By applying techniques from computational geometry and CAGD, new results are developed in four stages of the construction process: (a) the gamma-neighborhood graph for describing the structure of a set of points; (b) an algorithm for constructing a polygonal or polyhedral boundary (based on (a)); (c) the flintstone scheme as a hierarchy for polygonal and polyhedral approximation and localization; (d) and a Bezier-triangle based scheme for the construction of a smooth piecewise cubic boundary.

Dialectical Approaches to Studying Personal Relationships Barbara M. Montgomery 2013-09-13 This book describes many different and useful ways of understanding personal relationships from a dialectical perspective. It is written for scholars in higher education, both faculty and students, across many fields within the social sciences and the humanities who seek answers to questions about how people relate to one another. The book is valuable for all scholars who pursue new ideas because it models a form of scholarly communication in which: * multiple voices can be acknowledged as valid; * the worth of one perspective is not measured by the denigration of another; and * difference is celebrated as conducive to learning rather than threatening to it. The contributors emphasize the characteristics of their dialectical view that set them apart from other dialectical authors and describe their methods of studying relationships from a dialectical perspective. Following the Bakhtinian perspective, they honor the values of dialogism

by respecting different and sometimes contradictory views, assuming that these views can be valid, and joining in a discussion with the editors and other contributors about their emerging work. They also acknowledge that the chapters in this text are part of an ongoing process to frame and reframe emerging ideas, and allow the dialogue that occurs within this frame the freedom to express creative, unique ideas.

The Management of Complex Projects Stephen Pryke 2006-11-17 Value is added to projects through the relationships surrounding the client; the focus of this book is therefore the client as project, rather than the building on the ground. It shows how to create and maintain effective relationships between the client and the project team, as well as intra-coalition relationships. Students, academics and practitioners need to understand the changing nature of reforms from successive calls for change by the industry's various clients and client groups. Project team network relationships are a function of mindsets, behaviour and competencies of individuals and The Management of Complex Projects: a relationship approach: * Explores the relationship at the project interface: client-design team-contractor, stakeholders and supply chain relations * Examines different concepts to the development and management of relationships; formation and maintenance issues * Highlights some of the key issues that require development, both academically and through applied research. Most project management books cover tools and techniques; this one covers the softer skills and shows how crucial good relationships are to the successful management of projects.

“Doing things together” Therése Bielsten 2020-03-13 Background: Most people with dementia live in their own homes, often together with their partners, who become informal caregivers.

Relationship quality and sense of couplehood can be threatened as a result of the transition from a mutually interdependent relationship to a caregiver-care-receiver relationship. This, in turn, may lead to many negative consequences for both partners. Support provided for couples is often divided into different types for the person with dementia and for the partner without dementia and lacks couple-based support that targets the relationship, resources and the couple’s everyday life together. Aim: The overall aim of this thesis is to explore couple-centred interventions in dementia and to develop and test a salutogenic, resource-oriented and couple-based intervention among couples in which one partner has dementia living at home. Methods and findings: This thesis comprises three parts: The first part Exploring involves two linked reviews, one narrative review

legacy.opendemocracy.net on 2021-02-14

(study I A) and one scoping review (study I B) that aim to identify and describe what previous couple-centred interventions comprised and why they were conducted. The results of the reviews revealed a knowledge gap in and a need for easily accessible support that targets couple relationships, resources and everyday life. The second part Developing (study II) refers to the development of an easily accessible resource-oriented couple-management intervention. The first step was to identify priority topics for such an intervention through a co-researcher process with couples living with dementia. This included a comprehensive literature review, interviews with couples in which one partner has dementia, and consultation meetings with expert groups of people with dementia and partners in both Sweden and the UK. The co-researcher process and the expert meetings informed four main themes with corresponding sub-themes that couples with dementia considered as important to their wellbeing in their everyday lives: (1) Home and Neighbourhood, (2) Meaningful Activities and Relationships, (3) Approach and Empowerment, and (4) Couplehood. The themes were further developed and integrated into the multimedia application DemPower, which was developed for the delivery of the intervention. The third part Testing and Evaluating describes a feasibility study (study III) in which the DemPower application was tested for feasibility and acceptability among couples in Sweden and the UK. The results of the feasibility study indicated that the DemPower intervention was feasible and acceptable among couples in which one partner has dementia living at home. The testing and evaluating part also comprise a qualitative study (study IV) that explores the experiences of engaging with DemPower together as a couple living with dementia in Sweden. The findings resulted in the three themes: (1) Growth of the relationship, (2) We are not alone, and (3) Positive approach, which the couples appreciated and associated with the resource-oriented and salutogenic approach of DemPower. The overall findings of the thesis are presented in

a concluding synthesis at the end of the thesis. The concluding synthesis, focused on “Meaningfulness”, “Empowering health promotion”, “Normalization” and “Transitions and couplehood”, represents the core findings of this thesis. What this thesis adds: This thesis contributes to research, healthcare and the public by highlighting the need for a salutogenic approach toward couples living with dementia. The DemPower application, with its focus on couples’ relationships, resource-orientation and everyday life, has proven feasibility and acceptability and has meaningfully addressed a gap in the literature and in practice. As researchers, healthcare professionals and the public, we need to support couples where one partner has dementia to continue to live as normal life as possible. This can best be achieved by focusing on what couples can do, by inclusion and by valuing them as the experts within dementia research and of their life experiences. Bakgrund: Majoriteten av personer med demens bor i sitt eget hem och ofta tillsammans med sin partner som blir en informell vårdgivare. Relationens kvalitet och känsla av parskap hotas ofta till följd av övergången från en ömsesidig beroenderelation till en vårdgivare-vårdtagare-relation allt eftersom demenssjukdomen fortskrider. Detta kan innebära många negativa konsekvenser. Stöd för par där ena partnern har demens delas ofta upp i olika former för personen med demens och för partnern utan demens, vilket innebär att det saknas parbaserat resursorienterat stöd med inriktning på att främja parrelationen och parets vardagliga liv. Syfte: Syftet med denna avhandling är att utforska parcentrerade interventioner inom demens och att utveckla och testa ett parbaserat, salutogent och resursorienterat stöd för par där ena partnern har en demenssjukdom och som bor tillsammans i det egna hemmet. Metoder och fynd: Denna avhandling består av tre delar. Den första delen att utforska inkluderar två länkade litteraturöversikter, en narrativ översikt och en kartläggande översikt (studie I) som beskriver

tidigare interventioner för par som lever med demens och varför de genomförts. Resultaten av översikterna visade ett kunskapsgap i, och ett behov av lättillgängligt stöd som riktar sig till parförhållanden, parens resurser och att främja det vardagliga livet. Den andra delen, att skapa (studie II) involverar utvecklingen av ett lättillgängligt resursorienterat och parbaserat stöd. Det första steget var att identifiera prioriterade ämnen för en sådan intervention tillsammans med par som lever med demens, genom en så kallad medforskarprocess. Detta inkluderade en omfattande litteraturgenomgång, intervjuer med par där ena partnern har demens, och konsultationsmöten med expertgrupper bestående av personer med demens och partners i Sverige och i Storbritannien. Medforskarprocessen och expertmötena resulterade i fyra huvudteman med motsvarande underteman vilka par med demens ansåg vara viktiga för deras relation och för välbefinnande i vardagen: (1) Hem och grannskap, (2) Meningsfulla aktiviteter och relationer, (3) Förhållningssätt och empowerment och (4) Parskap. Dessa teman vidareutvecklades och integrerades i multimedia-applikationen DemPower, som utvecklades i syfte att erbjuda interventionen till par som lever med demens. Den tredje delen att testa och att utvärdera beskriver genomförbarhetsstudien (studie III) där applikationen DemPower testades med avseende på genomförbarhet och acceptabilitet hos par där en partner har demens i Sverige och i Storbritannien. Resultaten av studien visade att DemPower-interventionen var genomförbar och acceptabel bland par där ena partnern har demens. Denna delen av avhandlingen inkluderar även en kvalitativ studie (studie IV) som undersökte parens erfarenheter av att testa DemPower tillsammans som ett par. De samlade upplevelserna resulterade i tre teman: (1) Utveckling av parrelationen, (2) Vi är inte ensamma och (3) Positivt förhållningssätt. De övergripande resultaten från avhandlingen presenteras även i en konkluderande syntes i slutet av avhandlingen. Den konkluderande syntesen med fokus på Meningsfullhet, Empowerment,

Normalisering och Parskap representerar kärnan i denna avhandling. Avhandlingens slutsatser och kunskapsbidrag: DemPower-applikationen med fokus på parförhållanden, hälsofrämjande resurser och vardagen har bidragit med ett stöd som vilar på en genuin parbaserad grund tillämpad i det vardagliga livet för par som lever med demens. Denna avhandling bidrar även med kunskap till forskning, vård och allmänheten genom att lyfta fram ett salutogent förhållningssätt till par som lever med demens. Som forskare, vårdpersonal och allmänhet bör vi stödja par där ena partnern har demens för att de ska kunna fortsätta leva ett så normalt liv som möjligt. Detta kan bäst uppnås genom att fokusera på parens resurser, genom inkludering och genom att värdera dem som experter inom demensforskning och i deras livserfarenheter.

Marketing Management Svend Hollensen 2003 *Marketing Management: A Relationship Approach* takes the unique approach of linking relationship marketing to the traditional market planning models, which are used by most marketers today. The importance of the firm, not only to have good relationships with their customers but also with the other actors in the value net, such as suppliers, competitors, supplementors and the firms own personnel, and how this, in turn, will develop the firm's competitive advantage, is paramount. This "new" holistic approach to the marketing planning process is illustrated throughout the book with real company examples.

Positive Approaches to Optimal Relationship Development C. Raymond Knee 2016-04-08 How can we get the most out of our close relationships? Research in the area of personal relationships continues to grow, but most prior work has emphasized how to overcome negative aspects. This volume demonstrates that a good relationship is more than simply the absence of a bad relationship, and that establishing and maintaining optimal relationships entails enacting a set of processes that are distinct from merely avoiding negative or harmful behaviors. Drawing on recent relationship science to explore issues such as intimacy, attachment, passion, sacrifice, and compassionate goals, the essays in this volume emphasize the positive features that allow relationships to flourish. In doing so, they integrate several theoretical perspectives, concepts, and mechanisms that produce optimal relationships. The volume also includes a section on intensive and abbreviated interventions that have been empirically validated to be effective in promoting the positive features of close relationships.

and throughout all American walks of life. The divorce rate has been declining over the past ten years, but only because there are fewer marriages. People are insecure and tentative when it comes to long-term relationships and marriage commitment. There are fewer and fewer examples of healthy relationships and truly happy marriages. Dr. Grimes speaks straightforward with biblical truths he has mined over thirty years of ministry and relationship counseling. If you're looking for a romantically inspired approach--this isn't it. But if you are tired of romanticized dead ends, you are ready for his practical and solution-oriented approach to making relationships last. Relationships matter to Dr. Guy, who has pastored churches and college campuses for thirty years. He is the president of the Relationship Warehouse Inc. His own experience with divorce as a child, combined with his MA in Marriage and Family Therapy, and years of pastoral care have given him great insight to the shortfalls of relationships in today's divorce culture. As a divorce prevention advocate through Marriage Savers as well as professional consulting for divorce documentaries, Guy has written these simple principles that if applied--as an adult, child, roommate, date, parent, spouse, or boss--will help relationships become more healthy and longer lasting.

Change Processes in Relationships Alan Fogel 2006-05-25 Just as each person develops from infancy to adulthood, all interpersonal relationships have a life history that encompasses the changes in how people communicate with each other. This book is about how a relationship transforms itself from one pattern of communication to another. The authors present a unique research method called 'relational-historical research', based on advances in dynamic systems theory in developmental psychology, and qualitative methods in life history research. It rests on three premises: that the developing relationship (not the individual) is the unit of analysis; that change emerges from, but is not entirely constrained by, the patterns of the past; and that the

developmental process is best revealed by making frequent observations within a particular case before, during, and after a key developmental transition. Looking specifically at the mother-infant relationship, this is a compelling piece of research that will appeal to an international audience of intellectuals and practitioners.

Counselling Couples in Relationships Christopher Butler 1998-02-04 RELATE (originally the National Marriage Guidance Council) is probably the largest and most successful service of its kind in the world. For over 50 years, helping many hundreds of thousands of couples and individuals, it has developed an approach to couple counselling that is based on acknowledgment of the uniqueness of individual clients and their relationships, a respect for their autonomy and cultural differences, and a commitment to counselling with empathy, genuineness and warmth. The authors of this book are excellently qualified to provide this unique account of the RELATE Approach in action: both were trained by RELATE, both have very substantial counselling experience, and both have supervised the work of other RELATE counsellors for several years. The ever-changing characteristics of relationships and family life are fully recognised in the RELATE Approach, which helps clients to find their solutions to difficulties of family life, transitions, separation, divorce, sexuality, gender and identity, by helping them to find meanings in the patterns of their relationships, and to make sense of emotions, thoughts and actions in themselves and their partner. This book is designed to enrich and stimulate the work of counsellors working within a wide range of counselling models and traditions. This is not a prescriptive manual but rather an informed guide to the RELATE Approach, which includes many illustrative examples and (invented) case studies. The RELATE Approach still depends upon the counsellor's repertoire of counselling skills, but offers a three-stage counselling model (exploration, understanding, action) made operational within the

format of brief, time-limited therapy. "The counsellors with RELATE and its predecessor, the Marriage Guidance movement, were the founders of counselling as we know it today. The approaches to counselling which they have developed have wide application. Butler and Joyce write very well and I found this book clear and full of good ideas for clinical practice. I can confidently recommend the book to all who care for couples in relationships." C. Murray Parkes OBE, MD, FRCPsych "A useful introduction to RELATE's three-stage model of couple counselling and some of the concepts on which it is based." Do you have poor communication, too much conflict, or want a more deeply connected love relationship? If so, read this book! Marriages stuck in entrenched negative patterns have been revitalized; others on the brink of divorce have been saved. In this book which challenges society's beliefs about romantic love and marriage, you'll be given new tools and skills for creating breakthroughs in your relationship for deeper love-less conflict!

Maintaining Long-Distance and Cross-Residential Relationships Laura Stafford 2004-12-13

This thought-provoking volume offers an innovative and intriguing approach to the study of long-distance relationships. Author Laura Stafford examines romantic long-distance relationships and then expands the conception of long-distance relationships to include other relational types. She

summarizes literature across the social sciences on various types of long-distance relationships and extracts themes and patterns across the relational types. In so doing, she reconsiders approaches to and offers an expanded vision of relational maintenance. By expanding her scope beyond romantic relationships, Stafford includes those that span residences and relational types, such as noncustodial parent-child and geographically and residentially separated adult children and parents. She contends that face-to-face interaction is not necessary to maintain healthy relationships, and questions the assumption that maintaining, rather than terminating, a particular relationship is always best for the involved parties. With its interdisciplinary approach to challenging commonly held assumptions about communication and close relationships, *Maintaining Long-Distance and Cross-Residential Relationships* will be engaging reading for scholars in communication, psychology, sociology, mass communication, and family studies. It is also appropriate for special topics graduate courses on long-distance relationships and human communication, and will serve as a unique supplemental text for upper-level undergraduate and graduate students in interpersonal, relational, and family communication and family studies.

Handbook of Marital Therapy: A Positive Approach to Helping Troubled Relationships

partners. Many therapists, focusing on communication skills, have felt that behaviorists were too structured and uncaring; on the other hand, behaviorists have considered humanistic therapists as being "touchy-feely," vague, and unfocused. However, in the Handbook of Marital Therapy, Liberman, Wheeler, de Visser, and the Kuehnelns have wedded these two potent approaches into an integrated framework that makes them loving bed partners. With over a decade of experience in applying behaviorally oriented treatment to couples, Liberman and his co-authors have developed an educational model that focuses on teaching specific communication skills to couples. The communication skills they describe have been used extensively in all types of marital therapy, regardless of the therapist's theoretical orientation. The unique contribution of this book is that the authors provide a step-by-step approach to teaching these communication skills within a behavioral framework. Each chapter guides the therapist through the many issues and problems confronting him or her as a change agent. This highly readable book is enhanced by a liberal use of case examples. Emphasis is given to homework and structured sessions that focus on increasing specific communication skills in a sequential manner. The advantages of working with couples in a group setting are discussed, and concrete suggestions on how to manage these groups are clearly presented.

world where 'systems change' is often invoked as the rallying call for purposeful alternative action, this book provides a toolkit to help constructively make systems that can change situations for the better. Systems Approaches offers an excellent introduction for those seeking to understand systems thinking and to enact systems thinking in practice. The book helps practitioners from all professions to better understand inter-relationships, engage with multiple perspectives, and reflect on boundary judgements that can inhibit or enhance improved purposeful change. After an editorial introduction to these systems thinking in practice capabilities, successive chapters illustrate five systems approaches, each chosen for having a rigorous though adaptable framework, and a robust long pedigree of application in complex situations. Each chapter illustrates what the approach is about, followed by invaluable tips and insights from experience regarding how the tools might be practiced. Amongst updates from originating authors for this 2nd edition, each approach has an accompanying postscript on some developments since the 1st edition.

New Approaches in History and Theology to Same-Sex Love and Desire Mark D. Chapman

2018-02-15 This book offers a range of interdisciplinary evaluations of the history of same-sex relationships in the Church as they have been understood in different periods and contexts. The relationships between diverse forms of religious and sexual identities have been widely contested in the media since the rise of the lesbian and gay liberation movement in the 1970s. One of the key images that often appears in public debate is that of 'lesbians and gays in the Church' as a significant 'problem'. Research over the past forty years or so into queer theology and the history of same-sex desire has shown that such issues have played an important role in the story of Christianity over many centuries. The contributors to this volume have all been inspired by the challenges of such revisionist study to explore religion and same-sex desire as a field of opportunity for investigation and debate. They uncover some of the hidden histories of the Church and its theologies: they tell sometimes unexpected stories, many of which invite serious further study. It is quite clear through history that some in the churches have been at the vanguard of legislative and social change. Similarly, some churches have offered safe queer spaces. Overall, these essays offer new interpretations and original research into the history of sexuality that helps inform the contemporary debate in the churches as well as in the academy.

dysfunctional or just with the wrong partner—they can also be a source of frustration, pain, and unhappiness. Relationships are our great teachers. In his work with countless couples and individuals, he inspires his patients to ask the big questions, in an attempt to get them to understand all the factors that influence the formation and health of their relationships. When you understand what's really happening, you are in a position to make healthy choices that work and create changes for the better in your life. The key to creating the relationship you want can be found by asking three fundamental questions: • Who am I? • Where am I going? • Who is going with me? As always, to find the right answers, you need to ask the right questions.
