Fluid Signs - E. Valentine Daniel 2023-11-10

Fluid Signs is the product of anthropological fieldwork carried out among Tamil-speaking villagers in a Hindu village in Southern India. Combining a richness of ethnographic detail with a challenging and innovative theoretical analysis, Daniel argues that symbolic anthropologists have yet to appreciate the multifaceted function of the sign and its role in the creation of culture. This provocative study underscores the need for Western intellectual traditions in general and anthropology in particular to deepen its discourse with South Asian cultural and religious thought. *The Bethesda System for Reporting Cervical Cytology - Ritu Nayar 2015-04-13*

This book offers clear, up-to-date guidance on how to report cytologic findings in cervical, vaginal and anal samples in accordance with the 2014 Bethesda System Update. The new edition has been expanded and revised to take into account the advances and experience of the past decade. A new chapter has been added, the terminology and text have been updated, and various terminological and morphologic questions have been clarified. In addition, new images are included that reflect the experience gained with liquid-based cytology since the publication of the last edition in 2004. Among more than 300 images, some represent classic examples of an entity while others illustrate interpretative dilemmas, borderline cytomorphologic features or mimics of epithelial abnormalities. The Bethesda System for Reporting Cervical Cytology, with its user-friendly format, is a "must have" for pathologists, cytopathologists, pathology residents, cytotechnologists, and clinicians. *Cool Fire - Gabriella Eichinger Ferro-Luzzi 1983*

Sex Hormones in Neurodegenerative Processes and Diseases - Gorazd Drevensek 2018-05-02

The book provides chapters on sex hormones and their modulation in neurodegenerative processes and pathologies, from basic molecular mechanisms, physiology, gender differences, to neuroprotection and clinical aspects for potential novel pharmacotherapy approaches. The book contains 14 chapters written by authors from various biomedical professions, from basic researchers in biology and physiology to medicine and veterinary medicine, pharmacologists, psychiatrist, etc. Chapters sum up the past and current knowledge on sex hormones, representing original new insights into their role in brain functioning, mental disorders and neurodegenerative diseases. The book is written for a broad range of audience, from biomedical students to highly profiled medical specialists and biomedical researchers, helping them to

expand their knowledge on sex hormones in neurodegenerative processes and opening new questions for further investigation.

Woman Cancer Sex - Anne Katz 2020-11-29

Winner of the 2023 SSTAR Consumer Book Award! *Woman Cancer Sex*, Second Edition, is an accessible and comprehensive resource for women living with and surviving cancer as they navigate specific challenges related to sex and sexuality. Women who have survived cancer remain sexual beings despite the challenges of cancer treatment, and they often have nowhere to go with their questions and concerns. This text interweaves stories from clinical practice with evidence-based tips and interventions for a range of physical and emotional side effects resulting from cancer and its treatment. Each chapter describes the experience of a woman with a particular kind of cancer and a variety of related problems, including loss of libido, physical pain, body image issues, depression, and struggles communicating with a partner and health care providers. Written by a leading voice in the field of cancer and sexuality, this book offers essential guidance surrounding questions about sexual health for women diagnosed with cancer. It will also be of use to health care providers including social workers and sex and couple therapists. *The Karezza Method - John William Lloyd 199?*

1931 the Art of Connubial Love. the lover is the artist in touch. Karezza in its perfect form is natural marriage - that clinging, satisfied union of body and soul which true love ever craves and in which ideal marriage consists - and with every repeti.

the wives of the messenger of allah - Jeremy Boulter

Dermatology Made Easy - Amanda Oakley 2017-05-06

A concise overview of the common dermatological conditions most likely to present in general medicine From reviews: "... a perfect solution to the constant struggle that dermatology diagnosis presents to primary care physicians and other providers... This well-formatted book covers a vast array of topics ranging from common to rare skin disorders. The pictures are immensely helpful in the understanding of various skin rashes...." *Fam Med 2019;51(5):451-452.* "... easy to read and informative. One cannot emphasise enough the quality and comprehensive nature of the photographic content.... As someone who was interested in dermatology even as a medical student my only regret is that this book was not around when I was a student as it would have very adequately guided me into my beloved subspecialty." *Ulster Med J 2017;86(3):1-1.* "The introduction outlines dermatological conditions by symptom, morphology and body site, providing an excellent index prior to delving into greater detail in the following chapters. The logical approach and level of detail make this text perfect for medical students, interns/residents, primary

care physicians and other specialists who wish to quickly identify differential diagnoses or refresh their knowledge of dermatological conditions." A Lecturer in Dermatology Dermatology Made Easy is based on the hugely popular DermNet New Zealand website and is designed to help GPs, medical students and dermatologists diagnose skin conditions with confidence. The book starts by providing a series of comprehensive tables, complete with over 500 thumbnail photos, to aid diagnosis according to symptoms, morphology, or body site. Once you have narrowed down the diagnosis, cross-references then guide you to more detailed descriptions, and another 700 photographs, covering: common infections inflammatory rashes non-inflammatory conditions skin lesions Every section provides consistent information on the disorder: who gets it and what causes it? what are the clinical features and does it cause any complications? how do you diagnose it? how do you treat it and how long does it take to resolve? The book concludes with a comprehensive section on further investigations and treatment options. Dermatology Made Easy combines the essential focus of the Made Easy book series with the authority and knowledge base of DermNet New Zealand's unparalleled resources. Printed in full colour throughout.

Psychological Aspects of Women's Health Care - Nada L. Stotland 2008-11-01

In the decade since the first edition of this work was published, an incredible array of reproductive technologies and associated issues has emerged. Obstetricians and gynecologists are hard-pressed to deal with the startling breadth and depth of these issues, which require mastery over a daunting combination of ever-increasing scientific knowledge, technical skills, long hours, legal liability, and exposure to clinical situations of overwhelming emotional intensity. Psychiatrists have a vital role to play in helping obstetricians and gynecologists cope with a host of problems whose resolutions require not just technical skill, but also knowledge of biology, psychology, sociology, anthropology, ethics, and law. For example, to design and implement strategies to reduce the transmission of HIV, psychiatrists could work with public health workers to incorporate the psychology, sociology, and anthropology of female reproductive behavior. Psychiatrists could likewise improve the diagnosis and treatment of breast and pelvic malignancies by elucidating the factors that deter women from self-examination and regular medical screening and enhance treatment compliance. Divided into three sections, this clinical and theoretical sourcebook addresses every major area of contemporary concern. Pregnancy covers topics from the psychology of normal gestation to physical and psychiatric complications during and after pregnancy, including new prenatal diagnostic techniques and the dynamic issues that emerge when abnormalities are detected, and the use of psychotropic drugs and electroconvulsive therapy in pregnant and lactating patients. Gynecology discusses not only common gynecologic problems but also more controversial issues such as induced abortion and the new reproductive technologies, including the role of the menstrual cycle in exacerbating and precipitating psychologic symptoms, the psychiatric aspects of menopause, the assessment and management of chronic pelvic pain, the psychosocial concomitants of gynecologic malignancies and the emotional demands on the oncology team, and the special implications of HIV/AIDS. General Issues offers a broad, balanced view of topics rarely found in the literature, such as men's reactions to women's reproductive events, substance abuse and eating disorders, sexual and physical abuse (often part of the histories of patients with personality disorders and posttraumatic stress disorders), ethical and legal issues, and health care for lesbian patients. Of special significance is Dr. Stotland's chapter on how consultation-liaison services are provided to obstetrics and gynecology services. This practical and scholarly volume is exceptionally useful as a teaching reference for medical and other health care students and residents in psychiatry and obstetrics and gynecology. It also provides a valuable resource for the clinician working to improve the psychological well-being of women patients.

Aging and Menopause Among Indian South African Women - Brian M. du Toit 1990-09-25

Du Toit contributes to the study of the climacteric as an important phase of the life cycle among women of different cultures (the later reproductive and postreproductive years). Drawing upon perspectives in anthropology, sociology, psychology, and gerontology, he demonstrates the need for an adequate cross-cultural theory of aging among women, and offers a solid body of research from South Africa in establishing a standard methodology for the study of the climacteric.

Reproductive Ageing - Susan Bewley 2009-06

This book is based on the RCOG Study Group findings on reproductive

ageing.

National Family Health Survey (NFHS-2), India, 1998-99: Tamil Nadu - 2001

The Fat-Soluble Vitamins - H. DeLuca 2012-12-06

The first demonstration of the existence of a vitamin and the full recognition of this fact are often attributed to the work of McCollum, who found that a substance in butterfat and cod-liver oil was necessary for growth and health of animals fed purified diets. It became obvious that an organic substance present in microconcentrations was vital to growth and reproduction of animals. Following the coining of the word *vitamine* by Funk, McCollum named this fat-soluble substance *vitamin A*. We can, therefore, state that vitamin A was certainly one of the first known vitamins, yet its function and the function of the other fat-soluble vitamins had remained largely unknown until recent years. However, there has been an explosion of investigation and new information in this field, which had remained quiescent for at least two or three decades. It is now obvious that the fat-soluble vitamins function quite differently from their water-soluble counterparts. We have learned that vitamin D functions by virtue of its being converted in the kidney to a hormone that functions to regulate calcium and phosphorus metabolism. This new endocrine system is in the process of being elucidated in detail, and in addition, the medical use of these hormonal forms of vitamin D in the treatment of a variety of metabolic bone diseases has excited the medical community.

The Second Sex - Simone de Beauvoir 1997

Of all the writing that emerged from the existentialist movement, Simone de Beauvoir's groundbreaking study of women will probably have the most extensive and enduring impact. It is at once a work of anthropology and sociology, of biology and psychoanalysis, from the pen of a writer and novelist of penetrating imaginative power. *THE SECOND SEX* stands, five decades after its first appearance, as the first landmark in the modern feminist upsurge that has transformed perceptions of the social relationship of man and womankind in our time

Aging and Menopause Among Indian South African Women - Brian M. Du Toit 1990-01-01

Du Toit contributes to the study of the climacteric as an important phase of the life cycle among women of different cultures (the later reproductive and postreproductive years). Drawing upon perspectives in anthropology, sociology, psychology, and gerontology, he demonstrates the need for an adequate cross-cultural theory of aging among women, and offers a solid body of research from South Africa in establishing a standard methodology for the study of the climacteric.

Why Is Sex Fun? - Jared Diamond 2014-03-20

A fascinating insight into how human sexuality came to be the way it is now - Jared Diamond explains why we are different from the animal kingdom. Why are humans one of the few species to have sex in private? Why do humans have sex any day of the month or year, including when the female is pregnant, beyond her reproductive years, or between her fertile cycles? Why are human females one of the few mammals to go through menopause? Human sexuality seems normal to us but it is bizarre by the standards of other animals. Jared Diamond argues that our strange sex lives were as crucial to our rise to human status as were our large brains. He also describes the battle of the sexes in the human and animal world over parental care, and why sex differences in the genetic value of parental care provide a biological basis for the all-too-familiar different attitudes of men and women towards extramarital sex.

Consanguinity in Context - Alan H. Bittles 2012-05-24

An essential guide to the sensitive topic of cousin marriage, examining its social, medical, political and legal connotations.

The Ultimate Guide to Sex After Fifty - Joan Price 2014-12-22

The population over age 50 is larger than ever in history. According to the U.S. Census Bureau, 32.1 percent of the U.S. population were age 50 and over in 2011. This demographic is also healthier, more aware, more youthful, and more vocal than any previous older generation. Thanks to ongoing medical discoveries, the sexual revolution, and the Internet, today's seniors are also sexier than ever — or at least they're now willing to talk and ask about sex as never before. They are the generation that discovered clitoral orgasms, vibrators, and Viagra, and there's no stopping the thirst for knowledge and pleasure now. Since 2005, Joan Price has penned *Better Than I Ever Expected: Straight Talk About Sex After Sixty* and emerged as the go-to sexpert for the over-50 population. Price's savvy advice, honesty, helpfulness, and humor garnered awareness in the media, in professional circles of therapists and sex educators, and among the huge population of people over 50 who hunger

for real information from an age appropriate author. Price tackles it all in this definitive guide to sex and aging: health, fun (and function), disability, dating, illness, orgasms, G-spots, P-spots, polyamory, kink, and

much more.
