Perfumes Luca Turin 2010-08-06 'I've long wished perfumery to be taken seriously as an art, and for scent critics to be as fierce as opera critics, and for the wearers of certain "fragrances" to be hissed in public, while others are cheered. This year has brought *Perfumes: The Guide* by Luca Turin and Tania Sanchez, which I breathed in, rather than read, in one delighted gulp.' Hilary Mantel, *Guardian* *Perfumes: The Guide* is the culmination of Turin's lifelong obsession and rare scientific flair and Sanchez's stylish and devoted blogging about every scent that she's ever loved and loathed. Together they make a fine and utterly persuasive argument for the unrecognised craft of perfume-making. Perfume writing has certainly never been this honest, compelling or downright entertaining.

Midsummer Moon Laura Kinsale 2014-04-01 A duke's well-ordered world is turned upside down when a female inventor sends his heart soaring in this Regency romance by a New York Times-bestselling author. Merlin Lambourne has invented the "speaking box"—a sort of telephone—which is so valuable that Napoleon has killed for it. Sent by the crown to bring both inventor and invention to safety, Ransom Falconer, Duke of Damerell, is shocked to learn Mr. Lambourne is a Miss. Perhaps more shocking, however, are his feelings for the eccentric genius. She is everything he doesn't like: incapable of following orders, unaware of conventional etiquette, preoccupied, disorganized, and unkempt. Yet she beguiles him. One of the most ingenious inventors in England, she is also one of the country's greatest hopes in the defense against the power mad Napoleon Bonaparte. Now, if he could just get her mind out of the clouds and convince her to marry him . . . Merlin is not absentminded, it's just that she only seems to be able to pay attention to one thing at a time. And maybe she does take everything people say literally, but people ought to say what they mean. Now this Ransom Falconer wants her to forget her current interest in flying machines and focus on the speaking box she's lost interest in finishing. It's quite disconcerting. In fact, everything about him is disconcerting; in her isolated life Merlin has never met anyone who affects her quite like Ransom does. With her trademark blend of heartwarming characters and a hilarious conflict, *Midsummer Moon* is yet another winner from the author of *Flowers from the Storm*, praised by Lisa Kleypas as "the gold standard in historical romance."

Sex Addiction as Affect Dysregulation: A Neurobiologically Informed Holistic Treatment (Norton Series on Interpersonal Neurobiology) Alexandra Katehakis 2016-09-20 Examining the neurobiological underpinnings of sex addiction. Neuroaffective science—studying the integrated development of the body, brain, and mind—has revealed mechanisms linking psychological and biological factors of mental disorders, including addiction. Indeed, its paradigm-shifting theoretical umbrella demonstrated that substance and behavioral dependencies share identical neurobiological workings, and thus that problematic repetitive behaviors are genuine addictions—a state increasingly understood as a chronic brain disorder. Clinical experience strongly suggests that sex addiction (SA) treatment informed by affective neuroscience—the specialty of Alexandra Katehakis—proves profoundly transformative. Katehakis's relational protocol, presented here, blends neurobiology with psychology to accomplish full recovery. Her Psychobiological Approach to Sex Addiction Treatment (PASAT) joins therapist and patient through a relationally-based psychotherapy—a holistic, dyadic dance that calls on the body, brain, and mind of both. Written with clarity and compassion, this book integrates cutting-edge research, case studies, verbatim session records, and patient writings and art. Katehakis explicates neurophysiological, psychological, and cultural forces priming and maintaining SA, then details how her innovative treatment restores patients' interpersonal, sexual, and spiritual relationality.

Stardust Dads Josephine C. George 2008-10-17 The e-mail Danny and Allison read on their new computer in 1996 looks no different from the millions of others received by Web users around the world, with one glaring exception—it was sent by their dads who died during the 1970s. After carefully implementing a plan to send their son and daughter a gift of knowledge that could enrich their lives forever, the dads' brief contact is cut short. They are banished to another destination in the afterworld, but not before they impart indisputable proof of life after death—and unwittingly put Danny's and Allison's earthbound lives on the line.

The Politics of Consumption Alan Bradshaw 2013-05 This age of austerity comes on the back of a lengthened period of apparently rampant consumer excess: that was a party for which we are all now having to pay. A spectacular period of unsustainably funded over-indulgence, it seems, has now given rise to a sobering period of barely fundable mere-subsistence. Consumption, narrated along such lines, is a sin which has to be paid for. Beyond the deceptive theology of consumption, however, lies actual politics. In May 2012, we hosted a conference at Dublin's Royal Society of the Antiquaries of Ireland in order to analyse and debate the politics of consumption. This special issue is the outcome of the discussions which took place during that event. It features conceptual and empirical investigations into the politics of consumption, a head-to-head debate on the idea of consumer citizenship, a series of notes on the relationship between art, politics, and consumption, and reviews of two recent books. Taken together, these diverse pieces underline the need for a politically-oriented analysis of consumption, not only for the sake of informing academic debates but also for the sake of informing contemporary consumption practices. Consumption, we argue, is political: to approach it otherwise is to dogmatically seek refuge in a world of fantasy. Issue editors: Alan Bradshaw, Norah Campbell and Stephen Dunne. Contributors: Ben Fine, Kate Soper, Peter Armstrong, Matthias Zick Varul, Eleftheria Lekakis, Isleide Fontenelle, Adam Arvidsson, Detlev Zwick, Olga Kravets, Stevphen Shukaitis, David Mabb, Antigoni Memou, Femke Kaulingfreks, Ruud Kaulingfreks, Andreas Chatzidakis, Georgios Patsiaouras, Gavin Brown and Angus Cameron.

The Future of Technology Tom Standage 2005-08-01 From the industrial revolution to the railway age, through the era of electrification, the advent of mass production, and finally to the information age, the same pattern keeps repeating itself. An exciting, vibrant phase of innovation and financial speculation is followed by a crash, after which begins a longer, more stately period during which the technology is actually deployed properly. This collection of surveys and articles from *The Economist* examines how far technology has come and where it is heading. Part one looks at topics such as the "greying" (maturing) of IT, the growing importance of security, the rise of outsourcing, and the challenge of complexity, all of which have more to do with implementation than innovation. Part two looks at the shift from corporate computing towards consumer technology, whereby new technologies now appear first in consumer gadgets such as mobile phones. Topics covered will include the emergence of the mobile phone as the "digital Swiss Army knife"; the rise of digital cameras, which now outsell film-based ones; the growing size and importance of the games industry and its ever-closer links with other more traditional parts of the entertainment industry; and the social impact of technologies such as text messaging, Wi-Fi, and camera phones. Part three considers which technology will lead the next great phase of technological disruption and focuses on biotechnology, energy technology, and nanotechnology.

The Dream Machine M. Mitchell Waldrop 2018-09-25 At a time when computers were a short step removed from mechanical data processors, Licklider was writing treatises on "human-computer symbiosis," "computers as communication devices," and a now not-so-unfamiliar "Intergalactic Network." His ideas became so influential, his passion so contagious, that Waldrop coined him "computing's Johnny Appleseed." In a simultaneously compelling personal narrative and comprehensive historical exposition, Waldrop tells the story of the man who not only instigated the work that led to the internet, but also shifted our understanding of what computers were and could be.

Victoria: The Queen Julia Baird 2016-11-22 NAMED ONE OF THE BEST BOOKS OF THE YEAR BY JANET MASLIN, THE NEW YORK TIMES 'Victoria the Queen, Julia Baird's exquisitely wrought and meticulously researched biography, brushes the dusty myth off this extraordinary monarch' The New York Times Book Review (Editor's Choice). The true story for fans of the hit ITV drama series Victoria starring Jenna Coleman, this page-turning biography reveals the real woman behind the myth: a bold, glamorous, unbreakable queen. Drawing on previously unpublished papers, this stunning book is a story of love and heartbreak, of devotion and grief, of strength and resilience. When Victoria was born, in 1819, the world was a very different place. Revolution would begin to threaten many of Europe's monarchies in the coming decades. In Britain, a generation of royals had indulged their whims at the public's expense, and republican sentiment was growing. The Industrial Revolution was transforming the landscape, and the British Empire was commanding ever larger parts of the globe. Born into a world where woman were often powerless, during a century roiling

with change, Victoria went on to rule the most powerful country on earth with a decisive hand. Fifth in line to the throne at the time of her birth, Victoria was an ordinary woman thrust into an extraordinary role. As a girl, she defied her mother's meddling and an adviser's bullying, forging an iron will of her own. As a teenage queen, she eagerly grasped the crown and relished the freedom it brought her. At twenty years old, she fell passionately in love with Prince Albert of Saxe-Coburg and Gotha, eventually giving birth to nine children. She loved sex and delighted in power. She was outspoken with her ministers, overstepping boundaries and asserting her opinions. After the death of her adored Albert, she began a controversial, intimate relationship with her servant John Brown. She survived eight assassination attempts over the course of her lifetime. And as science, technology, and democracy were dramatically reshaping the world, Victoria was a symbol of steadfastness and security-queen of a quarter of the world's population at the height of the British Empire's reach. Drawing on sources that include revelations about Victoria's relationship with John Brown, Julia Baird brings vividly to life the fascinating story of a woman who struggled with so many of the things we do today: balancing work and family, raising children, navigating marital strife, losing parents, combating anxiety and self-doubt, finding an identity, searching for meaning. This sweeping, page-turning biography gives us the real woman behind the myth.

The Signal and the Noise Nate Silver 2015-02-03 UPDATED FOR 2020 WITH A NEW PREFACE BY NATE SILVER "One of the more momentous books of the decade." —The New York Times Book Review Nate Silver built an innovative system for predicting baseball performance, predicted the 2008 election within a hair's breadth, and became a national sensation as a blogger—all by the time he was thirty. He solidified his standing as the nation's foremost political forecaster with his near perfect prediction of the 2012 election. Silver is the founder and editor in chief of the website FiveThirtyEight. Drawing on his own groundbreaking work, Silver examines the world of prediction, investigating how we can distinguish a true signal from a universe of noisy data. Most predictions fail, often at great cost to society, because most of us have a poor understanding of probability and uncertainty. Both experts and laypeople mistake more confident predictions for more accurate ones. But overconfidence is often the reason for failure. If our appreciation of uncertainty improves, our predictions can get better too. This is the "prediction paradox": The more humility we have about our ability to make predictions, the more successful we can be in planning for the future. In keeping with his own aim to seek truth from data, Silver visits the most successful forecasters in a range of areas, from hurricanes to baseball to global pandemics, from the poker table to the stock market, from Capitol Hill to the NBA. He explains and evaluates how these forecasters think and what bonds they share. What lies behind their success? Are they good—or just lucky? What patterns have they unraveled? And are their forecasts really right? He explores unanticipated commonalities and

exposes unexpected juxtapositions. And sometimes, it is not so much how good a prediction is in an absolute sense that matters but how good it is relative to the competition. In other cases, prediction is still a very rudimentary—and dangerous—science. Silver observes that the most accurate forecasters tend to have a superior command of probability, and they tend to be both humble and hardworking. They distinguish the predictable from the unpredictable, and they notice a thousand little details that lead them closer to the truth. Because of their appreciation of probability, they can distinguish the signal from the noise. With everything from the health of the global economy to our ability to fight terrorism dependent on the quality of our predictions, Nate Silver's insights are an essential read.

My Sweet Folly Laura Kinsale 2014-04-01 An innocent long-distance correspondence leads to complications in this Regency romance by the New York Times–bestselling author of *For My Lady's Heart*. Married to an elderly man, Folie Hamilton finds her lonely days brightened by light-hearted letters from her husband's cousin, Lt. Robert Cambourne, stationed in Calcutta for the British East India Company. Robert calls her his princess, and she dubs him her knight errant. Four years later, Robert summons Folie and her stepdaughter to his estate in England. The girl is his ward, so they must go. The man who greets them, however, is nothing like the charming lieutenant of his letters. This Robert is demented. Screaming at ghosts in demonic rage, he is paranoid and frightening. Someone is poisoning him, spinning his brain into madness, of that Robert is sure, but who—and why? Haunted by his dead wife, the one thing his tortured mind understands is that he must keep Folie safe. Folie, with her beautiful expressive eyes, the only warmth in his nightmare world . . .
