The State of the World's Children 2012 David Anthony 2012 "More than half of the world's 7 billion people now live in urban areas. What does this mean for children? UNICEF has dedicated the 2012 edition of its flagship report, *The State of the World's Children*, to the situation of children growing up in urban settings. Cities are known to generate economic growth - but, as the report reveals, not all children are benefiting from urban expansion. In this increasingly urban world, the absence of a sustained focus on child rights means that some children are being left behind."-- Publisher website.

Global Health and Geographical Imaginaries Clare Herrick 2017-03-16 To date, geography has not yet carved out a disciplinary niche within the diffuse domain that constitutes global health. However, the compulsion to do and understand global health emerges largely from contexts that geography has long engaged with: urbanisation, globalisation, political economy, risk, vulnerability, lifestyles, geopolitics, culture, governance, development and the environment. Moreover, global health brings with it an innate, powerful and politicising spatial logic that is only now starting to emerge as an object of enquiry. This book aims to draw attention to and showcase the wealth of existing and emergent geographical contributions to what has recently been termed 'critical global health studies'. Geographical perspectives, this collection argues, are essential to bringing new and critical perspectives to bear on the inherent complexities and interconnectedness of global health problems and purported solutions. Thus, rather than rehearsing the frequent critique that global health is more a 'set of problems' than a coherent disciplinary approach to ameliorating the health of all and redressing global bio-inequalities; this collection seeks to explore what these problems might represent and the geographical imaginaries inherent in their constitution. This unique volume of geographical writings on global health not only deepens social scientific engagements with health itself, but in so doing, brings forth a series of new conceptual, methodological and empirical contributions to social scientific, multidisciplinary scholarship.

Applied Choice Analysis David A. Hensher 2005-06-02 Almost without exception, everything human beings undertake involves a choice. In recent years there has been a growing interest in the development and application of quantitative statistical methods to study choices made by individuals with the purpose of gaining a better understanding both of how choices are made and of forecasting future choice responses. In this primer the authors provide an unthreatening introduction to the main techniques of choice analysis and include detail on themes such as data collection and preparation, model estimation and interpretation and the design of choice experiments. A companion website to the book provides practice data sets and software to estimate the main discrete choice models such as multinomial logit, nested logit and mixed logit. This primer will be an invaluable resource to students as well as of immense value to consultants and professionals, researchers and anyone else interested in choice analysis and

modelling.

Parenting and Psychopathology Carlo Perris 1994 Divided into two parts: (I) theory, assessment and methodology; and (II) clinical issues--parental rearing behaviour and psychopathology, this book describes the results of a long-term, multinational research project concerning the relationship between the experience of parental rearing attitudes and the development of personality characteristics and specific psychopathological disorders--including alcoholism; eating disorders; depression; schizophrenia; obsessive-compulsive disorder; and suicidal thoughts. The editors have brought together an international team of authors, all of whom are leading authorities in their own fields, from the USA, Europe, China, Japan and Australia, thus enabling them to provide an evaluation of parental rearing attitudes in different cultures. This book appears in The Wiley Series in Clinical Psychology Series Editor: J. Mark G. Williams University College of North Wales, Bangor, UK

Integrating Mental Health Into Primary Care World Health Organization 2008 Presents the justification and advantages of providing mental health services in primary care. Provides advice on how to implement and scale-up primary care for mental health, and describes how a range of health systems have successfully undertaken this transformation. Part 1 provides the context for understanding primary care for mental health within the broader health care system. Part 2 explains how to successfully integrate mental health into primary care and highlights 10 common principles which are central to this effort. It also presents 12 detailed case examples to illustrate how a range of health systems have undertaken this transformation. Annex 1 provides information about the skills and competencies that are required to effectively assess, diagnose, treat, support and refer people with mental disorders.

Where Inner and Outer Worlds Meet Tirril Harris 2006-09-21 The importance of George Brown's sustained contribution to medical sociology through his longitudinal studies of psychiatric disorder and its relationship to social context is widely recognised. This collection of seventeen chapters exemplifies a particular way of working as a medical sociologist which focuses on the understanding of the meaning of social experiences as the key to an individual's health status. It combines the biographical richness of qualitative analysis and thus reach conclusions on the basis of statistical significance. The contributors mainly focus on conditions of depression and anxiety, relating these to the meanings including both demographic aspects such as gender, parity, lifestyle, employment, refugee/immigration status, humiliation, entrapment, loss and also more interpersonal stresses such as neglect, abuse and critical or unsupportive relationships. This is a book which offers a rich treasury of information for all researchers interested in understanding the complex relationship between our inner and outer worlds; it captures the essence of George Brown's unique way of working.

When Victims Become Killers Mahmood Mamdani 2020-01-28 An incisive look at the causes and consequences of the Rwandan genocide "When we captured Kigali, we thought we would face criminals in the state; instead, we faced a criminal population." So a political commissar in the Rwanda Patriotic Front reflected after the 1994 massacre of as many as one million Tutsis in Rwanda. Underlying his statement was the realization that, though ordered by a minority of state functionaries, the slaughter was performed by hundreds of thousands of ordinary citizens, including judges, doctors, priests, and friends. Rejecting easy explanations of the Rwandan genocide as a mysterious evil force that was bizarrely unleashed, *When Victims Become Killers* situates the tragedy in its proper context. Mahmood Mamdani coaxes to the surface the historical, geographical, and political forces that made it possible for so many Hutus to turn so brutally on their neighbors. In so doing, Mamdani usefully broadens understandings of citizenship and political identity in postcolonial Africa and provides a direction for preventing similar future tragedies.

Children's Agency and Development in African Societies Ofose-Kus, Yaw 2017-07-19 This book focuses on African childhood and youth within

the context of development and socialization where children are expected to be moulded in the image of adults. In many African societies children are generally held as passive bearers of the demands of adults, regardless of the fact that they are often exposed to a multitude of challenges that originate from the capriciousness of those adults. However, buoyed by international conventions and national legislations that offer them greater protection, and the ubiquitous internet that exposes them to childhood and youth experiences elsewhere, many of them are increasingly becoming assertive in homes, schools, and communities as well as re-invigorating their survival and self-preservation instincts. It is in this regard that this book, through the various chapters, engages with their competencies, skills and creativity to respond to experiential challenges as independent migrants or ones under coercion working in city streets and markets or cocoa farms or juggling work and schooling in pursuit of some education. Confronted with their parents' and siblings' health predicaments and the inadequacies of state and familial care, or urgent negotiation of their sexualities, they demonstrate incredible resilience. Similarly, their perceptiveness is demonstrated in a unique appreciation of politics and its actors and a capacity to assume responsibilities beyond their chronological age. Thus while highlighting some of the challenges confronting African children, the book provides gripping evidence of how they resiliently negotiate those challenges.

Empathy and Rage Tobe Levin 2009 The intense emotional responses of empathy and rage bracket a spectrum of feelings people confront when they consider the millions of women and girls who have undergone *bolokoli*, *takhoundi*, *tukore ir gudni'in* - names in local languages for a procedure that mutilates female genitalia. Contributors not content with silent acquiescence have shown the courage to oppose a harmful practice that continues to plague women of African descent sentenced to a life of suffering through a damaging tradition.

Growing Up Global Institute of Medicine 2005-06-25 The challenges for young people making the transition to adulthood are greater today than ever before. Globalization, with its power to reach across national boundaries and into the smallest communities, carries with it the transformative power of new markets and new technology. At the same time, globalization brings with it new ideas and lifestyles that can conflict with traditional norms and values. And while the economic benefits are potentially enormous, the actual course of globalization has not been without its critics who charge that, to date, the gains have been very unevenly distributed, generating a new set of problems associated with rising inequality and social polarization. Regardless of how the globalization debate is resolved, it is clear that as broad global forces transform the world in which the next generation will live and work, the choices that today's young people make or others make on their behalf will facilitate or constrain their success as adults. Traditional expectations regarding future employment prospects and life experiences are no longer valid. *Growing Up Global* examines how the transition to adulthood is changing in developing countries, and what the implications of these changes might be for those responsible for designing youth policies and programs, in particular, those affecting adolescent reproductive health. The report sets forth a framework that identifies criteria for successful transitions in the context of contemporary global changes for five key adult roles: adult worker, citizen and community participant, spouse, parent, and household manager.

Urban Girls Gary Barker 2000 The text focuses on the way in which low-cost programmes can help at-risk girls and young women in four difficult circumstances - street living, domestic servitude, sex work and teenage motherhood - improve their lives. It uses the work of the Consortium for Street Children UK as a case study.

West African Youth Challenges and Opportunity Pathways Mora L McLean 2020-10-09 This open-access edited collection, focusing on Ghana and

Nigeria, offers a transatlantic, transnational exploration of barriers that threaten the wellbeing of West African youth-ranging from Black immigrant youth in the American city of Newark, New Jersey, to students in Almajiri Islamic schools in Northern Nigeria. Incorporating themes of migration, vulnerability, and agency and aspirations, the book conveys the resilience of African youth transitioning toward adulthood in a world of structural inequality. It thus crosses the academic divide between Youth Studies and African Studies, while challenging conventional framings of Black youth as deficient and deviant-positing instead their individual and collective creativity and assets. The contributors employ different methodological approaches, including field research and autoethnography, from varying multidisciplinary and practitioner perspectives. Gaining Control Robert Aunger 2015 'Gaining control' tells the story of how human behavioral capacities evolved from those of other animal species. Exploring what is known about the psychological capacities of other groups of animals, the authors reconstruct a fascinating history of our own mental evolution. In the book, the authors see mental evolution as a series of steps in which new mechanisms for controlling behavior develop in different species - starting with early representatives of this kingdom, and leading to a species - us - that can engage in a large number of different types of behavioral control. Key to their argument is the idea that each of these steps -- from reflexes to instincts, drives, emotions, and cognitive planning - can be seen as a novel type of psychological adaptation in which information is 'inherited' by an animal from its own behavior through new forms of learning - a form of major evolutionary transition. Thus the mechanisms that result from these steps in increasingly complex behavioral control can also be seen as the fundamental building blocks of psychology. Such a perspective on behaviour has a number of implications for practitioners in fields ranging from experimental psychology to public health. Short, provocative, and insightful, this book will be of great interest and use to evolutionary psychologists and biologists, anthropologists and the scientific community as a whole.

Life Skills Education for Youth Joan DeJaeghere 2021-11-23 This open access volume critically reviews a diverse body of scholarship and practice that informs the conceptualization, curriculum, teaching and measurement of life skills in education settings around the world. It discusses life skills as they are implemented in schools and non-formal education, providing both qualitative and quantitative evidence of when, with whom, and how life skills do or do not impact young women's and men's lives in various contexts. Specifically, it examines the nature and importance of life skills, and how they are taught. It looks at the synergies and differences between life skills educational programmes and the way in which they promote social and emotional learning, vocational/employment education, and health and sexuality education. Finally, it explores how life skills may be better incorporated into education and how such education can address structures and relations of power to help youth achieve desired future outcomes, and goals set out in the Sustainable Development Goals (SDGs). Life skills education has gained considerable attention by education policymakers, researchers and educators as being the sine qua non for later achievements in life. It is nearly ubiquitous in global and national education policies, including the SDGs, because life skills are regarded as essential for a diverse set of purposes: reducing poverty, achieving gender equality, promoting economic growth, addressing climate change, fostering peace and global citizenship, and creating sustainable and healthy communities. Yet, to achieve these broad goals, questions persist as to which life skills are important, who needs to learn them, how they can be taught, and how they are best measured. This book addresses these questions.

Child Behavioral Health in Sub-Saharan Africa Fred M. Ssewamala 2021-11-22 This book highlights the emerging research and policy development efforts to address child and adolescent behavioral health in Sub-Saharan Africa, where mental health policy is at an early stage and in need of context-specific attention to its successes and shortcomings. A diverse range of researchers, with expertise on relevant policy in both the region as a whole and country-specific contexts, including Ghana, Kenya, Nigeria, Rwanda, South Africa, and Uganda, outline theoretically informed, culturally appropriate, evidence-based, and youth- and family-focused service models. The first work of its kind with an exclusive focus on the understudied region of Sub-Saharan Africa, this text: Provides an overview of the current state of child and adolescent behavioral health in the region Evaluates empirical work on risk and protective factors influencing behavioral outcomes Highlights emerging intervention research and dialogue on what works to improve child and adolescent behavioral health Offers insight and strategies on how to advance child and adolescent behavioral health in policy, research, and practice *Child Behavioral Health in Sub-Saharan Africa: Towards Evidence Generation and Policy Development* is a unique reference that offers guidance for current and future policy-makers, researchers, practitioners, and students as they seek to invest and engage in the healthy development of a future generation.

Domestic Violence and Psychology Paula Nicolson 2010-12-14 This book rethinks the way psychological knowledge of domestic violence has typically been constructed. It puts forward a psychological perspective which is both critical of the traditional 'woman blaming' stance, as well as being at odds with the feminist position that men are wholly to blame for domestic abuse and that violence in intimate relationships is caused by gender-power relations. It is rather argued that to neglect the emotions, experiences and psychological explanations for domestic violence is to fail those who suffer and thwart attempts to prevent future abuse. Paula Nicolson suggests that domestic violence needs to be discussed and understood on several levels: material contexts, including resources such as support networks as well as the physical impact of violence, the discursive, as a social problem or gendered analysis, and the emotional level which can be both conscious and unconscious. Drawing on the work of scholars including Giddens, Foucault, Klein and Winnicott, and using interview and survey data to illustrate its arguments, *Domestic Violence and Psychology* develops a theoretical framework for examining the context, intentions and experiences in the lives of women in abusive relationships, the men who abuse and the children who suffer in the abusive family. As such this book will be of great interest to those studying social and clinical psychology, social work, cultural studies, sociology and women's studies.

Conduct Gospel-Centered Funerals Brian Croft 2014-06-03 Bring Gospel Hope in the Midst of Death The phone rings: "Pastor, can you do my mother's funeral?" Or, "Please help us—our baby just died." Death comes unexpectedly, giving you two to three days of time to prepare a sermon—in

the midst of caring for a grieving family. This helpful book walks a pastor through the logistics of memorial services, burials, and working with funeral homes—using the four P’s: Plan, Prepare, Preach, and Perform. It shows how to magnify Christ and the gospel in the midst of all the details, demands, and sorrow that surrounds the death of a loved one. The Practical Shepherding series of books provides pastors and ministry leaders with advice and practical help to do the work of pastoral ministry in a local church. In *Conduct Gospel-Centered Funerals*, experienced pastors Brian Croft and Phil A. Newton offer readers a concise guide to conducting funerals that glorify God and offer a timely message of hope.

Income, Poverty, and Health Insurance Coverage in the United States (2005) Carmen DeNavas-Walt 2010-02 This report presents data on income, poverty, and health insurance coverage in the U.S. based on information collected in the 2006 and earlier Annual Social and Economic supplements to the Current Population Survey conducted by the U.S. Census Bureau. This report has three main sections -- income, poverty, and health insurance coverage. Each one presents estimates by characteristics such as race, Hispanic origin, nativity, and region. Other topics include earnings of full-time, year-round workers; poverty among families; and health insurance coverage of children. Extensive charts and tables.

Innovations in Global Mental Health Samuel O. Okpaku 2021-11-03 Over the course of the last decade, political and mental entities at large have embraced global mental health: the idea that psychiatric health is vital to improved quality of life. Physicians globally have implemented guidelines recommended by the National Institute of Mental Health (NIMH) in 2007, thereby breaking down barriers to care and improving quality of life in areas where these practices have been implemented. Programs for training and education have expanded as a result. Clinicians benefit more from both local resources in some regions as well as in international collaboration and technological advancements. Even amidst all of these positive outcomes, clinicians still face some stumbling blocks. With worldwide statistics estimating that 450 million people struggle with mental, neuropsychiatric, and neurological disorders—25 percent of the world’s non-communicable disease burden—rising to these challenges prove to be no small feat, even in wealthy Western nations. Various articles and books have been published on global mental health, but few of them thoroughly cover the clinical, research, innovative, and social implications as they pertain to psychiatry; often, only one of these aspects is covered. A comprehensive text that can keep pace with the rapidly evolving literature grows more and more valuable each day as clinicians struggle to piece together the changes around the world that leave open the possibility for improved outcomes in care. This book seeks to boldly rectify this situation by identifying innovative models of service delivery, training, education, research funding, and payment systems that have proven to be exemplary in implementation and scalability or have potential for scalability. Chapters describe specific barriers and challenges, illuminating effective strategies for improved outcomes. This text is the first peer-reviewed resource to gather prestigious physicians in global mental health from around the world and disseminate their expertise in the medical community at large in a format that is updateable, making it a truly cutting-edge resource in a world constantly changed by medical, scientific, and technological advances. *Innovations in Global Mental Health* is the ultimate resource for psychiatrists, psychologists, primary care physicians, hospitalists, policy makers, and all medical professionals at the forefront of global mental health and its implications for the future.

Introduction to Research Methods and Data Analysis in Psychology Darren Langdrige 2009 Introduction to Research Methods and Data Analysis in Psychology 2e presents quantitative and qualitative research methods and the most widely used techniques for collecting and analysing data. It provides clear and accessible coverage to equip the reader with an understanding of the research process and the practical skills they need to collect and analyse data. This second edition has been thoroughly revised and updated to include a number of new chapters and additional topics such as e-research, mixed methods, and R (a statistical software package). Detailed information is provided on experimental design and statistical analysis by hand and using SPSS v. 16.0. Expanded coverage of a range of areas including literature reviewing, the statistical techniques of ANOVA and MANOVA, and psychometrics is also provided. The text assumes that the reader has no previous knowledge of research methods or psychology and is therefore essential reading for undergraduate psychology students plus highly recommended for students on other social and health science courses.

Different Sexual Decision Making And Aids In Africa Muthoni A Mathai eBook Formats Explained

1. EPUB (Electronic Publication):

EPUB is one of the most common eBook formats, known for its versatility and compatibility across a wide range of eReaders and devices.

Features include reflowable text, adjustable font sizes, and support for images and multimedia.

EPUB3, an updated version, offers enhanced interactivity and multimedia support.

2. MOBI (Mobipocket):

MOBI was originally developed for Mobipocket Reader but is also supported by Amazon Kindle devices.

It features a proprietary format and may have limitations compared to EPUB, such as fewer font options.

3. PDF (Portable Document Format):

PDFs are a popular format for eBooks, known for their fixed layout, preserving the book's original design and formatting.

While great for textbooks and graphic-heavy books, PDFs may not be as adaptable to various screen sizes.

4. AZW/AZW3 (Amazon Kindle):

These formats are exclusive to Amazon Kindle devices and apps.

AZW3, also known as KF8, is an enhanced version that supports advanced formatting and features.

5. HTML (Hypertext Markup Language):

HTML eBooks are essentially web pages formatted for reading.

They offer interactivity, multimedia support, and the ability to access online content, making them suitable for textbooks and reference materials.

6. TXT (Plain Text):

Plain text eBooks are the simplest format, containing only unformatted text.

They are highly compatible but lack advanced formatting features.

Choosing the right Sexual Decision Making And Aids In Africa Muthoni A Mathai eBook format is crucial for a seamless reading experience on your device. Here's a quick guide to format compatibility with popular eReaders:

EPUB: Compatible with most eReaders, except for some Amazon Kindle devices. Also suitable for reading on smartphones and tablets using dedicated apps.

MOBI: Primarily compatible with Amazon Kindle devices and apps.

PDF: Readable on almost all devices, but may require zooming and scrolling on smaller screens.

AZW/AZW3: Exclusive to Amazon Kindle devices and apps.

HTML: Requires a web browser or specialized eBook reader with HTML support.

TXT: Universally compatible with nearly all eReaders and devices.
