women, 18 to 50 years old. Some of them are single; some are married. Some have children of their own. All of them are in different stages of shock, fear, and sudden, dramatic change. In *Home Will Never Be the Same: A Guide for Adult Children of Gray Divorce*, Carol Hughes and Bruce Fredenburg share their deep understanding gained during the innumerable hours they have spent with these women and men in their clinical practices. The result is a valuable resource for these too often forgotten adult children, many of whom find that, whenever they express their feelings and experiences, the most important people in their lives frequently ignore and dismiss them. As the divorce rate for older adults soars, so too does the number of adult children who are experiencing parental divorce. Yet, these adult children frequently say that they are the only ones who are aware of what they are going through, no one understands what they are experiencing, and they feel painfully alone.

Emotional Intelligence and Social Intelligence in Terms of Leadership Behavior and Personal Effectiveness Among +2 Level Students Dr. Amarnath Reddy 2021-11-30 Effective leadership is essential for an organization's success; hence, the ability to identify and define effective leadership is crucial. Technical expertise, superior performance, and established experience are no longer only criterion of effective leadership. Today effective leaders are defined by inspiring and motivating others, promoting a positive work environment, understanding and managing emotions, building bonds, communications, and influence, and so forth. Emotional Intelligence (EI) has an emerging track record of being linked to leadership performance. Emotional intelligence connects a leader's cognitive abilities with their emotional state. The ability for leaders to recognize the impact of their own emotions on their decision making is paramount if a leader is to make sound decisions based on the best interests of the organization. A leader must be able to read emotions in his/her peers and employees in order to be as effective as possible. Stodgily originated this notion with linkages of leader personality and control over emotions to employee perception of leader effectiveness. Due to the complexity of organizational change and the role emotions play in changes such as global expansion, job eliminations, leadership changes, as well as stressors of day to day responsibilities, the EI of managers and how they manage their associates is an element that leadership needs to consider while moving their organizations forward. Organizations everywhere need now to realize the benefits of primal leadership by cultivating leaders who generate the emotional resonance that lets people flourish.
